## For your information

This is the 16 th annual SOURCEBOOK OF CRIMINAL JUSTICE STATISTICS. It brings together in a single volume nationwide data of interest to the criminal justice community.

Almost all its data are nationwide in scope and, where possible, they are displayed by regions, States, and cities to increase their value for local decisionmakers and for comparative analyses.

Data available for limited groups of cities, States, or jurisdictions are included if they pertain to a topic of major concern.

## Overview of the availability of nationwide data

Statistical information about srime and criminal justice in the United States is published by hundreds of public and private agencies, academic institutions, research organizations, public opinion polling firms, and other groups. All levels of government collect and disseminate such data.

Figures $A$ and $B$ summarize the availability of national-level data on criminal justice. Figure A shows where data are available and where gaps exist. Asterisks mark the stages of the criminal justice process addressed by data in the SOURCEBOOK. The absence of an asterisk is a signal that relevant data are not available or do not meet SOURCEBOOK criteria.

Gaps in the availability of national data can be seen in Figures $A$ and $B$. Annual data are available for such topics as the extent of crime and number of persons under correctional supervision. But for many other topics, such as the pretrial and courtprocessing stages (grand jury, jury trial, and others), sentencing, and postdispositional outzomes for offenders, the data are notably meager and of limited coverage, particularly for State and local levels. For some topics, such as court caseloads, the available data pertain mostly to the Federal system.

Organization of the SOURCEBOOK

## This book has six sections:

(1) Characteristics of the Criminal Justice Systems presents data on the number and types of criminal justice agencies and employees, criminal justice expenditures, workload of agency personnel, and so on. It also includes tables that summarize, State by State, the statutory, regulatory, or administrative characteristics and practices of criminal justice agencies.
(2) Public Attitudes Toward Crime and Criminal Justice-related Topics presents the results of nationwide public opinion polls on such matters as fear of victimization; the death penalty; prison reform; gun control; drug use; and evaluation of law enforcement, judicial, and correctional agency performance.
(3) Nature and Distribution of Known Offenses presents data on several indicators of the extent of illegal activities. They include proportions of persons reporting that they have used various drugs or participated in other illegal activities; surveys of individuals and households that may have been victims of crimes; and low enforcement agency counts of offenses reported to them.
(4) Characteristics and Distribution of Persons Arrested includes counts of arrestees by age, sex, race, and area; proportions of known crimes cleared by arrests; and counts of illegal goods seized.
(5) Judicial Processing of Defendants presents data on the number of juveniles and adults processed through the courts and on the charocteristics, dispositions, and sentences of defendants.
(6) Persons Under Correctional Supervision presents data about persons on probation and parole, population and movement of inmates of State and Federal prisons, and characteristics of State prison inmates. It also presents data olt offenders executed and offenders currently under sentence of death.

Each of the six sections opens with an overview of its contents.

Annotated sources and list of publishers

Publications from which tables or figures have been taken for presentation in SOURCEBOOK are described in annotations that precede the Appendices. The annotations include standard bibliographic information, periodicity of publication, dates of tabular information appearing in the publication (many sources, even some annual reports, contain data for a number of years), a brief summary of the publication's contents, and a list of SOURCEBOOK tables and figures taken from the sources. Addresses of the publishers follow the annotations.

## Explanatory appendices

For sources that use complex survey methods or that require a long list of definitions of terms, an explanatory text is presented in the SOURCEBOOK. These appendices add information or clarify the data presented, but readers should consult the original sources for even more detailed and complete explanations.

## Reliability of the data

Data in this book are no more reliable or complete than the sources from which they are taken. Responsibility for the quality of data is borne by the original source; responsibility for its selection and presentation rests with the SOURCEBOOK staff.

## Reporting periods

The aim for each edition of the SOURCEBOOK is to combine the most recent data available with earlier data to show trends. Unfortunately, many "most recent" reports are based on data already several years old at the time of publication.

To complicate matters, it is sometimes impossible or imprecise to compare dota from different sources. For example, data in one source may be expressed only in full fiscal years while those in another are expressed only in full calendar years.

Until June 30, 1976, the fiscal year for Federal agencies ran from July 1 through June 30, but it now runs from October I through September
30. The period July I-September 30, 1976, is called the "transition quarter." Because various data sources treat this change in different ways, it is best to check a table's explanatory note to make sure of the precise periods covered by its data.

Table and figure preparation
Updating. For tables and figures from annual publications, such as the FBI's Crime in the United States and Criminal Victimization in the United States of the U.S. Department of Justice, updating involves replacing older with newer data, taking cal to note any changes in methodology or reporting procedures that should be brought to the reader's attention.

For tables and figures from nonannual and special publications (such as surveys, research reports, and public opinion polls), updating and expansion involves searches for new or more recent data. Sometimes, data from previous editions of the SOURCEBOOK are retained, either alone or along with more recent data.

Bodies of tables. The bodies of most SOURCEBOOK tables appear exactly as in the original sources. This presentation is consistent with the SOURCEBOOK's main function--to bring together data from diverse sources for presentation as originally published, rather than to transform or recompute the original data.

However, the SOURCEBOOK staff has:
(a) constructed some tables based on printed narrative or machinereadable data from the source; and
(b) adapted some tables with only nonsubstantive changes from the source.

Notes. SOLRCEBOOK tables carry three types of explanatory and cautionary notes:
(1) Notes that follow tables and begin with "Note:" are written by the SOURCEBOOK staff from information in the original source.
(2) Some are brief notes in parentheses "( )" just above the table body. Most of these notes repeat information from the source table, but a few are added by the SOURCE-
BOOK staff.
(3) Some are footnotes reprinted as they appeared in the original source. Most of these footnotes are keyed to specific table entries or to variables that require explanation.

## A note on definitions of terms

Because the SOURCEBOOK includes data from so many sources, similar or identical terms sometimes have different referents when used in different sources. For example, the precise meaning of terms such as "case," "caseload," "rate," and "race/ethnicity," differs among sources. To clarify the meaning of terms as they are used by various sources, many definitions are given in notes on tables and in appendices to which table notes refer.

However, in a compilation such as this it is impossible to provide an exhaustive list of definitions and explanations for each table that will satisfy the needs of all readers. Users with strong interest in particular tables--especially those not familiar with the substantive area to which a table refers--are advised to consult the original source for a fuller explanation of subtleties with respect to data collection procedures, data exclusions, definitions of terms, and so on.

## Cross-references to last year's edition

For each table and figure in this edition, the figure and table list (which follows the table of contents) indicates whether last year's edition contained exactly the same table or an equivalent table with data from an earlier year.

## Your input requested

Your critical comments and suggested changes will help us to improve future editions of the SOURCEBOOK.

Please tell us about appropriate sources of criminal justice statistics you believe we have overlooked. Of special interest are sources of data--preferably, but not necessarily, national in scope--that have not been drawn upon for this edition.

It would help us to know for what purposes you have used the SOURCEBOOK and how much it has helped in achieving those purposes.

A special page for your cormments and suggestions is at the end of the book, just after the index. Please use this self-mailer to give us the benefit of your comments and suggestions for a more useful SOLRCEBOOK.

## Guide to symbols used in tables

The following symbols have been used uniformly, unless otherwise noted in specific tables:

0 Represents the quantity zero or rounds to less than half the unit of measurement shown.

NA Data not separately enumerated, tabulated, or otherwise available.
$X$ Figure not applicable because column heading, stub line, or other contingencies make an entry impossible, absured, or meaningless.

B Not computed because the base figure is too small from which to generate a derived figure that meets statistical standards for reliability.
() Figure in parentheses is the base on which percentages or other statistics in the table column or row have been calculated. A lower case lefter in parentheses in a table cell is a footnote entry.
-- No entry in original source; reason not differentiated in original source.
$Y$ Indicates that the relevant attribute is present.

Where a different symbol meaning is used in order to maintain clarity within the context of a given table, this is noted for that particular table.

## Acknowledgments

The SOURCEBOOK OF CRIMINAL JUSTICE STATISTICS is truly a team effort, involving many dedicated people in Albany, Washington, and throughout the country. We are deeply grateful to all of these professionc s who make this work bossible.

Ann L. Pastore, Associate Director of the project and Managing Editor of SOLRCEBOOK, has engineered all aspects of the book's production for 16 years. Ann deserves credit for the design and clarity of the volume, and for her painstaking efforts to make the book user-friendly and attractive. Her expertise, talent and dedication is reflected in every page of every SOURCEBOOK, and we grotefully acknowledge our indebtedness to her.

Kim Schoonmaker, our Editorial Assistant, has lent her considerable tolents to this project for many years, and the high professional standards of her work are also reflected throughout several volumes of SORCEBOOK. We deeply appreciate Kim's excellent contributions to this work.

Sarah Perrotte, statistical typist, diligently prepared the text and updated numerous tables with great care and efficiency. We are grateful for the ability and enthusiasm Sarah has brought to this edition of SOURCEBOOK.

Our Assistant Editors help to define the SOLRCEBOOK in many ways. We rely on their judgement, methodological expertise, writing skills and sense of humor on a daily basis. We appreciate the work of Senior Assistant Editor Kathleen Maguire and Assistant Editors Karen Casey, Michelle Matheron, and Eileen Wolck. We also acknowledge the conscientiousness of Mary Finn who provided additional production assistance on this edition.

Sue A. Lindgren, Associate Deputy Director of the Bureau of Justice Statistics, again contributed her sharp eye and substantial experience in criminal justice statistics in reviewing the manuscript. We would like to acknowledge the time and care that Sue devotes to the SOLRCEBOOK each year. Her many suggestions have greatly improved the final product. Marilyn Marbrook,

Publications Chief at the Bureau of Justice Statistics, also lent her expertise and talent to the project, and has guided several volumes through printing and distribution. We would like to thank Marilyn for her able contributions to this project

The SORCEBOOK staff also relies on many individuals in State and Federal justice agencies, research centers, and universities who produce criminal justice statistical information. These people assist us in many ways, including advising us of new sources of criminal justice statistical data, providing prepublication copies of materials so we can meet our publication deadline, and answering myriad questions from our Assistant Editors about terminology and data collection procedures. This year, the following individuals were particularly helpful and we acknowledge their generous assistance: Thomas Hester and Kelly Shim of the Bureau of Justice Statistics; Pat Richards of the Administrative Office of the United States Courts; Alice Durant, Irt migration and Naturalization Service; Lloyd Johnston, Jerald Bachman, and Patrick O'Malley, Institute for Social Research; Delbert S. Elliott, Institute for Behavioral Research; Niarj Marlette, Contact Center, Inc.; John D. Fluke, American Humane Association; Michael J. Karter, Jr., National Fire Prevention Association; Kathleen Sampson and Sheila Macmanus, American Judicature Society; Mary Zavada, Insurance Information Institute; Joseph Jacoby and Christopher Dunn, Bowling Green State University; Joseph P. Briggs, U.S. Marshals Service; Velmer S. Burton, Jr., University of Cincinnatti; C. W. Lawrence, U.S. Postal Inspection Service; Samuel Walker, University of Nebraska, Omaha; Fay Honey Knopp and Wm. Ferree Stevenson, The Safer Society Program; Leslie C. McAneny, The Gallup Organization; Lindsay M. Hayes, National Center on institutions and Alternatives; Ellyne R. Berz, Higher Education Research Institute, UCLA; and John Jerinings, Internal Revenue Service.

Finaily, we wish to thank the many SOLRCEBOOK users who provide information about new sources of data, comments on SOURCEBOOK, and suggestions for improvernent. We receive these comments from colleagues at professional meetings, through telephone calls, and by mail, and we follow up on all inquiries, suggestions and cormments. Suggestions of additional materials for possible inclusion in subsequent editions are especially appreciated, and can be made either by using the questionnaire at the end
of this book or by contacting the Editors at the Hindelang Criminal Justice Research Center, State University of New York, University at Albany, 135 Western Avenue, A!bany, New York 12222.

## Figures and tables

For users who wish to compare data in this book with that in the 1987 SOURCEBOOK, the number of equivalent tables and figures in the 1987 SOURCEBCOK are shown in parentheses. Table and figure numbers marked with an asterisk (*) contain identical data in the 1987 and 1988 editions; these tables have been repeated from 1987 to 1988, with possible changes in titles and notation for accuracy and consistency within this edition. The table and figure numbers within parentheses and without asterisks are those for which the most recent data are presented in (generally) the same formot as the one in the 1987 edition. Tables for which dashes (--) appear have no comparable table in the 1987 edition.

2.111 On a national standard of obscenity, by demographic characteristics, United States, 1986 (2.99*) 275
2.112 On laws regulating the distribution of pornography, by demographic choracteristics, United States, selected years 1975-88 (2.104) 276
2.113 On pornographic material leading to rape, by demographic characteristics, United States, selected years 1973-88 (2.105) 278
2.114 On insider trading, United States, 1986 (2.108*) 280
2.115 On testing Federal prison inmates for AIDS, by demographic characteristics, United States, 1987 (2.109*) 280

Nature and distribution of known offenses 281
3.1 Personal and household victimiza.. tions--estimated number, percent distribution, and rate, by sector and type of victimization, United States, 1987 (3.1) 282
3.2 Personal and household victimiza-tions--number and rate (per 1,000 units of each respective category), by type of victimization, United States, 1973-87 (3.34) 283
3.3 Percent change in rates (per 1,000 units of each respective category) of personal and household victimizations between 1973 and 1987, by type of victimization, United States (3.35) 284
3.4 Personal and household victimiza-tions--estimated percent distribu-
tion, by type of victimization and reporting to police, United States, 1987 (3.2) 285
3.5 Reasons for reporting personal and household victimizations to the police--estimated percent distribution, by type of victimization, United States, 1987 (3.3) 286
3.6 Reasons for not reporting personal and household victimizations to police--estimated percent distribution, by type of victimization, United States, 1987 (3.4) 288
3.7 Initial personal contact by police with victims of reported crimes, by type of victimization, Untied States, 1986 and 1987 (--) 290
3.8 Police response time for reported victimizations, by type of victimization, United States, 1986 and 1987 (--) 290
3.9 Police activity during initial contact with crime victims, by type of victimization, United States, 1986 and 1987 (--) 291
3.10 Type of later contact with police for reported victimizations, by type of victimization, United States, 1986 and 1987 (--) 291
3.11 Type of followup activities where victims had later contact with police, by type of victimization, United States, 1986 and 1987 (--) 292
3.12 Contact between the victim and authorities other than police for reported victimizations, by type of victimization, United States, 1986 and $1987(--) 292$
3.13 Reported victimizations where victim assistance authorities helped or advised, by type of victimization, United States, 1986 and 1987 (--) 293
3.14 Personal and household victimizations resulting in economic loss--estimated percent distribution, by type of victimization, race of victim, and value of loss, United States, 1987 (3.33) 294
3.15 Personal victimization--estimated rate (per 1,000 population in each age group), by type of victimization and age of victim, United States, 1987 (3.5) 296
3.16 Personal victimization-estimated rate (per 1,000 population age 12 and over), by type of vic-
timization and sex of victim, United States, 1987 (3.6) 297
3.17 Personal victimization--estimated rate (per 1,000 population age 12 and over), by type of victimization and race of victim, United States, 1987 (3.7) 298
3.18 Personal victimization--estimated rate (per 1,000 population in each age group), by type of victimization, age, and race of victim, United States, 1987 (3.8) 299
3.19 Personal victimization--estimated rate (per 1,000 population age 12 and over), by type of victimization, sex, and race of victim, United States, 1987 (3.9) 299
3.20 Personal victimization--estimated rate (per 1,000 population in each age group), by type of victimization, sex, and age of victim, United States, 1987 (3.10) 300
3.21 Personal victimization--estimated rate (per 1,000 population in each age group), by type of victimization, sex, age, and race of victim, United States, 1987 (3.11) 300
3.22 Personal victimization--estimated rate (per 1,000 population age 12 and over), by type of victimization and family income, United States, 1987 (3.12) 301
3.23 Personal victimization--estimated rate (per 1,000 population age 12 and over), by type of victimization, race, and family income of victim, United States, 1987 (3.13) 302
3.24 Personal victimization--estimated rate (per 1,000 population age 12 and over), by type of victimization and victim-offender relationship, United States, 1987 (3.30) 302
3.25 Personal victimizations in whic'n victim took self-protective measures--estimated number and percent, by type of victimization and victim-offender relationship, United States, 1987 (3.32) 303
3.26 Household victimization--estimated rate (per 1,000 households), by type of victimization and age of head of household, United States, 1987 (3.14) 303
3.27 Household victimization-estimated rate (per 1,000 households), by type of victimization and race of head of household, United States,
1987 (3.15) 304
3.28 Household victimization--estimated rate (per 1,000 households), by type of victimization and family income, United States, 1987 (3.16) 304
3.29 Respondents reporting whether anyone illegally entered their home during the past year, by demographic characteristics, United States, selected years 1974-88 (2.16) 305
3.30 Motor vehicle theft--estimated number and rate (per 1,000 households and per 1,000 vehicles owned), by age, race of head of household, and form of tenure, United States, 1987 (3.17) 306
3.31 Motor vehicle theft victimiza-tion--estimated rate, by household characteristics, United States, 197385 (aggregate) (--) 307
3.32 Lone-offender victimizations-estimated percent distribution, by type of victimization and perceived age of offender, United States, 1987 (3.18) 308
3.33 Lone-offender victimizations-estimated percent distribution, by type of victimization and perceived sex of offender, United States, 1987 (3.19) 308
3.34 Lone-offender victimizations-estimated percent distribution, by type of victimization and perceived race of offender, United States, 1987 (3.20) 308
3.35 Lone-offender victimizations-estimated percent distribution, by type of victimization, race of victim, and perceived race of offender, United States, 1987 (3.21) 309
3.36 Lone-offender victimizations-estimated percent distribution, by type of victimization and victim-offender relationship, United States, 1987 (3.22) 310
3.37 Multiple-offender victimiza-tions--estimated percent distribution, by type of victimization and perceived ages of offenders, United States, 1987 (3.23) 310
3.38 Multiple-offender victimiza-tions--estimated percent distribution, by type of victimization and perceived sex of offenders, United States, 1987 (3.24) 311
3.39 Multiple-offender victimiza-tions---estimated percent distribution, by type of victimization and perceived races of offenders, United States, 1987 (3.25) 311
3.40 Multiple-offender victimiza-tions--estimated percent distribution, by type of victimization, race of victim, and perceived races of offenders, United States, 1987 (3.26) 312
3.41 Multiple-offender victimiza-tions--estimated percent distribution, by type of victimization and victim-offender relationship, United States, 1987 (3.27) 312
3.42 Personal and household inci-dents--estimated percent distribution, by type of incident and time of occurrence, United States, 1987 (3.28) 313
3.43 Personal and household inci-dents--estimated percent distribution, by type of incident and place of occurrence, United States, 1987 (3.29) 314
3.44 Type of weapon used in personal incidents by armed offenders--estimated percent distribution, by type of incident and victim-offender relationship, United States, 1987 (3.31) 315
3.45 Self-protective measures used by violent crime victims, by type of victimization, United States, 1986 and 1987 (--) 316
3.46 Perceived outcomes of self-protective measures used by violent crime victims, by type of victimization, United States, 1986 and 1987 (--) 316
3.47 Respondents reporting whether they have been hit by another person, by demographic characteristics, United States, selected years 197588 (3.39) 317
3.48 Respondents reporting whether something was taken from them by force during the last year, by demographic characteristics, United
States, selected years 1974-88 (3.40) 318
3.49 "-bouseholds touched by crime" during the last 12 months--number and percent, by type of victimization, United States, 1975-87 (3.41) 319

