INTRODUCTION

STUDY DESCRIPTION

The 1985 Expenditure and Employment data are part of an annual survey series conducted under the requirements of the Omnibus Crime Control and Safe Streets Act of 1968. The data were collected by the Bureau of the Census under the sponsorship of the U.S. Department of Justice, Bureau of Justice Statistics (BJS). Employment and payroll data for criminal justice activities were requested for the one pay period which included October 12, 1985. Expenditure data was collected for a 12-month accounting period with a fiscal year ending date between July 1, 1984 and June 30, 1985.

The data included in the present study concern all state and county governments, plus all municipal and township governments with 10,000 or more population which were surveyed as certainty units. The remaining survey panel was selected using a probability sample based on the relative size of their justice expenditures as reported in the 1982 Census of Governments.

The total sample surveyed was 8,273 and of those, 173 were the largest certainty units. Data for these units were compiled by special field agents using a combination of in-house plus field sources. The data were transcribed to special binders, reviewed and then were transferred to special keying documents before data keying. The remaining 8,100 units were surveyed through the mail. This sample was selected from a universe of general purpose state and local governments of approximately 36,000 based on the 1982 Census of Governments counts. Each government is uniquely coded and there are no duplicates on the file. In addition a supplement form was sent to 1,000 special campus police of public universities and colleges for data on their criminal justice activity.

Sample Methodology

The size of the sample needed to produce reliable estimates of the proportion of state-to-state local total expenditures in each state was kept to a minimum by comparing the reliability of general sampling schemes and selecting the scheme yielding the best error per dollar. The sampling method used in this survey is a probability sample in which the chance of selection is based on the relative size of a government's expenditure for police protection as requested

in the 1982 Census of Governments.

Each sample case was assigned a weight, which corresponds to its probability of selection. Preliminary estimates of variables by state and type of government were obtained by multiplying each case by the weight and summing them within type of government by state. The preliminary estimates were then adjusted for nonresponse using a ratio adjustment procedure.

The survey panel was designed to produce reliable estimates of the local government proportion of state-local total justice expenditure within one percent at the two-thirds confidence level. In fact, the estimated standard error on the proportion was within .5 percent at the 95 percent confidence level.

Survey Period

Employment and payroll data for criminal justice activities were requested for the one pay period which included October 12, 1985. Expenditure data was collected for a 12-month accounting period with a fiscal year ending date between July 1, 1984 and June 30, 1985.

Data Collection and Procedure

Data collection began in December, 1986, after the initial mailout, with closeout the early part of May. Non-sampling error, such as respondent misinterpretation, processing, and analysis mistakes were kept at a minimum through repeated manual and computer edit check. A 100 percent response was achieved for the larger field units, and 88 percent response was achieved on the mail canvass units.

FILE STRUCTURE

Expenditure and Employment Data for the Criminal Justice System Full File and Extract File, 1985 is available from the ICPSR in two formats: card image and OSIRIS. The card image file contains several decks per case in a format based on 80 column punched cards. The data are sorted by case with all decks for a case together in ascending order.

The OSIRIS dictionary gives the format and other information for each variable in the OSIRIS data file. The dictionary or dictionary-codebook file is used in conjunction with the OSIRIS software package. The OSIRIS data file is constructed with a single logical record for each case. The Full File has 166 variables on 7276 cases and the Extract File has 143 variables on 366 cases.

The OSIRIS data file can be accessed directly through software packages or programs which do not use the OSIRIS dictionary by specifying the tape locations of the desired variables. These tape locations are given in the OSIRIS dictionary-codebook.

CODEBOOK INFORMATION

The example below is a reproduction of information appearing in the machine-readable codebook for a typical variable. The numbers in brackets do not appear but are references to the descriptions which follow this example.

