

Immigration, Citizenship, and the Federal Justice System, 1998-2018

Mark Motivans, Ph.D., *BJS Statistician*

This report highlights trends in federal arrests and prosecutions by the country of citizenship of persons processed through the federal criminal justice system. It shows changes from 1998 through 2018. The report provides statistics on law enforcement and prosecutions along the U.S.-Mexico border, as well as in non-border areas. It shows the number of suspects arrested and prosecuted for both immigration and non-immigration offenses, including by their citizenship status. It details activities for all 94 federal judicial districts, while also separately detailing activities for the 5 districts along the U.S.-Mexico border. (See map on page 6.)

The statistical findings in this report are based on data from the Bureau of Justice Statistics' Federal Justice Statistics Program (FJSP). The FJSP receives administrative data from six federal justice agencies: the U.S. Marshals Service, Drug Enforcement Administration, Executive Office for U.S. Attorneys, Administrative Office of the U.S. Courts, U.S. Sentencing Commission, and Federal Bureau of Prisons. BJS links and standardizes this information to maximize comparability and to facilitate analysis across and within agencies over time.

FIGURE 1
Percent of all federal arrests, by citizenship status, FY 1998-2018

Note: Percentages based on available data. See table 4.

This enables the production of statistics that are not available elsewhere. See *Methodology* for additional details.

HIGHLIGHTS

Based on fiscal years—

- In 1998, 63% of all federal arrests were of U.S. citizens; in 2018, 64% of all federal arrests were of non-U.S. citizens (**figure 1 and table 4**).
- Non-U.S. citizens, who make up 7% of the U.S. population (per the U.S. Census Bureau for 2017), accounted for 15% of all federal arrests and 15% of prosecutions in U.S. district court for non-immigration crimes in 2018 (**tables 7a and 13**).
- The portion of total federal arrests that took place in the five judicial districts along the U.S.-Mexico border almost doubled from 1998 (33%) to 2018 (65%) (**table 6**).
- Ninety-five percent of the increase in federal arrests across 20 years was due to immigration offenses (**table 1**).
- In 2018, 90% of suspects arrested for federal immigration crimes were male; 10% were female (**table 9**).

Other key findings

Citizenship

- Federal arrests of non-U.S. citizens more than tripled from 1998 to 2018 (rising 234%), while federal arrests of U.S. citizens rose 10% over the same period (**table 4**).
- Federal arrests of non-U.S. citizens increased from 73,022 in 2017 to 125,027 in 2018, a 1-year increase of over 50,000 (**table 4**).
- In 2018, non-U.S. citizens accounted for 24% of all federal drug arrests and 25% of all federal property arrests, including 28% of all federal fraud arrests (**table 7a**).
- In 2018, 85% of federal arrests of non-U.S. citizens were for immigration offenses, and another 5% of arrests were immigration-related (**table 7b**).

Citizenship by country

- In 2018, the number of federal arrests of Mexican citizens (78,062) exceeded the number of federal arrests of U.S. citizens (70,542) (**table 4**).
- Federal arrests of Central Americans rose more than 30-fold over two decades, from 1,171 in 1998 to 39,858 in 2018 (**table 4**).
- From 1998 to 2018, the share of all federal arrests by country of citizenship rose from 28% to 40% for Mexican citizens, rose from 1% to 20% for citizens of Central American countries, and fell from 63% to 36% for U.S. citizens (**table 4**).

The border and immigration

- Federal arrests for immigration crimes increased from 20,942 in 1998 to 58,031 in 2017, and then to 108,667 in 2018 (**table 1**).
- Males under the age of 30 accounted for more than half (51%) of the total increase in federal immigration arrests from 2017 to 2018 (**table 10**).

- There were 21 federal criminal immigration arrests per 100 apprehensions by the U.S. border patrol in the southwest border patrol sectors in 2018, up from 12 per 100 in 2017 (**table 11**).
- Federal arrests in the five judicial districts on the U.S.-Mexico border increased from 76,171 in 2017 to 126,293 in 2018 (**table 6**).
- The number of Central Americans arrested in the five judicial districts along the U.S.-Mexico border almost tripled in one year, rising from 13,549 in 2017 to 37,590 in 2018 (**table 5**).
- In 2018, a quarter of all federal drug arrests took place in the five judicial districts along the U.S.-Mexico border (**table 8a**).