Fig. 3.1 it-buseholds touched by crime" during the last 12 months-percent, by type of victimization, United States, 1975-87 (Fig. 3.1) 319

Fig. 3.2 i-households touched by crime" during the last 12 months-percent, by type of victimization and race of head of household, United States, 1975-87 (Fig. 3.3) 320

6.109 Prisoners executed, by jurisdiction, 1930-Dec. 31, 1987 (aggregate) (6.82) 670
6.110 Prisoners executed under civil authority, by region and jurisdiction, 1930-87 (6.83) 671
6.1ll Prisoners executed under civil authority, by race and offense, United States, 1930-87 (6.84) 672
6.112 Female prisoners executed under civil authority, by offense, race, and jurisdiction, United States, 193087 (6.85) 673
6.113 Methods of execution in States authorizing the death penalty, by State, 1987 (6.86) 673

## Section 1

## Characteristics of the criminal justice systems

The data in this section describe the structure, organization, employment, and expenditures of criminal justice systems in our Nation. Many criminal justice systems exist in the United States because of the division of functions among local, county, State, and Federal jurisdictions.

The section begins with data compiled for the Bureau of Justice Statistics (BJS) from surveys conducted by the U.S. Bureau of the Census. The tables present information on the distribution of funds and personnel at all levels of government as well as various activities of individual criminal justice agencies. Detailed figures on financial expenditures and numbers of persons employed for police protection, judicial and legai services, and correctional activities are provided for each level of government in the 50 States.

The second segment of this section presents information on police expenditures, employment, and salaries collected by the Uniform Crime Reporting Program, the BJS/U.S. Bureau of the Census surveys and surveys conducted by the International City Management Association. Information is provided for State and local police agencies including sheriffs agencies. Characteristics of law enforcement officers such as race, sex, and job classification are included in this series of tables.

The third part of this section focuses on the middle stage of the criminal justice system, the court process. Information on expenditures, employment, and workload for the Federal judiciary were made available by the Administrative Office of the United States Courts. Uniform statistics for characteristics and workload of State and local courts are unavailable, but a variety of sources provide detailed information on many aspects of the judicial system. Data on judicial salaries, qualifications, terms of office, and method of selection and retention for State trial and appellate court judges are presented. In addition, information on duties of the U.S. Marshals Service is presented as are data on expenditure and utilization of jurors in U.S. District Courts. Jury size and vote requirements for the 50 States are also provided. Further, information on camera use in courts, indigent defense programs
and sentencing procedures in death penalty cases is presented. These data are from surveys by the National Center for State Courts, the Council of State Governments, and the Administrative Office of the United States Courts.

The next segment presents data on correctional activities and services, focusing on probation and parole. Information on salaries and entry requirements for probation, parole, and correctional officers is provided for each State. Characteristics of State and Federal paroling authorities and decisions of the U.S. Parole Commission are also presented. Statutory provisions for good-time reductions, life imprisonment without parole, and private sector involvement in prison industries are included.

The final tables in this section present data from statutory or administrative sources, including characteristics of State legal codes concerning juveniles, judicial waiver of juveniles to criminal court, and juvenile and adult sex offender prograns. Additionally, legislation pertaining to crime victims, restoration of feions' civil rights, handguns, and alcohol use and driving is provided. Finally, characteristics of State and Federal controlled substances acts are described.

Table 1.1
Justice system expenditures
By level of government and type of activity, United States, fiscal years 1984-86 ${ }^{\text {a }}$
(Dollar amounts in thousands. - represents zero or rounds to zero.)
$\left.\begin{array}{lrrrr}\hline & \text { Total all } \\ \text { governments }\end{array} \quad \begin{array}{c}\text { Federal } \\ \text { Covernment }\end{array}\right)$

Note: These data were collected from availoble government documents and from the annual surveys of government finances and employment conducted by the U.S. Bureau of the Census. Criminal justice data are extracted from those sources by the Census Bureau for the U.S. Department of Justice, Bureau of Justice Statistics (BJS). They are published by BJS in the Justice Expenditure and Employment Exiracts series. This series contains data for 1985 , which differ from those presented in previous editions of SOURCEBOCK. The previously published 1985 dato were collected through a special survey and are comparable to the Survey of Criminal Justice Expenditure and Employment data for 1971-79 and 1988 (forthcoming). Data for 1985 presented here represent the appropriate data to use in trend analyses for 1980-86 using the Justice Expenditure and Employment Extracts series. (See Appendix I for details.)
The Federal Government, all State governments, and a sample of county, municipal, and township governments were included in the survey. Since not all local governments were included in the survey, these data are subject to sampling error (i.e., variations that might result if a different scmple were used).

Intergovernmental expenditure consists of payments from one government to another. Such expenditure eventually will show up as a direct expendifure of a recipient government. The fiscol year for the Federal Government begins October $I$ and ends on September 30 . For survey methodology and definitions of terms, see Appendix 1 .

GDetail may not add to total due to rounding. The total category for each sector, and for the total justice system, excludes duplicative intergovernmental expenditure amounts. This was done to avoid the artificial inflation that would result if an intergovernmental expendifure of a government were tabulated and then counted again when the recipient government expended thot amount. The intergovernmental expenditure categories are not totaled for this reoson.

Note: See Note, table 1.1. These dota are from the Justice Expenditure and Employment Extracts series, which contain 1985 dota that differ from thase presented in previous editions of SOLRCEBOOK; see Note, table 1.1 and Appendix 1 for details. For survey methodology and definitions of terms, see Appendix 1.
${ }^{\text {a }}$ Detail may not add to total due to rounding.
Local government data are estimates subject to sampling variability.
CIncludes outlays of States and all types of local governments including
independent school districts and special districts, which are not displayed
separately. The "local, total" categories, which include these districts will not equal the sum of the "counties" and "municipalities" categories. $d_{\text {Justice }}$ system expenditure of independent school districts and special districts (primarily for special police forces) are not available.

Source: U.S. Department of Justice, Bureau of Justice Statistics, Justice
Expendifure and Employment Extrocts: 1984, 1985, 1986 Dato from the Annual General Finance and Employment Surveys (Washington, DC: U.S. Department of Justice, 1989).

| Counties | 303,565 | 34,659 | 11.4 | 16,987 | 49.0 | 8,338 | 24.1 | 9,334 | 26.9 |
| Municipalities | 306,607 | 35,255 | 11.5 | 31,098 | 88.2 | 3,558 | 10.1 | 599 | 1.7 |

Note: See Note, table I.1. These data are from the Justice Expenditure and Employment Extracts series, which contain 1985 data that differ from those presented in previous editions of SORCEBCOK; see Note, table 1.1 and Appendix I for details. For survey methodology anc definitions of terms, see Appendix 1.

Defail may not add to total due to rounding.
Local government data are estimates subject to sompling variability.
${ }^{C}$ lincludes outlays of States and all types of local governments including independent school districts and special districts, which are not displayed
separotely. The "local, total" categories which include these districts will got equal the sum of the "counties" and "municipalities" categories.
dustice system expenditure of independent school districts and special districts (primarily for special police forces) are not available.

Note: These data are from the budget submitted by the President to ${ }^{\text {a Budget authority and outlays include proposed legislation amounts }}$ Congress in February 1989. The budget authority (actual or esti- in addition to those presented for existing law. These amounts are mated) for each fiscal year includes appropriations for that year, as estimated at \$1 million for 1990 and 1991, and $\$ 2$ million for 1992. well as for future years, that have been approved by Congress. The outloys (octual or estimated) for the corresponding yeor are funded partially by the budget authority and partially through unspent funds allocated in previous years. "Outlays" are defined os values of checks issued, interest accrued on public debt, or other payments made, and net of refunds and reimbursements.

Note: The Justice Assistance Act of 1984 authorized the establishment of the Office of Justice Programs as the successor agency to the Office of Justice Assistance, Research, and Statistics (OJARS) and the Law Enforcement Assistance Administration (LEAA). This new body is responsible for coordinating the octivities of its compenent bureaus. Research and statistical activities are to be conducted by the National Institute of Justice (NIJ) and the Bureau of Justice Statistics (BJS), respectively. The new Bureau of Justice Assistance is responsible for the State and Local Assis-
tance Progran and the Anti-Drug Abuse Program.
${ }^{\text {a }}$ Includes effect of Gr amm-Rudman-Hollings reductions.
bauthorization for progran not provided until fiscal year 1985. 1984 funds were added to 1985 funds for award in 1985.

CReflects the total program level, which includes unused carryover ear garked by Congress for addition to oppropriated amount.
Represents amount deposited in previous year.
eA program authorized to provide funds, equipment, intelligence information, and/or personnel to a requesting State in the event of a law enforcement emergency.
A program to aid State and local law enforcement agencies in the exAhonge of intelligence information.
GRefers to an appropriation to be allocated to States housing Mariel Cuban refugees in State correctional facilities.

Note: See Note, table 1.1. These data are from the Justice Expenditure and displayed separately. The "local, total" categories which include these Employment Extrocts series, which contain 1985 data that differ from those presented in previous editions of SORCEBOOK; see Note, table 1.1 and Appendix I for details. For survey methodology and definitions of terms, see Appendix 1.
a Detail may not add to totol due to rounding.
$b_{\text {Local }}$ government data are estimates subject to sampling variability.
Includes employment of States and all types of local governments including independent school districts and special districts, which are not
districts, will not equal the sum of the "caunties" and "municipalities" gategories.
CJustice system employment of independent school districts and special districts (primarily for special police forces) are not available.

Note: See Note, table I.I. These dato are from the Justice Expenditure and Employment Extracts series, which contain 1985 data that differ fromithose presented in previous editions of SCURCEBCOK; see Note, table 1.1 and Appendix I for details. For survey methodology and definitions of terms, see Appendix 1.
a Detail may not add to total due to rounding.
${ }^{6}$ Local government data are estimates subject to sampling variability.
${ }^{C}$ Includes employment of States and all types of local governments
including independent school districts and special districts, which are not
displayed separately. The "local, total" categories which include these districts, will not equal the sum of the "counties" and "municipalities" gategories.
$\mathrm{d}_{\text {Justice system employment of independent school districts and special }}$ districts (primarily for special police forces) are not available.

Note: See Note, table 1.1. These data are from the Justice Expenditure and Employment Extracts series, which contain 1985 dota that differ from those presented in previous editions of SOLRCEBOOK; see Note, table 1.1 and Appendix ( for details. For survey methodology and definitions of terms, see Appendix 1.
${ }^{\text {a }}$ Detail may not add to total due to rounding.
$b_{\text {Local government data are estimates subject to sampling variability. }}$
CIncludes payrolls of States and all types of local governments including
independent school districts and special districts, which are not displayed
separately. The "local, total" categorics, which include these districts will not equal the sum of the "counties" and "municipalities" categories. Justice system payrolls of independent school districts and special districts (primarily for special police forces) are not available.

Source: U.S. Deportment of Justice, Bureau of Justice Statistics, Justice
Expenditure and Employment Extracts: 1984, 1985, 1986 Dato from the
Annual General Finance and Employment Surveys (Washington, DC: U.S. Department of Justice, 1989).

Note: See Note, table 1.1. These data are from the Justice Expenditure and Employment Extracts series, which contain 1985 data that differ from those presented in previous editions of SOLRCEBOOK; see Note, table I.I and Appendix I for details. For survey methodology and definitions of terms, see Appendix 1.
a Detail may not add to total due to rounding.
blocal government data are estimates subject to sampling variability.
${ }^{\text {C Includes payrolls of States and all types of local governments including }}$ independent school districts and special districts, which are not displayed
separately. The "local, total" categories, which include these districts will not equal the sum of the "counties" and "municipalities" categories. $d_{\text {Justice system payrolls of independent school districts and special }}$ districts (primarily for special police forces) are not available.

Note: See Note, table 1.1. These data are from the Justice Expenditure and Employment Extracts series, which contain 1985 data that differ from those presented in previous editions of SOURCEBOOK; see Note, table 1.1 and Appendix I for details. For survey methodology and definitions of terms, see Appendix 1.

Detail may not add to total due to rounding.
blocal government data are estimates subject to sampling variability.
${ }^{\text {C }}$ Includes payrolls of States and all types of local governments including independent school districts and special districts, which are not displayed
separately. The "local, total" categories, which include these districts will not equal the sum of the "counties" and "municipalities" categories. dustice system payrolls of independent school districts and special districts (primarily for special police forces) are not available.

Note: The Law Enforcement Management and Administrative Statistics survey (LEMAS) was conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics (BJS). "General purpose law enforcement agencies" include agencies having full arrest powers for all kinds of offenses and are not restricted to a specially defined area such as a park or a transit system. Questionnaires were mailed to a nationally representative sample of 3,054 local,
State, and sheriff law enforcement agencies using the 1986 Directory Survey of Law Enforcement Agencies maintained by the U.S. Bureau of the Census for BJS. All primary State law enforcement agencies, and city and township agencies with 135 or more sworn employees, were included in the survey. Hawaii does not maintain a State police agency. The remaining agencies were randomly sampled using a two-stage, stratified selection process. June 30,1987 , serves as a re-
ference date except for data on employees, where the poy period containing June 15, 1987 was used. The response rate for the LEMAS survey was 95.2 percent.
Readers should note that data on the number of employees and amount of expenditures in the LEMAS tables may not be comparable to BJS employment and expenditure deta presented elsewhere in SORCEBOOK due to definitional differences.
a Includes both full-time and part-time employees.
based on weighted sample results, not an exact enumeration.

Note: These data were collected in a mail survey conducted by the Inter national City Management Association in January 1987. Of the 2,616 cities surveyed, 1,334 ( 50.9 percent) provided the information requested concerning their police departments. The term "cities" refers to cities, villages, towns, townships, and boroughs. For definitions of terms, a list of States in regions, and detail of survey response rates, see Appendix 2.
${ }^{\text {a }}$ Includes uniformed and non-uniformed personnel.
Source: Gerard J. Hoetmer, "Police, Fire, and Refuse Collection, 1987," The Municipal Year Book 1988 (Washington, DC: International City Management Association, 1988), p. 138. Table adapted by SORCEBOXK staff. Reprinted by permission.

|  |  | Group I (60 cities, 250,000 ond over; population $43,916,000$ ) | $\begin{gathered} \text { Group II } \\ \text { (123 cities, } \\ 100,000 \text { to } \\ 249,999 ; \\ \text { population } \\ 17,977,000) \end{gathered}$ | $\begin{gathered} \text { Group lli } \\ \text { (300 cities, } \\ 50,000 \text { to } \\ 99,999 ; \\ \text { population } \\ 20,402,000 \text { ) } \end{gathered}$ | $\begin{gathered} \text { Group IV } \\ \text { (650 cities, } \\ 25,000 \text { to } \\ 49,999 ; \\ \text { population } \\ 22,291,000) \end{gathered}$ | Group $V$ $(1,604$ cities, 10,000 to 24,$999 ;$ population $25,115,000)$ | Group VI $(6,518$ cities, under 10,000; population $23,387,000)$ |
| County: 2,894 agencies; population 73,708,000: |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |
| Number of police employees Average number of employees | 236,222 | $x$ | $x$ | $x$ | $x$ | $x$ | $x$ |
| Average number of employees per 1,000 inhabitants | 3.2 | $x$ | X | X | X | X | X |

Note: These data are collected annually by the FBI Uniform Crime Reporting Program. "Full-time law enforcement employees" includes both law enforcement officers and civilian employees. Police officers include all "full-time, sworn personnel with full arrest powers." This excludes persons performing guard or protection duties (e.g., school crossing guards) who are not paid from police funds. "Civilian enployees include persons such as clerks, radio dispatchers, meter attendants, stenographers, and mechanics." Persons not paid from police funds are excluded. Employees on leave with pay are also excluded. (U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reporting Handbook (Washington, DC:
USCPO, 1984), pp. 71-72.) These data cre for employees who were
on the payroll on Oct. 31, 1987. For a list of States in geographic divisions, see Appendix 3.