[9] [10] [11]

- 52 1. State-local total
- 52 2. State government
- 52 3. Local government total

- [1] Indicates the variable and reference numbers. A variable number and a reference number are assigned to each variable in the data collection. In the present codebook which documents the archived data collection these numbers are identical. Should the data be subsetted or rearranged by an OSIRIS program (e.g., MMP to intersperse data from another source, or TCOT to produce an analysis deck), the variable numbers would change to reflect the order of the new data collection, while the reference number would remain unchanged to reflect the variable number in the codebook describing the archived data collection.
- [2] Indicates the abbreviated variable name (maximum of 24 characters) used in the OSIRIS system to identify the variable for the user. An expanded version of the variable name can be found in the variable description list.
- [3] Indicates the code values of missing data. In this example, code values equal to 0 are missing data (MD=0). Alternative statements for other variables are "MD=9," "MD. GE 9" (Greater than or equal to 9), or "NO MISSING DATA CODES." Some analysis software packages (including the OSIRIS software package) require that certain types of data which the user desires to be excluded from analysis be designated as "MISSING DATA," e.g., inappropriate, unascertained, unascertainable, or ambiguous data categories. Although these codes are defined as missing data categories, this does not mean that the user should not or cannot use them in a substantive role if so desired.
- [4] Indicates the starting location and width of this variable when the data are stored on a magnetic tape in the OSIRIS format. If the variable is of a multiple-response type, the width referenced is that of a single response. In this example the variable named "GOVTS ID-LEVEL/TYPE" is 1 column wide and is located in the 14th column within the record.
- [5] Indicates the location by deck and column of this variable when the data are stored on cards or in card-image format (80-column format)

- [6] This is the full text (question) supplied by the investigator to describe the variable. The question text and the numbers and letters that may appear at the beginning reflect the original wording of the questionnaire item.
- [7] Indicates an additional comment or explanation appended to the variable description.
- [8] Indicates the variable is continuous in which case the phrase "Actual number is coded." appears.
- [9] Indicates the frequency of occurrence of each code value for this variable. Frequencies inserted in this codebook are not weighted.
- [10] Indicates the code values occurring in the data for this variable.
- [11] Indicates the textual definitions of the codes. Abbreviations commonly used in the code definitions are "DK" (Do Not Know), "NA" (Not Ascertained), and "INAP" (Inappropriate).

ICPSR PROCESSING INFORMATION

The data collection was processed according to the standard ICPSR processing procedures. The data were checked for illegal or inconsistent code values which, when found, were recoded to OSIRIS missing data values. Inconsistencies in variables 274-279, 374, 375 and 378 were not recoded to missing data since the errors on the self-administered questionnaires seemed to stem from respondent errors in the use of filter questions. Statements bracketed in "<" and ">" signs in the body of the codebook were added by the processors for explanatory purposes.

FROM THE DIRECTOR
BUREAU OF THE CENSUS

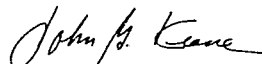

On behalf of the Bureau of Justice Statistics of the Department of Justice, the Bureau of the Census is collecting public expenditure and employment data for six civil and criminal justice activities: police protection, judicial, legal services and prosecution, public defense, corrections, and other justice activities. These data are very similar to data we last collected for the Bureau of Justice Statistics in 1979; participation continues to be voluntary. The Department of Justice will use the data from this survey to implement and administer the formula grant program of the Justice Assistance Act of 1984, 42 USC 3747. The Bureau of Justice Statistics will publish the data in a report entitled **Justice Expenditure and Employment in the United States**.

Please extract the requested data from your financial and payroll records and enter them on the attached questionnaire. If answers to questions are not available from records, please provide reasonable estimates and show them with an asterisk (*). Return the addressed copy of the questionnaire in the enclosed envelope within 3 weeks. The duplicate copy is for your files.

The Justice System Improvement Act of 1979 as amended (42 USC 3732) authorizes this report. This is a voluntary survey; although you are not legally required to respond, your participation is needed to make the results comprehensive, accurate, and timely. If we can help you complete this questionnaire, call Mr. Richard Meyer on (301) 763-7825.

Thank you for your cooperation in this voluntary survey. The Census Bureau appreciates your help.