Prosecutions

- Of suspects prosecuted in U.S. district court in 2018, 57% were U.S. citizens and 43% were non-U.S. citizens (**table 13**).
- Immigration suspects prosecuted in U.S. district court more than tripled from 1998 to 2018 (**table 16**).
- Of non-U.S. citizens prosecuted in U.S. district court in 2018, 0.3% were prosecuted for first-time illegal entry; 99.7% were prosecuted for something else (**table 14**).
- The five crime types for which non-U.S. citizens were most likely to be prosecuted in U.S. district court in 2018 were illegal reentry (72% of prosecutions), drugs (13%), fraud (4.5%), alien smuggling (4%), and misuse of visas (2%) (**table 14**).
- The five crime types for which U.S. citizens were most likely to be prosecuted in U.S. district court in 2018 were drugs (38% of prosecutions), weapons (21%), fraud (12%), public order (12%), and alien smuggling (6%) (**table 14**).
- In 2018, 65% of federal prosecutions for illegal reentry were prosecuted in U.S. district court, while 35% were prosecuted before a U.S. magistrate judge (**table 18**).

Note: Percentages based on available data. The unit of count is a federal arrest. Suspects with more than one arrest are counted separately. Most serious arrest is determined by the Deputy U.S. Marshal at booking. The five U.S.-Mexico border districts include the Southern District of California, the District of Arizona, the District of New Mexico, the Western District of Texas, and the Southern District of Texas. In total, there are 94 federal judicial districts.

~Not available.

^aIncludes persons of unknown citizenship. The number ranged from 14 (2018) to 5,424 (2010).

^bCitizenship status is defined using the country of citizenship indicated at the time of federal immigration arrest and booking.

^cIncludes Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama.

^dIncludes non-U.S. citizens from countries other than Mexico and Central America.

^eBased on known citizenship.

55 or older	1,185	1,078	107	1,747	1,569	178	562	491	71

Note: The unit of count is a federal arrest. Suspects with more than one arrest are counted separately. Data on sex of suspect were missing for four records in fiscal year (FY) 2017 and three in FY 2018. Age of suspect was missing for four records in FY 2018. Excludes D.C. Superior Court arrests.

Source: Bureau of Justice Statistics, based on data from the U.S. Marshals Service, Justice Detainee Information System, fiscal years 2017 and 2018.

Customs and Border Protection (CBP) and Immigration and Customs Enforcement (ICE) are responsible for most immigration law enforcement

The Department of Homeland Security (DHS) is responsible under the Immigration and Nationality Act (INA, Title 8 U.S.C. § 1101) for monitoring the flow of people and commerce along U.S. borders and waterways, at ports of entry, and in the U.S. interior. Within DHS, most immigration enforcement is the responsibility of Customs and Border Protection (CBP) and Immigration and Customs Enforcement (ICE). CBP is responsible for enforcing laws along the border or at ports of entry, and ICE is responsible for interior enforcement, detention, and removal operations.

Apprehensions

CBP conducts apprehensions of aliens for suspected immigration violations. Apprehensions entail the physical control or temporary detention of persons who are not lawfully in the U.S. They may or may not result in an arrest. Apprehensions most often occur between ports of entry, which are places where some persons may lawfully enter the country. Apprehensions can be handled administratively by DHS, adjudicated before an immigration judge, or referred for federal criminal prosecution.¹

Administrative arrest

ICE carries out administrative arrests. These include any arrest of an alien for a civil violation of U.S. immigration laws, which may result in detention and removal

¹See Witsman, K. (2018). *Immigration Enforcement Actions: 2017*. Retrieved from U.S. Department of Homeland Security website: https://www.dhs.gov/sites/default/files/publications/enforcement_actions_2017.pdf (most recent publicly available report). Administrative responses include: **Alien Transfer Exit Program**, which repatriates Mexican citizens through a geographic area different from that of their entry location to disrupt future coordination with smugglers; **Expedited Removal**, which immediately processes a formal removal order for illegal entrants apprehended within 100 air miles of the U.S. border who weren't physically present in the U.S. for a 14-day period immediately before their apprehension; **Reinstatement of Removal**, which provides the ability to reinstate a previously executed removal-order with respect to someone who illegally reenters the United States; and, **Voluntary Return**, which allows an illegal entrant to depart voluntarily from the U.S. in lieu of being subject to removal proceedings.

following an immigration court hearing. A Notice to Appear (form I-862) is the charging document that initiates removal proceedings. This document declares the administrative charges made by ICE.

Federal criminal arrest

Both CBP and ICE make federal criminal arrests for criminal violations of U.S. immigration laws. CBP does not publish its number of federal criminal arrests; however, those numbers, which BJS obtained through its Federal Justice Statistics Program, are published in this report. Making a federal criminal arrest requires establishing probable cause; a federal criminal arrest is subsequently adjudicated by a U.S. magistrate or a federal judge in U.S. district court, instead of an immigration court.

