

Capital Punishment, 2011 – Statistical Tables

Tracy L. Snell, *BJS Statistician*

At yearend 2011, 35 states and the Federal Bureau of Prisons held 3,082 inmates under sentence of death, which was 57 fewer than at yearend 2010 (figure 1). This represents the eleventh consecutive year in which the number of inmates under sentence of death decreased.

Four states (California, Florida, Texas, and Pennsylvania) held more than half of all inmates on death row on December 31, 2011. The Federal Bureau of Prisons held 56 inmates under sentence of death at yearend.

Of prisoners under sentence of death at yearend, 55% were white and 42% were black. The 387 Hispanic inmates under sentence of death accounted for 14% of inmates with a known ethnicity. Ninety-eight percent of inmates under sentence of death were male, and 2% were female. The race and sex of inmates under sentence of death has remained relatively unchanged since 2000.

Among inmates for whom legal status at the time of the capital offense was available, 40% had an active criminal justice status. Less than half of these inmates were on parole, about a quarter were on probation, and the remaining inmates had charges pending, were incarcerated, had escaped from incarceration, or had some other criminal justice status.

Criminal history patterns of death row inmates differed by race and Hispanic origin. More black inmates had a prior felony conviction (72%), compared to Hispanic (64%) or white (62%) inmates. Similar percentages of white (9%), black (8%), and Hispanic (6%) inmates had a prior homicide conviction. A slightly higher percentage of Hispanic (31%) and black (30%) inmates were on probation or parole at the time of their capital offense, compared to 23% of white inmates.

In 2011, 18 states reported that 80 inmates were received under sentence of death. Admissions in Florida (14), California (10), Texas (8), and Arizona (8) accounted for half of those sentenced to death in 2011.

Twenty-four states and the Federal Bureau of Prisons removed 137 inmates from under sentence of death: 43 were executed, 24 died by means other than execution, and 70 were removed as a result of commutations or courts overturning sentences or convictions. Removals in Texas (16), Illinois (15), and Alabama (14), accounted for nearly a third of all inmates removed from under sentence of death in 2011. Illinois removed all 15 inmates under sentence of death when the governor granted commutations upon signing a law to repeal the death penalty in that state.

Thirteen states executed 43 inmates in 2011, compared to 46 inmates in 2010. The inmates executed in 2011 had been under sentence of death an average of 16.5 years, which was 20 months longer than those executed in 2010.

Among the 36 jurisdictions with prisoners under sentence of death on December 31, 2011, 7 jurisdictions had more inmates than a year earlier, 15 had fewer inmates, and 15 had the same number. California showed the largest increase (up 5 inmates). The largest decreases in the population of inmates under sentence of death were in Ohio and Texas (down 8 each), followed by Pennsylvania and Oklahoma (down 7 each), and Alabama (down 5).

The U.S. Supreme Court reinstated the death penalty in 1976 (see *Gregg v. Georgia*, 427 U.S. 153 (1976) and its companion cases). From 1976 to 2000, the number of inmates under sentence of death in the U.S. steadily increased until it peaked at 3,601 inmates on December 31, 2000 (figure 2). In 2001, the number of inmates removed from under sentence of death was higher than the number admitted for the first time since 1976 (figure 3). The number of annual removals of those under sentence of death has continued to outpace admissions since 2001. The 80 inmates received under sentence of death in 2011 was a 27% decrease from the number received in 2010 (109). The number of inmates received in 2011 represented the smallest number of admissions to death row since 1973 when 44 persons were admitted.

Of the 7,958 people under sentence of death between 1977 and 2011, 16% had been executed, 6% died by causes other than execution, and 40% received other dispositions.¹ The federal government began collecting annual execution statistics in 1930. Between 1930 and 2011, a total of 5,136 inmates were executed under civil authority (figure 4).² After the Supreme Court reinstated death penalty statutes in 1976, 35 states and the federal government executed 1,277 inmates.

¹Following the U.S. Supreme Court's 1976 approval of revised statutes in some states (*Gregg v. Georgia*), executions of inmates resumed in 1977.

²Military authorities carried out an additional 160 executions between 1930 and 1961 which are not included in this report.

One state repealed its death penalty statute in 2011, and two states revised capital statutes

As of December 31, 2011, 36 states and the federal government authorized the death penalty (table 1). While New Mexico repealed the death penalty in 2009 (Laws 2009, ch. 11 § 5), the repeal was not retroactive, and offenders charged with a capital offense committed prior to the repeal may be eligible for a death sentence. As of December 31, 2011, New Mexico held two men under previously imposed death sentences, and one person was awaiting sentencing with the state seeking the death penalty.

The Illinois legislature repealed the death penalty (725 ILCS 5/119-1), effective July 1, 2011. During 2011, two states revised statutory provisions relating to the death penalty. By state, the changes were—

New Hampshire—Added murder during the commission of a burglary of any person authorized to occupy the building (RSA 630:1(g)), to the list of offenses eligible for a death penalty, effective July 1, 2011.

Texas—Revised an element of capital murder, murder of a child under age 6, to include any child under age 10 (Tex. Penal Code 19.03(a)(8)), effective September 1, 2011.

Lethal injection was authorized by all states with capital statutes

As of December 31, 2011, all 36 states with death penalty statutes authorized lethal injection as a method of execution (table 2).

In addition to lethal injection, 15 states authorized an alternative method of execution: 8 states, electrocution; 3 states, lethal gas; 3 states, hanging; and 2 states, firing squad.

FIGURE 4

Source: Bureau of Justice Statistics, National Prisoner Statistics Program (NPS-8), 2011.