Sincerely,

JOHN G. KEANE

- * 1 Work units of Forms CJ-6, "Survey of Expenditure and Employment for Civil and Criminal Justice Activities of Local Governments," (10/26/85)
- 2 Jail list
- 3 Supplemental Instructions for the Civil and Criminal Justice Activities for the Criminal Justice System
- 4 "Other Criminal Justice," Appendix A
- 5 "JADS Referral Slip - J'ville," Appendix B
- 6 "JADS Referral Slip - Wash.," Appendix C
- 7 Red pencils
- 8 Printing calculator

8B GENERAL EDIT INSTRUCTIONS

- 1 From the bin labeled "Ready for Edit," edit in the order given at 4E1 (Chapter 4) working one State at a time.
 - a Work all available county units first.
 - b Work all available municipal and township units next. Type of governmental units can be determined by the identification number (3rd character in ID, 1 - county, 2 - municipal, 3 - township).
- 2 Make all entries on the current year forms in red.
- 3 Delete cents entries for all dollar amounts by drawing a single line laterally through the cents entry.

- 4 Prior to editing each activity, examine the form for explanatory notes and if possible, adjust the entries accordingly. Explanatory notes can clarify a problem and therefore cut back on referrals.
- 5 Completely edit an entire activity on one line of Parts I and II before going to the next activity.
- 6 For blank questionnaires with ID's (without correspondence), check the population on the label.
 - a If under 1,000, indicate on the "JADS Referral Slip - Wash." and refer the form to your supervisor.
 - b If over 1,000, indicate the "R1" box on the "JADS Referral Slip - J'ville" and refer the form to your supervisor.
- 7 Adjust the total entered for an activity when it does not equal the sum of the itemized entries or enter the total for the itemized entries when the total is blank.
- * 8 Circle the item number to the left of the cell on the form to refer it, mark each item referred on a "JADS Referral Slip - J'ville" and indicate the referral number or explain in the "Remarks" column.
- 9 Edit the entire form before referring fail edit cases unless otherwise instructed in the specific instructions.
- 10 Use Appendix A to convert items listed under "Other Criminal Justice" where applicable.
- 11 Use a calculator, set to print to 4 decimal places, for all computations.
- 12 If a cell has multiple entries and all the entries clearly belong in the cell, add the entries. Delete the original entries by drawing a line through them and writing the total in the cell.
- 13 If entries are not legible, cross out the original and rewrite.
- 14 Follow the supplemental instructions as a guideline as to whether a particular activity exist in a cell.

For municipalities/township governments (type 2 or 3) with a population of less than 20,000:

- accept blanks for Judicial, if not reported
- accept blanks for Legal Services and Prosecution, if not reported

- accept blanks for Public Defense, if not reported
- accept blanks for Corrections, if not reported
- accept blanks for other Criminal Justice, if not reported

* For municipalities/township governments (type 2 or 3) with a population of 20,000 or more:

- accept blanks for corrections, if a correctional facility is not reported on the Jail List
- accept blanks for Other Criminal Justice, if not reported

* For county governments (type 1) with a population of less than 50,000:

- accept blanks for Legal Services and Prosecution, if not reported
- accept blanks for Public Defense, if not reported
- accept blanks for Other Criminal Justice, if not reported

* For county governments (type 1) with a population of 50,000 or more:

- accept blanks for corrections only if a correctional facility is not reported on the Jail List
- accept blank for Other Criminal Justice

* For county governments, don't forget about prorating the sheriff's departments between the police protection, judicial, and corrections per the special instructions.

* If you encounter blanks in an activity cell where the possibility of data may exist, indicate a (x) under the appropriate activity item and "blank" under remarks on the "JADS Referral Slip - J'ville."

15 Use the jail list for checking correction activities.

16 If no entries appear on the form and there are materials attached, indicate on the "JADS Referral Slip - Wash." and refer the form to your supervisor.

17 If a form indicates a refusal, indicate on the "JADS Referral Slip - Wash." and refer the form to your supervisor.

18 All forms for the state of Louisiana and Kentucky should be pulled from the receipts and referred to your supervisor. They will be edited later with the special fee offices.

APPENDIX H: RESOLUTION OF PROBLEM REFERRALS

1985 JUSTICE ASSISTANCE DATA

RESOLUTION OF PROBLEM REFERRALS - FORMS CJ-6

This procedure provides instructions to the Governments Unit, CPB, for resolution of problem referrals on Forms CJ-6.

