**PARENT CONSENT TO CONTINUE WITH PARENT-REPORT INTERVIEW FOR CHILD 0-9 YEARS OLD**

We'd like to ask you some questions about your \_\_\_-year-old's experiences over his/her lifetime and the past 12 months.

As I mentioned earlier, we are conducting a survey for the University of New Hampshire on the experiences of children in the United States. This study is being supported by the U.S. Office of Juvenile Justice. For this study, we will be interviewing 4,000 children and parents across the country to find out about potentially stressful circumstances that children sometimes confront, and how we may better protect kids from dangerous situations. This is an important study that will give us a better understanding of the kinds of problems that children face and help us to better plan for the future needs of children and their families. We would like to interview you concerning your child [child's name]. You have been randomly selected to represent parents of children in [child's name] age group.

This interview will take approximately 30-40 minutes and can be done at any time that is convenient to you. We will be asking you about things that may have happened to [child's name] at school, in your neighborhood, or at home. We will also ask you some questions about his/her health and behavior. This interview is completely confidential; you or your child's name will not be recorded or linked to the answers that you provide. The interview is completely voluntary – you can, of course, decline to participate in the interview or can refuse to answer any particular question. At the end of the interview we will send you a check for \$20 as a token of our appreciation. If you would like to check on the authenticity of this study, I can give you a toll-free number to confirm it – 1-800-XXX-XXXX.

PI1. Could we begin?

### **PARENT CONSENT TO CONTINUE WITH PARENT INTERVIEW FOR ADOLESCENTS AGE 10-17**

Now I have some questions about your child's experiences and health. Your interview will take about 10 minutes. We will be asking you about things that may have happened in your child's school, neighborhood, or home, and about how your child's health has been lately. We assure you that the interview is completely confidential; you or your child's name will not be linked to the answers you provide. Your participation is voluntary, and if there is a question you would prefer not to answer, that's ok. The information you provide will be combined with that of 4000 other families to help us better understand the kinds of risks that children face and how schools and various agencies may better protect children and their families.

If you would like to check on the authenticity of this study, I can give you our toll-free number to confirm it. That number is XXX.

### **CHILD ASSENT**

We would like to ask you to participate in an important study. This is part of a national survey of over 4,000 children and teenagers. We are interested in your experiences, so that we can better understand the kinds of things that young people go through. In this interview we will be asking you some questions about stuff that may have happened in your school, in your neighborhood, or at home. We'll also be asking you about your health and how you've been feeling lately.

You were chosen completely at random to represent the experiences of thousands and thousands of young people your age. We do this by dialing random phone numbers until we find someone the right age. You don't have to participate in this interview if you don't want to, but your help will make a big difference.

The interview will take about 30-40 minutes to complete. We will be asking you some questions about dangerous situations you may have faced and about some personal situations, where you might have been threatened. You can stop the interview at any time. If this is a bad time to talk, I

could call back at a better time for you. To thank you for your help, we will be sending you check for \$20.

Everything you say will be completely confidential. We are not going to tell your parents, your school, or anyone else anything you told us. We are going to be combining your answers with those from thousands of other kids to present a picture of the experiences of young people in the United States.

We would like you to try to answer every question that you can. However, if there is any question that you don't want to answer, that will be OK. Also, if there is any question that you don't understand, please say so. If there are too many people around for you to talk freely, just let me know and I can call back later.

PI77. If you have any questions about the study, I can give you our toll-free number to confirm it. Can we begin now?