Includes civilians.
${ }^{\text {b }}$ Includes suburban city and county law enforcement agencies within metropolitan oreas. Excludes central cities. Suburban cities and counties are clso included in other groups.

Note: Data for 1983 were obtained through a questionnaire mailed to the office of the chief of police and the office of the municipal director of personnel (or equivalent position) in the 50 largest cities in the United States. The data for 1988 are the result of a 5 -year follow-up to the 1983 study. For both surveys, 47 cities returned completed questionnaires. Cities are listed in rank order of size based on the 1980 Census of the population.
The index of Black representation is calculnted by dividing the percent of Black police officers in a department by the percent of Blacks in the local population. An index approaching 1.0 indicates that a city is closer to achieving a representation of Black police officers equal to their proportion in the local population. The Black population of a city is derived from the 1980 census of the population.

A "yes" in the table indicates the presence of an offirmative action plan for Blacks operating at some point during 1983-88.
${ }^{\text {a }}$ Voluntary plan. All others are court-ordered.
Dota for 1983 are based on 1980-81 information from the Police Executive Research Forum, Survey of Police Operational and Administrative Practices 1981 (Washington, DC: Pollice Executive Research Form, 1981).

Table adapted by SORCEBOOK staff.

Table 1.57
Entrance and maximum salaries, and mean number of years to reach
maximum salary, for police officers in cities over 10,000 persons
By. population group and region, United States, as of Jan. I, 1987

Note: See Note, table 1.50. The "entrance salary" refers to salary paid during the first 12 months of employment with the department (excluding uniform allowance, holiday pay, hazard pay, and other additional compensation). The "maximum salary" refers to salary paid to personnel who do not hold any promotional rank (excluding uniform allowance, haliday pay, hazard pay, or any other additional compensation). The mean is calculated by dividing the total number of salaries into the total amount paid in salaries. The median is the salary that marks the point below which and above which 50 percent of all the salaries fall. The first quartile salary is the
salary below which 25 percent of all salaries fall; the third quartile salary is the salary below which 75 percent of all the salaries fall. For definitions of terms, a list of States in regions, and detail of survey response rates, see Appendix 2.

Table 1.58
Solaries of city chiefs of police
By city population, metro status, region, and form of government, United States, July 1, 1987--Continued

Nate: These data are from a mail survey of municipal officials conducted by the International City Management Association in the stimmer of 1987. Of the 7,068 cities surveyed, 5,040 responded for a rate of 71.3 percent. The mean salary level is calculated by dividing the total number of salaries by the total amount paid in salaries. The median salary level is the salary that marks the point below which and above which 50 percent of all salaries fall. For definitions of terms, a list of States in regions, and detail of survey response rates, see Appendix 2.

| United States Bankruptcy Judges | 82,340 |
| United States Magistrates (full-time) |  |

Note: The former U.S. Court of Claims and U.S. Court of Customs and Patent Appeals have been reorganized into the U.S. Court of Appeals for the Federal Circuit. The Federal Circuit has the sarme legal status as the 12 Courts of Appeals which are organized on geographical lines. The Federal Courts Improvement Act of 1982 also established a U.S. Claims Court as an Article I court within the Judicial Branch.

Note: This table does not include the U.S. Supreme Court justices or stoff.
Permanent and temporary personnel are included in the totals.
${ }^{\mathrm{B}}$ This figure includes the nine judges from the Court of International Trade
(Article III), however, it is a National Court.
Cposition was created by the Speedy Trial Act of 1974.
In 1976, this total was included in the "members of the staff of Administrative Office" total.

| No report requested | 2.5 | 0.0 | 0.0 | 0.0 | 0.0 | 0.0 |

Note: These data were compiled from a variety of sources. Primarily used were questionnaires completed by judicial nominees for the Senate Judiciary Committee, transcripts of the confirmation hearings conducted by the Committee, and personal interviews. In addition, an investigation was made of various biographical directories including The American Bench (Sacramento: Fi.B. Forster), Who's Who in American Politics (New York: Bowker), Martindale-Hubbell Law Directory (Summit, NJ: MartindaleHubbell, Inc.), various regional editions of Who's Who, State legislative handouts, and relevant newspaper articles from the home State of nominees or appointees.

Low firms are categorized according to the number of partners/associates: 25 or more associates for a large firm; 5 to 24 associates for a moderate firm; and 4 or less for a small firm.
Percent subtotals for occupational experience sum to more than 100 because some appointees have had both judicial and prosecutorial experience.
The American Bar Assaciation's (ABA) ratings are assigned to candidates after investigation and evaluation by the ABA's Standing Committee on Federal Judiciary, which considers prospective Federal judicial nominees only upon referral by the U.S. Attorney General or at the request of the United States Senate. The ABA's Committee evaluation is directed primarily to professional qualifications--competence, integrity, and judicial temperament. Factors including intellectual capacity, judgment,
writing and analytical ability, industry, knowledge of the low, and professional experience are assessed. To be rated "exceptionally well qualified," the prospective nominee has to stand at the top of the legal profession in the community involved and hove outstanding legal ability, wide experience, and the highest reputation for integrity and temperament. Similar high standing in the community is also required. To be rated "well qualified," the nominee hos to have the Committee's strong offirmative endorsement and be regarded one of the best available for the vacancy from the standpoint of competence, integrity, and temperament. The evaluation of "qualified" indicates that it appears the prospective nominee would be oble to perform satisfactorily as a Federal judge with respect to competence, integrity, and temperament. When a nominee is found "not qualified," it means that the Committee's investigation indicotes that the prospective nominee is not adequate from the standpoint of competence, integrity, or temperament (American Bar Association, Standing Committee on Federal Judiciary (Chicago: American Bar Association, 1980), pp. 3-5).

Note: The Federal courts are organized into 11 geographic circuits. Each circuit consists of a number of District Courts, which are the trial courts, and a Court of Appeals, which hears appeals taken from other courts.
There is also a separate District Court and Court of Appeals for the District of Columbio.

On Oct. 1, 1981 the number of U.S. District Court Circuits was increased from 10 to 11 . The new circuit was created by the removal of Alabama, Florida, and Georgia from the Fifth Circuit and the reorganization of these courts into the Eleventh Circuit.

Beginning with the year ending June 30, 1976, U.S. District Courts have reported the number of minor offense coses filed in the Federal courts in addition to the number of felonies and misdemeanors above the minor offense level (offenses involving penalties that do not exceed 1 year imprisonment or a fine of more than $\$ 1,000$ ). This additional reporting resulted from the Speedy Trial Act of 1974 (Public Law 93-619), which required the courts to maintain records on all affenses above the petty offense level (offenses involving penalties that do not exceed 6 months incarceration and/or a fine of not more than $\$ 500$ ). Because the majority of minor offense cases are handled by magistrates in Federal courts and because this report is primarily a statistical statement reflecting the workload per authorized judgeship, the minor offense cases have been excluded from the 1976-79 data by the Adm ristrative Office of the United States
Courts. The exclusion of these casiss from the workload statistics has been done in on effort to make the 1976-79 data more comparoble to previous years' data that did not include most minor offense cases. In 1979, the Federal Magistrates Act (Public Low 96-82) expanded the authority of magistrates to dispose of all misdemeanors. To reflect the workload per outhorized judgeship, the 1980-86 data exclude all cases below the felony level.

Dato for 1979 ore provided in two columns in order to reflect the efforts of individual judges before and ofter the enactrnent of the Omnibus Judge-
ship Act (Public Law 95-486), which became effective Oct. 20, 1978. Because the increase in authorized judgeships became effective midway through the year and most of the newly authorized positions were not filled by June 30, 1979, computations based only on the newly authorized judgeships do not give an accurate indication of the efforts of individual judges.
The sharp decline in criminal cases filed in the Conal Zone after 1979 resulted from the passage of the Panama Canal Act of 1979 (Public Law 96-70), signed Sept. 27, 1979. This information was provided to SORCEBOCK staff by the Administrative Office of the United States Courts, Statistical Analysis and Reports Division.
${ }^{\circ}{ }^{\circ}$ On Apr. I, 1979, as a result of the enactment of Public Law 95-409, the Central District Court of lllinois was established, the Eastern District Court of Illinais was eliminated, and the Southern District Court of llinois underwent extensive reorganization. Consequently, data collected for the Southern District Court ofter this date are not comparable with data Gollected prior to this date.
${ }^{\text {Included }}$ in the criminal statistics for this district are numerous traffic offense cases that are classified as misdemeanors above the minor offense level. In most districts similar cases are classified as minor offenses and are excluded from this report.
${ }^{C}$ Public Law $95-157$ established the District Court of the Northern Mariana Islands on Nov. 8, 1977. Court was convened on Jan. 9, 1978.

| Warrants | 5.7 | 1.7 |
| Bail review | 1.5 | 1.5 |
| Civil consent cases | 1.1 | 1.1 |
| Additional duties | 49.2 | 51.9 |
| Motions | 28.8 | 28.7 |
| Pretrial conferences | 9.7 | 10.5 |
| Prisoner litigation | 5.3 | 5.8 |
| Other | 2.8 | 5.5 |
| Social Security | 2.6 | 1.4 |

Note: The Federal Magistrates Act (28 U.S.C. 636(b)) provides the authority under which magistrates assist courts in the performance of "additional duties." This authority was both broadened and clarified by Public Law 94-577, Oct. 21, 1976, and by new procedural rules governing most habeas corpus proceedings in the district courts, effective Feb. I, 1977. The changes make clear the ability of the parties of a civil case to consent to have the case referred to a magistrate for trial as a special master; the changes also empower magistrates to conduct evidentiary hearings in prisoner petition cases. Additionally, the role of magistrates in providing pretrial assistance to district judges in both dispositive and non-
dispositive matters has been clarified. A magistrate's authority to conduct arraignments following indictment in a criminal case is provided under Rule 10 of the Federal Rules of Criminal Procedure in 86 districts.

[^5]justice system. Fugitive warrants are issued for a variety of violations; e.g., escape, bond defoult, parole or probation violations, failure to cppear for judicial proceedings, or for fugitives from State or local jurisdictions wanted on "unlawful flight" warrants. "U.S. Marshals Service felony fugi tive" refers to warrants that the USMS maintains primary control over and includes probation and parole violators, escapees, and bond defaulters. "Other felony" refers to felony warrants originated by other Federal agencies such as the Drug Enforcement Administration, for which the USMS also assumes responsibility.

| New principal witnesses | 217 | 170 | 208 |
| Active principal witnesses | 781 | 787 | 783 |
| Active program participants ${ }^{\mathrm{a}}$ | 1,714 | 1,731 | 1,632 |
| Average number of months | 16 | 15 | 16 |
| witnesses are funded | $5,217^{\mathrm{b}}$ | 5,045 | 5,253 |
| Cumulative principal witnesses | $12,069^{\mathrm{b}}$ | 11,279 | 11,755 |
| Cumulative program participants |  |  |  |
| Number of principal witnesses |  |  |  |
| reactivated during fiscal year | 103 | 97 | 109 |

Note: See Note, figure 1.1. For the Witness Security Program, the U.S. Marshals Service provides 24 -hour protection to qualified witnesses who provide critical information to the Government and the courts about organized crime and other serious criminal enterprises. In exchange for testimony, witnesses and authorized dependents are relocated, given new identities, and provided services necessary to assist thern in becoming selfsustaining and acelimated to their new community. (Source, 1988, p. 43.)

OProgrom participants include principal witnesses and family members.
${ }^{\text {b }}$ Due to changes in the method of documenting cumulative witnesses and participants, data for fiscal year 1986 are not directly comparable to 1987 and 1988 information.

Selected qualification requirements of judges of oppellate and trial courts of general jurisdiction

By type of court and jurisdiction, as of Jan. 1, 1988

See notes on next page.

Selected qualification requirements of judges of appellate and trial courts of general jurisdiction

By type of court and jurisdiction, as of Jan. 1, 1988--Continued

Note: See Note, table 1.71. "Appellate" refers to judges of courts of last resort and intermediate appeliate courts. "Trial" refers to judges of courts of general trial jurisdiction. In some instances, information on the length of time for residency and legal experience requirements was not supplied. There are no qualification requirements for judges in Massachusetts and Rhode Island.
${ }^{a}$ Citizen of the United States. Alabama--5 years. Georgia--3 years.
Missouri-- 15 years for appellate court, 10 years for trial courts.
Citizen of the State.
CLength of time not specified.
${ }^{\text {dength of time as member of State bar not specified but must have been }}$ engaged in active practice of law for a specific number of years: 8 years for appellate court, 5 years for trial court.
${ }_{f}$ FFor court of appeals, 5 years.
${ }^{\mathrm{f}}$ For court of appeals judges only.
GQualified elector. For Arizona court of appeals, must be elector of county of residence. For Michigan Supreme Court, elector in State; court of appeals, elector of appellate circuit. For Missouri Supreme and appellate courts, electors for 9 years; for circuit courts, electors for 3 years. For Oklahoma Supreme Court and Court of Criminal Appeals, elector for 1 year; caurt of appeals and district courts, elector for 6 months. For Oregon court of appeals, qualified elector in county.
${ }^{h}$ Specific personal characteristics. Arizona, Arkansas--good moral character. Maine--sobriety of manners. Maryland--integrity, wisdom and sound legal knowledge.
'Nominee must be under certain age to be eligible. Arizono--under 65 years. Colorado--under 72 years, except when name is submitted for vacancy. Florida--under 70 years, except upon temporary assignment or to complete a term. Michigan, Chio--under 70 years.
Learned in law.
Years as a practicing lawyer and/or service on bench of court of record in State may satisfy requirement. Arkansas--appellate: 8 years; trial: 6 years. Indiana-- 10 years admitted to practice or must have served as a circuit, superior or criminal court judge in the State for at least 5 years. Kansas--appellate: 10 years; trial: 5 years (must have served a an associate district judge in State for 2 years). Texas--appellate: 10 years trial: 4 years. Vermont--5 of 10 years preceding appointment. West Virginia--appellate: 10 years; trial: 5 years. Puerto Rico--appellate: 10 years; trial: 5 years.
Six months.
m person convicted of a felony or breach of public trust is not eligible to the office for a period of 20 years after conviction.
May not have been previously removed from judicial office.
Oxcept that record of birth is required.
PThirty years for judges of court of oppeals and court of criminal appeals. FFor court of appeals, odmitted to practice for 5 years.
r90 days.

Note: The salaries reported for the highest appellate courts refer to salaries paid to associate justices, not chief justices. National averages for the highest appellate and general trial courts are based an figures for the 50 States. For intermediate appellate courts, the average is based on the 37 States that have such courts. Two figures are shown for States where localities supplement State-paid salaries. The first is the sum of the State pay plus the lowest supplement paid by the localities. The second figure (shown in parentheses) is the sum of the State pay plus the highest possible supplement paid by the Icoalities. Supplements may include pay-
ments for travel and other business expenses, and locaily authorized salary increments.
${ }^{a}$ Median salary.

Method of selection and length of initial and retention terms of the highest appellate court justices
By State, as of Navember 1988--Continued

#### Abstract

Note: These data were compiled through a survey of State statutes: they were then verified by personnel of the American Judicature Society in each State. "Partisan election" refers to elections in which the judicial candidates' names appear on the ballot with their respective party labels; "nonpartison election" refers to the situation when no party labels are attached to judicial candidates' names on the ballot. "Retention election" refers to an election in which a judge runs unopposed on the ballot and the electorate votes solely on the question of his continuation in office. In the retention election, the judge must win a majority of the vote in order to serve a full term except in lllinois which requires 60 percent. "Nominating cormission" is a merit selection procedure that refers to the nonpartisan body, composed of lawyers and nonlowyers, which octively recruits, screens, and nominates prospective judicial candidates to the executive for appointment. The nominating cormission method of selection was established by executive order in Delaware, Maryland, and Massachusetts and by constitutional or statutory authority in all other jurisdictions. "Initial selection" is defined as the constitutional or statutory method by which judges are selected for a full term of office. "Retention" refers to the method used to select judges

 for subsequent terms of office.Oin States that use nominating cormissions, the governor makes the gppointment.
The judicial selection commission submits a list of prospective judges to the governor who nominates one to fill a vacancy. The legislature then votes to approve or disapprove that nomination.
clnitial appointment is made by the President of the United States and confirmed by the Senate. If the President does not wish to reappoint the judge, the District of Columbia Nomination Commission compiles a new list of candidates.
The highest State court is named the Court of Appeals.
The appointment requires the approval of the elected executive council. foklahoma and Texas have two courts of final jurisdiction: the supreme court, which hos final civil jurisdiction; and the court of criminal appeals, which has final criminal jurisdiction.

Note: See Note, table 1.74. States not listed do not have intermediate appellate courts.
a In States that use nominating cormissions, the governor makes
the oppointment
Alabama and Tennessee have two infermediate appellate courts: the court of civil appeals, which has civil jurisdiction; and
the court of criminal appeals, which has criminal jurisdiction. The selection process is the same for both.
Pennsylvania has two intermediate appellate courts: the superior court and the commonwealth court. The selection process is the same for both.

Method of selection and length of initial and retention terms of general jurisdiction court judges

By State and name of court, as of November 1988

Table 1.76
Method of selection and langth of initial and retention terms of general jurisdiction court judges

By State and name of court, as of November [988--Continued

Note: See Note, table 1.74. Courts of general jurisdiction are de-
fined as having unlimited civil and criminal jurisdiction (Larry C.
Berkson, "Judicial Selection in the United States: A Special Report," Judicature 64(October 1980) p. 178).