9A MATERIALS NEEDED

- 1 Edited Forms CJ-6 with "JADS Referral Slip" attached
- 2 Jail List.
- 3 Procedure Manual 1, Chapter 8, "Editing Forms CJ-6"
- 4 Supplemental Instructions for the Criminal Justice System
- 5 Forms BC-2536, "Record of Telephone Follow-up"
- 6 Green pencils
- 7 Calculator

9B GENERAL RESOLUTION INSTRUCTIONS

- * 1 Do a quick re-edit of the schedule prior to telephoning to resolve referrals.
- * 2 Check referral slip form and telephone to resolve the problem. Referral slips that indicate blank under "Remarks" for a particular cell should be called to verify that activity does not exist.
- 3 Make telephone calls on a priority basis by population size, calling the largest units first.
- 4 Estimates are acceptable, indicate with an asterisk.
- 5 There will be no prior data to help resolve referrals.

<u>Problem</u>	<u>Disposition</u>
* <u>Blank Referrals</u>	Check Supplemental Instructions (jail list where appropriate) to verify that an activity should exist. If so, obtain necessary data following special instructions.
<u>Referral 1</u> Blank form over 1000 population	Obtain all necessary data over the phone following the Supplemental Instructions and Jail List.
* <u>Referral 2</u> More than one box is checked for Pay Period Interval	Call <u>or</u> determine for yourself the correct interval and put the code in the "Census Use" box.
* <u>Referral 3</u> No payroll code given	Determine the correct payroll interval and put the code in the "Census Use" box.
* <u>Referral 4</u> Wrong fiscal year given - 10,000 population or over.	If the wrong fiscal year is given, verify that the date given is for the wrong fiscal year. If it is, obtain date for a fiscal year that ends between July 1, 1984 and June 30, 1985.
<u>Referral 5</u> If an entry appears in Correction line a - Total, but no entry appears in line b or c	Call to get a break at b and/or c and adjust the data.
<u>Referral 6</u> If the only entry in Corrections is on line b, column (5) for Type 1 - counties	Call for number of employees, since most all counties have at least one jail.

 *

Problem

Disposition

- * Referral 7 If no entries appear in Corrections - line b and there are no notes indicating that jail services are contracted or entries do not appear in column (7) and/or(8)

Check jail list. If on list, call to obtain data. If a county does not have a jail, inter-governmental payments (expenditures) should be shown being made to another government for that service.

- Referral 8 If no full-time payroll amount appears in column (2), but number of employees is shown in column (1),there should be a payroll amount

Call to determine that the number of employees given is legitimate. If so, obtain the payroll. Also get the Pay Period Interval and put the code in the "Census Use" box. If not legitimate, delete the entry.

- * Referral 9 A full-time payroll amount appears in column (2), but no employees are shown in column (1) (except with the possibility of "Legal Services" or "Public Defense" - if this exists, go to the problem below)

Call to verify that the payroll amounts are legitimate. If so, obtain number of employees. Also get "Governmental contributions for Employee Benefits" and put in column (9). If not legitimate, delete the entry.

- Referral 10 A full-time payroll amount appears in column (2), but no employees are shown in column (1) and the activity is "Legal Services" or "Public Defense" for municipalities with 20,000 or more population or a county or a township

Verify that a municipal (type 2) population is 20,000 or more. If so, check the "Supplemental Instructions." Large governments are more likely to have "Legal Services" or "Public Defense" employees. If the instructions are inconclusive, call to determine if they have employees or whether they are contracted. If they have employees, put the number of employees in column (1) and get "Governmental Contribution for Employee Benefits", and put in column (9). If they are contracted and an entry appears in column (5), delete the entry in column (2).

 *

Problem

Disposition

* Referral 11 An entry appears in column (9) for municipalities (type 2) with less than 20,000 population.

- a Verify that the population is under 20,000. If so, call to verify the entry in column (9). If they have "government contributions for employee benefits," they should have employees. If the entry in column (9) is in error, delete the entry.
- b If they are contracted and an entry appears in column (5), delete the entry in column (2) and in column (9). If they are not contracted, they can show intergovernmental payments (expenditures) in columns (7) or (8), but delete all other entries.

