

## Prisoners in State and Federal Institutions on December 31, 1981

National Prisoner Statistics Bulletin SD-NPS-PSF-8, NCJ-86485 March 1983

### U.S. Department of Justice **Bureau of Justice Statistics**

Steven R. Schlesinger Director

Acknowledgments. This report was written by Mimi Cantwell, under the supervision of John F. Wallerstedt, Chief of the Correctional/Detention Studies Branch, Center for Demographic Studies, Eureau of the Census.

Collection and processing of data were conducted in the Bureau of the Census under the general supervision of Evan H. Davey, Demographic Surveys Division; Chester E. Bowie, Chief of the National Prisoner Statistics Branch, directed those activities, assisted by Diane V. O'Brien and Arlene J. Rasmussen.

Carol B. Kalish, Chief of Policy Analysis of the Bureau of Justice Statistics, provided overall program direction.

The report was made possible only by the generous and unstinting assistance of State and Federal correctional officials. Their patience and cooperation in providing the data contained herein are gratefully acknowledged.

### Preface

This report presents data for 1981 on the number and movement of prisoners in all State and Federal correctional institutions. It assesses the sharp growth in prison population during 1981 and surveys developments in the correctional field that could lead to even greater growth. As in past reports, it examines changes in the geographic distribution of prisoners; composition of the inmate population by race, sex, and Hispanic origin; incarceration rates for minorities; and the rates of various types of admissions and releases.

Before 1978, reports in this series focused only on prisoners sentenced to terms of more than 1 year (the "sentenced" population). The reports have been expanded to provide data on the yearend population of inmates with sentences of 1 year or less or with no sentence; however, admission and release data are still restricted to "sentenced" inmates.

Continuing another change made in 1978, this report discusses all prisoners subject to confinement under the jurisdiction of a given correctional system, whether or not they are in its physical custody. Before 1978, reports in this series focused on persons in the physical custody of each system. The impact of this distinction is assessed in Appendix III of Prisoners in State and Federal Institutions on December 31, 1978.

The narrative and most charts in this report are based on the tables in Appendix I, which includes a special table showing the number of persons in the custody of State and Federal correctional authorities at yearend 1981. Appendix II includes a statement on the method of data collection and completeness of the response to various sections of the questionnaire, a facsimile of which is also included. Notes explaining the degree of each jurisdiction's conformity with the criteria and definitions of the National Prisoner Statistics (NPS) program are in Appendix III. A special table in Appendix IV shows the number of prisoners in State and Federal institutions at yearend 1925-81.

This annual report is one of a series of reports prepared under the NPS program, Based on voluntary reporting, the program collects and interprets data on inmates in State and Federal correctional institutions. Initiated by the Bureau of the Census in 1926, the program was transferred to the Bureau of Prisons in 1950 and to the Law Enforcement Assistance Administration in 1971. Upon passage of the Justice System Improvement Act in late 1979, the program was placed in the Bureau of Justice Statistics. Since 1972, the data required for the program have been gathered and processed by the U.S. Bureau of the Census.

### Introduction

The number of prisoners in the United States reached 368,772 at the end of 1981, an increase of some 38,000 over the previous year. The record 12% increase, which followed 4 years of more moderate growth, was higher than that for any year since data were first available in 1925 (figure 1). For the first time, every jurisdiction (the 50 States, the District of Columbia, and the Federal Bureau of Prisons) reported increases over the previous year. For the Federal system, the 15% increase reversed a 3-year period of decline.

By far the greatest increase was among State prisoners sentenced to terms longer than 1 year, the largest and most significant group in the U.S. prison population. With a 4% decline in the number of State prisoners with shorter or no sentences, the makeup of the prison population shifted even more toward long-term prisoners and away from less serious offenders.

Several factors combined to cause the magnitude of the 1981 increase: the numbers admitted to prison were at a record high, increasing 16% over the previous year; the numbers released rose only 3% over 1980. Federal releases declined by 21%, while admissions increased by 2%, 1, both State and Federal prisons, the amount of time served continued to increase, resulting in a "piling-up" effect over time.

The large 1981 increase exacerbated problems of space and capacity. A National Institute of Corrections survey revealed that in the year between October 1980 and October 1981 space was made available for almost 20,000 State prisoners, slightly more than half the total increase in the number of prisoners for 1981. Attempts during the past decade to relieve overcrowding by legally requiring States to provide a minimum square footage for each inmate culminated in a U.S. Supreme Court ruling in mid-1981 (Rhodes vs. Chapman) that upheld double celling in 63square-foot cells. The Court held that cell size could not be used as the sole determinant of prison conditions. Nonetheless, during 1981, 39 States and the District of Columbia were under court order or had litigation pending to remedy overcrowding or other conditions of confinement.

The increases in the number of State prisoners in 1981 caused serious disagreements between some State and local authorities

Change in the total number of State and Federal prisoners, 1974-81

Year	Number	Percent change	
1974	229,721	NA	
1975	253,816	10.5	
1976	278,000	9,5	
1977 Custody	291,667	4.9	
1977 Jurisdiction	300,024	NA	
1978	307,276	2.4	
1979	314,457	2.3	
1980	329,821	4.9	
1981	368,772	11.8	

Note: Before 1977, NPS reports were based on the custody population. Beginning in 1977, they were based on the jurisdiction population. Both figures are shown for 1977 to facilitate year-to-year comparison. NA Not applicable.

Figure 1

about the obligation of local facilities to hold the overflow of State inmates. By yearend, the number of such prisoners reached 6,900 (following 4 years of decline) and the number of States involved in this type of transaction increased to 19, an alltime high.

Among the major factors cited as a determinant of prison population is the widespread revision of sentencing and parole laws in recent years. Fully determinant sentencing, in which the court sets a fixed term of years to be served in full (less any good time) with no possibility of early parole release, is in effect in nine States: California, Colorado, Connecticut, Illinois, Indiana, Maine, Minnesota, New Mexico, and North Carolina. In all other States, the date of release is determined by the parole authority.

In addition, by yearend 1981, at least 46 jurisdictions had some provision for lengthening the sentences of habitual offenders, and almost all provided for some sentence enhancement for the use of a deadly weapon. Many of the sentence enhancement laws relating to habitual offenders and use of weapons, as well as numerous drug laws, are mandatory, that is, they require imprisonment for these types of offenders, eliminating both judicial and parole discretion.

### The prison population at yearend

During 1981, more than 38,000 persons were added to the Nation's prison rolls, almost 3 times as many as during the previous year. The new total of 368,772 State and Federal prisoners is a 12% increase over 1980, the highest percentage increase recorded in the Nation's prisons. The first period of sustained growth in the prison population coincided with the depression of the 1930's; the second spanned the period from the end of World War II to the early 1960's. The 1981 spurt is the high point so far in a third sharp upward trend that began in 1974. For the first time since data became available in 1925, every jurisdiction without exception reported an increase in the number of prisoners. In the Federal system, the increase reversed 3 consecutive years of decline.

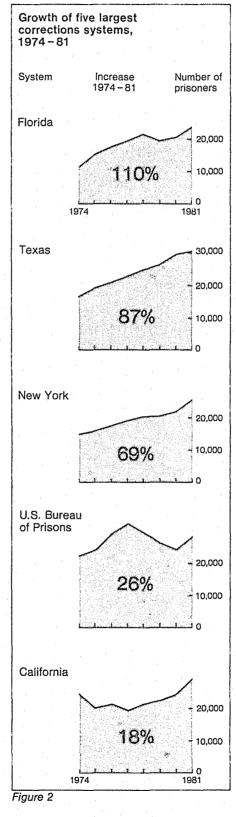

### Reversal of Federal decline

The number of prisoners reported by Federal institutions increased by almost 4,000 inmates during 1981, due largely to the inclusion in Federal counts of almost 2,000 detainees who were actually under the jurisdiction of the Immigration and Naturalization Service but held in Federal prisons.1 As a result of this inclusion, more than half the increase took place among those who were unsentenced. However, even without the sudden influx of refugees, the count grew by 8%. The resulting population of 28,133 inmates was lower than the record high of 32,088 in 1977, but it was some 15% higher than the capacity of the 42 Federal prisons in existence at the end of 1981 (figure 2).<sup>2</sup>

### Three largest States account for one-fourth of inmates

Together, Texas, California, and New York, the Nation's three most populous States, accounted for 23% of all the prisoners in the United States and for more than a fourth of the increase in prisoners under State jurisdiction. For the first time, Texas surpassed the 30,000 mark, alone

<sup>&</sup>lt;sup>2</sup>The capacity of the Federal prison system declined in the 1977-81 interim due to the closing of McNeil Island as a Federal prison.

