

STATE OF WASHINGTON

John Spellman, Governor

Explanation of Cover Graph

The graph appearing on the cover illustrates the differences in the national crime rate and that for the State of Washington from 1958-1979. The rate is an aggregate one related to the number of crimes known by or reported to the police and refers to the number of crimes per 100,000 population. The rate is based upon crime categories known generally as murder/manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny/theft and motor vehicle theft. Arson was added as a crime category in the late 1970s but is not reflected in this graph.

The statistical change in 1973 causing the jump in the graph reflected a change in definition for larceny/theft. Prior to 1973, only larceny/thefts of property valued at greater than \$50 was reported. Following the change in definition, the aggregate rate jumped to a higher level reflecting the current standard of reporting larceny/theft of items of any value.

INTRODUCTION

The purpose of this report is to provide a resource for analysis of changing patterns of crime within the State of Washington. Information has been aggregated from annual publications and presented in formats that will promote understanding of current activity.

In using this publication note that the population estimates utilized are those developed by the Federal Census Bureau. The Census Bureau figures are used because they allow easy comparison to national and other state population totals emanating from a common source.

Reporting crime data in a standardized format to a central repository began at the initiative of the International Association of Chiefs of Police (IACP). Following their original study and recommendations, the Uniform Crime Reporting (UCR) program was begun in 1930. In that same year the U.S. Congress enacted legislation authorizing the U.S. Attorney General to gather crime information. Subsequently the FBI was designated to serve as the national clearinghouse for data collected by the Uniform Crime Reporting program. Seven offenses were originally chosen as an Index for evaluating changes in the volume of crime. Presently, an eighth offense, arson has been added to the original seven. Those seven remain the same as they were in 1930, viz., murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft. However, in 1973 a major statistical change was introduced when the definition of larceny-theft was altered to reflect the theft of items of any value not just those of \$50 value or greater. This has caused a major change in volume and rates since 1973 and is annotated in this volume, as appropriate. Definitions of these Uniform Crime Reporting Index offenses are delineated in Appendix 1.

A factor which is key to understanding the data in this publication is the categorization of population into major units. These population units follow the UCR definitions insofar as size, density and area are concerned. Basically, these units are the Standard Metropolitan Statistical Areas (SMSA), the areas known as Rural and the areas known as Other Cities. Specific definitions of these areas are contained in Appendix 1. Generally, the SMSAs consist of the urban areas: major cities, their suburbs and surrounding county areas. Incorporated cities not included in the SMSAs constitute the Other Cities category while unincorporated areas outside of the first two categories make up Rural areas. In some cases the reports for Rural areas, nominally the sheriff's area of responsibility, include incorporated cities which contract for police services with the sheriff's department and, therefore, are included in the reports for that rural jurisdiction. Cities which are currently in that category for Washington State are listed in Appendix 2.

In this report, crime and population information are aggregated either into state totals or by major population units such as SMSAs. The most volatile population category is the SMSA since certain smaller areas experience growth over time and are added to the SMSA category. This, naturally, reduces the categories of origin, viz., Other Cities and/or Rural by a similar amount. A new designation of an area as an SMSA is reflected not only in the population figures but also in the volume of crime for those areas affected. For example, the addition of Richland-Kennewick to the SMSA category meant an increase in total SMSA population and crime volume with a consequent decrease in the Rural and Other Cities categories. Consequently, in reviewing this publication the reader should examine gross changes in crime volume for recent changes in population category.

Designation of geographic areas as SMSAs is a function of the Department of Commerce. Within Washington State currently, there are five SMSAs and a portion of a sixth. This latter is Clark County which is a part of the Portland, Oregon SMSA. The other five and the titles used in this publication for the sake of brevity are as follows:

<u>SMSA</u>	<u>Title in this report</u>
Seattle-Everett, WA (includes King & Snohomish Counties)	King-Sno SMSA
Tacoma, WA (includes Pierce County)	Pierce SMSA
Spokane, WA (includes Spokane County)	Spokane SMSA
Yakima, WA (includes Yakima County)	Yakima SMSA
Richland-Kennewick-Pasco, WA (includes Benton & Franklin Counties)	Rich-Kenn SMSA

In addition, the Clark County portion of the Portland SMSA is identified as Clark SMSA.

The activities involving the report of crime to the Uniform Crime Reporting system is a voluntary one on the part of individual law enforcement agencies within each State. In many instances, certain agencies report only a portion of the year or may not report at all. In these cases, the Uniform Crime Reporting program estimates the activity for that agency based upon a complicated formula involving population, density, location, history and other elements. Each annual UCR report issued by the FBI provides the percentage of jurisdictions reporting on the basis of population represented. These figures are not reproduced herein but are available in the annual source documents. Generally, these percentages exceed 95% for the state of Washington.

PART I
POPULATION & GENERAL CRIME PATTERNS

CHAPTER I
COMPOSITION OF POPULATION GROWTH
IN WASHINGTON
1958-1979

CHAPTER I
THE COMPOSITION OF POPULATION GROWTH IN WASHINGTON
1958-1979

State Population Changes

The state population grew from 2,769,111 in 1958 to 3,926,000 in 1979 -- an increase of 41.78 percent. This growth was not evenly distributed throughout the state. As is the case in many states, the concentration of growth has been in the large urban areas. In this study, the term we use to refer to these urban areas is Standard Metropolitan Statistical Areas (hereafter SMSA).

Page 1-6 illustrates the growth of the state as well as that of the Standard Metropolitan Statistical Areas (SMSA), Other Cities and Rural Areas. The following table summarizes the volume of growth as well as the percentage increase from 1958 to 1979. For more detailed definitions, see Appendix 1.

POPULATION CHANGE IN WASHINGTON 1958-79*

	1958 Size	1979 Size	Percent Change
State Total	2,769,111	3,926,000	41.78%
Other Cities	530,132	486,050	-8.32%
Rural Areas	684,615	647,870	-5.37%
S.M.S.A.*	1,554,364	2,792,080	79.63%
.....			
King-Sno	870,401	1,527,804	75.53%
Pierce	317,264	454,556	43.27%
Spokane	279,187	332,499	19.10%
Clark	87,842	178,326	103.01%
(Yakima and Richland-Kennewick became S.M.S.A.s in 1971 and 1975, respectively, in the Uniform Crime Report)			
Yakima (1971)	146,000	165,729	13.51%
Richland-Kennewick (1975)	101,411	133,166	31.31%

*May not total precisely due to census adjustments

SOURCE: UNIFORM CRIME REPORTS - 1958-1979

The table above appears to indicate the loci of growth: the Standard Metropolitan Statistical Areas increased 79.63% while the two other areas, Other Cities and Rural Areas, had a decrease of 8.32% and 5.37% respectively. It is important to note that the addition of Yakima and Richland-Kennewick as SMSAs meant a correlative decrease in the Other Cities and Rural Areas totals. While much of the growth was located in the King-Snohomish and Clark County SMSAs, it is nonetheless interesting to see how rapidly the Richland-Kennewick SMSA has grown in just five years. In this brief time period, the Richland-Kennewick SMSA has experienced a 31.31% increase in population.