TABLE 11
Suspects arrested for federal criminal immigration offenses by Customs and Border Protection in the nine southwest border patrol sectors, FY 2013-2018

Fiscal year	Apprehensions	Criminal immigration arrests	Number of federal criminal immigration arrests per 100 apprehensions
2013	414,397	62,705	15.1
2014	479,371	54,790	11.4
2015	331,333	48,123	14.5
2016	408,870	48,770	11.9
2017	303,916	37,172	12.2
2018	396,597	83,108	21.0

Note: Apprehensions reflect activity by CBP in these nine southwest border patrol sectors: Big Bend, Del Rio, El Centro, El Paso, Laredo, Rio Grande Valley, San Diego, Tucson, and Yuma. Federal criminal arrests by the CBP reflect arrests in the 14 federal judicial districts that share the same geographical area with the 9 southwest border patrol sectors: Arizona, California Central, California Eastern, California Northern, California Southern, Oklahoma Eastern, Oklahoma Northern, Oklahoma Western, New Mexico, Texas Eastern, Texas Northern, Texas Southern, Texas Western, and Utah.

TABLE 18
Among all immigration suspects who were federally prosecuted, percent prosecuted in U.S. district court, by type of immigration offense, FY 1998-2018

Fiscal year	Illegal entry	Illegal reentry	Misuse of visas	Alien smuggling
1998	55.7%	94.8%	58.7%	87.8%
1999	51.5	95.7	73.1	88.8
2000	64.0	94.7	92.5	89.7
2001	56.1	92.4	90.4	91.5
2002	58.4	96.1	92.3	91.3
2003	56.6	95.7	91.2	87.7
2004	14.6	89.0	83.3	83.9
2005	13.9	81.7	79.9	83.9
2006	8.3	78.6	79.8	81.1
2007	9.4	72.9	83.2	83.7
2008	3.8	77.0	86.2	86.8
2009	3.1	72.0	84.2	86.2
2010	2.5	67.0	84.7	86.0
2011	2.1	64.7	86.5	85.5
2012	1.5	57.7	87.6	84.5
2013	2.0	54.2	88.0	77.6
2014	3.2	52.1	93.1	84.2
2015	1.3	52.0	90.3	80.0
2016	1.0	57.4	90.1	81.5
2017	1.9	61.1	86.9	82.7
2018	2.5	65.3	83.1	80.5

Note: The denominator for the percentages does not include those who were declined for further prosecution. Includes suspects with an immigration offense as the lead charge. Lead charge is the substantive statute that is the primary basis for referral to federal prosecutors. It is most often, but not always, the charge with the greatest potential sentence. Includes suspects prosecuted in U.S. district court or suspects prosecuted before a U.S. magistrate judge. Includes suspects who were initially charged in U.S. district court but later had case terminated before U.S. magistrates. This was found to be more likely in matters concluded with illegal entry. Table does not show percentages handled by U.S. magistrates (i.e., in 2018, 19.5% of suspects charged with alien smuggling were prosecuted by U.S. magistrates).

Methodology

Background of the Federal Justice Statistics Program

The Federal Justice Statistics Program (FJSP) was initiated in 1982 to serve as a central resource for information describing the case-processing of federal criminal defendants and to meet BJS's statutory mandate to "collect, analyze, and disseminate comprehensive federal justice transaction statistics ... and to provide technical assistance to and work jointly with other federal agencies to improve the availability and quality of federal justice data" (34 U.S.C. 10132 (c) (15)).

The FJSP receives administrative data files from six federal criminal-justice agencies and standardizes this information to maximize comparability across agencies and within agencies over time. This includes—

- standardizing the primary unit of count as each contact by a person with the federal criminal justice system, typically a distinct criminal case
- delineating the fiscal year (October 1 through September 30) as the period for reported events
- applying a uniform offense-classification across agencies
- classifying the court disposition and any sentence imposed.

Annual, cross-sectional data files are produced and maintained. They represent the federal criminal case-processing stages from arrest and prosecution through pretrial release, adjudication, sentencing, appeals, and corrections. The federal district is the jurisdictional boundary for federal courts and prosecutions. There are 94 federal judicial districts, 5 of which are adjacent to the U.S.-Mexico border, where most criminal immigration arrests occur. These border districts include the Southern District of California, the District of Arizona, the District of New Mexico, the Western District of Texas, and the Southern District of Texas.