In States that use nominating cormissions, the governor makes the gppointment.
${ }^{6}$ Counties with populations less than 150,000 select and retain superior court judges in nonpartisan elections for 4 -year terms.
Initial appointment is made by the President of the United States and confirmed by the Senate. If the President does not wish to reappoint the judge, the District of Columbia Nomination Cormission compiles a new list of candidates.
${ }^{\text {d }}$ Circuit court associate judges are appointed by the circuit judges in each circult for 4 -year terms, as provided by supreme court rule.
eln Vanderburgh County, the two candidates for the nanpartisan election are chosen by the judicial naminating cormission.
Retention elections are used in Vanderburgh County.
9A nominating commission is used for the superior court judges of Lake, St. Joseph, and Vanderburgh Counties.
$h_{\text {Twenty-two of } 29 \text { districts use a nominating commission for district }}$ judge selection; the remaining 7 select district judges in partisan elections.
Seven of 29 districts use partisan elections.
Nominating cormissions are used for selecting circuit court judges in Jackson, Clay, and Platte Counties, and the City and County of St. Louis.
${ }^{\text {k }}$ An associate circuit court judge's term is 4 years; also in counties that use nominating commissions the appointed judge serves until the next general election but not less than I year.
Retention elections are used in Jackson, Clay, and Platte Counties, and the City and County of St. Louis.
$\mathrm{m}_{\text {Subject to }}$ to approval by an elected five-member executive council.
nSpecial judges of the superior court are appointed by the governor and serve 4 -year terms.
${ }^{\circ}$ Special judges of the superior court are reappointed by the governor and serve 4-year terms.

Note: The Center for Judicial Conduct Organizations conducts annual surveys of judicial conduct commissions. These commissions are typically State agencies created by statute or constitutional amendment with the mandate to receive, investigate, and dispose of complaints regarding judicial misconduct. Information was not available for Alaska, Arkansas, lowa Montana, Ohio, Oklahoma, South Dakota, Vermont, and Wyoming.
${ }^{-}$All States reported ior the fiscal year beginning July I, 1986 and ending June 30, 1987 except the following: Alabama, District of Columbia, and Michigan (Oct. I, 1986 to Sept. 30, 1987), Arizona (July 1, 1985 to June 30, 1986), Idaho and North Carolina (July 1, 1987 to June 30, 1988), Nebraska and Texas (Sept. 1, 1986 to Aug. 31, 1987), New York (Apri) 1 1986 to March 31, 1987), and North Dakota and Washington (July I, 1985 to June 30, 1987).
${ }^{\text {B Part-time. }}$
${ }^{\mathrm{C}}$ Two full-time, two part-time.
There is no budget or staff employed for the Court on the Judiciary; the Clerk of the Supreme Court functions os the Clerk of the Court on the judiciary.
EThe Cormission budget for fiscal year 1987 was $\$ 116,000$, but the Commission only spent $\$ 112,000$ of the budget for the year. Of the amount expended, approximately 50 percent ( $\$ 56,000$ ) was spent on complaints fnd misconduct investigations.
Investigators and additional attorneys work on contractual basis when needed.
GThe part-time executive director is also an attorney.
$h_{\text {The executive director is of the Supreme Court division of the State }}$ Court Administration and also serves as counsel to the Cormission. In 1986, funds were provided from various separately budgeted agencies; post-1986 the Commission is funded from the general Supreme Court budget, as needed.

JThe Clerk of the Appellate Courts serves as secretory and has a parttime assistant.
kThe executive secretary is also an ottorney who also serves as counsel and attorney to the Conmission. Investigators do work by specific assignment on a contract basis. A secretary performs administrative assistant work in addition to secretarial work and low student research assistance js often used.
Cormission only spent $\$ 60,951$ of its $\$ 89,392$ budget in fiscal year 1987. MEmploys additional staff as needed.
nApproximately.
O Includes four full-time employees (assistunt finance/personnel officer, librarian, two clerks) and one part-time employee (budget clerk).
PBudget is shared with the Disciplinary Board.
qA secretary by contract.
${ }^{r}$ Part-time executive director is also part-time examiner.
${ }^{\text {S }}$ The services of the attorneys and investigators are contracted for on a case-by-case basis.
The $\$ 435,3712$ year budget total included a $\$ 76,000$ supplemental budget ( $\$ 55,000$ to cover costs of a matter taken to the Supreme Court; $\$ 21,000$ to cover constitutional changes increasing Commission membership and affecting some procedures).
UThe executive director must be an attorney who acts as both administrator and legal counsel.

Table 1.79
Percent distribution of juror expenditures in U.S. District Courts
By type of juror and expenditure, year ending June 30, 1987

| (Total juror expenditures: $\$ 45,202,500)$ |  |
| :--- | :---: |
|  | Percent |
| Petit juror expenditures | $74.8 \%$ |
| Attendance | 47.6 |
| Mileage | 16.3 |
| Subsistence | 4.2 |
| Other | 6.7 |
|  |  |
| Grand juror expenditures | 25.2 |
| Attendance | 15.3 |
| Mileage | 5.7 |
| Subsistence | 3.2 |
| Other | 1.0 |

Note: Grand jurors hear ". . .evidence of criminal activity presented by the prosecution and determine whether the government's evidence is sufficient to justify the bringing of formal criminal charges." Petit jurors ". . .determine questions of fact, in any civil or criminal action, through hearing the evidence presented at trial." (Source, p. A-127.)
Attendance fees are paid to these jurors in compensation for their services. Federal petit jurors are selected from a group of those available to serve--the jury venire--for a given day. Of those selected from this initial group, some will be excluded after the voir dire process--questioning under oath by the judge. Individuals who ore excused ofter the voir dire process are still paid an aftendance fee. "Other" expenditures include miscellaneous payments for the comfort and convenience of both petit and grand jurors.

Note: See Note, table 1.71. In this table, 1976 and 1977 data ore for 94 District Courts; 1978 through 1982 data ore for 95 District Courts; and 1983 through 1987 data are for 94 District Courts.
"Travel status" refers to jurors who are in transit. The "Juror Usage Index" is the average number of jurors on hand for each jury trial day; it is calculated by dividing the total number of available jurors by the total number of jury trial days.
${ }^{\text {a }}$ Each juror is counted for each day serving, waiting at the courthouse to serve, or in travel.
${ }^{\mathrm{b}}$ The jurors in travel status are included in the category of jurors not selected, serving or challenged.

Note: See Note, table 1.77.
INot applicable; jury does not set original sentence.
$\mathrm{b}_{\text {If }}$ the verdict jury is unable to make a recommendation to the judge, a new jury is called to make that recommendation.
${ }^{\text {c Statutes are }}$ very specific as to aggrovating or mitigating factors, which the jury must find and which in turn dictates what the court must do. DDuring the "aggravation and penalty" phase the defendant may elect sentencing by the judge, the sentencing jury, or a new jury if good cause is shown.
${ }^{\text {e Following a jury trial, the defendant may opt for sentencing by elther the }}$ judge or verdict jury.
If the jury refuses to decide punishment or the defendant waives jury trial as to punishment, then the court assesses.
In death penalty cases the defendant may opt for a judge or jury trial.

Note: These data are based on a survey of State criminal defense programs in 1982 and 1986. A nationally-representative stratified sample of 718 counties throughout the 50 States was developed in both years. In 1982, a total of 696 counties responded for a response rate of 97 percent. In 1986, contoct with respondents resulted in the identification of jurisdictions where Statewide data were available and jurisdictions where only countylevel information was available. The follow-up data collection resulted in a 100 percent response rate for 36 States providing Statewide data and 66 percent for the 222 counties surveyed, for an overall response rate of 90 percent.

| Note: See Note, table 1.86. A State may have more than one type of program. Numbers of counties unde: each system type are weighted estimates based on survey responses. Counties and States are classified according to the predominant system of service delivery; other systems may supplement the primary system. "Public defender" refers to prograns having a salaried staff of full-time or part-time attorneys providing defense services to indigent clients. The organization may be a public agency or a private, nonprofit corporation under contract with a State or local government. "Assigned counsel" prograns are those where there is a case-by-cose appointment of counsel who are local merbbers of the private bar. "Controct" prograns refer to those where the funding source contracts with individual private attorneys, <br> law firms, or local bar assoclations to represent indigent defendants for a given period of time. <br> ${ }^{0}$ A change in Arizona's county boundaries resulted in gne new county since the 1982 survey. <br> For the case types included in this survey, North Dakota remains a predominantly assigned counsel State. If case types were limited to serious criminal matters (felonies), North Dakota would show a shift to a predominantly contract State. <br> Source: U.S. Department of Justice, Bureau of Justice Statistics, Criminal Defense for the Poor, 1986, Bulletin NCJ- 12919 (Washington, DC; U.S. Department of Justice, September 1988), p. 3, Table 2. |  |  |  |  |  |  |  |  |

Note: Persons under supervision of the Federal Probation System include persons placed on probation--either by U.S. District Courts, U.S. magistrates, or at the request of U.S. attorneys (deferred prosecution)-and Federal offenders released from confinement on parole or mandatory release. A Federal prisoner is eligible for mondatory release when the prisoner has served the full term of imprisonment less "good-time" allowances. If the offender has eorned more than 180 days of "good-time" credit, supervision (as if on parole) is for that period in excess of 180 days. If "good-time" is less than 180 days, release occurs without supervision.

As of Mar. 31, 1987.
${ }^{6}$ Does not include bail interviews because this function has been transferred from the probation offices to the pretrial services offices.

## U.S. Parole Commission hearing examiner workload

By type of hearing or record review and region, fiscal years 1978-87

| Region | Total considerations | Initial hearing | Onethird hearing | Pre-hearing/ presumptive date record review | Statutory review/ inter im hearing | Review hearing | Rescission hearing | Retroactive record review | Local revocation hearing | Institutional revocation hearing | Other |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1978 | 23,305 | 11,980 | 1,044 | 4,574 | 1,002 | 1,946 | 618 | $x$ | 240 | 1,535 | 366 |
| 1979 | 22,918 | 11,872 | 141 | 4,578 | 2,004 | 310 | 937 | 723 | 275 | 1,771 | 307 |
| 1980 | 21,886 | 10,379 | 10 | 5,478 | 1,790 | 13 | 1,096 | 366 | 319 | 2,042 | 393 |
| 1981 | 18,540 | 7,788 | $x$ | 4,480 | 1,579 | - x | 1,095 | X | 369 | 2,039 | 365 |
| 1982 | 18,693 | 8,745 | $x$ | 4,367 | 1,744 | $x$ | 879 | $x$ | 346 | 1,949 | 310 |
| 1983 | 21,462 | 10,678 | X | 4,797 | 2,042 | $x$ | 671 | $x$ | 331 | 2,132 | 443 |
| 1984 | 20,773 | 10,010 | $x$ | 4,908 | 2,137 | $x$ | 780 | $x$ | 352 | 1,890 | 330 |
| 1985 | 21,300 | 10,608 | $x$ | 4,343 | 2,685 | $x$ | 764 | $x$ | 277 | 1,892 | 313 |
| 1986 | 24,264 | 12,519 | $\times$ | 5,057 | 2,680 | $x$ | 880 | x | 319 | 2,035 | 471 |
| 1987 | 26,149 | 13,070 | X | 5,516 | 2,812 | X | 811 | X | 348 | 2,171 | 390 |

Note: The hearing examiner's workload consists of in-person hearings and record reviews. At an in-person hearing, the offender appears before the examiner and can introduce additional information for consideration. At a record review, only informatlon contained in the prisoner's case file is considered. Some data reported os hearings were actually record reviews because the prisoner was serving concurrent Federal and State sentences in a State institution. With implementation of presumptive parole date procedures, "one-fhird hearings" and "revlew hearings" have been phased out.
For definitions of initial hearing, one-third hearing, statutory review/interim hearing, and other terms, and a list of States in regions, see Appendix 4.

Note: See Note, table 1.97. In 1978, the U.S. Parole Cormission tion hearings in order to establish on eligibility date for "repaadopted a system of guidelines, based on a calculation of parole risk, to aid in the determination of an aptimal parole release date. Release decisions may be made either above or below the designoted guideline range if warranted by discretionary, statutory, or policy considerations. For this table, only discretionary decisions outside the guideline structure are counted as "above" or "below." Thus, decisions to deny parole where the mondatory release date is below the guideline range, and decisions to grant an effective parole date above the guideline range, due to time needed to develop a suitable release plan or because the minimum sentence is beyond the guideline range, are counted as "within" the parole policy guidelines. Decisions below the guideline range becouse of policy limitations are excluded from this table (Source, 1981, p. 22). Guidelines are used in revoca-

Table 1.100
Provisions for automatic and earned good-time sentence reductions applied by correctional authorities

By jurisdiction, January 1985
$\left.\begin{array}{lcc}\hline & & \\ \text { Automatic } \\ \text { good-time }\end{array} \quad \begin{array}{c}\text { Earned } \\ \text { good-time }\end{array}\right]$

Note: These data were derived from a survey of chief judges, attorneys general, and paroling authorities in each State in January 1985. Automatic good-time is defined us credits toward a sentence that are authorized in statute or regulation; earned goad-time is allocated on the basis of specific activities or achievements, and is frequently awarded on a discretionary basis. Good-time may be applied differently depending on the offense, santence length, time served or criminal history of the prisorier. Earned goodtime may be applied, when appropriate, after subtraction of automatic good-time. (Source, pp. 45, 49.)
${ }^{\text {a }}$ Inmates with mandatory sentences for firearms offenses receive no goodtime until the completion of the mandatary term.
${ }^{6}$ Applies no good-time for persons under life sentences.
${ }^{C}$ Excludes specific offense and parole violators.
Source: U.S. Department of Justice, Buranu of Justice Statistics, Correctional Populations in the United States, i985, NCJ-103957 (Washington, DC: US(PO, i987), pp. 45-49. Table adapted by SORCEBOOK staff.

Table 1.101
Statutory provisions for imprisonment for life-without parole
By State, as of Jon. 1, 1987

Note: This information was gathered through a review of statutary provisions in the 50 States. Life-without-parale statutes fall into two categories. A "capital offender statute" is generally applied to offenders convicted of aggravated homicide and can be invoked for a single offense. The "habitual offender statute" is directed at career criminals and is applied to repeat offenders under specified conditions. In some States, these provisions are included in parole sections of the criminal code.

OProvisions stated in parole section of criminal code.
bAs of July 1, 1987, Maryland will also have a capital offender statute.
${ }^{\text {c }}$ May be applied to any sentence over I year.

Statutory provisions related to private sector involvement in prison industries

By State, as of January 1987

Note: These data were collected by Criminal Justice Associates, Inc. for the National Institute of Justice os part of a broader investigation of private sector involvement in prison-based business. For the statutory analysis, the 50 States were surveyed by telephone or mailed a questionnaire. After review, twelve key issues were identified. "Private sector employment authorized" refers to statutes outhorizing or prohibiting the private sector emplayment of prisoners and the private sector's direct control of the daily operations of the work place. "Private sector contracting authorized" covers statutes that address the department of corrections' ability to enter into contracts to provide goods or services for the private sector. "Private sector sales authorized" describes statutes that outhorize or prohibit the sule of goods or services produced in whole or in part by prisoners to any buyer within the State. "Incentives for private sector authorized" refers to statutes authorizing the State to provide incentives aimed at encouraging private sector involvement in prison-based employment projects. "Prisoner voluntarism mandated" indicates whether statutes specify that inmates participating in prison-based private sector employment projects do so by their own choice. "Project's impact on free world labor addressed" refers to the provision of assurances that any prison-based private sector employment project will either not displace labor within the State or not compete unfairly with similar competitive firms within the State, or both. "Rent/lease of property author-
ized" refers to statutes authorizing the State to rent or lease space or property to the private sector for the purpose of employing prisoners. "Wage deductlons authorized" refers to statutes authorizing the department of corrections to make deductions from the wages of prisoners employed in prison-based private sector employment projects for such purposes as payment of court fines, victim restitution, family support, taxes, etc. "Employment status of prisoners addressed" refers to statutes defining whether inmates are employed by the private business or by the State. (Criminal Justice Associates, Private Sector Invalvement in Prison-Based Business: A National Assessment, US. Department of Justice, National Institute of Justice (Washington, DC: USCPO, 1985), pp. 51, 52.)
Within the table, "yes" indicotes legislative authorization exists, "no" indicates legislative prohibition exists, and blank indicates that legislation neither specifically authorizes nor prohibits.

Legislation unclear.

| Rhode Island | 16 and over | Indictable offense |

See notes at end of table.

Table I. 105
Age and crime restrictions for judicial waiver of juveniles to
criminal court
By Stote, August 1986--Centinued

| State | Age of which juvenile may be transferred to criminal court | Crime restrictions |
| :---: | :---: | :---: |
| South Carolina | 14 or 15 | Two prior and unrelated adjudications of assault, assault and batter, with intent to kill, assault and battery of a high and aggrovated nitture, arson, housebreaking, burglary, kidnapping, attempted criminal s,xual conduct or robbery, and currently charged with a third or subsevuent offense |
|  | 16 and over | Felony or misdemeanor |
| South Dakota | No specific age | None |
| Ternessee | 16 and over | None |
|  | 15 and over | Murder, rape, aggravated rape, robbery with deadly weapon, kidnapping |
| Texas | 15 and over | Felony |
| Utah | 14 and over | Felony |
| Vermant | Over 10, but not yet 14 | Arson causing death, assault and robbery with a dangerous weapon, assault and rabbery causing bodily injury, aggravated assault, murder, manslaughter, kidnapping, maiming, sexual assault, aggravated sexual assoult, burglary of sleeping apartments in nighttime |
| Virginio | 15 and over | Offense punishable by confinement in penitentiary; requires the transfer of a juvenile for trial as an adult if he has been previously tried as an adult and convicted of a felony ond is presently charged with cormitting an act which would be a felony if cormitted by an odult, or when the alleged act is armed robbery, rape, murder |
| Washington | 16 or 17 | Class A felony or attempted Class A felony |
|  | 17 | 2nd degree assault, Ist degree extortion, indecent liberties, 2nd degree kidnapping, 2nd degree rope, 2nd degree robbery |
| West Virginia | No specific age | Treasons murder, robbery with a deadly weapon, kidnapping, first degree arson, first degree sexual assault, second violence to person felony, or third felony |
|  | 16 and over | Offense of violence to a person felony and child has previous delinquency adjudicotion for felony |
|  | 16 and over | Child requests |
| Wisconsin | 16 and over | State criminal low. Child may request. |
| Wyoming | No specific age | None |

Note: These data were compiled through an analysis of State juvenile codes completed in August of 1986. Other related statutes may be found in State criminal codes or rules of juvenile procedure. No attempt was made to include relevant case law. For the most complete understanding of this complex issue, the Source encourages readers to consult the full text of the relevant statute.
a Juvenile court has concurrent jurisdiction with superior court over child
alleged to hove committed offense punishable by lass of life or life
imprisonment.
bJuvenile and criminal courts have concurrent jurisdiction and prosecutor decides where to file.