The Regional Impact of Population Growth

It has been proposed that the increase in the volume of crime is primarily a simple function of the increase in population. An important hypothesis about the volume of crime and the distribution of crime in Washington is thus available for testing. The findings could have high relevance to forecasters and those who develop policy and budgets on the state and local level in matters of criminal justice.

The following table displays the percent of the state population contained in a given area from 1958 to 1979.

PERCENT OF STATE POPULATION BY AREA 1958-1979

Year	Other Cities	Rural Areas	SMSA Total	King Sno	Pierce	Spokane	Clark	Yakima	Rich Kenn

CHAPTER II
TOTAL INDEX CRIME
FOR STATE, URBAN AREAS (SMSAs)
CITIES OUTSIDE URBAN AREAS (OTHER CITIES)
AND RURAL AREAS

CHAPTER II
TOTAL INDEX CRIME

Definition

Individual police agencies report the occurrence of crime on a voluntary basis to the Uniform Crime Reporting (UCR) system. This data is collected on a national basis by the U.S. Department of Justice, Federal Bureau of Investigation, then aggregated, analyzed and reported in a standardized format for comparison and trend information. Since the crimes reported are only those made known to the police, it is reasonable to assume that they represent only a proportion of actual crime volume. Actual crime volume can only be estimated since many crimes go unreported by the Public and less than 100% of law enforcement agencies participate in the UCR program. Therefore, the category of crimes extrapolated from those actually known to the police is utilized in this publication, rather than estimated total crime volume. The most serious offenses are classified as Part 1 index crimes, and less serious offenses as Part 2 index crimes in the Uniform Crime Reporting System. As used in this report, the terms "Total Index Crime" or "Total Index Crime Rate" refer only to the more serious Part 1 index offenses, viz., murder, forcible, rape, robbery, aggravated assault, burglary, larceny/theft, motor vehicle theft and arson. There are insufficient data to sufficiently and accurately portray the incidence of arson since it has only recently been added to the Part 1 crime index. Therefore, no specific analysis of arson statistics is included in this report. There will be no report or analysis of the less serious Part 2 Index Crimes. See Appendix 1 for definitions of the Part 1 index crimes as utilized by the national Uniform Crime Reporting system.

Volume and Rates Per 100,000 Population - 1979

The following table displays the volume and rates per 100,000 population of seven index crimes (excludes arson) for the state of Washington and for eight areas within the state. For comparison purposes, the corresponding USA rate is presented in the column on the far right of the table.

PERCENTAGE COMPOSITION OF TOTAL CRIME VOLUME 1958-79
(% State Population in Parentheses)

Year	SMSA %	Other Cities %	Rural %
1958	68.94 (56.13)	15.06 (19.24)	15.99 (24.72)
1959	71.84 (63.20)	14.10 (15.30)	14.27 (21.50)
1960	70.88 (63.20)	15.36 (15.83)	13.76 (21.05)
1961	71.42 (63.06)	14.50 (15.47)	14.07 (20.79)
1962	71.80 (63.38)	14.08 (15.99)	14.12 (20.64)

Trends 1958-79

o Percentage Composition of Total Crime Volume by Jurisdiction

The percentage of the total volume of crime in Washington contributed by a given area has exhibited considerable variation from 1958 to 1979. The table below illustrates the variation.

The data indicates the persistent concentration over time of 69% to 82% of all reported index crimes in the SMSAs. It is significant that the contribution of Rural Areas to the total volume of crime in the state has decreased steadily from 16% in 1958 to 9% in 1979 while decreasing in population as almost a similar pace. It is also interesting to note that crime in Other Cities decreased from 15% in 1958 to 9% in 1971 and then increased again to 16% in 1979. The change in crime volume is especially noteworthy for Other Cities when compared to the relatively constant population figures since 1971.

o Changes in Population Size and Crime Volume By Area

The relationship between annual changes in population size and annual changes in crime volume is displayed in the table below.

A COMPARISON OF PERCENTAGE CHANGE IN POPULATION SIZE AND PERCENTAGE CHANGE IN CRIME VOLUME BY AREA

Year	Washington % Change		SMSA % Change		Other Cities % Change		Rural Areas % Change	
	Pop	Vol	Pop	Vol	Pop	Vol	Pop	Vol

Source: Uniform Crime Reports - 1958-79

From the chart above, we are able to discern that tracking consistent changes in population as they relate to crime volume is difficult at best. Yet, overall we know that over a twenty-one year span, 1958-1979, population increased in this state some 41.8% while reported crime volume increased 436%. (Computation of this latter figure ignores the reported volume of larceny/theft crime entirely in order to minimize the effect of the statistical change in reporting for those offenses since 1973.) The correlation coefficients* presented below examine the relationship between the reported Part 1 index crimes and geographical area. The correlation includes the larceny/theft data. These figures appear to emphasize the strength of the relationship between urban areas and serious crime.

	Washington Total	SMSA	Other Cities	Rural Areas
Murder	.949	.953	-.215	-.266
Rape	.952	.927	-.127	.011
Robbery	.958	.933	.154	.254
Agg. Assault	.955	.948	-.150	-.090
Burglary	.974	.972	-.104	-.096
Larceny	.892	.900	-.294	-.233
M.V.T.	.967	.935	-.150	-.110

*The terms "corr. coef." or "Correlation" are used synonymously in this report. They refer to the statistical term, "correlation coefficient" which is a measure of the relationship between two sets of variables or numbers. If both sets of numbers increase at the same rate then they would have a positive correlation with a perfect coefficient of 1.00. If one set increases while the other decreases, then they would be negatively correlated with a minus coefficient. A coefficient of zero would indicate a complete lack of relationship. Interpretation of these coefficients should be restricted to an inference of strong or weak relationships rather than an exact numerical measure.

o Total Index Crime Rate By Area

Hitherto, the discussion of crime statistics has involved the description of the incidence of crime in terms of volume. The following discussion uses crime rates in lieu of volume. Crime rates in this instance describe

criminal activities in terms of number of crimes per 100,000 population. The use of rates permits comparisons across populations of different size.

The total index crime rate has varied significantly over time for the state. The following table illustrates those changes. The percentage change in rates from one year to the next is in parentheses. Note the dramatic increase caused by the statistical change in larceny in 1973. (Prior to 1973, only larcenies of property with value in excess of \$50 were reported. Subsequently, all larcenies are reported.) Areas within the state were differentially impacted by that reporting change. Other Cities experienced a 102% increase in crime rate while the SMSA had a 56% increase and Rural Areas had a 59% increase. It is important, therefore, that any comparisons of the crime rate over time take the impact of this statistical change into account. Otherwise, the fallacious interpretation of a radical increase in the crime rate from 1972 to 1973 could be drawn. Furthermore, two important questions have been raised: 1) Why did the statistical change in larceny have twice as much impact on the crime rate in the Other Cities area? 2) Does the current high rate of total index crime in the Other Cities area compared to other areas continue to be a result of that statistical change in 1973? It should be noted that Other Cities across the USA experienced a 75% increase, presumably from the statistical change.