Percent increase in prison population in States with more than 10,000 prisoners, 1980-81

	Number of prisoners				
State	1980	1981	Increase		
Texas	29,892	31,502	5.4		
California	24,569	29,202	18.9		
New York	21,815	25,599	17.3		
Florida	20,735	23,589	13.8		
North Carolina	15,513	15,791	1.8		
Michigan	15,124	15,157	0.2		
Ohio	13,489	14,968	11.0		
Illinois	11,899	13,206	11.0		
Georgia	12,178	12,444	2.2		
Figure 2	······································				

Figure 3

accounting for almost 10% of the State prison population (figure 3). Yet the growth in Texas was moderate compared to that of the United States prison population as a whole-5.4% vs. 11.5% for all State institutions. California, with 29,202 prisoners, reported a growth of 19% during 1981; New York reported a 17.3% increase. In California, admissions to prison increased by more than 20%, while releases increased by only 7%. In New York, admissions also increased by 20%, but releases declined.

Both California and New York have relatively new sentencing laws that have been cited as factors in recent prison growth. California's law calls for an increase in the terms of offenders who have had prior felony convictions whose current or prior offense was violent, and for an additional 2year sentence if a firearm is used in the crime.

New York's violent-offender law provides for an increased sentence ranging from 4 to 25 years depending on the class of the felony if the offender had a prior conviction for a violent crime within the last 10 years. Additional years are also legislated for the use of a firearm during certain classes of crimes.

In Texas, the sentencing enhancement laws require that the offender be sentenced to the penalty for the next higher offense level if there is a prior felony conviction or if a firearm is used. If there are two prior felony convictions, a felony offender is subject to life imprisonment in Texas.

Florida was the fourth State whose prison population exceeded 20,000. Its growth rate of 14% was due to a one-third increase in admissions, combined with a more modest increase (12%) in releases. Along with other sunbelt States, Florida's general population is growing rapidly, thereby contributing to the likelihood of larger prisoner totals. Moreover, parole guidelines that establish presumptive release dates based on offense seriousness, prior record, and other factors seem to be producing longer periods of imprisonment for new admissions.

<sup>&</sup>lt;sup>1</sup>The refugees, many of whom were already detained in the Federal system at yearend 1980, were not included in the jurisdiction counts for that year because they are under the jurisdiction of an agency other than the Bureau of Prisons. However, given the large size of the group and the fact that they are under Federal autherities, they are included in the yearend count beginning December 31, 1981.

### Five States held between 10,000 and 20,000 inmates

Five States held between 10,000 and 20,000 prisoners at yearend 1981. All of them registered increases below the national average of 12% for State prisons. Illinois and Ohio each had 11% increases; Georgia, Michigan, and North Carolina reported increases of 2% or less.

Illinois' high percentage growth occurred despite an 82% reduction in its short-sentence population, whom officials said were remaining in local jails because of overcrowding at State facilities. Ohio had a big increase in both new court commitments and in returned violators of parole or other conditional release, while at the same time experiencing an overall 2% decline in releases.

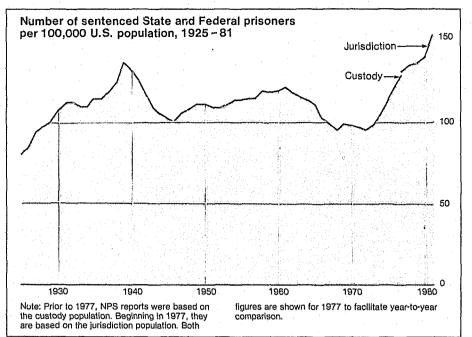

The relatively low percentage increases in the other three States were attributable to various factors. In Georgia, releases increased by 12% due to overcrowding and almost kept pace with the 14% increase in admissions. More releases in Michigan, particularly more paroles, combined with an increase of only 5% in admissions to keep the overall growth rate low. North Carolina's 20% increase in releases would have caused a net decrease in population had it not been for relatively few releases the previous year. In North Carolina, an effort was made to reduce a seriously overcrowded prison population by expediting paroles and expirations of sentences through grants of extra good time.

### Record number of high percentage increases

Not only was 1981 the first year in which every jurisdiction experienced an increase in its prison population, but it was also a record year for the number of States registering markedly high percentage growth. In all, 38 States had increases of 10% or more, including 10 States with 20% or higher: West Virginia (25%), Alaska (24%), Hawaii (23%), Utah (22%), Massachusetts (22%), New Hampshire (22%), Maine (22%), Washington (21%), Maryland (21%), and Indiana (20%). In general, State authorities cited a rise in admissions to "get tough" attitudes on the part of the public as evidenced in legislative, police, and court actions.

### Few States experience low growth

Only 5 States had increases under 5%: Michigan (0.2%), Minnesota (1.1%), North Carolina (1.8%), Georgia (2.2%), and Oregon (3.7%). Georgia, Michigan, and North Carolina experienced their relatively low growth despite ranking high in overall prison population, with over 10,000 prison inmates each. Minnesota and Oregon, with considerably smaller prison pop-

ulations, held the line on prison growth by various means. Both had negative growth the previous year. In Minnesota, mid-year changes in sentencing policy introduced sentencing guidelines and temporarily reduced admissions. Oregon has kept its population growth at a moderate level by releasing inmates to community programs instead of housing them in residential work-release facilities.

### Per capita rate at record high

The acceleration in the rate of incarceration—the number of prisoners per 100,000 U.S. population—during 1981 was similar to that experienced during the mid-1970's (figure 4). The fifth consecutive record high incarceration rate for total number of prisoners, including those sentenced to more than I year and those with shorter or no sentences, was recorded at the end of 1981.3 For sentenced prisoners alone, the category used for purposes of historical comparison, the figure was 153.

Incarceration rates vary markedly among the States due to a wide range of factors including degree of urbanization within the State, age/sex composition of the population, percentage of transients, and the administrative structure of correctional and other systems for detaining offenders. The South by far had the highest rate, incarcer-

### Number of sentenced prisoners per 100,000 U.S. population, by jurisdiction and region, 1981

Louisiana	211	216	
Texas	210	210	
Delaware	183	208	

Figure 6

ating 201 prisoners per 100,000 persons in the region, up from the yearend 1980 rate of 189. The other three regional rates also exceeded 1980 figures by a wide margin (figure 5). During 1981, two States were added to the seven in which the rate of sentenced prisoners per 100,000 population exceeded 200 (figure 6). Rates were lowest in North Dakota (33), New Hampshire (42), and Minnesota (49) (figure 7).

<sup>3</sup>Throughout this report "sentenced inmates" denotes those with a maximum sentence of more than I year, i.e., excluding those with a lesser or no sentence. Inmate-to-population ratios are based on sentenced inmates in order to facilitate comparison with previous years and to facilitate comparison of the six States with combined jail/prison systems to the other 44. The District of Columbia, as a wholly urban area, is excluded from the rankings.

### Record number of jail-housed prisoners

For the first year in the six in which data have been recorded, the number of State prisoners housed in local jails increased (figure 8). The number of States that use this method to stem overcrowding rose from 17 in 1980 to 19 in 1981 (figure 9). For the first time, California and Utah reported having State prisoners in local jails. California reported 600 such prisoners, amounting to 2% of its total.

For the Nation as a whole, 2% of all State prisoners were being held in local jails. In the South, the figure was 3.2%. Mississippi and Alabama, both involved in litigation regarding overcrowding and prison

Figure 9

conditions, held by far the greatest proportion of their prisoners in local jails, 25% and 19% respectively. The proportion was 12% in New Jersey, 8% in Louisiana, 6% in South Carolina, and 5% or less in each of the other 14 States. Of the 17 States that held such prisoners both in 1980 and 1981, 7 held a larger number at yearend 1981, with the remainder decreasing the numbers or staying the same. New Jersey's increase from 200 to 995 followed a large increase the previous year and was attributed to the effects of a new penal code enacted in late 1979. Large decreases in jail-housed populations also were reported by Louisiana, Maryland, and Massachusetts.

### Decline in short/no sentence group

The number of State inmates sentenced to 1 year or less or with no sentences declined by 4% during 1981. The decline followed a 16% increase in this category in 1980 that reversed 3 years of decline (figure 10). Once again pressures on State institutions to release persons early because of overcrowding was a major factor in the decline in the number of persons in this category. Four in every 10 persons with short or no sentences were held in the 7 States with combined jail/prison systems,

the custody population. Beginning in 1977, they are

based on the jurisdiction population. Both figures are shown for 1977 to facilitate year-to-year

while another 13% were unsentenced narcotics users under civil (noncriminal) commitment in California. Another large component (10%) was from North Carolina, which requires adult misdemeanants with a minimum term of 181 days or more to serve their time in State facilities rather than a local jail.