Data Sources

U.S. Marshals Service (USMS): The Justice Detainee Information System (JDIS) provides information on suspects arrested for federal immigration offenses. The USMS uses the JDIS to track federal prisoners in its custody. Deputy U.S. Marshals are responsible

Federal criminal justice response

Dual civil and criminal justice responses are authorized under the Immigration and Nationality Act (INA) to address persons who are in or are attempting to enter the U.S. without authorization, and persons committing crimes while unlawfully in the U.S. The INA covers criminal immigration offenses that are subject to federal arrest and prosecution, including illegal entry into the U.S., illegal re-entry after having been removed, failing to leave the U.S. after a final order of deportation has been issued, remaining beyond days on conditional permit, bringing in or harboring aliens, and more. This report uses data from the Federal Justice Statistics Program (FJSP) to describe the federal enforcement of criminal provisions of the INA (Title 8 U.S.C. 1101.43).

The Immigration and Nationality Act includes provisions for immigration violations that are subject to federal arrest and prosecution. Immigration offenses included in this report are defined according to the following federal criminal statutes:

Smuggling, transporting, harboring

- Title 8 U.S.C. § 1322: prohibits bringing into the United States aliens subject to denial of admission due to lack of proper authorization or documentation
- Title 8 U.S.C. § 1323: prohibits unlawful bringing in and harboring certain aliens
- Title 8 U.S.C. § 1324: prohibits bringing and harboring certain aliens
- Title 8 U.S.C. § 1327: prohibits aiding or assisting aliens to enter the United States

Illegal entry and re-entry

- Title 8 U.S.C. § 1325: prohibits improper entry by an alien
- Title 8 U.S.C. § 1326: prohibits re-entry of removed aliens

Misuse of visas and other violations

- Title 18 U.S.C. § 1546: prohibits fraud and misuse of visas, permits, and other documents
- Title 8 U.S.C. §§ 1252-1253: involves order of removal of aliens and penalties related to removal
- Title 8 U.S.C. §§ 1321: prohibits persons from failing to prevent the unauthorized entry of aliens

for booking federal prisoners into custody following an arrest. For arrest counts reported in this bulletin, immigration suspects may be counted more than once in a fiscal year if they are arrested multiple times during the period.

Executive Office for U.S. Attorneys (EOUSA): The Legal Information Office Network System database contains information on the investigation and prosecution of suspects in criminal matters opened and concluded and in criminal cases filed and terminated by federal prosecutors.

Suspects may be counted more than once in a fiscal year if they are involved in multiple matters opened and concluded during the period. A matter is defined as a referral in which an attorney spends one hour or more investigating. The lead charge is used to classify the most serious offense at referral and is defined as the substantive statute that is the primary basis of referral.

Administrative Office of the U.S. Courts (AOUSC): This report uses AOUSC data from the Probation and Pretrial Services Automated Case Tracking System (PACTS), which contains information on defendants interviewed and supervised by pre-trial services. These data are used to describe background characteristics of immigration defendants arraigned. Offenses are based on the most serious charged offense, as determined by

the probation officer responsible for interviewing the defendant. The probation officer classifies the offense charged into AOUSC's four-digit offense codes, which are maintained and updated by the AOUSC. For defendants charged with more than one offense, the probation officer chooses as the charged offense the one carrying the most severe penalty or, in the case of two or more charges carrying the same penalty, the one with the highest offense severity. The offense severity level is determined by the AOUSC, which ranks offenses according to the maximum sentence, type of crime, and maximum fine amount. These four-digit codes are then aggregated into the primary offense charges used for this report.

Other resources

FJSP data are available in the Federal Criminal Case Processing Statistics Tool, an interactive BJS web tool that permits users to query the federal data and download the results as a spreadsheet. This tool is available on the BJS website (<https://www.bjs.gov/fjsrc>). It provides statistics by stage of the federal criminal case process, including law enforcement, prosecution and courts, and incarceration. The Department of Homeland Security's Office of Immigration Statistics provides data resources on immigration on their website (<https://www.dhs.gov/immigration-statistics>).

The Bureau of Justice Statistics of the U.S. Department of Justice is the principal federal agency responsible for measuring crime, criminal victimization, criminal offenders, victims of crime, correlates of crime, and the operation of criminal and civil justice systems at the federal, state, tribal, and local levels. BJS collects, analyzes, and disseminates reliable statistics on crime and justice systems in the United States, supports improvements to state and local criminal justice information systems, and participates with national and international organizations to develop and recommend national standards for justice statistics. Jeffrey H. Anderson is the director.

This report was written by Mark Motivans of BJS. Suzanne Strong of BJS verified the report. Elizabeth Buck of the U.S. Marshals Service provided input and review of the Justice Detainee Information System source records. Under funding award 2016-BJ-CX-K044 for the Federal Justice Statistics Program, Abt Associates provided statistical input and review. Contributors included Ryan Kling (Principal Investigator), Chris Cutler, Ari Lewenstein, John Thacker, Omri Drucker, and David Izrael.

Edrienne Su edited the report. Morgan Young and Carrie Epps produced the report.