TOTAL INDEX CRIME RATE BY AREA

o Changes in Population Size and Crime Rate By Area

The relationship between changes in the population size and the crime rate is not constant. The table below displays changes in population size for given areas and the corresponding changes in their crime rate. The premise is that crime rates would vary equally with population if population size is the major determinant of crime. A change in the volume of population would hypothetically be reflected as an equal percentage change in the rate of crime. A cursory examination of the table reveals that increases or decreases in population are not necessarily related to increases or decreases in crime rates.

A COMPARISON OF PERCENTAGE CHANGE IN POPULATION SIZE AND PERCENTAGE CHANGE IN CRIME RATE BY AREA

The correlation coefficients tend to reemphasize the strength of the relationship between serious crime and urban areas, especially over an extended period of time.

A COMPARISON OF THE CORRELATIONS BETWEEN POPULATION SIZE AND CRIME RATE BY CRIME TYPE 1958-1979

	Washington Total	SMSA	Other Cities	Rural Areas
Murder	.915	.903	-.366	-.434
Rape	.954	.923	-.242	-.100
Robbery	.935	.876	-.037	.027
Agg. Assault	.951	.946	-.260	-.196
Burglary	.958	.947	-.272	-.263
Larceny	.882	.897	-.358	-.322
M.V.T.	.958	.947	-.272	-.264

The Relationship Between Population Density and Crime Rate By Crime Type in Washington - 1958-1979

It is not advisable to generalize about various populations or sub-populations in regard to criminal activity because each population within a specific area has a unique distribution or demographic characteristic such as age, sex, race, employment home ownership, education, etc. A definitive study of the relationship between population characteristics and crime would, of necessity, consider each pertinent factor in detail. One of the factors that would be of interest is the relationship between population density and crime.

Over a twenty-one year period from 1958-1979, the population density per square mile for the State and certain urban subareas increased as follows:

21 year increase in population density

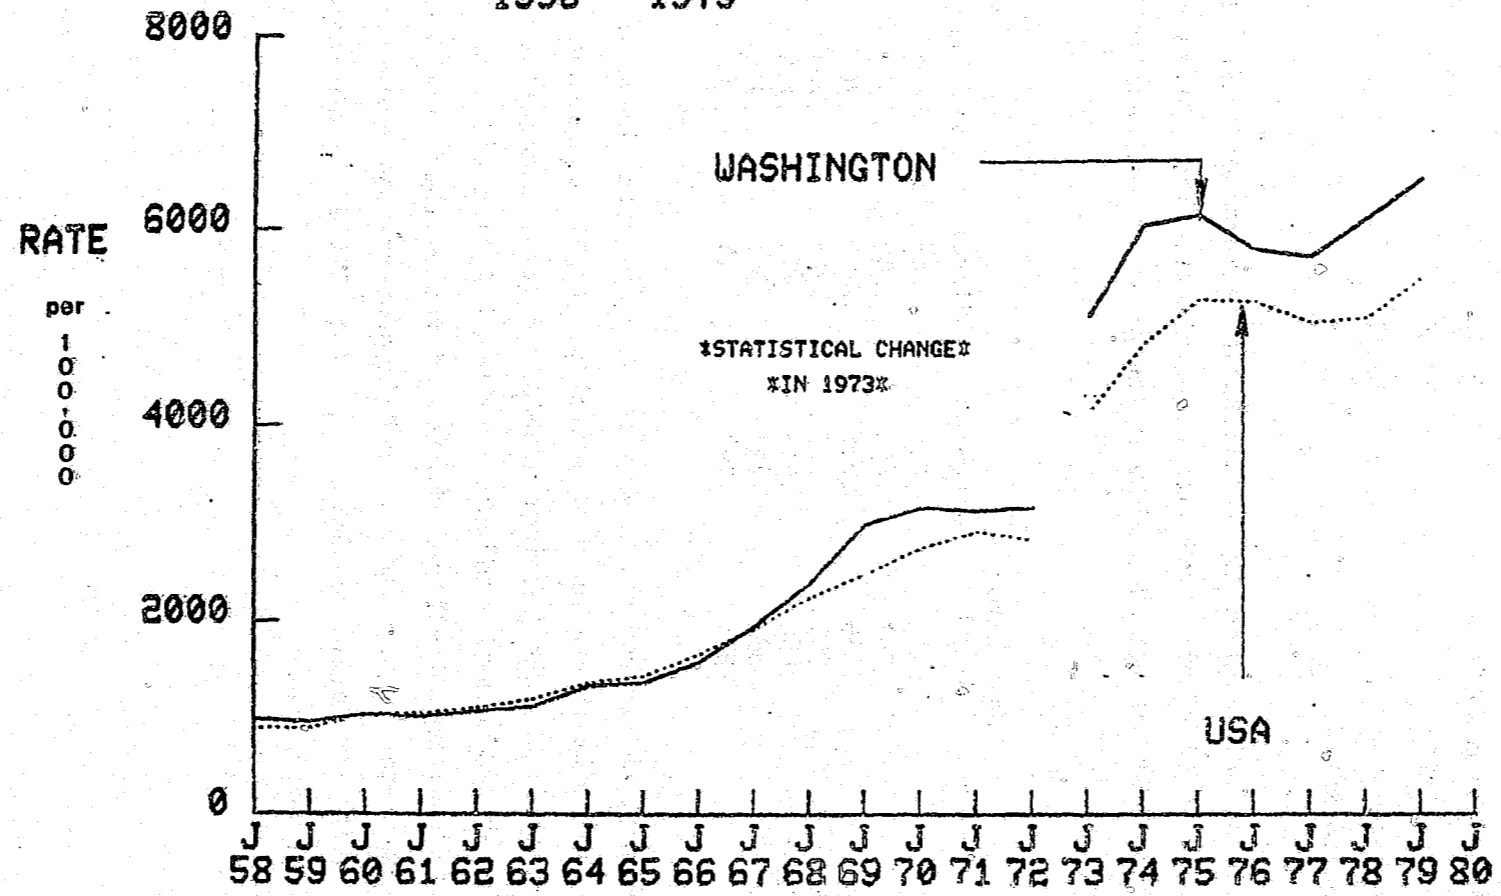

Washington State	41.6%
King-Snohomish SMSA	75.5%
Pierce SMSA	43.3%
Spokane SMSA	19.1%
Yakima SMSA	13.5%

The table below describes the relationship between population density and crime rate in terms of correlation coefficients. Those areas showing the higher correlations also experienced the greatest increase in population density.

	Washington Total	King-Sno	Pierce	Spokane	Yakima
Murder	.915	.813	.867	.535	.328
Rape	.954	.858	.882	.763	.807
Robbery	.935	.838	.893	.702	.407
Agg. Assault	.951	.867	.926	.703	.790
Burglary	.958	.910	.960	.715	-.084
Larceny	.882	.797	.861	.715	.429
M.V.T.	.936	.798	.944	.584	.827

The following charts and tables depict the crime rates in Washington State and the United States in terms of social/geographic areas, viz., the State vs. the entire US, the Washington SMSAs in total compared to the entire total for US SMSAs and, similarly, the Other Cities and Rural areas. On pages 11-20 through 11-27 are charts and tables that provide comparison between the total index crime rate and the property and violent crime rates for the state for Washington SMSAs, for Other Cities in Washington and for Washington Rural areas.