In Federal institutions, the number of those with short sentences rose only slightly, but the unsentenced group tripled because of the inclusion in the 1981 count of some 2,000 persons held under the jurisdiction of the Immigration and Naturalization Service rather than the Bureau of Prisons. Most of the 2,000 are Cubans who arrived during summer 1980 and who are being held at the Federal penitentiary in Atlanta, technically pending deportation on the grounds that they had committed crimes while in Cuba.

### Number of women increased in every category

The number of women in State and Federal institutions increased by 15% to 15,437 during 1981, compared to a 2% increase during 1980. Growth occurred both at the State and Federal levels and among those sentenced to more than 1 year and those with shorter or no sentences. The proportion of women in U.S. prisons remained at 4%.

The increase among those sentenced to more than 1 year (15%) marked a reversal of 5 years of decline in the growth rate among women in this sector (figure 11). In general, the patterns of growth for women prisoners have been similar to those for men. The number of women declined during 1981 in only eight States and increases of more than 20% were not uncommon, even among States with large population bases of women prisoners.

As has been the case historically, the highest regional increase for women was in the Northeast (27.5%), the region with the fewest women prisoners. The South, with the largest number of women, had a 15.3% increase, followed by the North Central region (13.0%) and the West (10.7%). In all, eight States held more than 500 women, including two, Texas and California, with more than 1,000.

The large increase in the number of women in prison at yearend 1981 reflects in part the increased participation of females in economic crimes during the 1970's. Arrests

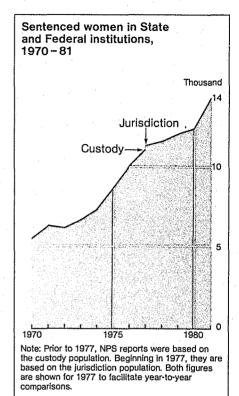

Figure 11

for fraud and embezzlement, for example, were up over 10% in 1979 alone. For the 1971-80 period, the increase in the number of women arrested for serious property crimes was 44%, almost double the increase registered for men during the same period.

### Racial composition unchanged

Data on race, available for the fourth year in this series, indicated that the proportions of inmates in each racial group have remained substantially unchanged since 1978. Whites comprise a bare majority, 52%; blacks, 46%; and American Indians, Alaska natives, Asians, and Pacific Islanders. 1%. Data on race were not available for 1% of the prison population.

The proportion of blacks in the prison population was almost 4 times their share of the U.S. population in 1981—12%. Their distribution among State prison systems followed to some extent national patterns of racial composition, with the most black prisoners being held in the South and the least in the West (figure 12). However, relative to their share of the general population, blacks in the South were held at a rate that was two and a half times larger

### Proportion of blacks in prison population and U.S. population,

		Prison population		
Region	Number	Percent	population	
United States	168,129	46	12	
Northeast	26,660	50	10	
North Central	33,813	47	9	
South	84,441	53	19	
West	14,417	26	- 5	

Figure 12

than their share in the general population, while the share of black prisoners in the Nowheast, North Central, and West exceeded the proportion of blacks in regional totals by a factor of five.

Black prisoners were particularly concentrated in the southern jurisdictions that have high percentages of blacks in their general populations. In the District of Columbia blacks represented 95% of the prison population and 70% of the general population; in Louisiana 72% and 29%, in Maryland 72% and 23%, and in Mississippi 69% and 35%. Other States with at least 60% of their inmate populations black were New Jersey (64%), Alabama (62%), Illinois (62%), and Delaware (60%). In each of these States, the black share of the general population exceeded the national average of 12%.

As in previous years, State prisoners were more likely than Federal prisoners to be black (47% vs. 35%). Half the female and 46% of the male prisoners were black. This imbalance prevailed at both State and Federal levels and in each of the four major geographic regions.

American Indians or Alaska natives made up more than 30% of the inmates in Alaska's combined jail/prison system but only 16% of the State's general population. In Montana, they made up 20% of the State's prison inmates but only 5% of its general population.

About two-thirds of the 1,170 Asians or Pacific Islanders in U.S. prisons were held in Hawaii. Among prisoners in that State, 70% were Asians or Pacific Islanders, 25% were white, 4% were black, and 1% were American Indians or Alaska natives,

### Incarcaration rates highest for black males

The number of prisoners per 100,000 U.S. population was considerably higher for blacks than for whites or other races (figure 13). For black males, the rate averaged 6 times that for white males, a differential that prevailed in most States. In four States, the incarceration rate for black males exceeded 2,000 per 100,000 blacks in the general population: Delaware (2,160), Nevada (2,189), Nebraska (2,213), and Arizona (2,487). Except for Delaware, these States had relatively few blacks in their general populations.

The rate averaged 2 ½ times higher for American Indian or Alaska native than for white males, and it was even higher in States where the two minorities resided in relatively large numbers—Alaska, Arizona, Minnesota, Montana, North Carolina, Oklahoma, Oregon, South Dakota, Washington, and Wisconsin.

The incarceration rate was far lower for females than for males (13 vs. 321 per 100,000 U.S. resident population). The rate for males exceeded that for females by 25 times among whites, by 23 times among blacks, and by 16 times among American Indians and Alaska natives. The rate was far higher for black females than for white females (55 vs. 8 per 100,000).

### Hispanics number 1 in 10 prisoners

Coverage of the 1981 Hispanic prison population improved considerably over the previous 2 years. In 1981, 80% of all inmates could be classified as to Hispanic origin, and 42 of the 52 jurisdictions distinguished Hispanic from non-Hispanic inmates, including 6 that estimated their data and 5 that reported partial data.

One in every 10 prisoners for whom ethnic data were reported was Hispanic. The Hispanic proportion was higher in Federal than in State institutions (16% vs. 9%), and it was higher among male than among female prisoners (10% vs. 7%). New Mexico had by far the largest proportion of prisoners of Hispanic origin (52%), followed by California (25%), Colorado (25%), and Arizona (24%). Five other States had Hispanic inmate shares of between 10% and 20%: New York (20%), Texas (19%), Utah (19%), Connecticut (15%), and Idaho (10%) (figure 14).

Incarceration rates by jurisdiction, region, and race, 19811

				1
Region/ institution	Total <sup>2</sup>	Blacks	Whites	American Indian or Alaskan Native
United States	163 <sup>3</sup>	635	101	233
Federal	12	33	8	31
State	150	602	93	202
Northeast	109	550	62	37

	51 25 25 24 20 19 19

<sup>1</sup>Number of Hispanic inmates per 100,000 Hispanics in the residential population.

Figure 14

Among the 27 States for which incarceration rates on the Hispanic population could be calculated, the data suggest that Hispanics are more likely than whites but less likely than blacks to be incarcerated.<sup>4</sup> As in the case of blacks and whites, the rate of incarceration for Hispanic women was far lower than that for men. In general, States that have high proportions of Hispanies in their inmate populations also had high incarceration rates for the Hispanic population.

<sup>4</sup>Rates of incarceration were not calculated for States that could not provide figures on Hispanic inmates, had fewer than 10 Hispanic inmates, or had fewer than 25,000 Hispanics in their general populations.

### Admissions and releases

During 1981, 212,264 persons were admitted to and 174,955 released from State and Federal correctional facilities. Admissions increased by nearly 30,000 (16%) from 1980, while releases were up by slightly more than 5,000 (3%). Thus, there were more than five times as many admissions as releases. At the State level, admissions increased by an average of 17%, but almost half the States exceeded the average. Admissions declined in only four States. Reversing a 3-year declining trend, the number of Federal admissions increased by

Federal releases were down 21%, but State releases were up 5%. Among the four major regions, only the Northeast showed a decrease in the number of releases—down 10% (more than 2,000 inmates). Five States in that region— Connecticut, Maine, New Jersey, New York, and Vermont-released fewer inmates than in 1980. Of the 17 States that had fewer releases in 1981 than in 1980, 5 had decreases of at least 20%: Connecticut, Hawaii, Maine, Maryland, and New Jersey. Releases were up in 33 States and the District of Columbia; 6 States had increases of 25% or more: Iowa (50%), New Mexico (47%), Delaware (33%), Louisiana (28%), Texas (26%), and Arizona (26%). No State released more persons than it admitted.