Follow the same steps (8-11) of problem referral resolution for part-time employees - column (2) and part-time payroll amounts - column (4) as was followed for full-time employees - column (1) and full-time payroll amounts - column (3), above.

* Referral 12 If an activity has employment and payroll information, but the "Current Operation" - column (5) is blank and no explanatory remarks appear in the form or elsewhere

Call to verify that employment and payroll information is correct. If so, obtain "Current Operation" data for column (5). If not legitimate, delete the entry.

For cities/municipalities (2,3) under 20,000 and counties (1) under 50,000:

If data is entered in column (9), multiply the payroll by the payroll interval times 12. Add 15% and insert in column (5) - Current operations.

*

Problem

Disposition

Referral 12
(cont'd)

If data is not entered in column (9):

a For legal services/public defense - convert payroll to an annual expense and insert it in column (5). Delete the entries in the payroll/employees column.

b Otherwise, call to verify that employment and payroll information is correct.

* Referral 13 If an activity has an entry in the "Current Operation" column (5), but no employment and payroll information and there are no explanatory notes/remarks*

Call to verify that there is "current operation" expenditure. If so, obtain employment and payroll over the phone for the Employment and Payroll columns. If the entry is not legitimate, delete.

*Exceptions are the "Legal Services" and "Public Defense" activities, which you would accept. These activities are usually contracted.

*Exception: Counties for corrections activity

If not on jail list, move operating expenditures to "Annual payments to cities/counties," column (7):

9D TELEPHONE INSTRUCTIONS

- 1 Place all calls through an FTS operator. Place commercial calls only when the FTS system cannot be utilized satisfactorily.
- 2 Call the telephone number and ask to speak to someone who is familiar with the Justice Assistance Data Survey or ask for the name and telephone number of someone who can help you.

3 Use the following as a guideline when placing calls:

Good morning (afternoon), my name is _____ from the U.S. Bureau of the Census. I am calling about the Survey of Expenditure and Employment for Civil and Criminal Justice Activities for Local Governments. The Census Bureau is collecting this information for the U.S. Department of Justice to help determine the amount of discretionary Justice Assistance monies going to local governments. We are preparing to close out data collection and we need:

a Additional information.

b To clarify certain answers.

4 If the respondent says it is impossible or too difficult to provide exact figures, ask the respondent if there is somebody else there that could help you. Also indicate that you will accept reasonable estimates.

5 If the respondent cannot immediately provide the information requested:

a Arrange for a call back at a specific time and date depending on the official's estimate of time required to assemble the data.

b Call again at the specified time for the data.

6 After obtaining all information, examine the form to make sure the name and telephone number of the respondent are entered in the "Data supplied by" box on page 2 of the form.

7 When calling a county government to obtain jail information because a jail was not reported and the respondent indicates that a jail is operated but no specific individual is assigned to the jail, e.g., different police officer each day, determine the entries for "Corrections," line 5.b. and adjust as follows.

a Determine if jail duties are shared by sworn or non-sworn personnel.

b Move the employee from "Police Protection", line 1, to Corrections and enter the average monthly salary in Corrections.

c Multiply the average monthly salary by 12 and add 10 percent to obtain the Current Operation figure for the jail.

d Adjust the "Totals" lines 1.a. and 5.a. accordingly.

*

9E DISPOSITION OF MATERIALS

- * When referrals have been reviewed and resolved, prepare the resolved referrals for DSB and place on the bin labeled "Ready for verification and keying" and refer unresolved referrals to Governments Division.