PART 2
ANALYSIS BY TYPE OF CRIME

CHAPTER III
VIOLENT CRIME

CHAPTER III
VIOLENT CRIME

Definition

Violent crime is composed of four index crimes: murder/manslaughter, forcible rape, robbery, and aggravated assault.

Volume and Rates Per 100,000 Population - 1979

The following table displays the volume and rates per 100,000 population of violent crime for the state of Washington and eight types of areas within the state. For comparison purposes, the corresponding USA rate is the column on the far right of the table. The second column in the table represents the percentage of the total volume of violent crime contributed by a given area. The bottom half of the second column represents the percentage of the total volume of Standard Metropolitan Statistical Area (SMSA) violent crime contributed by each SMSA in the state.

VIOLENT CRIME
VOLUME AND RATES PER 100,000 POPULATION

Area	Volume	% Total	Wash Rate	USA Rate

Trends

o Percentage Composition of Total Violent Crime Volume

The percentage of the total volume of violent crime in Washington contributed by a given area has exhibited considerable variation from 1958 to 1979. The table below illustrates the variation.

PERCENTAGE COMPOSITION OF VIOLENT CRIME VOLUME 1958-79

	SMSAs	Other Cities	Rural
1958	73.93	14.09	11.98
1959	74.07	9.07	16.45
1960	75.53	11.47	13.00
1961	74.46	13.48	12.06
1962	74.24	11.12	14.64
1963	73.28	13.41	12.32
1964	74.22	15.16	10.38
1965	74.75	12.20	13.05
1966	76.10	13.10	10.81
1967	74.95	13.88	11.17
1968	82.75	10.03	7.22
1969	82.23	10.02	7.75
1970	77.79	13.21	9.00
1971	84.95	6.76	8.29
1972	83.41	7.95	8.64
1973	83.21	7.93	8.86
1974	85.36	8.23	6.41
1975	82.72	11.03	6.25
1976	82.35	9.72	7.93

o Percentage Change In Rates By Area

The following table displays percentage change in rates per 100,000 population for the following periods: 1958-79; 1970-79; 1978-79. Contrary to the patterns established for overall crime rates, it is possible to see a dramatic increase in violent crime rates for the less populated areas of the State, viz., Other Cities and Rural areas as opposed to the urban areas. For comparison purposes, the percentage increase in the corresponding USA rate has been placed in parentheses.

PERCENTAGE CHANGE IN RATES BY AREA

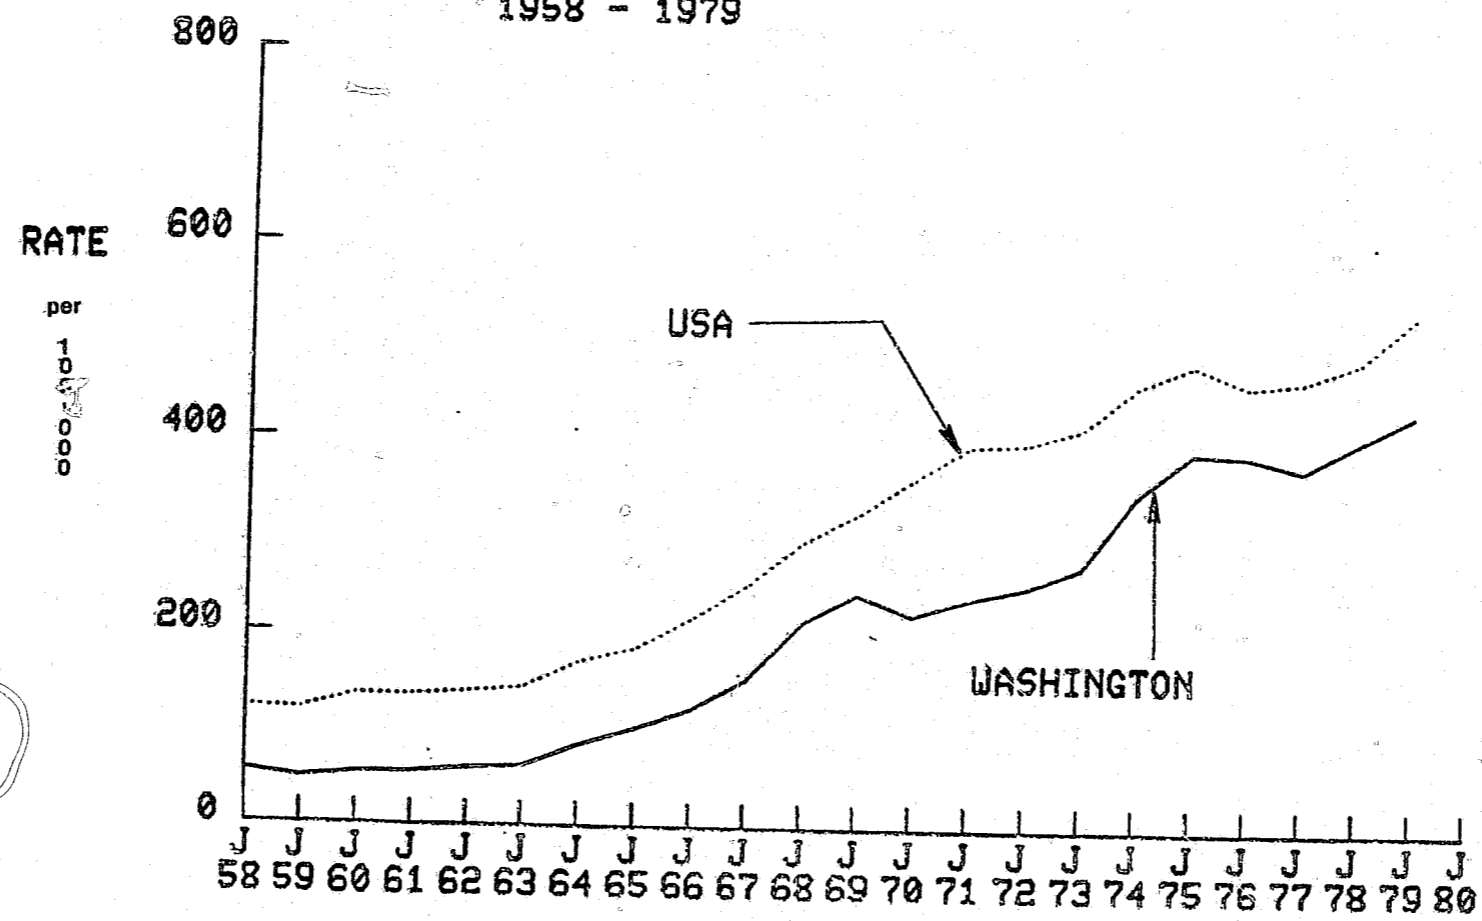

Area	1958-79		1970-79		1978-79	
	Wash %	(USA) %	Wash %	(USA) %	Wash %	(USA) %
Washington Total	667.10	(338.40)	93.37	(48.75)	7.24	(9.96)
SMSA (Total)*	549.03	(308.71)	85.57	(40.13)	3.88	(9.72)
Other Cities	793.74	(407.60)	93.05	(81.90)	20.69	(15.60)

CHAPTER IV
MURDER & NON NEGLIGENT MANSLAUGHTER

CHAPTER IV

MURDER AND NON NEGLIGENT MANSLAUGHTER

Definition

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another. The classification of this offense, as in all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides, which are the killing of felons by law enforcement officers in the line of duty or by private citizens; and attempts to murder, which are scored as aggravated assaults.