### Record high admission/release ratio

The admissions to releases ratio for 1981 was 12.1 to 10.0, higher than in any year for which data are available (figure 15). The 16% increase in the Federal prison population is reflected in an admission/release ratio of 12.2 to 10.0 compared to an 11.3 to 10.0 ratio for State institutions. For the first time, every jurisdiction admitted more prisoners than it released. Admission/ release ratios in the States ranged from 10.0 to 10.0 in Michigan to 22.1 to 10.0 in Hawaii, with eight States recording a ratio of at least 14.0 to 10.0.

### Regional increase highest in West

Admissions to State prisons increased in the West by 24%, in the North Central region by 20%, in the South by 15%, and in the Northeast by 14%. The greatest increases were in New Mexico (88%), Delaware (71%), Mississippi (49%), and Illinois (49%), while 11 more States had

Ratio of admissions to releases, 1974 - 81

Figure 15

increases of 25% or more. In New Mexico, the increase was due largely to an influx of prisoners who had been held elsewhere awaiting admission in the wake of its 1980 prison riot. Delaware's high figure may have resulted from a new computerized system of reporting. Mississippi increased its prison capacity by 1,700 beds during 1980 as the result of a court order. Illinois' increase resulted from a massive (149%) increase in the number of parole or other conditional release violators returned, a phenomenon resulting partially from the large number of prisoners released conditionally in earlier years due to overcrowd-

Six States admitted more than 10,000 prisoners during 1981: California (18,024), Texas (16,750), Florida (13,579), New York (12,481), Illinois (11,987), and Ohio (10,567). These six States together accounted for 42% of all State admissions.

### New court commitments account for 3 in 4 admissions

Three quarters of all admissions to prison during 1981 were new court commitments-that is, persons convicted on a new charge rather than recommitted for parole violation, loss of an appeal, or other action stemming from an offense for which they had already served time. The second major type of commitment, 17% of the total, was the return of violators of parole or other forms of conditional release. Escapees and AWOLs numbered 4% of all admissions, with the remainder being persons transferred from other jurisdictions and returns from appeal or bond. About 1% of admissions fell into a variety of other admission categories.

### Biggest increase was in returned violators

The number of returned violators of parole or other conditional release increased by 24% during 1981 over 1980. In addition to parole violators, many of this group were undoubtedly persons who had violated the conditions of supervised mandatory release, a form of release that has been used increasingly since 1979. Both returned escapees and AWOLs and transfers from other jurisdictions increased by 15% over 1980, while new court commitments increased by 13%. Increases of less than 5% occurred in the other categories.

### Most admitted directly from court

In 1981, the majority of admissions in most States were new court commitments, which accounted for a great majority of the growth in the prison population. The number of such commitments increased in all but six States (Connecticut, Louisiana, Maine, Michigan, New Mexico, and Oregon). Seven States expanded the number by 30% or more: Delaware (49%), West Virginia (43%), Utah (43%), Massachusetts (36%), Montana (33%), Mississippi (32%), and New Jersey (32%). Delaware's increase may be due partly to its change in reporting methods. Massachusetts also changed its reporting system and for the first time included females formerly held in county jails. The increase in Massachusetts has also been attributed to an increase in crime in the State. New Jersey's speedy trial program, which has been in effect since 1980, added to the growth in its new court commitments.

During the year, new court commitments exceeded 1,000 in four States: California (2,585), New York (1,851), Florida (1,808), and Texas (1,015). Another 10 States admitted at least 500 new court commitments. Growth in this type of admission was highest in the West (20%), followed by the Northeast (15%), the South (13%), and the North Central region (11%).

New court commitments were the most numerous type of admissions in the South (80%), and ranged between 70% and 72% in the three other regions. In five States (Utah, Indiana, Louisiana, West Virginia, and Wyoming), 90% of all admissions were new court commitments, but in the District of Columbia and New Mexico, both of which had large numbers of trans-

fers from other jurisdictions, less than 50% of all admissions were new court commitments.

### Illinois had record number of returned violators

Returned violators of parole, supervised mandatory release, or probation were the second largest group of admissions in 1981; they accounted for 17% of the total. More than a third of all admissions in Connecticut (39%), Illinois (34%), and Minnesota (34%) were in this category.

By far the largest percentage increase among returned violators occurred in Illinois (149%); this was attributed to the large numbers of persons released conditionally in previous years. Four other States (Alabama, Arizona, Iowa, and New Mexico) also more than doubled the number of returned violators over the previous year. Such admissions decreased in 10 States.

The largest number of returned violators (4,067) was in Illinois, followed by California (3,885), and New York (3,058). Admissions of this type exceeded 1,000 in six other States: Texas (2,780), Florida (2,159), Ohio (2,013), Michigan (1,152), Connecticut (1,052), and Pennsylvania (1,037).

Sentencing laws enacted in recent years have substantially altered the various means of release from prison, but the proportion of returned violators should not change substantially as long as most releases continue to be conditional, that is, parole, supervised mandatory release, or probation. Most States that have shifted away from parole have increased the number of supervised mandatory releases; as a result, the pool of convicts in the conditional release category has not changed radically.

### Escapes increase in State institutions

Escapees, AWOLs, and returns from such unauthorized absences accounted for about 1 in every 10 admissions and departures from State and Federal institutions, a figure that has remained basically unchanged from previous years. At the national level, returned escapees and AWOLs increased by 15% over 1980, while the number who escaped or who were AWOL increased by 10%. Escapes and AWOLs from Federal

Releases f	rom	State	and F	ederal
institutions	, by	type,	1980	and 1981

Type of release	1980	1981
Conditional	73%	71%
Unconditional	15	16

Other	5	6.
Transfers	2	1
Deaths	0.4	1

Figure 16

prisons declined by 38%, but such departures from State institutions increased by

States with high proportions of returned escapees and AWOLs included Washington (18%), Oregon (19%), and Michigan (22%). At least 10% of all admissions were returned escapees or AWOLs in five other States: Utah (14%), Vermont (14%), Iowa (11%), Colorado (10%), and Massachusetts (10%). All of the eight States with high proportions of returned escapees and AWOLs, except Massachusetts, also had high proportions in this category in 1980. The largest number of returned escapees or AWOLs was in Michigan (1,563), followed by North Carolina (725), Florida (698), and Washington (546).

Michigan also reported the highest number of escapes and AWOLs (1,668), followed by Florida (782), North Carolina (669), Washington (572), and Oregon (544). Michigan, Oregon, Utah, and Washington reported that at least 20% of their departures were escapes or AWOLs. North Dakota and Wisconsin reported no escapes or AWOLs for 1981; Alaska, Hawaii, Illinois, Nebraska, South Dakota, and West Virginia reported fewer than 10.

### Most releases conditional, but type varied at State and Federal level

In both the Federal and State systems, conditional releases predominated, but Federal authorities have traditionally made greater use of unconditional release than State authorities. Conditional releases accounted for 71% of all releases (73% in State systems; 52% at the Federal level); unconditional releases accounted for 16% (15% at the State; 27% at the Federal level) (figure 16).

For State institutions, however, the type of conditional release continued to shift away from parole toward supervised mandatory

release, which is required by statute at some point prior to expiration of sentence but subject to supervision while the sentence remains in force. Among other forms of departure at the national level, escapes and AWOLs comprised 5%; transfers to other jurisdictions, 1%; deaths, less than 1%; and other releases, 6%.

### Paroles continue downward trend

Both the numbers and relative use of parole declined during 1981. Its proportion, on a downward trend since 1978, was 48% of all releases in 1981. This occurred largely because of the decline in its use in State, rather than Federal, institutions (figure 17). Regionally, parole was least used in the West, only 28% of all releases vs. 47% in the North Central region, 50% in the South, and 64% in the Northeast.

Parole continued to be the major form of release in most States, and comprised 3 of every 4 releases in Minnesota, New Hampshire, New Jersey, North Carolina, and North Dakota. The use of parole, both relatively and in absolute numbers, dropped significantly in Indiana and Maine, as a result of recent laws abolishing it, leaving its use to only inmates sentenced under old laws. Arizona, Louisiana, and Wisconsin increased the use of parole by at least 40%; in these three States and in Iowa, the number of new parolees increased by at least 60% over 1980.

### Use of mandatory release increases

During 1982, supervised mandatory releases increased in number and as a proportion of all releases (19%), filling the gap left by the declining use of parole in many States. Of the 16 jurisdictions that used this form of release in 1981, 10 increased the number and 6 decreased the number. This form of release accounted for at least half of all releases in California (92%), Alaska (58%), Illinois (55%), and Indiana (54%).