Juvenile and adult sex-offender programs and treatment providers
By State, 1988

Note: This information was collected by the Sofer Society Progrom through a questionnaire mailed to 1,002 juvenile and adult sex-offender treatment programs and service providers. These programs were identified through
telephone and mail surveys; contacts with local, county, and State sexoffender treatment networks; and consultations.

The information above does not include: services provided for the incest offender when treated only within the context of the incest family, services that treat the sex-offender with other types of offenders, or adult sex-offender self-help prograns (Source, p. 5).
The categories lobeled "court" are those existing in conjunction with the court such as probation or parole offices or school districts.

Categories labeled "private" refer to private nonprofit or private-for-profit agencies or professional services. "Cormunity based, prison-related" prograns are those that are located in halfway houses operated by prison outhorities.

At the time of this survey, Mississippl was found not to provide service to either juveniles or adult sex offenders.

Note: This information was collected through an analysis of the 1986 legal codes of the 50 States and the District of Columbia. Where the legal codes were ambiguous, an attempt was made to gain clarification through a survey mailed to each State's attorney general's office. In cases of nonresponse by the State attorney general, the authors' interpretation is reported. The District of Columbia was not included in the nail survey. A " 1 " in the table indicates that the right
is permanently restricted or jecpardized. "Parental" refers to
the court's ability to terminate a felon's custodial rights over
his or her children upon conviction or imprisonment. "Di-
vorce" indicates that conviction or imprisonment for a felony moy be used as grounds for divorce by the felon's spouse. "Civil death" refers to instances where all civil rights and privileges of a convicted felon ore forfeited.
${ }^{\text {a Right }}$ is restricted for specific offenses.

Note: This information was collected through an analysis of statutes for the 50 States and a survey mailed to each State's Attorney General Office. From this survey, 23 States: Arizona, Arkansas, Colorodo, Connecticut, Delaware, lowa, Kansas, Maine, Massachusetts, Mississippi, Montana, Nebraska, New Hampshire, New Mexico, North Dakota, Ohio, Oklahoma, Rhode Island, South Dakota, Tennessee, Washington, Wisconsin, and Wyoming failed to respond. Six States, Californio, Georgia, New York, North Carolina, Sauth Carolina, and Virginia were prevented by State law from providing legal opinions. Twenty-one Attorney General Offices completed the survey: Alabama, Alaska, Florida, Hawaii, Idaha, Illinois, Indiana, Kentucky, Louisiana, Maryland, Michigar,, Minnesota, Missouri, Nevada, New Jersey, Oregon, Pennsylvania, Texas, Utoh, Vermont, and West Virginia. A " 4 " in the table indicates that the State provides for this type of restoration of felony offender's civil rights.
${ }^{\text {a Requires judicial procedure including expungement, sealing, annulment, }}$ withheld or deferred judgement, and vacation or setting aside convictions. bardon authority rests with board of pardons or parole.
chow grade or non-violent felony convictions only.
dot applicable for convictions involving firearms.
${ }^{e}$ One or more civil rights are restored after sentence is completed.
${ }^{\mathrm{f}}$ Civil rights are restored by an existing general statute.
GFor probationers only.
hCertificate of rehabilitation also granted.
${ }^{\text {i }}$ Pardon process split between governor and pordon board.
Authority to pardon out-of-State convictions.
"Must have been fully pardoned to be eligible for expungement.
${ }^{1}$ Must be under 21 years of age when convicted.
${ }^{m}$ Certificate of good conduct or certificate of relief from disabilities may be gronted.
${ }^{n}$ For first offenders only.
OPardon requires act of State's general ossembly.
PAfter sentence completion the sentencing court will restore civil rights upon petition of offender.

Note: These dota were compiled by the National Rifle Association's Institute for Legislative Action. In addition to State laws, the purchase, sale, and in certain circumstances, the possession and interstate transportation of firearms ore regulated by the Federal Gun Control Act of 1968 and Title VII of the Omnibus Crime Control and Safe Streets Act. Also, cities and localities may have their own firearms ordinances in addition to Federal and State laws. The
Source notes that State firearms laws are sub-
ject to frequent change. State and local statutes and ordinances, as well as local law enforcement authorities, should be consulted for full text and meaning of statutory provisions. The Source defines "constitutional provision" by citing Article 1, Section 15 of the Connecticut State constitution as an example of the basic feature contained in the constifutions of many States. It reads: "Every citizen has a right to bear arms in defense of himself and the State."

Table 1.110
Statutory restrictions on the purchase, carrying, and ownership of handguns

By State, as of May 1988--Continued
a License to carry in a vehicle either openly or Eoncealed.
Arkansas prohibits carrying "with a purpose to employ it as a weapon against a person." Tennessee prohibits carrying "with the intent to go nessee ${ }^{\text {pred." }}$
arme
${ }^{c}$ Certain cities or counties.
d Chicago only.
eapplies only to pre-registered firearms. No new handguns can be brought into the city.
handguns can be brought into the city. Morton Grove.
${ }^{9}$ Handguns must be presented to the city chief of police or county sheriff to obtain a certificate of inspection.
heermission to carry concealed may be granted by county sheriff on written application. Loaded.
Some municipalities control the possession, sale, tronsfer, or carrying of handguns, e.g., Cleveland and Columbus require a police permit for purchose; Toledo requires a handgun owner's identification; Cincinnati requires application for purchase.
"ptohibits carrying a firearm "with the intent or purpose of injuring another."

Note: These data were collected through a review of the statutory provisions of the 50 States, the District of Columbio, and Puerto Rico.

The evidentiary weight given to blood alcohol concentration levels generally falls into one of two categories. "Presumption at 0.10 percent" indicates that such a level of blood alcohol concentration creates a presumption of intoxication in a court of low. "lllegal per se at 0.10 percent" indicates that such a level of blood alcohol concentration is considered conclusive evidence of intoxication in a court of law. Statutory provisions of several jurisdictions treat the 0.10 percent level as both presumptive and illegal per se evidence of driving under the influence. This appears to be the result of Stotes hoving adopted one of the standards with-
out amending statutes which had previously authorized the other standard. In such cases, the actual statutes should be consulted for clarification. "Open container lows" refer to laws prohibiting the possession of open containers of alcoholic beverages in the passenger compartment of a motor vehicle. "Anti-consumption lows" refer to laws prohibiting the consumption of alcoholic beverages in the passenger compartment of a motor vehicle. "Dram shop laws" refer to laws which make owners of drinking establistments civilly liable for serving alcohol to an intoxicated patron who then goes out and injures another individual in a motor vehicle accident. In the table, "S" indicates that such a provision is provided expressly by statute. Statutes should be consulted for the full text and meaning of specific provisions.

See notes at end of table.

Toble 1.112
Statutory provisions authorizing blood alcohol concentration tests for persons suspected of driving while intoxicated, and sanctions for refusal to take such tests

By jurisdiction, as of January 1989--Continued

Note: See Note, table 1.111. The blood alcohol concentration level of persons suspected of driving while intoxicated is generally determined through the administration of either preliminary breath tests or chemical blood, breath, or urine tests. "Preliminary breath tests" ore adrninistered at the site of a traffic stop and are used for screening purposes in determining the need to arrest and the need to conduct further blood alcohol concentration tests. "Chemical tests," authorized under "implied consent laws," are typically administered after arrest (see toble for exceptions) and are used to obtain admissible evidence of intoxication (U.S. Department of Transportation, National Highway Traffic Safety Administrotion, Alcohol and Safety Laws: A National Overview, 1981 (Washington, DC: USGPO, 1982), pp. 1, 3, 9). "Implied consent laws" provide that "any person who operates a motor vehicle upon a public highway is deemed to have given consent to a chemical test or tests of his or her blood, breath, or urine for the purpose of determining the blood alcoholic content" (U.S. Department of Transportation, National Highway Traffic Safety Administration, Alcohol and Highway Safety Laws: A National Overview, 1981 (Washington, DC: USGPO, 1982), p. 9). "Criminal sanctions" refers to fines and/or jail sentences whereas "odministrative licensing action" refers to suspension or revocation of license. In the table, "S" indicates that such a provision is provided expressly by statute. Statutes should be consulted for the full text and meoning of specific provisions.
${ }^{\text {a }}$ A low enforcement officer can request a driver to submit to a chemical test if the driver has been involved in a fatal occident or there is "reasonable cause to believe" that the driver is intoxicated or has a blood alcohol concentration level of 0.10 or more.

Wunclear, but probably not.
CBefore the preliminary breath test can be given, a law enforcement officer must have probable cause to believe that the driver is violating the Driving While Intoxicated law.
${ }^{\mathrm{d}}$ A law enforcement officer only needs "reasonable grounds" and any one of the following: (1) a Driving While Intoxicated arrest; (2) an accident resulting in injury or death; (3) a preliminary breath test refusal; (4) a preliminary breath test reading of 0.10 percent; or (5) a preliminary
breath test reading of less than 0.10 percent but the officer has reasonable grounds that the driver was under the influence of drugs or drugs and alcohol.
No arrest is required if the person has been involved in a motor vehicle accident resulting in property damage, injury, or death.
Although arrest is not required, police must have "probable cause."
9A restricted/hordship license may be issued for ffirst offense.
honly "reasonable grounds" seem to be required. ${ }^{\text {i }}$ The test is mandatory and applies to drivers inyolved in accidents and traffic law violations. JAn arrest is not required in all situations. If a preliminary breath test indicates that alcohol has been consumed, a request to submit to a chemical test under the implied consent law may be made without the need of a formal arrest.

Note: See Nate, table 1.111. "The sanctions listed for convictions of alcohol driving offenses. . .are those specified by statute. If a sanction is not specified by low. . ., it is not listed." (U.S. Department of Transportation, National Highway Traffic Safety Administration, Digest of State AlcoholHighway Safety Reloted Legislation, January 1983 (Washington, DC: U.S. Department of Transportation, 1983), pp. 1, 2.) Impriscnment refers to both jail sentences and prison sentences. "The term 'mondatory sanction; means either a criminal sanction or an administrative licensing action which must be imposed by either a court or administrative agency" (Source, p. 1-2). Because of variation anong the jurisdictions within categories of sanctions, e.g., terms of imprisomment or amounts of fines, the Source document as well as individual jurisdictions' statutes should be consulted. Statutes should be consulted for the full text and meaning of specific provisions.
${ }^{\text {a }}$ In lieu of jail for a driving while intoxicated conviction.
${ }^{\text {b }}$ Consecutively.
${ }^{\text {c }}$ Suspended.
Revoked.
${ }^{\text {e May }}$ not apply to certain offenders who have been suspended pursuant to the administrative per se low.
Not necessorily served consecutively.
948 consecutive hours or 10 days of cormunity service are mandatory if
the Department of Motor Vehicles certifies that on opplication for 23 USC 408 grant funds has been submitted to the U.S. Department of Tronsportotion.
handatory cormunity service regardless of whether there is a mandatory imprisonment sanction.
The court must sentence defendants to at least one of.these sanctions but may sentence them to more than one such sanction.
Must serve at lease 48 consecutive hours.
Not more than 200 hours of cormunity service in lieu of the fine.
IThis sentence may not be suspended; however, the statute is silent as to probation.
$\mathrm{ma}_{\mathrm{A}}$ person may be issue:' a restricted license notwithstanding this revocation if certain conditions are met.
ribome incarceration is possible.
Provided the defendant either (1) had a Blood Alcohol Content (BAC) level of 0.15 or more, (2) was driving 30 MPH over the speed limit and had a BAC level of 0.10 or more, (3) was eluding a police officer and had a BAC level of 0.08 or more, or (4) refused to submit to a chemical test.
PTemporary restricted license may be issued only for the purpose of attending either an alcohol education or treatment program.
9 Or 14 days in a treatment facility.
${ }^{r}$ Work release is ovailable for this period of time.
${ }^{5}$ In lieu of imprisonment for 30 days, 8 hours of community service may be substituted for each day less thon 30 days that the person would hove served in jail.
Involving at least 40 hours.
UApplies only to intoxicated offenses; for illegal per se and administrative per se actions, a restricted hardship license may be granted provided the defendant has not received such a privilege within the past 5 years.

Voes not apply to illegal per se offense; this sanction only applies to "regular" driving while intoxicated offenses.
WMust serve 48 consecutive hours; does not apply to illegal per se offenses.
$\times$ This revocation may not be mandatory if the defendant meets certain eligibility requirements for and does participate in a driver rehabilitation or improvement program.
Yone day imprisonment or 24 hours of community service if rehabilitation is taken.
$\mathrm{z}_{5}$ days if rehabilitation is taken; 48 hours must be served consecutively. oa 48 hours must be served consecutively.
${ }^{0}$ Three consectutive 24 hour periads in a house of correction and seven consectutive 24 hour periods in a driving while intoxicated detention

## center.

${ }^{\circ}{ }^{\text {M }}$ Mandatory treatment of not less than 12 or more than 48 hours; this time is to be spent in on intoxicated driver resource center.
adjot more thon 90 days as an alternative to imprisonment.
ae The law states that the right to operate a motor vehicle is "forfeited." af there is no imprisonment sanction, the defendant must serve either 48 consecutive hours of inpatient rehabilitation/treatment or 10 days of community service.
${ }^{\circ g}$ Could be 5 years under the habitual offender law.
$\mathrm{oh}_{\text {As }}$ a part of probation.

Note: State and Federal controlled substances acts (CSA's) regulate the possession, use, sole, distribution, and manufacture of specified drugs or categories of drugs and establish penalties for C5A violations. The information in this table summarizes the major elements of each State CSA. The data ore derived from published State codes and the most recent code supplements available as of mid-1987. CSA amendments that took effect ofter that time ond clarificotions of statutory provisions obtained through converzations with State officials also comprise this summary information.
"Forfeiture" may involve civil proceedings against property, criminal proceedings that require prosecutors to prove their cases beyond a reasonable doubt, and administrative proceedings not judicial in noture that occur when no one claims an interest in property valued under a specified amount.
"Paraphernalia" includes any equipment, product, or material intended for use in manufacturing, converting, preparing, injecting, inholing, or otherwise introducing into the human body a controlled substance. "Imitation drugs" are non-controlled substances which, by appearance and representations made, would lead a reasonable person to belleve that the substance is a controlled substance. These are also called "look-alike" drugs. "Analogs" refer to substonces hoving a chemical structure substantially similar to that of a controlled substance, but which have a similar or substantially greater effect on the central nervous system than the represented conirolled substance. Anologs are also called "designer drugs."

## Section 2

Public attitudes toward crime and criminal justice-related topics

Surveys of public opinion that focus on criminal justice topics are conducted periodically in the United States. These surveys are carried out by public opinion researchers for political campaigns or in general social surveys; others are conducted for governmental agencies or commissions concerned with specific problems. Opinion surveys may also focus on specific groups of respondents within the population such as teenagers, high school seniors, or college students. The results of these surveys are presented in this section.

Most of the opinion surveys select samples designed to be representative of the particular group of respondents in the continental United States. Surveys may be conducted by mail, telephone, or in person. For a description of survey sampling procedures and definitions of certain terms used in the following polls, the reader may consult Appendix 5: The Gallup Poll, The Harris Survey, the General Social Survey conducted by the National Opinion Research Center, the ABC News-Washington Post Poll, the New York Times-CBS News Poll, and the Media General/Associated Press Poll.

Topics examined in this section include public perceptions of the most important problem facing the Nation and respondent's community, confidence in national institutions, focusing on the U.S. Supreme Court, and the honesty and ethics of selected professions with an emphasis on the legal profession and law enforcement. In addition, surveys that reflect public perceptions of changes in the level of crime, the amount of spending for crime control, and personal safety are presented. Other topics included in this section examine attitudes toward offense severity and punishment, capital punishment, gun ownership and gun control policies, drug use and sale and public policies that center on combatting drug use, policies aimed at alcohol use, community standards of obscenity, pornography and related legislative issues, insider trading, and AIDS testing of Federal prisoners. A series of tables present attitudes of high school seniors and college freshman focusing on topics such as important social problems, drugs, and abortion.

When available, the survey results are broken down by demographic characteristics of respondents--such as age, sex, race, income, and oc-cupation--enabling comparisons across important social dimensions. Finally, because some questions have been asked repeatedly by a given source, many trend tables have been constructed by SOURCEBOOK staff and are presented.

Readers should be aware that many factors, including slight differences in the wording of survey questions, may have significant effects on survey responses. In addition, the standard error of survey results, presented in Appendix 5, may vary slightly between surveys. Thus, attention to the exact wording of questions and the appropriate estimate of error, should always accompany comparisons between tables.