Volume and Rates Per 100,000 Population - 1979

The following table displays the volume and rates per 100,000 population of Murder for the state of Washington and eight types of areas within the state. For comparison purposes, the corresponding USA rate is the column on the far right of the table. The second column in the table represents the percentage of the total volume of murder contributed by a given area. The bottom half of the second column represents the percentage of the total volume of Standard Metropolitan Statistical Area murder contributed by each SMSA in the state.

MURDER 1979
VOLUME AND RATES PER 100,000 POPULATION

Area	Volume	% Total	Wash Rate	USA Rate
Washington Total	187	-	4.76	9.75
Other Cities	30	16.04	6.17	5.69
Rural	15	8.02	2.32	7.45
SMSA (Total)*	142	75.93	5.09	10.87

% SMSA

King-Sno SMSA	78	54.93	5.11	10.87
Pierce SMSA	23	16.20	5.06	10.87
Spokane SMSA	10	7.04	3.01	10.87
Clark SMSA	4	2.82	2.24	10.87
Yakima SMSA	14	9.86	8.45	10.87
Rich-Kenn SMSA	13	9.15	9.76	10.87

*Standard Metropolitan Statistical Areas (Includes Clark County)

The percentage of the total volume of MURDER in Washington contributed by a given area has exhibited considerable variation from 1958 to 1979. The table below illustrates the variation.

PERCENTAGE COMPOSITION OF MURDER VOLUME 1958-79

Area	Annual Avg.	Std. Dev.	Range	Maximum	Minimum
SMSA	74.44	6.65	25.61	84.37	59.21
Other Cities	10.09	4.01	14.26	18.03	4.25
Rural	15.27	4.91	20.93	28.95	8.02

Trends

The following table displays percentage change in rates per 100,000 population for the following periods: 1958-1979; 1970-79; 1978-79. For comparison purposes the percentage increase in the corresponding USA rate has been placed in parentheses.

PERCENTAGE CHANGE IN MURDER RATES BY AREA

CHAPTER V
FORCIBLE RAPE

CHAPTER V
RAPE

Definition

Forcible RAPE is defined in the Uniform Crime Reports as the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit RAPE by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are not included in this category.

Volume and Rates Per 100,000 Population - 1979

The following table displays the volume and rates per 100,000 population of RAPE for the state of Washington and eight types of areas within the state. For comparison purposes, the corresponding USA rate is the column on the far right of the table. The second column in the table represents the percentage of the total volume of RAPE contributed by a given area. The bottom half of the second column represents the percentage of the total volume of Standard Metropolitan Statistical Area RAPE contributed by each SMSA in the state.

CHAPTER VI
ROBBERY

CHAPTER VI
ROBBERY

Definition

ROBBERY is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Volume and Rates Per 100,000 Population - 1979

The following table displays the volume and rates per 100,000 population for ROBBERY in the state of Washington and eight types of areas within the state. For comparison purposes, the corresponding USA rate is the column on the far right of the table.

ROBBERY 1979
VOLUME AND RATES PER 100,000 POPULATION

Area	Volume	% Total	Wash Rate	USA Rate
Washington Total	4,739	-	120.71	212.12
Other Cities	280	5.91	57.61	57.89
Rural	104	2.12	16.05	22.06
SMSA*	4,355	91.90	155.98	276.12
.....				
% SMSA				
King-Sno SMSA	2,842	65.26	186.02	276.15
Pierce SMSA	697	16.00	153.34	276.15
Spokane SMSA	424	9.74	127.52	276.15
Clark SMSA	106	2.44	59.44	276.15
Yakima SMSA	187	4.29	112.83	276.15
Rich-Kenn SMSA	99	2.27	74.34	276.15

*Standard Metropolitan Statistical Areas (includes Clark County)

The percentage of the total volume of ROBBERY in Washington contributed by a given area has exhibited considerable variation from 1958 to 1979. The table below illustrates the variation.

PERCENTAGE COMPOSITION OF ROBBERY VOLUME 1958-79

Area	Annual Avg.	STD. Dev.	Range	Maximum	Minimum
SMSA	89.39	4.12	12.90	95.02	82.12
Other Cities	6.67	2.17	7.74	10.85	3.11
Rural	3.86	2.16	7.78	9.23	1.45

Trends

The following table displays percentage change in rates per 100,000 for the following periods: 1958-79; 1970-79; 1978-79. Although the ROBBERY rates have increased by a large percentage over the long term, there appears an encouraging trend in the figures representing the years 1978-1979. This is one of the few bright spots in an otherwise dismal picture of increasing criminal activity. For comparison purposes the percentage increase in the corresponding USA rate has been placed in parentheses.

PERCENTAGE CHANGE IN ROBBERY RATES BY AREA

Area	1958-79		1970-79		1978-79	
	Wash %	(USA) %	Wash %	(USA) %	Wash %	(USA) %

CHAPTER VII
AGGRAVATED ASSAULT

CHAPTER VII
AGGRAVATED ASSAULT

Definition

Aggravated ASSAULT is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of ASSAULT is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

Volume and Rates Per 100,000 Population - 1979

The following table displays the volume and rates per 100,000 population of aggravated ASSAULT for the state of Washington and eight types of areas within the state. For comparison purposes, the corresponding USA rate is the column on the far right of the table. The second column in the table represents the percentage of the total volume of aggravated ASSAULT contributed by a given area. The bottom half of the second column represents the percentage of the total volume of Standard Metropolitan Statistical Area aggravated ASSAULT contributed by each SMSA in the state.

**AGGRAVATED ASSAULT
VOLUME AND RATES PER 100,000 POPULATION**

Area	Volume	% Total	Wash Rate	USA Rate
Washington State Total	10,317	-	262.79	279.06
Other Cities	1,342	13.01	276.10	248.01
Rural	1,435	13.91	221.50	142.77
SMSA (Total)*	7,540	73.08	270.05	312.46

* % SMSA

King-Sno SMSA	4,153	55.08	271.83	312.46
Pierce SMSA	1,229	16.30	270.37	312.46
Spokane SMSA	783	10.38	235.49	312.46
Clark SMSA	259	3.44	145.24	312.46
Yakima SMSA	791	10.49	477.29	312.46
Rich-Kenn SMSA	325	4.31	244.06	312.46

*Standard Metropolitan Statistical Areas (Includes Clark County)

The percentage of the total volume of aggravated ASSAULT in Washington contributed by a given area has exhibited considerable variation from 1958 to 1979. The table below illustrates the variation.