*

C. Develop and Check Payroll/Current Operations Ratios

<u>Activity</u>	<u>Procedure to Obtain Ratio</u>
1. Police Protection	IC 032 + IC 034 (Gross monthly payroll amounts - FT & PT) divided by IC 035 (current operations) = ratio .000
2. Judicial	IC 044 + IC 046 (Gross monthly payroll amounts - FT & PT) divided by IC 047 (current operations) = ratio .000
3. Legal Services/Prosecution	IC 056 + IC 058 (Gross monthly payroll amounts - FT & PT) divided by IC 059 (current operations) = ratio .000
4. Public Defense	IC 068 + IC 070 (Gross monthly payroll amounts - FT & PT) divided by IC 071 (current operations) = ratio .000
5. Corrections	IC 080 + IC 082 (Gross monthly payroll amounts - FT & PT) divided by IC 083 (current operations) = ratio .000
6. Other Criminal Justice	IC 128 + IC 130 (Gross monthly payroll amounts - FT & PT) divided by IC 131 (current operations) = ratio .000

Once the ratio has been calculated for each activity, you will need to check to determine the:

- State - check for State code (character location 1 and 2).
- Government Type - check for type code (character location 3).

You would then make appropriate comparisons for each unit using Ratio Range Chart (Attachment 1). If the unit fails a range check, print out ID#, activity, and ratio - .000.

If no data is shown for the Gross Monthly Payroll amount fields and/or Current Operation fields, ignore procedure to obtain ratios.

D. Develop and Check Average Pay

This check will be for average pay full-time, involving the following procedures for the activities listed.

<u>Activity</u>	<u>Procedure to Obtain Average Pay</u>
1. Police Protection	IC 032 (Gross monthly payroll - FT) divided by IC 031 (# of employees) = average pay
2. Judicial	IC 044 (Gross monthly payroll - FT) divided by IC 043 (# of employees) = average pay
3. Corrections	IC 080 (Gross monthly payroll - FT) divided by IC 079 (# of employees) = average pay

Once the average pay has been obtained for each activity you will again need to determine the State and Government type. You would then make appropriate comparisons on the Average Pay Chart (Attachment 2). If a unit is greater than the average pay figure given, print out ID #, activity and average pay - _____ per month. If a unit shows less than 500 for average pay, print out ID #, activity and average pay less than 500 - _____. If no data is shown for the Gross Monthly Payroll - FT fields and/or # of employees fields, ignore procedure to obtain average pay.

E. Detail Equal Total Checks - Corrections

IC 079 should = IC 091 + IC 103, if condition does not exist, print out ID # and F-T employees - detail.

IC 080 should = IC 092 + IC 104, if condition does not exist, print out ID # and F-T payroll - detail.

IC 081 should = IC 093 + IC 105, if condition does not exist, print out ID # and P-T employees - detail.

IC 082 should = IC 094 + IC 106, if condition does not exist, print out ID # and P-T payroll - detail.

IC 083 should = IC 095 + IC 107, if condition does not exist, print out ID # and current operations - detail.

IC 084 should = IC 096 + IC 108, if condition does not exist, print out ID # and capital outlay - detail.

IC 088 should = IC 100 + IC 112, if condition does not exist, print out ID # and IG-Local - detail.

IC 089 should = IC 101 + IC 113, if condition does not exist, print out ID # and IG-State - detail.

APPENDIX L: COMPUTER EDIT SPECIFICATIONS CJ-6F

Justice Assistance Data Survey

Computer Edit Specifications for Field Units (CJ-6F)

(Note: An asterisk (*) indicates that the edit check is new or is different than one for mail panel)

*A. Converting Payroll to Monthly Not Needed for Field Units

Since all field unit payroll data are converted to monthly amounts before being transcribed to CJ-6F's, no conversion is needed.

We will still need a ratio check procedure programmed for the following activities.

C. Develop and Check Payroll/Current Operations Ratios

*(Note: Unlike the mail panel, current operations must be multiplied by 1,000 to compute ratio)