For states that authorize multiple methods of execution, the method is generally selected by the condemned prisoner. Five of the 15 states (Arizona, Arkansas, Kentucky, Tennessee, and Utah) stipulated which method must be used depending on either the date of the offense or sentencing. One state (New Hampshire) authorized hanging only if lethal injection could not be given. Four states authorized alternative methods if lethal injection is ruled to be unconstitutional: Delaware authorized hanging, Oklahoma authorized electrocution or firing squad, Utah authorized firing squad, and Wyoming authorized lethal gas.

The method of execution of federal prisoners is lethal injection, pursuant to 28 CFR, Part 26. For offenses prosecuted under the federal Violent Crime Control and Law Enforcement Act of 1994, the method is that of the state in which the conviction took place (18 U.S.C. 3596).

Executions in 2012

In 2012, 9 states executed 43 inmates, which was the same number executed in 2011.

Four states accounted for three-quarters of the executions carried out during this period: Texas executed 15 inmates; and Mississippi, Oklahoma, and Arizona each executed 6 inmates.

Of the 43 executions carried out in 2012, all were by lethal injection.

No women were executed in 2012.

Methodology

Capital punishment information is collected annually as part of the National Prisoner Statistics program (NPS-8). This data series is collected in two parts: data on persons under sentence of death are obtained from the department of corrections in each jurisdiction currently authorizing capital punishment, and information on the status of death penalty statutes is obtained from the Office of the Attorney General in each of the 50 States, the District of Columbia, and the federal government. Data collection forms are available on the BJS website at www.bjs.gov.

NPS-8 covers all persons under sentence of death at any time during the year who were held in a state or federal nonmilitary correctional facility. This includes capital offenders transferred from prison to mental hospitals and those who may have escaped from custody. It excludes persons whose death sentences have been overturned by the court, regardless of their current incarceration status.

The statistics included in this report may differ from data collected by other organizations for a variety of reasons: (1) NPS-8 adds inmates to the population under sentence of death not at sentencing, but at the time they are admitted to a state or federal correctional facility; (2) if inmates entered prison under a death sentence or were reported as being relieved of a death sentence in one year but the court had acted in the previous year, the counts are adjusted to reflect the dates of court decisions (See note on table 4 for the affected jurisdictions); and (3) NPS counts are always for the last day of the calendar year and will differ from counts for more recent periods.

All data in this report have been reviewed for accuracy by the data providers in each jurisdiction prior to publication.

Note: The method of execution of federal prisoners is lethal injection, pursuant to 28 CFR, Part 26. For offenses prosecuted under the federal Violent Crime Control and Law Enforcement Act of 1994, the execution method is that of the state in which the conviction took place (18 U.S.C. 3596).

^aAuthorizes lethal injection for persons sentenced after November 15, 1992; inmates sentenced before that date may select lethal injection or gas.

^bAuthorizes lethal injection for inmates whose offense occurred on or after July 4, 1983; inmates whose offense occurred before that date may select lethal injection or electrocution.

^cAuthorizes hanging if lethal injection is held to be unconstitutional by a court of competent jurisdiction.

^dAuthorizes lethal injection for persons sentenced on or after March 31, 1998; inmates sentenced before that date may select lethal injection or electrocution.

^eAuthorizes hanging only if lethal injection cannot be given.

^fAuthorizes lethal injection for inmates whose capital offense occurred prior to July 1, 2009.

^gAuthorizes electrocution if lethal injection is held to be unconstitutional, and firing squad if both lethal injection and electrocution are held to be unconstitutional.

^hAuthorizes lethal injection for inmates whose capital offense occurred after December 31, 1998; inmates whose offense occurred before that date may select electrocution by written waiver.

ⁱAuthorizes firing squad if lethal injection is held unconstitutional. Inmates who selected execution by firing squad prior to May 3, 2004, may still be entitled to execution by that method.

^jAuthorizes lethal gas if lethal injection is held to be unconstitutional.

Note: Some counts shown for yearend 2010 are revised from those reported in *Capital Punishment, 2010 - Statistical Tables*, BJS Web, NCJ 236510. The revised counts include 4 inmates who were either reported late to the National Prisoner Statistics program or were not in custody of state correctional authorities on December 31, 2010 (1 each in Alabama, Delaware, Arizona, and California) and exclude 23 inmates who were removed from a death sentence before December 31, 2010 (7 in Ohio; 6 in Texas; and 1 each in Pennsylvania, Alabama, Florida, Georgia, Oklahoma, South Carolina, Arizona, Idaho, Utah, and the Federal Bureau of Prisons).

^aIncludes 21 deaths from natural causes (4 in Florida; 3 in California; 2 each in Pennsylvania, Ohio, Alabama, North Carolina, and Oklahoma; and 1 each in Nebraska, Mississippi, Texas, and Arizona) and 3 deaths from suicide (1 each in Alabama, Florida, and California).

^bIncludes American Indians, Alaska Natives, Asians, Native Hawaiians, other Pacific Islanders, and Hispanic inmates for whom no other race was identified.

^cCounts of white and black inmates include persons of Hispanic or Latino origin, which may differ from other tables in this report.

^dExcludes persons held under Armed Forces jurisdiction with a military death sentence for murder.

Note: In 1972, the U.S. Supreme Court invalidated capital punishment statutes in several states (*Furman v. Georgia*, 408 U.S. 238 (1972)), effecting a moratorium on executions. Executions resumed in 1977 when the Supreme Court found that revisions to several state statutes had effectively addressed the issues previously held unconstitutional (*Gregg v. Georgia*, 428 U.S. 153 (1976) and its companion cases). Some inmates executed since 1977 or currently under sentence of death were sentenced prior to 1977. For persons sentenced to death more than once, the numbers are based on the most recent death sentence.