PERCENTAGE COMPOSITION OF AGGRAVATED ASSAULT VOLUME 1958-79

Area	Annual Avg.	Std. Dev.	Range	Maximum	Minimum
SMSA	68.70	15.62	32.29	80.60	48.31
Other Cities	15.62	4.43	17.49	26.69	9.20
Rural	15.67	5.98	20.66	28.86	8.20

Trends

The following table displays percentage change in rates per 100,000 population for the following periods: 1958-79; 1970-79; 1978-1979. These figures are, perhaps, the most devastating of all as they depict an increasingly violent society. For comparison purposes the percentage increase in the corresponding USA rate has been placed in parentheses.

PERCENTAGE CHANGE IN RATES BY AREA

Area	1958-79		1970-79		1978-79	
	Wash %	(USA) %	Wash %	(USA) %	Wash %	(USA) %

CHAPTER VIII
PROPERTY CRIME

CHAPTER VIII
PROPERTY CRIME

Definition

PROPERTY crime is composed of three index crimes: burglary, larceny-theft, and motor vehicle theft.

Volume and Rates Per 100,000 Population - 1979

The following table displays the volume and rates per 100,000 population of property crime for the state of Washington and eight types of areas within the state. For comparison purposes, the corresponding USA rate is the column on the far right of the table. The second column in the table represents the percentage of the total volume of PROPERTY crime contributed by a given area. The bottom half of the second column represents the percentage of the total volume of Standard Metropolitan Statistical Area PROPERTY crime contributed by each SMSA in the state

Trends -1958-79

o Percentage Composition of Property Crime Volume

The percentage of the total property crime volume in Washington contributed by a given area has exhibited considerable variation from 1958 to 1979. The following table illustrates the variation.

PERCENTAGE COMPOSITION OF PROPERTY CRIME VOLUME 1958-79

	SMSAs	Other Cities	Rural
1958	68.64	15.12	16.24
1959	71.49	14.35	14.16
1960	70.62	15.58	13.80
1961	71.25	14.56	14.19
1962	71.65	14.25	14.09
1963	72.03	14.76	13.21
1964	71.67	14.84	13.48
1965	71.47	15.83	12.71
1966	71.59	15.62	12.79
1967	73.50	14.81	11.70
1968	75.83	13.35	10.82
1969	77.32	12.45	10.23

Source: Uniform Crime Reports - 1958-1979

The following table displays percentage change in rates per 100,000 population for the following periods: 1958-72; 1973-79; 1978-79. The most significant long term increases occur in the category, Other Cities, and in one specific urban area, Pierce SMSA. While the PROPERTY crime increases are not as dramatic as similar occurrences in violent crime rates (see Chapter III), they do provide impetus for further investigation of the more detailed chapters that follow pertaining to the incidence of specific PROPERTY crimes. For comparison purposes, the percentage increase in the corresponding US rate has been placed in parentheses in the following table.

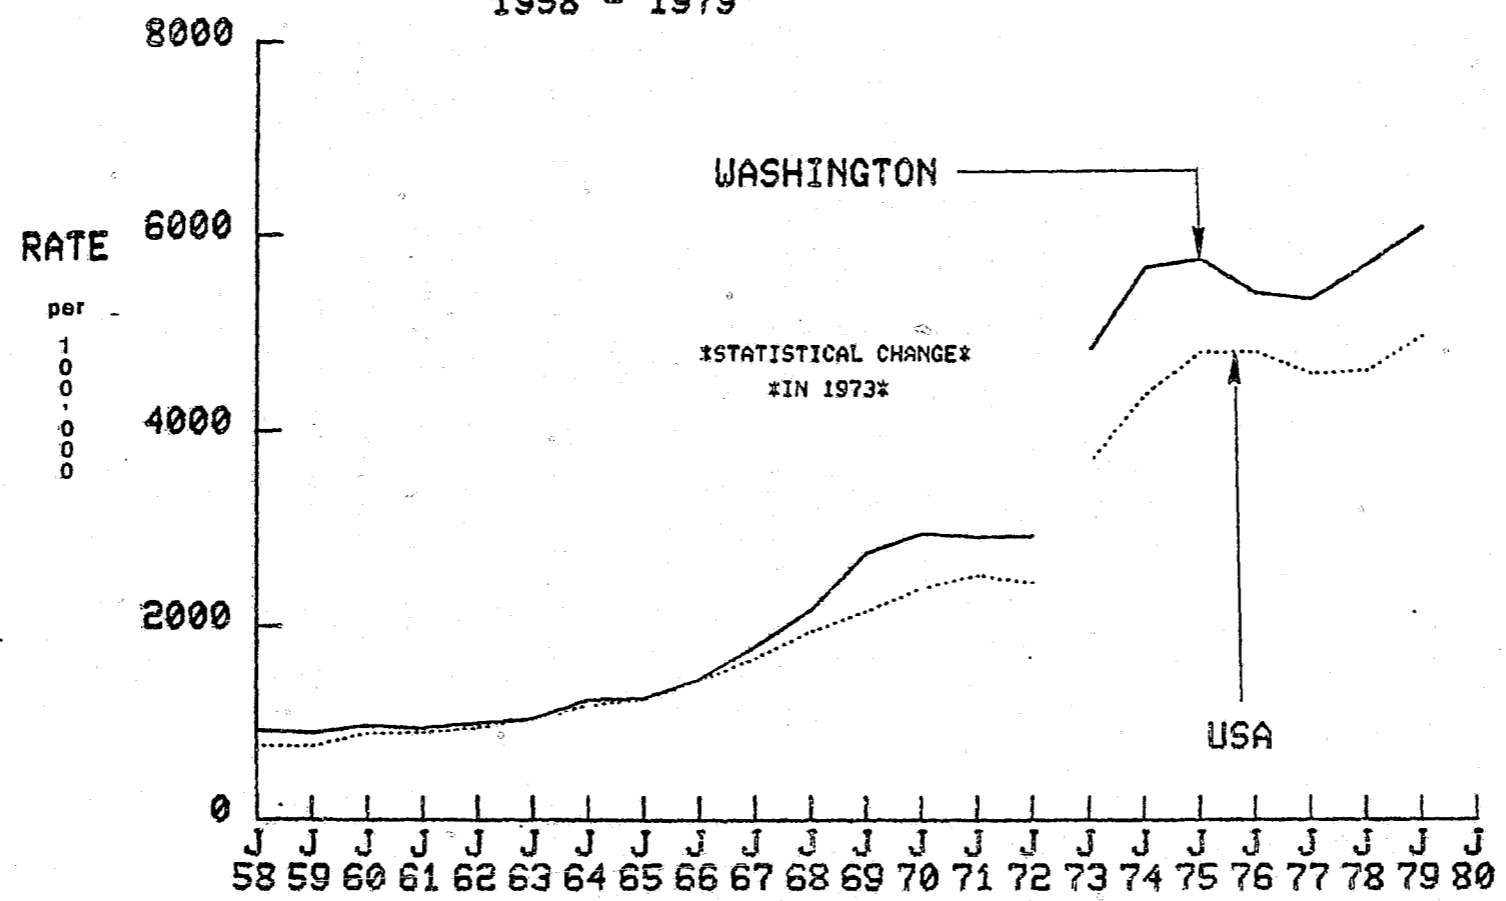

PROPERTY CRIME
PERCENTAGE CHANGE IN RATES BY AREA

Area	1958-72		1973-79		1978-79

CHAPTER IX
BURGLARY

CHAPTER IX

BURGLARY

Definition

The Uniform Crime Reporting Program defines BURGLARY as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as BURGLARY.