Probation continued to make up about 3% of all releases from State institutions, but the Federal system reported no releases on probation. Its use was much higher than the average in four States: Idaho (48%), Vermont (48%), Hawaii (30%), and Kansas (26%). Idaho and Kansas, though not combined jail/prison States like Hawaii and Vermont, have traditionally made extensive use of probation.

## Major types of releases from State institutions, 1974-81

Year	Parole	Probation	Supervised mandatory release	Sentence expira- tion
1974*	60%	2%	6%	17%
1975*	59	3	4	16
1976	59	3	5	16
1977	63	3	5	- 14
1978	62	3	5	15
1979	53	3	15	14
1980	51	3	17.	13
1981	48	3	19	12

\*Adjusted to exclude authorized temporary absences to conform with later years.

Figure 17

### Commutations increase in Georgia

In State institutions, expirations of sentence accounted for 12% of all releases, compared to 26% at the Federal level, which makes lesser use of parole. Expirations of sentence occurred in every State except Alaska and Kansas. At least half of all releases in Louisiana, Maine, and Nebraska were expirations of sentence; all three States had low parole use.

Commutations increased from 698 in 1980 to 3,394 in 1981. Almost all commutations (95%) were granted in Georgia and Oklahoma, where they accounted for 39% and 16%, respectively, of all releases. In Georgia, the high number was attributable to mass releases to relieve overcrowding.

### Deaths up, death rate down

The number of deaths in State and Federal prisons increased by 9% over 1980 to 791. The death rate for the Nation's prisons declined from 221 to 214 deaths per 100,000 prisoners, largely because 1980's rate was inflated by the inclusion of 33 deaths resulting from a major uprising in New Mexico's State prison. The highest number of prisoner deaths per 100,000 U.S. population was in the West (237), followed by the South (221), the North Central region (202), and the Northeast (193).

The death rate was higher in State facilities (215) than in Federal prisons (206), but the number of deaths in Federal prisons increased by 45% over 1980 (vs. a 7% increase for State institutions). The Federal increase probably reflected in part the higher prison population held during 1981. The largest increase in the number of

deaths was in Michigan (51 vs. 7 in 1980). Connecticut had no prison deaths in 1980, but reported 20 in 1981.

Of the 73% of deaths for which cause was reported, 65% were attributed to natural causes, 18% were caused by another person, 13% were suicides, and 4% were accidental. The 76 suicides included 1 woman in Florida. There was one execution during 1981, in Indiana.

NOTE: See Appendix II, Questionnaire, for category definitions and Appendix III, Explanatory notes, for State-by-State variations from definitions. Federal and U.S. total counts include unsentenced persons held under the jurisdiction of the Immigration and Naturalization Service rather than the Bureau of Prisons. Such persons were excluded from December 31, 1980 counts. See Appendix III, Explanatory notes, for details.
\*Not definable.

Prisoners in State and Federal Institutions on December 31, 1981 13

NOTE: See Appendix II, Questionnaire, for category definitions and Appendix III, Explanatory notes, for State-by-State variations from definitions.

1 Prisoners in local jails are not considered by the State to be under its jurisdiction. For the purposes of this table, however, they are included in the total State prisoner count used to calculate the percentage of State prisoners held in local jails.

NOTE: See Appendix II, Questionnaire, for category definitions and Appendix III, Explanatory notes, for State-by-State variations from definitions. In addition to the 10 jurisdictions which could not provide data on Hispanic origin, 6 reported estimated figures (Arkansas, Colorado, Idaho, Indiana, Nevada, Texas, and Vermont) and 5 reported Hispanic origin for only a portion of the prison population (California--Mexicans only, Michigan--Hexicans only, New York--Puerto Ricans only, Ohio--custody only, and the Federal system--sentenced inmates only).

NA Data not available.

Table 11 (Yearend 1981)
Number of Hispanic prisoners under State and Federal jurisdiction per 100,000 Hispanic population, by sex

# Appendix II

# Data collection method and questionnaire

Data in this report are based on yearend 1980 and 1981 inmate counts and on enumerations of prisoner transactions during 1981. Historical data are taken from earlier studies in the series. Data on race were provided by all jurisdictions and mortality figures by the vast majority. Data on Hispanic origin were available for about 80% of all inmates, yielding useful, if incomplete, findings. Data differentiating AWOLs from escapees and parole violators with new sentences from those without new sentences were slightly improved over last year, but they are still insufficient to develop analytical findings.

As in past years, a standard questionnaire was used to collect data on prisoners from State authorities and the Federal Bureau of Prisons. The questionnaire (NPS-1, Summary of Sentenced Population Movement—1981) is shown on the following pages. The cutoff date for receipt of information was March 16, 1982.

In each jurisdiction, the questionnaire was completed by a central agency reporting for institutions within the correctional system. The Bureau of Prisons supplied data on Federal institutions. Because the data were derived from a complete enumeration rather than a survey, they are not affected by sampling error.

Response errors were held to a minimum by a systematic telephone followup and, where necessary, other control procedures. Thus, the yearend counts generally are considered reliable. Because of the absence of standard administrative and recordkeeping practices among the States, detailed in Appendix III, data on admissions and departures are not always entirely comparable across jurisdictions. Standard NPS definitions are given in the questionnaire, and differences from these definitions observed in individual State responses are noted in Appendix III.

Form Approved: O.M.B. No. 43-R0590

NOTICE - These data are being collected in accordance with the 1973 Crime Control Act.

(Please correct any error in name and address including ZIP code)

# FROM THE ACTING DIRECTOR **BUREAU OF THE CENSUS**

The Bureau of the Census has been requested by the Bureau of Justice Statistics (BJS), formerly LEAA, to collect data annually on inmates of State prisons. The program, authorized by title 42, United States Code, section 3763, is designed to collect summary data on movements into and out of each system's jurisdiction by adults or vouthful offenders whose maximum sentences are greater than 1 year.

The report period covers January 1, 1981, through December 31, 1981. Please complete and return the report by March 16, 1982, to expedite timely publication of the data.

Historically, a major drawback of all national correctional studies has been their inability to provide researchers with comparable data for States due to differing definitions and reporting procedures. Your efforts in using our definitions when completing this form will greatly help in overcoming this deficiency. Where this is not possible, please let us know the specific differences so that we can inform data users.

The figures posted in "1980" columns were transcribed from the NPS-1 report submitted last year.

Should you have any questions regarding the completion of this voluntary report, please call collect for assistance on (301) 763-5082.

Sincerely,

Daniel D. Levine

DANIEL B. LEVINE

# INSTRUCTIONS

### COVERAGE

In this report, you are asked to report populations and movements of all inmates sentenced to a maximum of at least one year and one day and admitted to or released from the **jurisdiction** of the State prison system, even though they may be housed in another State or in a Federal institution or in a county facility. For example, you should report the admission or release of prisoners sentenced for offenses in your State but who were housed in another State for safekeeping or the admission or release of women sentenced for offenses in your State but housed in another State because your State does not operate a female facility. You should not report the admission or release of inmates your State was merely housing for other States.

**SPECIAL NOTE** — Include the populations, admissions, and releases of State inmates held in local jails as a direct result of overcrowding in State facilities only if your State considers these inmates under State jurisdiction while they serve in local jails.

# **ADMISSIONS**

- a. New court commitments Include all inmates who were admitted with all new sentences, that is, these inmates were not readmitted for any sentences. This category includes probation violators entering prison for the first time on the probated offenses. Do not include parole violators with new sentences as new court commitments.
- b. Parole violators with new sentences Include all parolees returned with new sentences.
- c. Other conditional release violators with new sentences — Include all conditional releases (other than parole) returned with new sentences, for example, returns from shock probations, from supervised mandatory release, etc.
- d. Parole violators only, no new sentences Include all parolees returned only for formal revocations of parole which were not accompanied by new sentences. If the parole was not formally revoked, that is, the parolee was held only temporarily pending a hearing, no admission occurred for NPS purposes.
- Other conditional release violators only, no new sentences — As for 2d, substituting conditional release violator for parole violator.
- f. Transfers from other jurisdictions Include all inmates transferred to this State's jurisdiction to continue sentences already in force. Do not report the admission if your State does not acquire jurisdiction. Do not report movements from prison to prison within your State.

### ADMISSIONS - Continued

- g. AWOL returns, with or without sentences Include all returns from AWOL, that is, failures to return from authorized temporary absences such as work furlough, study release, mercy furlough, or other authorized temporary absence.
- h. Escapee returns, with or without new sentences Include all returns from escape, that is, unlawful departures from a State correctional facility or from the custody of State correctional personnel.
- i. Returns from appeal/bond Include all inmates reinstated to correctional jurisdiction from long-term jurisdictional absences on appeal or bond. Do not report returns from short-term movements (that is, less than 30 days) to court (that is, where the State retains jurisdiction).
- j. Other admissions Include all other admissions not covered by the above categories. Please specify the nature of these admissions in the "Notes" section on page 4.