Attitudes toward the most important problem facing the country
Unifed States, 1980-88 ${ }^{\text {a }}$
Question: "What do you think is the most important problem facing this country today?"

Figure 2.1
Respondents approving of a policeman striking a citizen under certain circumstances

United States, selected years 1973-88
Question: "Would you approve of a policeman striking a citizen whe. . .?"
(Percent responding "yes")

Note: In 1975, these dato were based on a subsample of respondents who answered "yes" or "not sure" to the question presented in table 2.20. Since 1976, all survey respondents were asked the above questions. Readers interested in responses to this question for 1973 should consult previous editions of SOURCEBOOK. For a discussion of public opinion survey sampling procedures, see Appendix 5.

Attitudes toward the level of spending to halt the rising crime rate
By demographic characteristics, United States, selected years 1976-88 ${ }^{\text {a }}$

Question: "We are faced with many problems in this country, none of which can be solved easily or inexpensively. I'm going to name some of these problems, and for each one l'd like you to tell me whether you think we're spending too much money on it, too little money, or about the
right amount. First (halting the rising crime rate) are we spending too much, too little, or obout the right amount on (halting the rising crime rate)?"

Table 2.25
Respondents agreeing too little is spent on selected problems in the country

United States, selected years 1973-88
Question: We are faced with many problems in this country, none of which can be solved easily or inexpensively. I'm going to name some of the problems, and for each one l'd like you to tell me whether you think we're spending too much money on it, too little money, or about the right amount. First (problem) are we spending too much, too little, or about the right amount on (problem)?"
(Percent agreeing too little)

Table 2.34
Attitudes toward the circumstances of abortion
By demographic characteristics, United States, 1988
Question: "Please tell me whether you think abortions should or should not be legal under each of the following circumstances:1"

Note: This question was asked of the 57 percent subsample responding "legal under certain circumstances" to the question presented in table 2.33. For a discussion of public opinion survey sampling procedures, see Appendix 5
${ }^{a}$ Responses of "no opinion" were omitted by the Source. ${ }^{b}$ Less than I percent.

Table 2.35
Attitudes toward Supreme Court ruling on abortion
United States, selected years 1972-89
Question: Mn 1973, the U.S. Supreme Court decided that state laws which made it illegal for a womon to have an abortion up to three months of pregnancy were unconstitutional, and that the decision on whether or not a woman should have an abortion up to three months of pregnoncy should be left to the woman and her doctor to decide. In general, do you favor or oppose the U.S. Supreme Court decision making abortions up to three months of pregnancy legal?"

|  | Fovor | Oppose | Not sure |
| :--- | :--- | :--- | :---: |

Note: Data for the 1987 National Punishment Survey were collected in telephone interviews conducted by the Population and Society Research Center at Bowling Green Stote University, Bowling Green, Ohio, between August and October 1987. A representative sample of 1,920 American adults were surveyed obout their attitudes toward punishment of crimina! offenders, Respondents were read eight brief vignettes that included information on a type of crime, the amount of harm or injury, and characteristics of the victim and offender. These vignettes were unique combinations of offense, offender, and victim charocteristics randomly generated by a computer program in a factorial survey design. After hearing an interviewer read a vignette, the respondent was asked for his/her opinions regarding the seriousness of the offense, the type and amount of punishment that the offender should receive, and the reasons for selecting that particular punishment. Seriousness scores were computed in the same manner as the National Survey of Crime Severity, (Source, Jacaby and Dunn, P. 1.)

Data from the National Survey of Crime Severity (NSCS) were collected through a supplement to the Notional Crime Survey (NCS). The NSCS was conducted during a 6 -month period in 1977. Respondents were given a description of a crime, for exomple, "a person steals a bicycle parked on the
street," and were then told that this crime rated a severity score of "l0." They were then asked to compare a number of other crimes with the bicycle theft. If the crime was seen as twice as serious it would be rated a 20 , if it was seen os 5 times as serious if would be rated a 50 , and so forth. Each person wos then asked to rate the seriousness of 25 such descriptions drawn from a list of 204 descriptions of activities that were illegal in ot least one State. The ratings given by the 60,000 respondents were combined to give a single severity score for each of the 204 items. (Source, U.S. Department of Justice, p. 2.) The selected offenses presented above correspond to offenses also contained in the 1987 National Punishment Survey. For a discussion of survey methodology for the National Crime Survey, see Appendix 6.

Note: These data are from a series of nationwide surveys of high school seniors conducted by the Survey Research Center of the Institute for Social Research from 1975 through 1988. The survey design is a multistage random sample of high school seniors in public and private schools throughout the continental United States. All percentages reported are based on weighted cases; the N's that are shown in the tables also refer to the number of weighted coses.
Response categories were "never," "seldom," "sometimes," and "often." Readers interested in responses to this question for 1975 and 1976 should consult previous editions of SORCEBCOK. For survey methodology and definitions of terms, see Appendix 7.

Note: See Note, table 2.66. Data are given for those who identify themselves os White or Caucasion and those who identify themselves as Black or Afro-American because these are the two largest racial/ethnic subgroups in the population. Data are not given for the other ethnic categories because these groups comprise less than 3 percent of the sample in any given year (Source, 1982, p. 9). "College plans" distinguishes those seniors who expect to graduate from a 4 -year college from those who expect to receive some college training or none. The four drug use cotegories are based on an index of seriousness of involvement. The term "pills" may contain people who indicate that they use any of a number of drugs including some that usually are not taken in pill form. "Few pills" refers to respandents indicating the use of one or more of a number of illicit drugs but who had not used any one class of them on three or more accasions. "More pills" refers to respondents indicating such use on three or more occasions. Respondents reporting heroin use were included in a separate category that is not presented here due to the small number of respondents indicating such use. (Source, 1982, pp. 8, 9, 14.)

Response categories were "never," "seldom," "sometimes," and "often." Readers interested in responses to this question for 1975 and 1976 should consult previous editions of SORCEBOKK. For survey methodology and definitions of terms, see Appendix 7.

Table 2.75
High school seniors reporting positive attitudes toward the
performance of the courts and the justice system in general
By sex, race, region, college plons; and illicit drug use, United States,
1977-88
Question: Now we'd like you to make some ratings of how good or bad a job you
feel each of the following organizations is doing for the country as a
whole. ... How gaod or bad a job is being done for the country as a whole by. . .all the courts and the justice system in general?"
(Percent responding "good" or "very good")

Note: These data ore from a series of nationwide surveys of high school seniors conducted by the University of Michigan's Institute for Social Research for the National Institute on Drug Abuse from 1975 through 1988. The survey design is a multistage random sample of high school seniors in public and private schools. Depending on the survey year, from 66 to 80 percent of the schools initially invited to participate agreed to do so. Completed questionnaires were obtained from 77 to 84 percent of all sarnpled students in participating schools each year. All percentages reported are based on weighted cases; the N's that are shown in the tables refer to the number of unweighted cases. Alcohol and cigarette use ore included in selected tables. Readers interested in responses to this question for 1975 and 1976 should consult previous editions of SOLRCEBOKK. For survey methodology and definitions of terms, see Appendix 7.
${ }^{\text {a Answer alternatives were: (1) no risk, (2) slight risk, (3) moderate risk, }}$ (4) great risk, and (5) can't say, drug unfamiliar.

Note: The American Frestman Survey is conducted onnually by the Cooper ative Institutional Research Program (CIRP) of the Higher Education Research Institute at the University of California, Los Angeles. Each fall, the CIRP surveys approximately 200,000 full-time students entering the freshman classes at a nationally-representative sample of two-year and fouryear colleges and universities in the United States. From 1968 to 1970, opproximately 15 percent of the Nation's institutions of higher educotion were selected by sampling procedures to participate in the program. Beginning in 1971, a stratified sample was selected from all institutions that have entering freshman classes and that respond to the U.S. Department of Educotion's Higher Education General Information Survey. An institution is considered eligible if it was operating ot the time of the survey and if it had a freshman class of at least 25 students. The data presented above are weighted estimates of all first-time, full-time students entering higher education institutions in the fall of each year. Response categories were "agree strongly," "agree somewhat," "disagree somewhat," and "disagree strongly."
a The text or format of the question or response may differ slightly in different years.

Table 2.114
Attitudes toward insider trading
United States, 1986
Questions August November
A. "How common to you think it is for people on Wall Street to engage in insider trading? Do you think it is very cormon, somewhat cormon, happens only occosionally, or is not common at all?"

| Very cormon | $31 \%$ | $39 \%$ |
| :--- | :---: | :---: |
| Somewhat cormon | 32 | 28 |
| Happens only occasionally | 21 | 16 |
| Not cormon at all | 5 | 5 |
| Not sure | 11 | 12 |

B. "Do you think insider trading should be illegal, or is it just a case of people simply making money because they happened to know more than other people?"

| Should be illegal | 52 | 66 |
| :--- | ---: | ---: |
| Just that they know more | 41 | 26 |
| Not sure | 7 | 8 |

C. "Suppose someone got a tip from a friend that the company he or she works for was going to be purchased for a lot more money than its current stack price. Do you think that most people, if they had the money, would buy stock in that compnny or not?"

| Would buy | 82 | 78 |
| :--- | ---: | ---: |
| Would not | 14 | 15 |
| Not sure | 4 | 7 |

D. Now, suppose you got a tip frum a friend that the comprity he or she works for was gaing to be purchased for a lot more money than its current stock price. If you had some spare cash, would you buy stock in that company or not?"

| Would buy | 53 | 55 |
| :--- | ---: | ---: |
| Would not | 42 | 39 |
| Not sure | 5 | 6 |

E. "Well, let me ask you why you would not buy that stock based on such a tip. If you had to choose one reason, is it because...?"

It would be lilega
The government might find out
The tip might not furn out to be a good one 37
It Is just plain wrong to do It a good one 37
22
3
34
35
6
F. Have the stories about Insider trading changed your opinion about the ethics of people who work on Wall Street for the worse, for the better, or haven't they made much difference?"
For the worse
For the betfer
Not much difference
Not sure

| 11 | 17 |
| ---: | ---: |
| 4 | 3 |
| 80 | 75 |
| 5 | 5 |

G. "Finally, I'd like you to compare the ethical standards of people who work on Wall Street with those in other lines of work. If you had to choose, which one of these groups do you think has the lowest ethica! standards?"

| Those who work on Wall Street | 7 | 6 |
| :--- | ---: | ---: |
| Politiclans | 43 | 43 |
| Doctors | 5 | 7 |
| Reporters | 10 | 13 |
| Lawyers | 16 | 15 |
| Corpgrate executives | 8 | 9 |
| None | 4 | 2 |
| Not sure | 7 | 5 |

Note: Question A was prefaced with the following statement: "As you may know, lately a number of peaple who work on Wall Street have been accused of what's known as 'insider troding'. That is, illegally trading stocks based on information they knew, but the general public ond other stockholders did not. This information can come from someone who works for a company involved in a deal or from a financial or legal advisor to that company." Question B was prefaced by the following statement: "Some people have argued that insider trading shouldn't be illegal at all. They say that nobody gets hurt, since no one actually loses money as a result of insider trading, just that same people make more money than others." For a discussion of public opinion survey sampling procedures, see Appendix 5.
${ }^{\text {a }}$ This question was asked of the 42 percent subsample of August respondents and the 39 percent subsample of November respondents who gnswered "would not" in question D.
EResponse volunteered.

## Section 3 <br> Nature and distribution of known offenses

The data presented in this section describe the nature and extent of criminal activity. Because it is wellknown that many crimes are not reported to the police, surveys of the population and selected subgroups have been utilized to provide an additional perspective on the extent of criminal activity. Two methods have been most commonly used: (1) surveys of households and businesses to determine the rate and characteristics of victims of criminal acts and (2) surveys of the general population to determine the proportion and characteristics of persons who have committed criminal offenses.

The section begins with information presented from the National Crime Survey (NCS), which is sponsored by the Bureau of Justice Statistics and conducted by the U.S. Bureau of the Census. The NCS is a multi-faceted national probability survey of households in the United States. Detailed information is provided on the extent and nature of personal and household crime, its costs, and characteristics of victims and criminal incidents for both lone and multiple offender crimes. Data are also presented on victims' reasons for reporting or not reporting crimes to the police, perceived characteristics of offenders, weapon use by offenders, self-protective measures taken by victims, and economic loss resulting from victimization.

Also included in this section are data from the redesigned National Crime Survey. In 1987, NCS introduced a new series of questions soliciting additional information on self-protective actions taken by victims and the response of police and other criminal justice authorities to reported crimes. Data on the timing and nature of police response, as well as police followup activities are presented. Information on characteristics of victims of State prison inmates is presented in this section as are the number and rate of children and families reported for child abuse and neglect.

Following the NCS tables is information presented from the Monitoring the Future Project and the National Youth Survey. The Monitoring the Future Project collects data through
a series of nationwide surveys of high school seniors. Information on
victimization experiences and involvement in delinquent activities is gathered. The National Youth Survey collects data on the prevalence and incidence of delinquent behavior in the adolescent population. Also presented are data from surveys conducted for the National Institute on Drug Abuse on the use and frequency of use of various substances. Data on drug, alcohol, and cigarette use for various subgroups of the population, such as students and young adults are presented. This includes use of marihuana, cocaine, heroin, inhalants, hallucinogens, and a variety of psychotherapeutic drugs such as sedatives, tranquilizers, and stimulants. Also included in this section are reported problems associated with alcohol or drug use.

The finai segment of this section presents data on officially recorded figures of crime. The Federal Bureau of Investigation collects information on crimes known to the police through its Uniform Crime Reporting Progrann. Data on crimes are collected and tabulated by city, county, Metropolitan Statistical Area, popuIation group, and geographic division. Offense characteristics and situational factors for violent crime, property crime, and specific offenses are presented. Additionally, the number and characteristics of law enforcement officers assaulted and killed are reported. The section concludes with information presented on bombing incidents, loss due to fires, terrorist incidents, criminal acts involving aviation, and Federal Crime Insurance policies.

Toble 3.1
Estimated number, percent distribution, and rate of personal and household victimizations

By sector and type of victimization, United States, $1987^{\circ}$

| Sector and type of victimization | Number | Percent of crimes within sector | Percent of al! crimes | Rate per 1,000 population age 12 and over | Sector and type of victimization | Number | Percent of crimes within sector | Percent of all crimes | Rate per 1,000 households |

Note: See Note, table 3.1. Slight changes in the class:fication of the personal crimes of robbery and ossault occurring in commercial estoblishments were made beginning in 1985. Data for 1984 hove been adjusted to account for this change and will differ slightly from previous years' presentations. For survey methodology and definitions of terms, see Appendix 6.

Detail may not add to total shown because of rounding.
${ }^{6}$ The victimization rate for female rape (the number of rapes per 1,000 women age 12 and older) was 1.3 in 1985, 1.2 in 1986, and 1.3 in 1987.

Table 3.7
Initial personal contact by palice with victims of reported crimes
By type of victimization, United States, 1986 and 1987a,b

| Type of victimization | Estimated percent of reported insidents where of the initial contact: |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | Police come to victim | Victim went to police | ```Police made no face-to-face contact \({ }^{\text {C }}\)``` | Not known if police came |
| Personal crimes |  |  |  |  |  |
| Crimes of violence | 100\% | 76\% | 8\% | 14\% | 2\% |
| Rape | 100 | 75 | $18{ }^{\text {d }}$ | $4^{\text {d }}$ | $4{ }^{\text {d }}$ |
| Robbery | 100 | 79 | 7 | 12 | $2{ }^{\text {d }}$ |
| Aggravated assault | 100 | 79 | 7 | 12 | $2^{\text {d }}$ |
| Simple assault | 100 | 72 | 8 | 17 | 3 |
| Crimes of theft | 100 | 54 | 8 | 33 | 4 |
| Personal lorceny |  |  |  |  |  |
| With contact | 100 | 54 | $11^{\text {d }}$ | 31 | $4^{\text {d }}$ |
| Without contact | 100 | 54 | 8 | 33 | 4 |
| Household crimes | 100 | 71 | 3 | 23 | 3 |
| Burglary | 100 | 83 | 2 | 14 | 2 |
| Household larceny | 100 | 58 | 4 | 35 | 3 |
| Motor vehicle theft | 100 | 68 | 6 | 21 | 5 |

Note: These data are from the first phase of a redesign of the National Crime Survey. The National Crime Survey (NCS) is conducted for the Bureau of Justice Statistics (BJS) for the U.S. Bureau of the Census. Data are derived from a continuous survey of a representative sample of housing units in the United States. Approximately 49,000 housing units, inhabited by 100,000 individuals age 12 and over, participated in the survey. In July 1986, BJS introduced a new series of questions to the NCS incorporating information on victims' perceptions of drug and alcohol use by violent offenders, protective actions taken by victims and bystanders, and the response of police and other criminal justice authorities to reported crimes. The data presented from this source are based on interviews conducted from July 1986 through July 1987, reflecting victimizations thot occurred from January 1986 through June 1987. These victimizations include only a proportion of incidents that occurred from January through May 1986 and Janvary through May 1987. However, all victimizations recorded by the NCS from June through December 1986 are included.