Volume and Rates Per 100,000 Population - 1979

The following table displays the volume and rates per 100,000 population of BURGLARY for the state of Washington and eight types of areas within the state. For comparison purposes, the corresponding USA rate is the column on far right of the table. The second column in the table represents the percentage of the total volume of burglary contributed by a given area. The bottom half of the second column represents the percentage of the total volume of Standard Metropolitan Statistical Area BURGLARY contributed by each SMSA in the state.

BURGLARY 1979
VOLUME AND RATES PER 100,000 POPULATION

Area	Volume	% Total	Wash Rate	USA Rate
Washington Total	70,024	-	1,783.60	1,499.09
Other Cities	8,483	12.11	1,745.29	1,134.40
Rural	7,967	11.38	1,229.72	770.81
SMSA (Total)*	53,574	76.51	1,918.78	1,708.82

*Standard Metropolitan Statistical areas (Includes Clark County)

Trends

The following table displays percentage change in rates per 100,000 population for the following periods: 1958-79; 1970-79; 1978-79. The ten-year figures depict some perplexing trends for the urban areas. Both the Spokane and Pierce SMSAs show a fairly high rate while the King-Snohomish SMSA figures indicate a decrease for the same time period. For comparison purposes, the percentage increase in the corresponding USA rate has been placed in parentheses.

PERCENTAGE CHANGE IN RATES BY AREA

Area	1958-79		1970-79		1978-79	
	Wash %	(USA) %	Wash %	(USA) %	Wash %	(USA) %

CHAPTER X
LARCENY/THEFT

CHAPTER X

LARCENY/THEFT

Definition

LARCENY-THEFT is the unlawful taking, carrying, leading or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. It does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category for crime reporting purposes inasmuch as it is a separate Crime Index offense.

Volume and Rates Per 100,000 Population - 1979

The following table displays the volume and rates per 100,000 population of LARCENY-THEFT for the state of Washington and eight types of areas within the state. For comparison purposes, the corresponding USA rate is the column on the far right of the table. The second column in the table represents the percentage of the total volume of LARCENY-THEFT contributed by a given area. The bottom half of the second column represents the percentage of the total volume of Standard Metropolitan Statistical Area LARCENY-THEFT by each SMSA in the state.

LARCENY-THEFT 1979
VOLUME AND RATES PER 100,000 POPULATION

Area	Volume	% Total	Wash Rate	USA Rate
Washington Total	152,204	-	3,876.82	2,988.44

Rich-Kenn SMSA	5,683	5.09	4,267.61	3,353.08

*Standard Metropolitan Statistical Areas (Includes Clark County)

The percentage of the total volume of LARCENY-THEFT in Washington contributed by a given area has exhibited considerable variation from 1958 to 1979. The table below illustrates the variation.

PERCENTAGE COMPOSITION OF LARCENY-THEFT VOLUME 1958-79

Area	Annual Avg.	Std. Dev.	Range	Maximum	Minimum
SMSA	71.54	3.58	12.88	77.97	65.09
Other Cities	16.40	1.75	6.88	18.81	11.93
Rural	12.06	2.98	8.54	17.09	8.55

Trends

The following table displays percentage change in rates per 10,000 population for the following periods: 1958-72; 1973-79; 1978-79. The comparison period, 1973-1979, is unique in that the other crime specific chapters included a ten year trend, viz., 1970-1979. This period was selected due to the change in 1973 to reporting all larcenies in lieu of only those of \$50 value or greater as in 1972 and earlier. Overall, it appears that LARCENY/THEFT since 1973 has increased at a relatively modest rate compared to the national rate. For comparison purposes, the percentage increase in the corresponding USA rate below has been placed in parentheses.

PERCENTAGE CHANGE IN RATES BY AREA

CHAPTER XI
MOTOR VEHICLE THEFT

CHAPTER XI

MOTOR VEHICLE THEFT

Definition

MOTOR VEHICLE THEFT is defined as the theft or attempted theft of a motor vehicle in the Uniform Crime Reporting system. This definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

Volume and Rates Per 100,000 Population - 1979

The following table displays the volume and rates per 100,000 population for the state of Washington and eight types of areas within the state. For comparison purposes, the corresponding USA rate is the column on the far right of the table. The second column in the table represents the percentage of the total volume of MOTOR VEHICLE THEFT contributed by a given area. The bottom half of the second column represents the percentage of the total volume of Standard Metropolitan Statistical Area MOTOR VEHICLE THEFT contributed by each SMSA in the state.

MOTOR VEHICLE THEFT 1979
VOLUME AND RATES PER 100,000 POPULATION

Area	Volume	% Total	Wash Rate	USA Rate
Washington Total	17,057	-	434.46	498.50
Other Cities	1,978	11.60	406.95	266.34
Rural	1,428	8.37	220.41	137.12
SMSA (Total)*	13,651	80.03	488.92	610.62
.....				
		% SMSa		
King-Sno SMSA	8,487	62.17	555.50	610.62
Pierce SMSA	1,833	13.43	403.25	610.62
Spokane SMSA	1,513	11.08	455.04	610.62
Clark SMSA	704	5.15	394.78	610.62

Rich-Kenn SMSA	444	3.25	333.42	610.62

*Standard Metropolitan Statistical Areas (Includes Clark County)

The percentage of the total volume of MOTOR VEHICLE THEFT in Washington contributed by a given area has exhibited considerable variation from 1958-79. The table below illustrates the variation.

PERCENTAGE COMPOSITION OF MOTOR VEHICLE THEFT VOLUME 1958-79

Area	Annual Avg.	Std. Dev.	Range	Maximum	Minimum
SMSA	80.18	4.21	13.03	86.69	73.65
Other Cities	12.80	3.44	10.18	18.08	7.91
Rural	7.02	1.48	6.08	10.83	4.75

Trends

The following table displays percentage change in rates per 100,000 population for the periods: 1958-1979; 1970-1979; 1978-1979. The categories Rural Clark SMSA and Spokane SMSA are the leaders in the percentage change figures for MOTOR VEHICLE THEFT. There is insufficient history to yet determine the relative position of the Richland-Kennewick SMSA but the short-term figures indicate that this category bears watching. For comparison purposes in the following chart, the percentage increase in the corresponding US rate has been placed in parentheses.

PERCENTAGE CHANGE IN RATES BY AREA

	1958-1979		1970-1979		1978-1979

PART 3
CRIME IN URBAN AREAS

CHAPTER XII
KING/SNOHOMISH

CHAPTER 12

This chapter deals exclusively with detailed information regarding criminal activity occurring from 1958 to 1979 in the KING-SNOHOMISH Standard Metropolitan Statistical Area. Crime rates are compared to the US rate for similar periods and percent change is detailed for each category every year. Following the Total Index Crimes chart is a comparison chart for Total Crime, Violent and Property crime rates. Violent crime rates are presented as an entity then each violent crime is examined in order, viz., murder, forcible rape, robbery and aggravated assault. On subsequent pages, property crime rates are delineated, followed in order by Burglary, Larceny/Theft and Motor Vehicle Theft.