# RELEASES

**Unconditional** — An unconditional release occurs only if the released inmate cannot be reimprisoned for any sentence for which he was in prison.

- a. Expirations of sentence Include all inmates whose maximum court sentences minus credits have been served.
- b. Commutations Include all inmates whose maximum sentences have been changed (lowered) to time served to allow immediate unconditional release.
- c. Other unconditional releases Include all other unconditional releases not covered by the above categories. Please specify the nature of these releases in the "Notes" section on page 4.

**Conditional** — A conditional release occurs if the released inmate, upon violating the conditions of his release, can be imprisoned again for any of the sentences for which he was in prison.

- d. Probations Include all inmates who have been placed under probation supervision and conditionally released. Include all shock probation releases.
- e. Supervised mandatory releases Include all inmates who must, by law, be conditionally released. This type of release may also be called mandatory conditional release.
- f. Paroles Include all inmates conditionally released to parole. Enter only releases officially entitled "parole."
- g. Other conditional releases Include all other conditional releases not covered by the above categories. Please specify the nature of these releases in the "Notes" section on page 4.

FORM NPS-1 (7-24-81)

# INSTRUCTIONS - Continued

# **RELEASES** — Continued

### Death

- h. Executions Self-explanatory
- i. Illnesses/natural causes Self-explanatory
- j. Suicides Self-explanatory
- k. Accidental injury to self Include all inmates who accidentally caused their own deaths (for example, a fall from a ladder, mishandling electrical equipment).
- I. Death caused by another person include all inmates whose deaths were caused accidentally or intentionally by another inmate or prison personnel.
- m. Other deaths Include all other deaths not covered by the above categories. Please specify the nature of these deaths in the "Notes" section on page 4.

# Other Releases

- n. AWOLS Include all failures to return from an authorized temporary absence such as work furlough, study release, mercy furlough, or other authorized temporary absence.
- o. Escapes from confinement Include all unlawful departures from a State correctional facility or from the custody of State correctional personnel.
- p. Transfers to other jurisdictions Include all inmates who were transferred from this State's jurisdiction to another to continue sentences already in force. Do not report the release if your State does not relinquish jurisdiction. Do not report movements from prison to prison within your State.
- g. Releases to appeal/bond include all inmates released from correctional jurisdiction to long-term jurisdictional absences on appeal or bond. Do not report short-term movements (that is, less than 30 days) to court (that is, where the State correctional systems retains jurisdiction).
- r. Other releases Include all other releases not covered by the above categories. Please specify the nature of these releases in the "Notes" section on page 4.

# **JURISDICTION POPULATION DECEMBER 31**

Include all inmates under State jurisdiction on December 31, regardless of location. Do not include other jurisdictions' inmates (for example, inmates from other States, pre-trial detainees) merely housed in your prisons. These inmates, however, are enumerated below in item 6, "Custody Population."

**CUSTODY POPULATION DECEMBER 31** 

Include all inmates in the State's custody, that is, housed in State correctional facilities on December 31. Do not include State inmates housed outside State prison facilities (these are reported under "Jurisdiction Population," item 5, above). Include other jurisdictions' inmates (for example, inmates from other States, the courts, local jails) housed in your State's facilities.

# **OVERCROWDING DECEMBER 31**

Include all inmates housed in local jails on December 31, as a direct result of State prison overcrowding. Do not include inmates held in local jails for other reasons, (for example, work release, court appearance, etc.). Indicate whether or not these inmates are included in the 5d, "Total Inmate Population - Jurisdiction Population December 31." total.

# RACE

- (1) White A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.
- (2) Black A person having origins in any of the black racial groups of Africa.
- (3) American Indian or Alaskan Native A person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition.
- (4) Asian or Pacific Islander A person having origins in any of the original peoples of the Far East. Southeast Asia, the Indian Subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.
- (5) Other Any other race not covered by the above categories. Please specify the races on the form below.
- (6) Not known Any inmate whose race is unknown should be included here.

# **ETHNIC ORIGIN**

- a. Hispanic A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race.
- b. Not Hispanic A person not covered by the above category.
- c. Not known Any one whose ethnic origin is unknown should be included here.

# Appendix III

# **Explanatory notes**

These notes (1) point out deviations from the standard NPS definitions of admissions and release categories published in the 1981 questionnaire, (2) give details on the content of "other" admission and release categories, and (3) call attention to revisions to data that should be taken into account when comparing 1980 and 1981 figures.

As a rule, State inmates housed in local jails because of overcrowding are considered to be under State jurisdiction; only exceptions to this rule are noted. States retaining jurisdiction over inmates housed in local jails are shown in table 5 of Appendix I. To balance the yearend 1980 count with the yearend 1981 count, some States included an adjustment residual in their admission or release figures.

### Alabama

Yearend jurisdiction counts for 1980 are revised from those published in the 1980 report. Persons housed in local jails accounted for the differences between jurisdiction and custody counts for 1981.

New court commitments: Includes some splitsentence violators and some parole violators with new sentences.

Other admissions: Type not specified and an adjustment residual.

Other unconditional releases: Unconditional court-ordered releases.

Other conditional releases: Discretionary leave.

Other releases: Type not specified and an adjustment residual.

# Alaska

All data include both jail and prison inmates (prisons and jails form an integrated system). Admission and release figures are estimates based on 1980 data. The large proportion of State inmates held in Federal prisons account for the differences between the 1981 jurisdiction and custody counts.

Parole violators, with new sentence: Includes parole violators with no new sentences and other conditional release violators with and without new sentences.

Other admissions: Adjustment residual. Supervised mandatory releases: Includes some (fewer than 5%) expirations of sentence and releases to probation of inmates serving a split sentence. The remainder are supervised releases, many of which convert to probation shortly after discharge.

Race: Estimates based on 1980 data.

Hispanic origin: Alaska has not identified the ethnicity of its prison population.

# Arizona

Inmates housed in other States or in Federal prisons account for the differences between the 1981 jurisdiction and custody counts.

Other conditional releases: Discretionary, temporary, and work furlough releases.

# Arkansas

Yearend jurisdiction counts for 1980 are revised from those published in the 1980 report. Breakdown of the jurisdiction and custody population by sentence length are estimates. Admission and release data include inmates sentenced to less than 1 year.

Parole violators, no new sentence: Includes parole violators with new sentences.

Suicides: Figures are estimates.
Race: Figures are estimates.

Hispanic origin: Figures are estimates.

#### California

Yearend female jurisdiction count for 1980 is revised from that published in the 1980 report.

Other unconditional releases: Court-ordered releases.

Transfers to other jurisdictions: Includes the net difference between transfers from and to jails, hospitals, and other States.

Other releases: Includes the net difference between returns from and releases to court.

Hispanic origin: Figures for Hispanics include Mexicans only; other Hispanics are included in the figure for non-Hispanics.

# Colorado

Yearend jurisdiction counts for 1980 are revised from those published in the 1980 report.

Other unconditional releases: Unconditional court-ordered releases.

Race: Figures are estimates. Hispanic origin: Figures are estimates.

# Connecticut

All data include both jail and prison inmates (prisons and jails form an integrated system). Yearend jurisdiction counts for 1980 are revised from those published in the 1980 report. Custody counts are estimates. Persons in halfway houses and on reentry furlough due to overcrowding account for the differences between jurisdiction and custody counts.

Expiration of sentence: Includes some releases to probation.

Other conditional releases: Persons released to group homes.

### Delaware

All data include both jail and prison inmates (prisons and jails form an integrated system). Persons receiving a split sentence of more than I year, part to be served in prison and the remainder on probation, are excluded from the movement data unless the prison portion of the sentence exceeded I year, a practice resulting in an understating of movement transactions. State

inmates held in other State and Federal in ultutions and persons in supervised custody because of overcrowding account for the differences between jurisdiction and custody counts for 1981.

New court commitments: Includes probation violators.

Other unconditional releases: Unconditional court-ordered releases.

Supervised mandatory releases: Includes persons released on probation.

Escapes: Includes escapes from supervised custody.

Race: Breakdown based on percentages.

Hispanic origin: Delaware has not identified the ethnicity of its prison population.

### **District of Columbia**

The District of Columbia has an integrated jail and prison system. Data include unsentenced inmates and those sentenced to I year or less, with the exception of those housed in the D.C. Jail or Detention Center. Persons receiving a split sentence of more than I year, part to be served in prison and the remainder on probation, were excluded from movement data unless the prison portion of the sentence exceeded I year, an omission resulting in an understating of such transactions.