Data on police activities are incident-weighted and based on national estimates obtained from the usual National Crime Survey weighting procedures. Incidents included are those reported by the victim, another household member, or an official. Coses where police were at the scene when the crime occurred are excluded.
For survey methodology and definitions of terms used in the Nationa: Crime Survey, see Appendix 6.
${ }^{0}$ These dato reflect a proportion of reported victimizations for the 6 -month periods from January through May 1986 and 1987, and all incidents reported from June through December 1986.
${ }^{6}$ Percents may not total to 100 because of rounding.
cpolice may have communicated with victim by telephone or mail.
${ }^{d}$ Estimate based on 10 or fewer sample cases.

| 65 years and older | 19,195,650 | 108,840 | 5.7 | 23,325,820 | 120,500 | 5.2 |
| Form of tenure |  |  |  |  |  |  |
| Owned or being bought | 58,715,510 | 746,900 | 12.7 | 122,190,740 | 813,830 | 6.7 |
| Rented | 33,048,430 | 731,850 | 22.1 | 43,337,900 | 761,930 | 17.6 |

Note: See Notes, tables 3.1 and 3.17. The number For survey methodology and definitions of of thefts based on vehicles owned is equal to or terms, see Appendix 6.
higher than the corresponding figure based on
households because the former includes all comt pleted or ottempted vehicle thefts, regardless of the final classification of the event; personal crimes of contact and burglary occurring in con-
junction with motor vehicle thefts take prece-
dence in determining the final clossification
based on the number of households.

| Income of househald |  |  |  |
| Less than \$10,000 | 13.9 | 13.9 | 1.0 |
| \$10,000 to \$ 19,999 | 19.4 | 11.2 | 1.7 |
| \$20,000 to \$29,999 | 18.9 | 8.9 | 2.1 |
| \$30,000 and above | 19.7 | 8.2 | 2.4 |
| Not ascertained | 19.3 | 11.5 | 1.7 |
| Number of household members |  |  |  |
| One | 12.8 | 15.6 | 0.8 |
| Two- | 16.6 | 10.1 | 1.6 |
| Three to five | 22.3 | 10.8 | 2.1 |
| Six or more | 28.8 | 13.4 | 2.2 |
| Household structure |  |  |  |
| One male | 21.2 | 18.0 | 1.2 |
| One female | 7.5 | 10.9 | 0.7 |
| One adult with children under 12 | 17.3 | 21.6 | 0.8 |
| Married couple | 12.1 | 6.6 | 1.8 |
| Married couple with children, other adults, etc. | 20.6 | 9.0 | 2.3 |
| Two persons, both 12 and older, who are not morried | d 25.9 | 17.6 | 1.5 |
| Other | 32.1 | 17.8 | 1.8 |
| Home ownership |  |  |  |
| Own | 14.7 | 7.7 | 1.9 |
| Rent | 25.7 | 21.7 | 1.2 |
| Number of housing units |  |  |  |
| One | 15.5 | 8.1 | 1.9 |
| Two | 25.4 | 20.8 | 1.2 |
| Three or more | 27.6 | 27.2 | 1.0 |
| Mobile home, other | 14.1 | 9.3 | 1.5 |
| Residence |  |  |  |
| Central city | 27.2 | 21.0 | 1.3 |
| Suburb | 19.5 | 10.7 | 1.8 |
| Nonmetropolitan area | 9.3 | 5.2 | 1.8 |

Note: These data are based on all motor vehicle thefts reported in the Notional Crime Survey (NCS) conducted for the Bureau of Justice Statistics by the U.S. Bureau of the Census. Estimates presented here are higher than other NCS dato because: (1) motor vehicle thefts occurring during other, more serious crimes, ore included, ond (2) series crimes--three or more incidents obout which the victim is unable to provide separate detail--are counted as three incidents each. Approximately 7.7 percent of motor vehicle thefts reported in these tables involved a rape, robbery, or burglary and 3.6 percent constituted series crimes.

Motor vehicle thefts were weighted to represent both households and incidents, since for crimes defined as household crimes; the households os a whole is considered the victim, with one household per theft. (Source, p. 9.)

For definitions of terms and survey methodology used in the National Crime Survey, see Appendix 6.

| Attempted | 509,930 | 100.0 | 22.6 | 65.0 | 18.4 | 31.8 | 14.8 | 12.4 |

Note: See Note, table 3.1. An incident is a specific criminal act involving one or more victims. The number of incidents of personal crime is lower than that of victimizations, because some crimes are simultaneously committed against more than one individual. (Source, p. 14.) For survey methodology and definitions of terms, see Appendix 6.

Note: See Nate, table 3.1. The data presented for the years 1975-80 are weighted estimates based on 1970 population figures from the U.S. Bureau of the Census. Data for 1981 are weighted estimates based on a composite figure deveioped from 1970 and 1980 population figures. Data for 1982-87 are weighted estimates based on 1980 population figures. "Households touched by crime" includes households experiencing burglary or theft, or those in which a household member was a victim of personal crimes of violence or theft. In 1986, the National Crime Survey changed its classification of crimes occurring during cormercial robberies. Prior to 1986, persons injured during a cormercial robbery but who lost no property
themselves were considered to have been victimized by robbery. Such incidents are now counted as assaults. Additionally, persons threatened in commercial robberies ore also now counted as victims of attempted assault. Previously these incidents were excluded. Estimates for 1985 hove been
adjusted to be equivalent to the 1986 estimates. (U.S. Department of Justice, Bureau of Justice Statistics, Households Touched by Crime, 1986, Bulletin NCJ-105289 (Washington, DC:U.S. Department of Justice, June 1987), p. 5.) For survey methodology and definitions of terms, see Appendix 6.
${ }^{\text {a }}$ Detail does not add to total because of overlap in households touched by different crimes.

Note: These data were collected by the U.S. Bureau of the Census for the Bureau of Justice Statistics through the Survey of Inmates of State Correctional Focilities. This survey employs a stratified probability sampling design with the probabilities proportional to the size of the correctional facility. In 1986, 13,711 interviews were conducted at 275 prisons from a sample of approximately 15,000 inmates. The estimated prison population for 1986 was 450,416.

Percents may not add to 100 due to rounding.

| Offense involved multiple victims | 30.8 | 22.2 | 16.1 | 38.8 | 27.9 | 37.4 |

Note: This information was obtained from a survey of juveniles and young adults in custody conducted by the U.S. Bureau of the Census for the Bureau of Justice Statistics. This survey was based on personal interviews with a nationally representative sample of 2,621 juveniles and young adults. Interviews were conducted in 50 institutions in 26 States, representing I in 4 long-term, State-operated institutions. Data presented are estimates of characteristics of the 18,226 juveniles and 6,798 young adults represented by the sample. Participation in the survey was voluntary and the response rate was 89 percent.

The sample design was a stratified sample based on the size of the correctional facility. Facilities that were long-term ond State-operated with institutional environments were included in the sampling frame. The majority of these instifutions described themselves as training schools. Excluded from the survey were institutions that were locally operated, State facilities not designed for secure custody and all short-term or privately-operated facilities and institutions.

Primarily as a result of the inclusion of California's Youth Authority facilities, more than a quarter of the sample was made up of young adults who are age 18 and older (up to 25 years of age). This older population is referred to as young adults, while those less than the age of 18 will be referred to as juveniles. All residents regardless of age are referred to as youth. (Source, pp. 1, 9.)

Note: These data were collected through a survey conducted by the National Study on Child Neglect and Abuse Reporting. Child protective service agencies in the 50 States, the District of Columbia, Puer to Rico, the U.S. Virgin Islands, Guam and the Marianas were surveyed regarding both the number of families and number of children reported in neglect and abuse cases. Data include cases that have been substantiated upon further investigation as well as cases that were determined to be unfounded. A particular child may be reported more than once in a given year and unless otherwise noted the totals presented here reflect that duplication. Rates are based on provisional child population estimates (ages 0 to 17) for each year from the U.S. Bureau of the Census.
The Notional Study defines on abuse report as a report of intentional, nonaccidental injury, harm or sexual abuse inflicted on a child. A neglect report is a report of the responsible caretaker's improvision of care essential to o child, such as food, clothing, shelter, medical attention,
${ }^{\text {a }}$ Estimate computed on a nationally derived ratio of children to tamilies or families to children. The conversion factor from families to children is 1.60 and from children to families is 0.62 .
Number based on a hand count of reports at the State level.
CFigure excludes duplicate reports.
Estimate is based on 1985 data.
ENumber based on counts of reports made by local jurisdictions, e.g. counties.
Estimate computed based on the ratio of children to families or families to children from case reports available to the national study.

Humane Associotion, 1988), pp. 10, 11. Table adapted by SORCEBOOK staff. Reprinted by permission. education, or supervision. It should be noted, however, that definitions of abuse and neglect, and reporting procedures vary from State to State.

Table 3.54
Abused and neglected children named in substantiated reports in $\mathbf{3 0}$ jurisdictions

1986

| Jurisdiction | Number of children associated with substantiated reports | Percent of all children reported associated with substantiated reports |
| :---: | :---: | :---: |
| Total | 408,276 | 40\% |
| Arkansas | 7,333 | 33 |
| Florida | 51,890 | 39 |
| Hawaii | 2,546 | 54 |
| llinois | 35,956 | 45 |
| Indiana | 9,647 | 29 |
| lowa | 6,372 | 24 |
| Kansas | 5,470 | 23 |
| Kentucky | 19,488 | 46 |
| Lovisiona | 20,714 | 48 |
| Maine | 6,188 | 50 |
| Maryland | 5,524 ${ }^{\text {a }}$ | 30 |
| Massachusetts | 20,214 | 39 |
| Minnesota | $10,040^{\text {b }}$ | 37 |
| Missouri | 32,745 | 43 |
| Nevada | 6,081 | 44 |
| New Hempshire | 1,338 ${ }^{\text {b }}$ | 34 |
| New Jersey | 17,982 | 36 |
| New Mexico | 2,985 | 37 |
| North Carolina | 12,379 | 35 |
| Orlahoma | 8,533 | 39 |
| Oregon | 13,350 | 42 |
| Pennsylvania | 7,127 | 34 |
| Rhode Island | $3,140^{\text {c }}$ | 48 |
| South Dakota | 4,606 | 46 |
| Texas | 61,854 | 53 |
| Utah | 5,127 | 28 |
| Virginia | 11,055 | 23 |
| West Virginia | 8,278 ${ }^{\text {d }}$ | 64 |
| Wisconsin | 9,794 | 34 |
| Guam | $520^{\text {c }}$ | 60 |

Note: See Note, table 3.53. Data on substantiated reports are available from the cbove States accounting for 52 percent of the U.S. child population in 1986. Although definitions vary from State to State, substantiated cases generally imply a degree of certainty that the involved child is at risk of abuse or neglect.

Estimate computed on a nationally derived ratio of children to families or families to children. The conversion factor from families to children is 1.60 and from children to families is 0.62 .
Number based on a hand count of reports at the State level.
Figure excludes duplicate reports.
CNumber based on counts of reports made by local jurisdictions, e.g. counties.

Note: These data are from a series of nationwide surveys of high school seniors conducted from 1975 through 1988 by the Survey Research Center of the Institute for Social Research. The survey design is a multistage random sample of high school seniors in public and private schools throughout the continental United Stotes. All percentages reported are based on weighted cases; the N's that are shown in the tables also refer to the number of weighted coses. Readers interested in responses to this question for 1976 and 1977 should consult previous editions of SOLRCE-
BOOK. For survey methodology ond definitions of terms, see Appendix 7.

Note: See Note, table 3.56. Data are given for those who identify themselves as White or Caucasion and those who identify themselves as Black or Afro-American because these are the two largest racial/ethnic subgroups in the population. Data are not given for the other ethnic categories because these groups corrorise less than 3 percent of the sample in any given year (Source, 1982, p. 9). Readers interested in responses to this question for 1976 and 1977 should consult previous editions of SORCEBOOK. For survey methodology and definitions of terms, see Appendix 7.

High school seniors reporting involvement in driving accidents in last 12 months

United States, 1978-88
Question: "During the last 12 months, how many accidents have you had while you were driving (whether or not you were responsible)?"

| Number of accidents | $\begin{gathered} \text { Class } \\ \text { of } 1978 \\ (N=18,916) \end{gathered}$ | $\begin{gathered} \text { Class } \\ \text { of } 1979 \\ (\mathrm{~N}=16,654) \end{gathered}$ | $\begin{gathered} \text { Class } \\ \text { of } 1980 \\ (N=16,524) \end{gathered}$ | $\begin{gathered} \text { Class } \\ \text { of } 1981 \\ (\mathrm{~N}=18,267) \end{gathered}$ | $\begin{gathered} \text { Class } \\ \text { of } 1982 \\ (\mathrm{~N}=18,348) \end{gathered}$ | $\begin{gathered} \text { Class } \\ \text { of } 1983 \\ (\mathrm{~N}=16,947) \end{gathered}$ | $\begin{gathered} \text { Class } \\ \text { of } 1984 \\ (\mathrm{~N}=16,499) \end{gathered}$ | $\begin{gathered} \text { Class } \\ \text { of } 1985 \\ (\mathrm{~N}=16,502) \end{gathered}$ | $\begin{gathered} \text { Class } \\ \text { of } 1986 \\ (N=15,713) \end{gathered}$ | $\begin{gathered} \text { Class } \\ \text { of } 1987 \\ (\mathrm{~N}=16,843) \end{gathered}$ | $\begin{gathered} \text { Closs } \\ \text { of } 1988 \\ (\mathrm{~N}=16,795) \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| None | 73.6\% | 72.5\% | 74.8\% | 76.6\% | 77.8\% | $77.8 \%$ | 77.3\% | 75.6\% | 74.9\% | 74.4\% | 73.9\% |
| One | 19.8 | 20.0 | 19.4 | 18.3 | 17.0 | 17.3 | 17.6 | 18.5 | 18.8 | 19.5 | 19.9 |
| Two | 4.9 | 5.5 | 4.3 | 3.9 | 4.0 | 3.7 | 3.9 | 4.5 | 4.8 | 4.4 | 4.6 |
| Three | 1.3 | 1.5 | 1.1 | 0.8 | 0.9 | 0.9 | 0.9 | 0.9 | 1.1 | 1.3 | 1.2 |
| Four or more | 0.5 | 0.6 | 0.4 | 0.5 | 0.4 | 0.3 | 0.3 | 0.5 | 0.4 | 0.4 | 0.4 |

Note: See Note, table 3.56. Respondents were informed that "accident" refers to "a collision involving property damage or personal injury - not bumps or personal scratches in parking lots" (Source, 1982, p. 22). Readers interested in responses to this question for 1976 and 1977 should consult previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 7.

Note: These data ore from a series of nationwide surveys of high school seniors conducted by the University of Michigon's Institute for Social Research for the National Instifute on Drug Abuse from 1975 through 1988. The survey design is a multistage rondom sample of high school seniors in public and private schools. Depending on the survey year, from 66 to 80 percent of the schools initially invited to participate agreed to do so. Completed questionnaires were obtained from 77 to 84 percent of all sampled students in participating schools each year. All percentages reported are based on weighted cases; the N's that are shown in the tables refer to the opproximate number (i.e., rounded to the nearest hundred) of

Unweighted cases. These data were derived from the questions indicated above. For survey methodology and definitions of terms, see Appendix 7.

Table 3.75
Reported drug use, alcohol use, and cigarette use within last 12 months among high school seniors

By type of drug, United States, 1977-88

Note: See Note, table 3.73. Data for the categories "inhalants" and "hallucinogens" are underestimated because some users of amyl and butyl nitrites, and PCP fail to report in these drug categories. Since 1979, the survey addresses this issue by asking specific questions about amyl and butyl nitrites (inhalants) and PCP (a hallucinogen) on one survey alternate form. The results of this survey are used to adjust for underreporting in these drug categories. Since 1982, new questions were introduced on the use of controlled and non-controlled stimulants in order to exclude over-the-
counter amphetamines, which were believed to have been inflating the statistic during 1980 and 1981. "Crack" is a highly potent and addictive form of cocaine. "Other cocaine" refers to noncrock forms of this drug. In 1987, only one-fifth of respondents were asked about cacaine use separate from crack use. These two categories approximate, but do not total to the figure for cocaine because two-fifths of respondents were asked about crack and one-fifth of respondents were asked about other cocaine in 1987. Readers interested in responses to this queston for 1975 and 1976 should consult previous edtions of SORCEBOCK. For survey methodology and definitions of terms, see Appendix 7.
${ }^{a}$ Data based on four questionnaire forms. $N$ is four-fifths of $N$ indicated. bata bused on a single questionnaire form. N is one-fifth of N indicated.
${ }^{C}$ Question text changed slightly in 1987.
Data based on a single questionnaire form in 1986 ( N is one-fifth of N indicated), and on two questionnaire forms in 1987 and 1988 ( N is twofifths of N indicated).
${ }^{\text {eOnly}}$ drug use which was not under a doctor's orders is included here.

Note: See Note, table 3.73. These data are from a follow-up survey of respondents 1 to 4 years past high school who are presently enrolled in college. Included ore those registered as full-time students in March of the year in question and who report they are enrolled in a two- or four-year college. Those individuals previously in college and those who have already completed college ore excluded. The number of respondents for each year is as follows: 1980, 1,040; 1981, 1,130; 1982, 1,150; 1983, 1,170; 1984, 1,110; 1985, 1,080; 1986, 1,190; 1987, 1,220.

Since 1982, new questions were introduced on the use of controlled and non-controlled stimulants in order to exclude over-the-counter amphetamines, which were believed to hove been inflating the statistic during 1980 and 1981. "Stimulants adjusted" is based on the data obtained from these new questions. "Crack" is a highly potent and addictive form of cocaine. For survey methodology and definitions of terms, see Appendix 7.
${ }^{\text {a }}$ This drug was asked about in four of the five questionnaire forms. $N$ is four-fifths of $N$ indicated.
This drug was asked about in one of the five questionnaire forms in 1986 ( N is one-fifth of N indicated), and two of the five questionnaire forms in 1987 ( $N$ is two-fifths of $N$ indicated).
${ }^{\text {Conly}}$ drug use that was not under a doctor's orders is included here.