CHAPTER XIII

PIERCE

CHAPTER 13

This chapter deals exclusively with detailed information regarding criminal activity occurring from 1958 to 1979 in the PIERCE Standard Metropolitan Statistical Area. Crime rates are compared to the US rate for similar periods and percent change is detailed for each category every year. Following the Total Index Crimes chart is a comparison chart for Total Crime, Violent and Property crime rates. Violent crime rates are presented as an entity than each violent crime is examined in order, viz., Murder, Forcible Rape, Robbery and Aggravated Assault. On subsequent pages, Property crime rates are delineated, followed in order by Burglary, Larceny/Theft and Motor Vehicle Theft.

CHAPTER XIV

SPOKANE

CHAPTER 14

This chapter deals exclusively with detailed information regarding criminal activity occurring from 1958 to 1979 in the SPOKANE Standard Metropolitan Statistical Area. Crime rates are compared to the US rate for similar periods and percent change is detailed for each category every year. Following the Total Index Crimes chart is a comparison chart for Total Crime, Violent and Property crime rates. Violent crime rates are presented as an entity then each violent crime is examined in order, viz., Murder, Forcible Rape, Robbery and Aggravated Assault. On subsequent pages, Property crime rates are delineated, followed in order by Burglary, Larceny/Theft and Motor Vehicle Theft.

CHAPTER XV

YAKIMA

CHAPTER XV

This chapter deals exclusively with detailed information regarding criminal activity occurring from 1971 to 1979 in the YAKIMA Standard Metropolitan Statistical Area. Crime rates are compared to the US rate for similar periods and percent change is detailed for each category every year. Following the Total Index Crimes chart is a comparison chart for Total Crime, Violent and Property crime rates. Violent crime rates are presented as an entity then each violent crime is examined in order, viz., Murder, Forcible Rape, Robbery and Aggravated Assault. On subsequent pages, Property crime rates are delineated, followed in order by Burglary, Larceny/Theft and Motor Vehicle Theft.

CHAPTER XVI
RICHLAND-KENNEWICK

CHAPTER XVI

This chapter deals exclusively with detailed information regarding criminal activity occurring from 1975 to 1979 in the RICHLAND-KENNEWICK Standard Metropolitan Statistical Area. Crime rates are compared to the US rate for similar periods and percent change is detailed for each category every year. Following the Total Index Crimes chart is a comparison chart for Total Crime, Violent and Property crime rates. Violent crime rates are presented as an entity then each violent crime is examined in order, viz., Murder, Forcible Rape, Robbery and Aggravated Assault. On subsequent pages, Property crime rates are delineated, followed in order by Burglary, Larceny/Theft and Motor Vehicle Theft.

**APPENDIX 1
DEFINITIONS**

APPENDIX I

DEFINITIONS

Part I Offenses

Criminal Homicide

a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty; and (2) the killing of a felon by a private citizen. b. Manslaughter by negligence: the killing of another person through gross negligence. Excludes traffic fatalities. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

Forcible Rape

The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used - victim under age of consent) are excluded.

Robbery

The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault

An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary-breaking or entering

The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny-theft (except motor vehicle theft)

The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

Motor vehicle theft

The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

Arson

Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Part II Offenses

Other assaults (simple)

Assaults and attempted assaults where no weapon was used and which did not result in serious or aggravated injury to the victim.

Forgery and counterfeiting

Making, altering, uttering, or possessing, with intent to defraud, anything false which is made to appear true. Attempts are included.

Fraud

Fraudulent conversion and obtaining money or property by false pretenses. Included are larceny by bailee and bad checks, except forgeries and counterfeiting.

Embezzlement

Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

Stolen property; buying, receiving, possessing

Buying, receiving, and possessing stolen property, including attempt

Vandalism

Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or person having custody or control.

Weapons; carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

Prostitution and commercialized vice

Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

Sex offenses (except forcible rape, prostitution, and commercialized vice)

Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

Drug abuse violations

State and local offenses relating to narcotic drugs, such as unlawful possession, sale, use, growing, and manufacturing of narcotic drugs.

Gambling

Promoting, permitting, or engaging in illegal gambling.

Offenses against the family and children

Nonsupport, neglect, desertion, or abuse of family and children.

Driving under the influence

Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

Liquor laws

State or local liquor law violations, except "drunkenness" (offense 23) and "driving under the influence" (offense 21). Federal violations are excluded.

Drunkenness

Drunkenness or intoxication. Excluded is "driving under the influence"

Disorderly conduct

Breach of the peace.

Vagrancy

Vagabondage, begging, loitering, etc.

All other offenses

All violations of state or local laws, except offenses 1-25 and traffic offenses.

Suspicion

No specific offense; suspect released without formal charges being placed.

Curfew and loitering laws

Offenses relating to violation of local curfew or loitering ordinances where such laws exist.

Runaways

Limited to juveniles taken into protective custody under provisions of local statutes.

UNIFORM CRIME REPORTING AREA DEFINITIONS

Standard Metropolitan Statistical Area

The geographic presentation of Uniform Crime Reporting (UCR) data relies on the concept of the Standard Metropolitan Statistical area (SMSA). Comprehension of this term is crucial to understanding the related UCR concepts of "Other Cities" and "Rural Area," which are discussed later in this appendix.

An SMSA is a statistical construct used to define metropolitan areas in a uniform manner. It is an integrated economic and social unit with a recognized large population nucleus. The SMSA concept was developed to facilitate the analysis and dissemination of statistical information on metropolitan areas. The primary objective in establishing standard definitions of these areas was to make it possible for Federal statistical agencies to utilize the same boundaries when publishing statistical data.

An SMSA always includes a central city (cities) of specified population (generally over 50,000) and the county (counties) in which it is located. In addition, an SMSA also includes contiguous counties when the economic and social relationships between the central and contiguous counties meet specified criteria of metropolitan character and integration. An SMSA may cross state lines. In New England, SMSAs are composed of cities and towns instead of counties.

The Office of Federal Statistical Policy and Standards of the U.S. Department of Commerce has responsibility for designating and defining SMSAs. It in turn, is advised by the Federal Committee on Standard Metropolitan Statistical Areas. The detailed criteria followed in establishing and defining SMSAs can be found in the U.S. Department of Commerce publication, Standard Metropolitan Statistical Areas, revised edition 1975.

Community Types

Uniform Crime Reporting data are often presented using three community-type aggregations. These are SMSA, Other Cities, and Rural Area.

SMSAs, as defined earlier in this appendix, made up approximately 73 percent of the total United States population in 1980. In addition to the core city (cities), SMSA includes suburban cities and suburban counties. Together these two groups make up the suburban area. A suburban area includes cities with less than 50,000 inhabitants in addition to counties (unincorporated areas) within the SMSA.

"Other Cities" are those outside SMSAs. Most of these places are incorporated and comprised 11 percent of the 1980 population of the United States.

A rural area is that portion of a county outside the SMSA excluding areas covered by city policy agencies. For crime reporting purposes, rural areas are made up of unincorporated portions of counties outside urban places and SMSAs. They comprised 16 percent of the 1980 national population.