Parole violators with and without new sentences and other conditional release violators with and without new sentences: The total number of violators is accurate, but the breakdown by type is estimated from 1980 figures.

Transfers to and from other jurisdictions: Transfers to and from mental hospitals and Federal facilities.

Escapees and AWOLs returned: May include some sentenced to 1 year or less.

Expirations of sentence: Includes supervised mandatory releases with fewer than 180 days remaining on their sentences. Such persons are not considered to be subject to the conditions normally attached to this type of release.

Supervised mandatory releases: Includes only supervised mandatory releases with 180 days or more remaining on their sentences.

Race: Estimates based on 1980 data. Hispanic origin: The District of Columbia has not identified the ethnic composition of its prison population.

# Florida

Persons housed in local jails account for the differences between jurisdiction and custody counts.

### Georgia

Yearend jurisdiction counts for 1980 are revised from those published in the 1980 report.

Parole violators returned with new sentences: Includes parole and other conditional release violators returned with and without new sentences.

Other admissions: Type not specified.

Transfers to other jurisdictions: Transfers to other States to serve time on sentences in other

Hispanic origin: Georgia has not identified the ethnicity of its prison population.

#### Hawaii

Jurisdiction and custody figures are estimates believed to be within 5% of actual counts. Data include both jail and prison inmates (prisons and jails form an integrated system). Inmates in the custody of Federal prisons account for the differences between jurisdiction and custody counts.

Probation: Inmates whose sentences were reevaluated within 60 days of commitment and modified to probation.

### Idaho

Custody figures are believed to be within 5% of actual count. The male/female breakdown of admission and release figures are estimates based on 1980 data. Inmates held in other State and Federal institutions account for the differences between jurisdiction and custody counts.

Other admissions: Court orders and returns from agreement on detainers.

Other unconditional releases: Releases because of acquittal or dismissal of sentence.

Other releases: Releases to agreement on detainers.

Unsentenced inmates (custody count): Civil commitments held for psychological testing and evaluation.

Race: Estimates based on 1980 data. Hispanic origin: Estimates based on 1980 data.

# Illinois

Admission and release counts include persons sentenced to 1 year or less. Inmates housed in other States or in Federal facilities and inmates out to court account for the differences between jurisdiction and custody counts.

Parole violators, no new sentence: Persons previously reported in this category are now being reported as other conditional release violators due to a new supervised mandatory release program in effect in 1981.

Other conditional release violators, no new sentences: Includes mostly supervised mandatory release violators.

Other admissions: Includes work release vio-

Other releases: Transfers to community correctional centers.

## Indiana

Data on race, Hispanic origin, and probations are estimates.

Other conditional release violators with new sentences: Includes parole, probation as part of a split sentence, and probation violators with or without new sentences.

Other unconditional releases: Releases of persons with indeterminate sentences without postrelease supervision.

Other conditional releases: Releases to Regulated Community Assignment in the community. Persons released in this manner retain inmate status and report to a parole officer weekly. They are released to parole status in 90 days unless there are infractions, in which case they are returned to the institution.

#### lowa

All population and movement data for 1981 are custody figures. Male/female counts of admissions and releases are estimates based on 1980 data. Data for 1980 are revised from those published in the 1980 report. Admission and release figures contain an estimated 137 admissions and 154 releases with sentences of less than 1 year. Male/female ratios of the racial and ethnic composition is estimated.

Escapees and AWOLs returned: Includes escapees only, not AWOLs.

Escapes and AWOLs: Includes escapes only, not AWOLs.

# Kansas

Probation. Includes fewer than 50 inmates released to court.

# Kentucky

Yearend counts for 1980 are revised from those published in the 1980 report. Custody figures include 104 inmates held in local jails to relieve overcrowding.

Probation: All probation releases are shock probation.

### Louisiana

Persons housed in local jails account for the differences between jurisdiction and custody counts.

Other unconditional releases: Court-ordered releases.

### Maine

Yearend counts for 1980 are revised from those published in the 1980 report, Persons housed in local jails, in hospitals, in other States, or at home on work-release account for the differences between jurisdiction and custody counts.

# Maryland

All data include inmates (about 4 percent of total) sentenced to a maximum of 1 year or less. Persons housed in local jails account for the differences between jurisdiction and custody counts.

New court commitments: Includes parole and other conditional-release violators with new sentences and returns from appeal or bond.

Hispanic origin: Maryland has not identified the ethnicity of its prison population.

## Massachusetts

Yearend counts for 1980 are revised from those published in the 1980 report. Beginning in 1980, the count includes women with sentences of 1 to 2-1/2 years formerly held in county facilities now closed. Persons housed in local jails account for the differences between jurisdiction and custody counts.

New court commitments: Includes parole violators returned with new sentence. Beginning in 1980, includes males from the time of sentencing even if held in local facilities. Formerly, males awaiting booking were not counted until they entered the State prison.

# Michigan

Other deaths: Cause not known.

Other races: Includes Mexican-Americans and some persons whose race is not known.

Hispanic origin: Includes only persons of Mexican descent.

## Minnesota

Persons housed in other State or Federal institutions account for the differences between jurisdiction and custody counts.

Other unconditional releases: Releases by court order.

# Mississippi

Yearend jurisdiction counts for 1980 are revised from those published in the 1980 report. Persons housed in local jails account for the differences between jurisdiction and custody counts.

Other admissions: Includes persons returned for parole revocation hearings whose parole is not revoked and an adjustment residual.

Other unconditional releases: Includes Supreme Court overturns and releases to court with no probation to follow.

Other releases: Includes persons returned to parole supervision after hearing where no revocation occurred.

# Missouri

Yearend jurisdiction counts for 1980 are revised from those published in the 1980 report.

Parole violators, no new sentences: Includes parole violators with new sentences,

Race: Figures are estimates.

Hispanic origin: Missouri has not identified the ethnicity of its prison population.

#### Montana

Yearend counts for 1980 are revised from those published in the 1980 report. Persons housed in local jails and those held in other States account for the differences between jurisdiction and custody counts.

Other conditional releases: Two supervised releases and one jail-based work release to district court supervision.

Other unconditional releases: Court-ordered releases.

#### Nebraska

Yearend jurisdiction counts for 1980 are revised from those published in the 1980 report. Persons with sentences of a year or less or with no sentence held in State prisons but under county jurisdiction and interstate transfers account for the differences between jurisdiction and custody counts.

Other admissions: Adjustment residual.

### Nevada

Inmates held in other States, out-of-State inmates housed in Nevada, and 65 persons held less than 120 days for evaluation account for the differences between jurisdiction and custody counts.

Race: Figures are estimates. Hispanic origin: Figures are estimates.

# **New Hampshire**

Persons held in other States account for the differences between jurisdiction and custody

Parole violators returned without new sentence: Includes inmates returned without a new sentence at the time of admission but who later received a new sentence.

Other unconditional releases: Unconditional court-ordered releases.

# **New Jersey**

Jurisdiction figures exclude 995 males held in local jails to ease overcrowding. Differences between jurisdiction and custody counts are due to 23 New Jersey inmates held in other States and 8 from other States held in New Jersey.

# **New Mexico**

Yearend jurisdiction counts for 1980 are revised from those published in the 1980 report. Inmates held in county jails account for the differences between jurisdiction and custody counts.

Other admissions: Includes parole and probation violators and escapee returns.

#### **New York**

Yearend jurisdiction counts for 1980 are revised from those published in the 1980 report.

Transfers from and to other jurisdictions: Includes transfers from and to the Department of Mental Hygiene.

Other releases: Releases of inmates determined not to be State commitments after having been received as new court commitments.

Race: Figures are estimates. "Not known" comprises American Indians and Orientals.

Hispanic origin: Includes only Puerto Rican inmates; all other Hispanic inmates are included in the non-Hispanic category.

Unsentenced inmates (custody): Persons held on parole violation warrants.

#### North Carolina

Yearend jurisdiction counts for 1980 are revised from those published in the 1980 report. Persons held for safekeeping and presentence diagnosis account for the differences between jurisdiction and custody counts. Persons receiving partially suspended sentences of more than 1 year, part to be served in prison and the remainder on probation, were excluded from the movement data unless the prison portion of the sentence exceeded 1 year, an omission resulting in an understating of movement transactions by 719 persons.

Parole violators with new sentences: Includes parole violators without new sentences.

Other admissions: Adjustment residual. Expiration of sentence: Includes some commutations (fewer than 10%).

