The number of thefts based on vehicles owned is equal to or higher than the corresponding figure based on households because the former includes all completed or attempted vehicle thefts, regardless of the final classification of the event; personal crimes of contact and burglary occurring in conjunction with motor vehicle thefts take precedence in determining the final classification based on the number of households.

The term "Urban" is used to denote "Central cities."

The term "Suburban" is used to denote "Outside central cities."

The term "Rural" is used to denote "Nonmetropolitan areas."
