

Bureau of Justice Statistics Bulletin

Criminal Victimization 1986

Criminal victimizations in the United States dropped by nearly 750,000 to about 34.1 million in 1986 for persons age 12 and older, according to the National Crime Survey (NCS). This 2% decline in overall crime continued a trend that has reduced criminal victimizations to their lowest level in the 14-year history of the NCS, about 18% below the 41.5 million victimizations reported in the peak year of 1981 (table 1).¹

The victimization rate for crimes of violence declined about 6% during the year to a new low; this rate was about 20% lower than its peak in 1981 (figure 1). The victimization rate for assault dropped about 8%, reaching a new low.

The National Crime Survey obtains information on criminal victimizations, whether or not the crime was reported to the police. About 37% of all crimes

¹For definitions of the crimes measured by the National Crime Survey and a description of NCS operations, see *Measuring Crime*, BJS Bulletin, NCJ-75710, February 1981.

Figure 1

October 1987

The data in this bulletin update the preliminary estimates of victimization in 1986, which were released in April of this year. For the fifth year in a row, the overall level of crime decreased, bringing the number of crimes in the United States to the lowest level in the 14-year history of the National Crime Survey (NCS).

The NCS measures both crimes reported to the police and crimes

not reported. Although nearly two-thirds of all NCS crimes, including about half of all violent crimes, are not reported to police, this year's survey indicates that reporting rates have increased significantly since the survey first began.

Steven R. Schlesinger
Director

measured by the NCS were reported to the police, an increase of about 4% between 1985 and 1986.

Personal crimes decline

The overall victimization rate for personal crimes--crimes of violence and theft--declined about 4% in 1986, resulting in approximately half a million fewer crimes in 1986 than in 1985 (table 2).

The victimization rate for assault declined after 3 years of stable rates (table 3). The rate in 1986--22.3 victimizations per 1,000 persons--was 18% lower than its high point in 1979 and the lowest in NCS history (figure 2). The rate of simple assault dropped about 9% between 1985 and 1986, from 15.9 to 14.4 per 1,000 persons. The decline in the simple assault rate is primarily due to a decrease in the rate of attempted assaults without a weapon. The victimization rate for

Note: Detail may not add to total shown because of rounding. Percent change is based on unrounded figures. Victimization rates are calculated on the basis of the number of victimizations per 1,000 persons age 12 and older or per 1,000 households. The population age 12 and older grew from 194,096,700 in 1985 to 196,160,200 in 1986, an increase of 1.1%. The number of households grew from 89,262,800 to 90,394,700 between 1985 and

1986, an increase of 1.3%.

...Not applicable.

^aThe difference is statistically significant at the 95% confidence level.

^bThe difference is statistically significant at the 90% confidence level.

^cThe victimization rate for female rape (the number of rapes per 1,000 women age 12 and older) was 1.3 in 1985 and 1.2 in 1986.

aggravated assault remained essentially stable between 1985 and 1986.

The robbery rate for 1986 was lower than that for any year between 1973 and 1983 (table 4). There has been no measurable difference, however, in the rate for robbery since 1984.

There was no measurable change in the overall rate of personal crimes of theft between 1985 and 1986. The 1986 rate, however, was about 31% lower than its peak in 1977 and lower than for any time between 1973 and 1984. The rate of completed thefts declined between 1985 and 1986, from 65.8 to 63.2 per 1,000 persons. This decrease is primarily due to a decline in the rate of completed personal larceny without contact.

There were no measurable changes in the rates for rape and for personal larceny with contact, which consists of purse snatching and pocket picking. These crimes occur far less often than other categories of crimes of violence or theft; consequently, actual changes in the levels or rates of rape or personal larceny with contact are much more difficult to measure.

Household crimes stable

Rates for the three household crimes measured by the NCS—burglary, household larceny, and motor vehicle theft—remained basically unchanged between 1985 and 1986. The rate for completed household larcenies with a loss of less than \$50, however, declined by nearly 13%, from 44 to 38 per 1,000 households.

The rate for burglary was 61 per 1,000 households. Household larceny occurred at a rate of 94 per 1,000 households, and motor vehicle theft occurred at a rate of 15 per 1,000 households. The burglary rate was lower than for any year between 1973 and 1983, though not measurably different from the 1984 and 1985 rates. The overall household larceny rate was lower than for any time between 1973 and 1984.

Police reporting increases

About 37% of all NCS crimes in 1986 were reported to the police, a 4% increase over the 1985 rate. The 1986 reporting rate for all NCS crimes was the highest ever recorded by the NCS and was 15% higher than the 1973 reporting rate (table 5 and figure 3). About half of all violent crimes, two-fifths of all household crimes, and slightly more than one-fourth of all crimes of personal theft were reported.

Note: Percent change was calculated using rates that were rounded to the nearest hundredth. *The difference is not statistically significant at the 90% confidence level.

The 1986 reporting rates did not change measurably for any of the individual crimes measured, although the overall rate for household crimes increased to 41%, from 39% in 1985. As in the past, motor vehicle theft, with roughly 7 in every 10 incidents reported to the police, had the highest rate of reporting; personal larceny without contact and household larceny, both with about 1 in every 4 cases reported, had the lowest police reporting rates.