Releases to appeal or bond: Unconditional court-ordered releases. May contain some over-turned convictions for which no new trial was held.

Race: "Other" races include Hispanics and persons whose race is not known.

### North Dakota

Federal prisoners and prisoners from other States held in North Dakota account for the differences between jurisdiction and custody counts.

Other conditional releases: Court-ordered releases to probation.

### Ohio

Inmates living in halfway houses, reintegration centers, and those incarcerated outside the State, but for whom the State retains jurisdiction, account for the differences between jurisdiction and custody counts.

New court commitments: Includes some "other conditional release violators with new sentences."

Transfers from and to other jurisdictions: Transfers from and to mental hospitals.

Other unconditional releases: Sentences vacated by court. Other conditional releases: Extended medical furloughs and pre-parole furloughs.

Hispanic origin: Based on custody population only.

#### Oklahoma

Yearend jurisdiction counts for 1980 are revised from those published in the 1980 report. Persons held in hospitals and halfway houses account for the differences between jurisdiction and custody counts. Jurisdiction counts exclude 89 male and 15 female inmates on escape.

Other admissions: Sentenced offenders held in county jails to relieve overcrowding.

### Oregon

Yearend jurisdiction counts for 1980 are revised from those published in the 1980 report.

# Pennsylvania

Yearend jurisdiction counts for 1980 are revised from those reported in the 1980 publication.

Other admissions: Inmates received from other authorities.

Other releases: Inmates released to other authorities and administrative final discharges.

Hispanic origin: Pennsylvania has not identified the ethnicity of its prison population.

# Rhode Island

All data include both jail and prison inmates (prisons and jails form an integrated system). Persons receiving a partially suspended sentence of more than 1 year, part to be served in prison and the remainder on probation, were excluded from the movement data unless the prison portion of the sentence exceeded 1 year, an omission resulting in an understating of movement transactions.

Other admissions: One male paroled illegally, who was returned to prison to complete his sentence.

Other releases: Court-overturned sentence.

# South Carolina

Persons housed in local jails to ease overcrowding account in part for the differences between jurisdiction and custody counts.

Other unconditional releases: Includes unconditional court-ordered releases.

Hispanic origin: South Carolina has not identified the ethnicity of its population.

### South Dakota

Out-of-State inmates and Federal prisoners held in South Dakota account for the differences in jurisdiction and custody counts.

#### Tennessee

Persons housed in local jails account in part for the differences between jurisdiction and custody counts.

Parole violators without new sentences; Includes parole violators with new sentences.

Other conditional release violators without new sentences: Includes jail cases returned to prison.

Other unconditional releases: Unconditional court-ordered releases.

Other conditional releases: Includes jail cases released to jails because of overcrowding.

Other deaths: Drug overdoses.

Other releases: Adjustment residual. Hispanic origin: Tennessee has not identified the ethnicity of its inmate population.

#### Texas

All data are custody figures; jurisdiction counts were not provided.

Parole and other conditional release violators with new sentences: Includes parole and other conditional release violators without new sentences.

Other unconditional releases: Unconditional court-ordered releases.

Other conditional releases: Conditional pardons.

Other deaths: Cause not known.

Other releases: Adjustment residual.

Hispanic origin: Figure is estimated at 22% of inmate population.

# Utah

Inmates housed in other State and Federal facilities account for the differences between jurisdiction and custody counts.

Other unconditional releases: Terminations of sentence by Board of Pardons.

## Vermont

All data include both jail and prison inmates (prisons and jails form an integrated system). Types of admissions and releases are estimates.

Other unconditional releases: Unconditional court-ordered releases.

Other conditional releases: Includes court-ordered amended sentences with release to a special probation-supervision.

Race: Figures are estimates. Hispanic origin: Figures are estimates.

# Virginia

Persons held in local jails and those held in other States account for the differences between jurisdiction and custody counts.

Transfers from other jurisdictions: Includes transfers from other States who may be starting or continuing a sentence. Therefore, data for this category may be overstated and new court commitments may be understated.

Other admissions: Type not specified. Other unconditional releases: Administrative releases.

Other conditional releases: Conditional pardons granted by the Governor.

Other deaths: Cause not known. Other releases: Type not specified.

Hispanic origin: Virginia has not identified the ethnicity of its inmate population.

# Washington

Yearend jurisdiction counts for 1980 are revised from those published in the 1980 report.

Other admissions: Returns from temporary assignment to mental hospitals or other States.

Other unconditional releases: Full pardons granted by the Governor.

Other releases: Releases to temporary assignment.

Other races: Includes persons of Hispanic origin.

# West Virginia

Other admissions: Type not specified. Other unconditional releases: Unconditional court-ordered releases.

Other conditional releases: Conditional courtordered releases.

Other releases: Includes persons returned to court jurisdiction after being declared unsuited to serve at a particular minimum security institu-

# Wisconsin

Yearend jurisdiction counts for 1980 are revised from those published in the 1980 report. Jurisdiction counts include escapees.

Other admissions: Includes returns pending revocation of parole and returns from mandatory release pending revocation.

Other unconditional releases: Includes reinstatement to parole and reinstatement to mandatory release.

Other deaths: Cause not known.

Other releases: Includes reinstatement to probation supervision, reinstatement to mandatory release, and one unknown release type.

# Wyoming

Inmates held in other States account for the differences between jurisdiction and custody counts.

Other conditional releases: Court-ordered releases.

# Federal Bureau of Prisons

Persons receiving a split sentence of more than 1 year, part to be served in prison and the remainder on probation, are excluded from 1980 and 1981 counts for those with maximum sentences of more than 1 year unless the prison portion of the sentence exceeded 1 year, a practice resulting in an understating of these counts. Such persons are included in the count of inmates with maximum sentences of 1 year or less. Yearend jurisdiction count for 1981 includes 1,921 persons held in Federal prisons but under the jurisdiction of the Immigration and Naturalization Service. Such persons were excluded from jurisdiction counts in 1980.

New court commitments: Includes "other conditional release violators with new sentences.'

Parole violators with new sentences: Figures are estimates based on new court commitments. Race: Data available only for sentenced in-

Hispanic origin: Data available only for sentenced inmates.

# Appendix IV

# **Historical** series

The following table shows yearend counts of the number of prisoners in State and Federal institutions as collected by the National Prisoner Statistics (NPS) Program and published annually in the National Prisoner Statistics Bulletins, Prisoners in State and Federal Institutions on December

These counts should be viewed as providing an order of magnitude for the U.S. prisoner population, inasmuch as the definition of the prisoner population varies

widely from State to State and may also vary within States from year to year.

To aid in interpretation of these data, users are encouraged to review the notes at the end of the list for general information on comparability and those in the annual bulletins for specific details on the degree of conformity to NPS definitions, since these definitions change over the years as well as the individual States' interpretation of these definitions and reporting procedures.

Special table Number and rate per 100,000 population of sentenced prisoners in State and Federal institutions, 1925-81

Yearend	Number	Rate per 100,000 population	Yearend	Number	Rate per 100,000 population
1005	01.660	79	 1054	182,901	114

1948	155,977	107	1977	278,141	129
1949	163,749	110	1977	285,456	132
* - 4 -	103,193	1117	1978	294,396	135
1950	166,123	110	1979	301,470	137
1951	165,680	109	1980	315,974	140
1952	168,233	109	1981	353,167	153
1953	173,579	110	1701	333,107	100

NOTE: The count, until 1977, was limited to those prisoners remanded to the custody of the State or Federal adult correctional system. Beginning in 1977, the count includes all persons under the jurisdiction of the individual correctional systems. Examples of inmates under the jurisdiction of a given system, but not under its custody, are those housed in local jails, in other States, or in hospitals (including mental health facilities) outside the correctional system; inmates out on work release, furlough or bail; and inmates out on work release, furlough or bail; and

State prisoners held in Federal prisons or vice versa. Figures for both the custody and jurisdiction populations are given for 1977 in order that 1977 can be compared with both previous and subsequent years.

1 Over the years, the sentenced prisoner population has been variously defined to include "felons age 18 and over," "adult felons," "prisoners sentenced to a maximum term of at least a year and a day," and since 1978, "prisoners sentenced to over 1 year."

# **NCJRS REGISTRATION**

The National Criminal Justice Reference Service (NCJRS) abstracts documents published in the criminal justice field. Persons who are registered with the Reference Service receive announcements of documents in their stated fields of interest and order forms for free copies of Bureau of Justice Statistics publications. If you are not registered with the Reference Service, and wish to be, please provide your name and mailing address below and check the appropriate box.