<u>Activity</u>	<u>Procedure to Obtain Ratio</u>
1. Police Protection	IC 032 + IC 034 (Gross monthly payroll amounts - FT & PT) divided by IC 035 x 1,000 (current operations) = ratio .000
2. Judicial	IC 044 + IC 046 (Gross monthly payroll amounts - FT & PT) divided by IC 047 x 1,000 (current operations) = ratio .000
3. Legal Services/Prosecution	IC 056 + IC 058 (Gross monthly payroll amounts - FT & PT) divided by IC 059 x 1,000 (current operations) = ratio .000
4. Public Defense	IC 068 + IC 070 (Gross monthly payroll amounts - FT & PT) divided by IC 071 x 1,000 (current operations) = ratio .000
5a. Corrections - Total	IC 080 + IC 082 (Gross monthly payroll amounts - FT & PT) divided by IC 083 x 1,000 (current operations) = ratio .000
*5b. Corrections - Institutions	IC 092 + IC 094 (Gross monthly payroll amounts - FT & PT) divided by IC 095 x 1,000 (current operations) = ratio .000
*5c. Corrections - Probation	IC 104 + IC 106 (Gross monthly payroll amounts - FT & PT) divided by IC 107 x 1,000 (current operations) = ratio .000
*5d. Corrections - Other	IC 116 + IC 118 (Gross monthly payroll amounts - FT & PT) divided by IC 119 x 1,000 (current operations) = ratio .000

- J. Other Criminal Justice $IC\ 128 + IC\ 130$ (Gross monthly payroll amounts - FT & PT) divided by $IC\ 131 \times 1,000$ (current operations) = ratio .000

Once the ratio has been calculated for each activity, you will need to check to determine the:

- State - check for State code (character location 1 and 2)
- Government Type - check for type code (character location 3)

You would then make appropriate comparisons for each unit using the Field Unit Ratio Range Chart (Attachment 1). If the unit fails a range check, print out ID#, activity, and ratio - .000.

If no data are shown for either the Gross Monthly Payroll amount fields or Current Operation fields, ignore procedure to obtain ratios.

D. Develop and Check Average Pay

This check will be for average pay full-time, involving the following procedures for the activities listed.

<u>Activity</u>	<u>Procedure to Obtain Average Pay</u>
1. Police Protection	$IC\ 032$ (Gross monthly payroll - FT) divided by $IC\ 031$ (# of employees) = average pay
2. Judicial	$IC\ 044$ (Gross monthly payroll - FT) divided by $IC\ 043$ (# of employees) = average pay
*3/4. Other Legal	$IC\ 056 + IC\ 068$ (Gross monthly payroll - FT) divided by $IC\ 055 + IC\ 067$ (# of FT employees) = average
5a. Corrections - Total	$IC\ 080$ (Gross monthly payroll - FT) divided by $IC\ 079$ (# of employees) = average pay
*5b. Corrections - Institutions	$IC\ 092$ (Gross monthly payroll - FT) divided by $IC\ 091$ (# of FT employees) = average pay
*5c. Corrections - Probation	$IC\ 104$ (Gross monthly payroll - FT) divided by $IC\ 103$ (# of FT employees) = average pay
*51. Corrections - Other	$IC\ 116$ (Gross monthly payroll - FT) divided by $IC\ 115$ (# of FT employees) = average pay
*6. Other Criminal Justice	$IC\ 128$ (Gross monthly payroll - FT) divided by $IC\ 127$ (# of FT employees) = average pay

If no data are shown for the Gross Monthly Payroll - FT amounts, ignore procedure to obtain average pay.

Revised
2-14-86

Once the average pay has been obtained for each activity, you will again need to determine the state code and type code. Then make appropriate comparisons to the Field Unit Average Pay Chart (Attachment 2). If a unit is greater than the average pay figure given or less than \$1,000, print out ID #, activity, and average pay = _____ per month.

(Type Code is char location 3)

E. Detail Equals Total Checks

If type code eq ~~0~~ 0 or 1, then

- *IC 047 should = IC 151 + IC 154 + IC 155 + IC 156. If condition does not exist, print out ID # and current operations detail.
- *IC 151 should = IC 152 + IC 153. If condition does not exist, print out ID # and current operations detail.
- *IC 079 should = IC 091 + IC 103 + IC 115. If condition does not exist, print out ID # and F-T employees detail.

i.e., above 2 checks do not apply to cities but to States and counties only

Once the average pay has been obtained for each activity, you will again need to determine the state code and type code. Then make appropriate comparisons to the Field Unit Average Pay Chart (Attachment 2). If a unit is greater than the average pay figure given or less than \$1,000, print out ID #, activity, and average pay = per month.