The National Crime Survey

The NCS measures selected personal and household offenses, including crimes not reported to the police, through interviews at 6-month intervals with the occupants of housing units that make up a representative national sample. During 1986 some 101,000 persons--occupants of about 49,000 housing units--participated in the survey. Interviews are administered monthly to one-sixth of the sample

Figure 2

according to a rotation schedule. Information pertaining to the previous 6 months is gathered at each interview.

Preliminary estimates and sampling error

In April 1987 the Bureau of Justice Statistics released preliminary NCS victimization levels and rates as well as police reporting data for 1986. When levels and rates of victimization for the early 1986 estimates are compared to the final 1986 results, the procedure used in calculating the preliminary estimates appears to have yielded reliable indicators of both magnitude and change in criminal victimization during 1986 (table 6). For example, the 1986 preliminary rate for crimes of violence was 28 per 1,000 persons; the final rate was 28.1.²

²For a complete discussion of preliminary estimation procedures, see *Criminal Victimization 1983*, BJS Bulletin, NCJ-93869, June 1984.

Note: Numbers and rates may not add to totals shown because of rounding.

Percent changes were calculated based on unrounded numbers.

Data collected in the National Crime Survey are obtained from a sample and not from a complete enumeration. Consequently, a sampling error (standard error) is associated with each number in the report, including the numbers measuring change. In general, if the difference between two numbers is greater than twice the standard error for that difference, we can say that we

are 95% confident that the two numbers are in fact different—that is, the apparent difference is not simply the result of surveying a sample and not the entire population. If the difference is greater than 1.6 standard errors, we are 90% confident that the two numbers are different. All comparisons made in the text are at or above the 90% confidence level. When differences between two numbers are below the 90% confidence level, the two numbers are described in the text as "not measurably different."

Bureau of Justice Statistics bulletins are prepared principally by the staff of BJS. This bulletin was written by Marshall DeBerry and Catherine J. Whitaker. Frank D. Balog edited the bulletin. Marilyn Marbrook, publications unit chief, administered production, assisted by Tina Dorsey, Jeanne Harris, Arlene F. James, and Sara E. Smith.

October 1987, NCJ-106989

The Assistant Attorney General, Office of Justice Programs, coordinates the activities of the following program offices and bureaus: the Bureau of Justice Statistics, National Institute of Justice, Bureau of Justice Assistance, Office of Juvenile Justice and Delinquency Prevention, and the Office for Victims of Crime.

Trends in reporting to the police for selected crimes, 1973-86

Figure 3

Crime and Older Americans

Information Package

- Are older Americans more likely to be victims of crime than younger age groups?
- Are the elderly being arrested for certain crimes more frequently than in the past?
- Are offenders in crimes against the elderly more likely to be strangers or nonstrangers compared to other age groups?

A new information package available from the Justice Statistics Clearinghouse answers these and other questions about crime and the elderly. Drawing from national sources for crime statistics—including the BJS National Crime Survey, the FBI Uniform Crime Reports, and the BJS National Corrections Reporting Program—the 34-page package discusses the types of crimes in which older Americans are most likely to be victims and offenders, and the types of crime prevention they use.

As the elderly population has grown, so has concern about the effects of crime on this age group.

Population statistics indicate that older Americans are fast becoming a large segment of the total U.S. population. In 1985, Americans 60 years and older totaled 39.5 million—a 21-percent increase over the past 10 years.

This package also includes the names and addresses of associations and organizations that are sources of information about crime and older Americans and a list of further readings.

Crime and Older Americans costs only \$10.00.

Please send me _____ copies of the Information Package on Crime and Older Americans (NCJ 104569) at \$10.00 each.

For librarians and researchers...

...BJS Selected Library in Microfiche and Topical Bibliography from the National Criminal Justice Reference Service

SLiM

Libraries, research organizations, and universities now have access to the full text of 284 documents prepared by the Bureau of Justice Statistics (BJS), U.S. Department of Justice. *The Bureau of Justice Statistics SLiM*—produced in 1985 by the Justice Statistics Clearinghouse/NCJRS—provides text of the entire set of documents published between 1971 and 1984 from the various BJS data series, including:

- National Crime Survey
- National Prisoner Statistics
- Justice Expenditure and Employment Survey
- Computer Crime Series
- BJS Bulletins and Special Reports
- Sourcebook of Criminal Justice Statistics.

A free Topical Bibliography accompanies your order.

Each copy of the SLiM is shipped with a copy of the *Topical Bibliography Publications of the Bureau of Justice Statistics, 1971-84*, which puts at your fingertips more than 200 reference sources and ideas on criminal justice statistics issues and programs. The *Topical Bibliography* also serves as an index to the SLiM and contains an informative abstract of each document, as well as subject and title indexes to provide easy reference.

Order form

Yes! Please send me the *Bureau of Justice Statistics SLiM* and a free *Topical Bibliography* for \$203.00 U.S. and Canada (\$248.25 other foreign countries).

I don't wish to order the SLiM, but I would like the *Topical Bibliography, Publications of the Bureau of Justice Statistics, 1971-1984* (291 pages) for \$17.50 (\$18.50 Canada, \$22.50 other foreign countries).

I'd also like information about other SLiM packages.

Return with your payment to: Justice Statistics Clearinghouse/NCJRS, Dept. F-AGB, Box 6000, Rockville, MD 20850.