Note: Registered handiers of controlled substances (pharmacies, practitioners, manufacturers, and hospitals) are required, under the Controlled Substances Act, to report the theft of all controlled drugs to the Drug Enforcement Administration. This table includes drug thefts reported by these registered handlers.

The States included in the regions are as follows: Northeast.Connecticut, Deloware, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont; Southeast--Alabama, Arkansas, District of Columbia, Florida, Georgia, Louisiona, Niaryland, Mississippi, North Carolina, South Carolina, Tennessee, Virginia; North Central--Illinois, Indiana, lowa, Kansas, Kentueky, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, West Virginia, Wisconsin; South Central-Arizona, Colorado, New Mexico, Oklahoma, Texas, Utah, Wyoming;

West--Alaska, California, Hawaii, Idaho, Montana, Nevada, Oregon, Washington.
Drug theft data for 1981-85 are not ovailable by geogrophic orea.
 dato for 1985 are for April through December.
EIncludes methadone, cocaine, and other narcotics.

Note: The estimated average illegal market retail heroin price is calculated from e sample of evidence exhibits removed from the illicit market by the Drug Enforcement Administration. The sample is selected to include "only those exhibits which fall within a certain range of values representative of a retail level of the illicit market." Beginning in 1978, the estimated national average is derived from regional averages weighted for the "intensity of the narcotic problem." That is, through statistical procedures, a large number of transactions in one location are clustered to limit their influence on heroin price and purity statistics in the sample group (Source, 1979, p. 34).
Cocaine prices for 1976-82 were derived from the Cocaine Retail Price Index, which was based upan evidence exhibits purchased by the Drug Enforcement Administration; these are prices per pure gram. Since 1983, the price reflects the cost of a "street gram" of prevailing purity. In 1983 and 1984, a "street gram" was 35 percent pure; in 1985, a "street gram" was 50 percent pure; in 1986, a "street gram" was 60 percent pure; and in 1987, a "street gram" was 70 percent pure.

In 1979 and 1980, prices of dangerous drugs (marihuana, hashish, LSD, PCP, barbiturates, and amphetamines) were based on reports for the last quarter of each year submitted by Drug Enforcement Administration's field offices in 24 large metropoliton areas. These prices are compiled through a newly-initiated collection method, which reflects transaction data at the retail level. Comparison with prices of earlier years is not recommended by the Source (1979, p. 36).
The notation "d.u." means dasage unit.
${ }^{\text {a }}$ Prices are per pure gram.
brices are per dosage unit for 1977-81 and per gram for 1982-87.

Respondents reporting problems resulting from alcohol or drug use during the past year

By age group and type of problem, United States, 1985

| Type of problem | Total ail ages | Age group |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | $\begin{aligned} & 12 \text { to } 17 \\ & \text { years } \end{aligned}$ | 18 to 25 years | $26 \text { to } 34$ years | 35 years and older |
| Found it difficult to think clearly | 7.9\% | 9.5\% | 16.7\% | 10.3\% | 3.9\% |
| Drove unsafely | 7.4 | 3.1 | 15.8 | 12.9 | 3.6 |
| Had orguments ond fights with fomily or friends | 6.7 | 7.0 | 13.4 | 9.5 | 3.4 |
| Become depressed or lost interest in things | 5.8 | 6.2 | 10.6 | 8.4 | 3.2 |
| At times, I could not remember what happened to me | 5.8 | 7.0 | 13.6 | 7.7 | 2.3 |
| Felt very nervous and anxious | 5.6 | 7.0 | 11.1 | 7.1 | 3.0 |
| Felt irritable and upset | 5.1 | 4.6 | 9.0 | 8.0 | 2.9 |
| Got less work done than usual at school or on the job | 3.6 | 4.4 | 7.8 | 5.3 | 1.5 |
| Had health problerns | 3.1 | 2.4 | 3.6 | 3.3 | 3.1 |
| Felt completely alone ond isolated | 3.0 | 3.3 | 6.1 | 3.6 | 1.8 |
| Felt suspicious and mistrustful of people | 2.6 | 2.7 | 5.5 | 3.2 | 1.4 |
| Skipped four or more regular meals in a row | 2.4 | 1.5 | 5.9 | 3.0 | 1.2 |
| Found it harder to handle my problems | 2.3 | 2.3 | 4.4 | 3.3 | 1.3 |
| Had trouble with the police | 2.1 | 2.4 | 5.7 | 2.1 | 1.0 |
| Had serious money problems | 2.1 | 1.8 | 4.0 | 2.7 | 1.3 |
| Had trouble at school or on the job | 2.0 | 3.2 | 4.0 | 2.1 | 1.0 |
| Had to get emergency medical help | 0.8 | (0) | 1.5 | 1.1 | 0.7 |

Note: See Note, table 3.81. Respondents who did not use alcohol or drugs are coded as not having problems. Respondents who skipped these questions even though they used one or more substances in the past year, are also coded as not hoving problems. The majority of past year users who failed to answer the problems questions were mokers or occasional (less than weekly) drinkers who most likely did not consider themselves to have any drug problems. These figures, therefore, silightly underestimate the prevolence of percelved problems.
For survey methodology and definitions of terms, see Appendix 8.

Table 3.101
Estimated percent distribution of fatally-injured and surviving motor vehicle drivers

By level of blood olcohol concentration, United States, 1982-86

| Blood alcohol concentration | 1982 | 1983 | 1984 | 1985 | 1986 | Percent change 1982-86 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Fatally-injured |  |  |  |  |  |  |
| drivers |  |  |  |  |  |  |
| None (0.00\%) | 47\% | 4\% | 51\% | 52\% | 52\% | 10.6\% |
| Some and impaired (0.01 to $0.09 \%$ ) | 9 | 9 | 9 | 9 | 9 | 0.0 |
| Intoxicated (0.10\% or more) | 44 | 42 | 40 | 39 | 39 | -11.4 |
| Total number | 24,690 | 24,138 | 25,589 | 25,337 | 26,613 | 7.8 |
| Surviving drivers |  |  |  |  |  |  |
| Some and impaired (0.01 to 0.09\%) | 9 | 8 | 8 | 7 | 8 | -11.1 |
| Intoxicated ( $0.10 \%$ or more) | 19 | 18 | 17 | 16 | 15 | -21.0 |
| Total number | 31,339 | 30,518 | 31,923 | 32,546 | 33,684 | 7.5 |

Note: These data are based on information submitted by all 50 States, the District of Columbia, and Puerto Rico to the National Center for Statistics and Analysis maintained by the National Highway Traffic Safety Administration. The National !fighway Traffic Sofety Administration uses an estimation procedure to derive national statistics on blood alcohol levels of motor vehicle drivers involved in fatal accidents, who were not tested or for whom BAC test results are unknown. The probability of alcohol involvement of each driver for whom there is no BAC data is calculated based on known test results for people in similar accidents using specific driver and crash parameters. This procedure allows national estimates of alcohol-related motor vehicle fatalities.

Note: The estimates of delinquent behavior presented above were obtained from the National Youth Survey project which invoived a series of annual surveys with a representativa national sample of American youth aged II to 17 in 1976. This sample of American youth constituted a national youth panel and each member of the youth panel was interviewed in successive years during 1977-81 and in 1984 about their involvement in delinquent activity. The reader should be aware that for 1976-80 and 1983, the recall period is 1 year. For 1981 and 1982, the recall period is 3 and 2 years, respectively, as data for 1981-83 were collected during 1984. Prevalence
rates reflect the proportion of persons in the population who reported some involvement in the particular offense during the previous year. For survey methodology and descriptions of offenses, see Appendix 9.

Note: See Note, table 3.103. Incidence rates reflect the average number of offenses reported per person during the previous year. For survey methodology and descriptions of offenses, see Appendix 9.
${ }^{\text {a }}$ Incidence rates for the drug use offenses are bosed on mean cotegorical responses rather than the mean number of reported offenses. The response categories were: $1=n e v e r, 2=0 n c e$ or twice, $3=0 n c e$ every 2 to 3 months,
$4=$ once a month, 5 =once every 2 to 3 weeks, $6=$ once a week, $7=2$ to 3 times a week, $8=$ once a day, and $9=2$ to 3 times a day.

Note: See Notes, tables 3.103, 3.104, and 3.107. For survey methodology and descriptions of offenses, see Appendix 9.

Incidence rates for the drug use offenses are bosed on mean categorical responses rather than the mean number of reported offenses. The response categories were: $1=n e v e r, 2=o n c e ~ o r ~ t w i c e, ~ 3=o n c e ~ e v e r y ~ 2 ~ t o ~ 3 ~ m o n t h s, ~$
$4=$ once a month, $5=$ once every 2 to 3 weeks, $6=$ once o week, $7=2$ to 3 times a week, $8=0$ once a day, and $9=2$ to 3 times o day.

Note: See Note, table 3.103. The social class measure applies to the principal wage earner in each youth's family. Middle class primarily refers to professional/managerial occupations and college level educations. The working class category is comprised primarily of owners of small business, clerical workers, persons in sales occupations, and skilled manual occupations with high school or some college completed. Semiskilled persons and those in unskilled monual occupations with high school or lower levels of
education comprise the lower class cotegory. (Source, pp. 39-42.) For survey methodology and descriptions of offenses, see Appendix 9.

Note: See Notes, tables 3.103, 3.104, and 3.109. For survey methadology and descriptions of offenses, see Appendix 9.
$\sigma^{\text {Incidence rates for the drug use offenses are based on mean categorical }}$ responses rather than the mean number of reported offenses. The response categories were: I=never, $2=0 n c e$ or twice, $3=0 n c e$ every 2 to 3 months,
$4=$ once a month, $5=$ once every 2 to 3 weeks, $6=$ once a week, $7=2$ to 3 times a week, $8=0 n c e$ a day, and $9=2$ to 3 times a day.

Note: See Note, table 3.103. The place of residence classification is created by using U.S. Bureau of the Census descriptions of the cities, towns, and areas where respondents lived. For this survey, the Source defines urban areas as central cities of a Standard Metropolitan Statistical Area
(SMSA) or an urbenized area, with a population of 100,000 or more. Suburban areas are central cities of an urbanized area with a population less than 100,000 or any part of an SMSA not previously clossified as "urban," or any cormunity with a population of 25,000 or more. Rural areas are cities or places not included in an SM5A or part of a central city in an
urbanized area, with a population less thon 25,000. (Source, pp. 42, 43.) For survey methodology and descriptions of offenses, see Appendix 9.

Note: See Notes, tables 3.103, 3.104, and 3.111. For survey methodology ond descriptions of offenses, see Appendix 9.
${ }^{a}$ Incidence rates for the drug use offenses are based on mean categorical responses rather than the mean number of reported offenses. The response categories were: I=never, $2=$ once or twice, $3=$ once every 2 to 3 months,

4 zonce a month, $5=$ once every 2 to 3 weeks, $6=$ once a week, $7=2$ to 3 times a week, $8=0$ nce a day, and $9=2$ to 3 times a day.

Reported prevalence of delinquent behavior
By offense type and age of respondent, United States, 1976-83 and 1986
Note: See Note, table 3.103. To improve readability of these data, this
table is presented in two-year groupings for the years 1976-83 (see table
3.113b, table 3.113 c , and table 3.113 d ). Data for 1986 are presented
separately in table 3.113e. For survey methodology and descriptions of
offenses, see Appendix 9.

Incidence rates for the drug use offenses are based on mean categorical responses rather than the mean number of reported offenses. The response categories were: $1=n e v e r, 2=o n c e ~ o r ~ t w i c e, ~ 3=o n c e ~ e v e r y ~ \hat{Z}$ to 3 months, $4=$ once a month, $5=$ once every 2 to 3 weeks, $6=$ once a week, $7=2$ to 3 times a week, $8=0$ nce a day, and $9=2$ to 3 times a day.

Note: See Note, table 3.115. These figures are aggregated from individual State statistics presented in table 3.100. These data include estimated offense totals for agencies submitting less than 12 months of offense reports (Source, p. 3|2). For definitions of offenses and areas, see Appendix 3.
${ }^{\text {a Populations are U.S. Bureau of the Census provisional estimates as of July }}$ b, 1987, and are subject to change.
${ }^{6}$ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-
theft, and motor vehicle theft. Data ore not included for the property crime of arson.
CThe percentage representing area octually reporting will not coincide with the ratio between reported and estimated crime totals, since these dato represent the sum of the calculations for individual States that have varying populations, portions reporting, and crime rates.

Note: See Note, table 3.115. These data include estimated offense totals for agencies submitting less than 12 but more than 2 months of offense reports (Source, f. 312). For definitions of offenses and areas, see Appendix 3.
${ }^{0}$ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
broperty crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
${ }^{\text {c }}$ Includes offenses reported by the Zoological Police.
${ }^{d_{F o r c i b l e ~}}$ rape figures furnished by the State-level Uniform Crime Reporting (UCR) Program administered by the Ilinois Department of State Police were not in accordance with national UCR guidelines. The 1987 forcible rape totals for lllinois were estimated using the national rate of forcible rapes when grouped by like agencies. Therefore, only the State total is shown.
erates were calculated using unrounded population figures.

Note: See Note, table 3.115. These data represent all low enforcement agencies submitting complete reports for at least 6 common months in 1986 and 1987 (Source, p. 313). Forcible rape figures furnished by the Statelevel Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in occordance with national UCR guidelines and were excluded from the forcible rape, violent crime, and Total Crime Index categories. For definitions of offenses, suburban and rural areas, see Appendix 3.
${ }^{\text {G}}$ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
${ }^{\text {b }}$ Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
Includes State police agencies with no county breakdown.
Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are ciso included in other groups.

Total annual
visitation (in thousands)

Criminal homicide
Forcible rape
Robbery
Aggravated assault
Burglary
Larceny-theft
Motor ${ }_{b}$ vehicle theft
Arson
Note: The National Park Service is responsible for the odministration of 335 park areas that are owned by the Federal Government. Three urban park oreas are policed by the U.S. Park Police, whereas other park areas are policed by the U.S. Park Rangers. The offense caiegories listed above ore the Uniform Crime Reports Part 1 offenses; see Appendix 3 for definitions. Note, however, thot these offenses are not counted in the Federal Bureau of Investigation figures. In 1975, the "Human Kindness Day" activities held in Washirigton, DC accounted for approximately 500 robbery incidents in that year.

| 1985 | 59 | 21 | 6 | 8 | 3 | 4 | 100 | 17,545 |
| 1986 | 59 | 20 | 6 | 9 | 2 | 4 | 100 | 19,257 |
| 1987 | 59 | 20 | 6 | 8 | 2 | 4 | 100 | 17,859 |

Note: See Note, table 3.115. In trend tables "constructed" or "adapted" by SOLRCEBOOK staff from Crime in the United States, the data were taken from the first year in which the dota were reported. It should be noted that the number of agencies reporting and the populations represented vary from yeor to yeor.
The Uniform Crime Reporting Program requests that additional information be transmitted to the FBI when a murder has been cormitted. The actual number of offenses presented in the tables displaying characteristics of murders Lnown to the police may differ from figures in other tables that reflect data from only the initial report on the offense.
${ }^{a}$ This category includes beatings and strangulations. Pushed is also included in personol weapons.
${ }^{6}$ This cotegory includes drownings, orson, poison, explosives, narcotics, asphyxiation, etc. cBecause of rounding, percents may not add to total.

Note: These bank crime statistics were compiled by the Federal Bureau of Investigation. Violations of the Federal Bank Robbery and Incidental Crimes Statute include robbery, burglary (entry of bank and/or theft from bank during non-business hours), and larceny (theft not involving direct confrontation between offender and bank personnel or customers) of cormercial banks, savings and loan institutions, and credit unions. Violations of the Hobbs Act involve extortion and kidnaping of bank officials or their families.

Note: These data were compiled from reports of investigations conducted by the Federal Bureau of Investigation, the U.S. Department of the Treasury, the U.S. Postal Service, and the U.S. Capitol Police. The Federal Bureau of Investigation is responsible for the investigation of assaults on personnel of the U.S. Department of the Interior, the U.S. Department of Justice, and the Federal judiciary. Customarily, the U.S. Department of the Treasury, the U.S. Postal Service, and the U.S. Capitol Police investigate assaults against officers assigned to their agencies. All assaults and threats of assault are included in the analysis even though no injury to on officer may have resulted, as are assaults that resulted in the death of an officer
officer.

| Threats to U.S. Deportment of the Treasury facilities | 44 | 33 | 22 | 35 | 22 | 24 | 10 | 9 | 7 | 8 | 6 | 10 |

Note: These figures are from reports to the Bureau of Alcohol, Tobacco and Firearms (ATF) and other low enforcement agencies; these reports may not include all explosives incidents. "Explosives incidents" are any explosives-involved situation impacting on ATF jurisdiction. "Bombings" are a,y incident in which a device constructed with criminal intent and using high explosives, low explosives, or blasting agents explodes. "Attempted bombings" are incidents in which a device designed or purposely contrived to detonate/ignite fails to function. Intent of activity was criminal in nature. This pertains to malfunctioning, recovered, and/or disarmed devices. "Incendiary bombingot" are criminally-motivated bombing incidents in which on incendiary/chemical device that induces
burning is used. "Hoax devices" are inactive or "dummy" devices designed to appear as bombs or explosive materials. (Source, 1987, pp. 3, 4.)

Bombing figures for the years 1976 and 1977 include 30 and 21 criminal accidents, respectively, that were separately enumerated by the Source.

Note: Detailed information concerning each bombing incident reported as occurring in the United States, Puerto Rico, and the Virgin Islands is submitted by FBI field offices to the Uniform Crime Reporting Program. Local and State public safety agencies bring incidents within their jurisdictions to the attention of the field offices. Because not all bombing incidents constitute Federal violations within the FBI's investigative purview, these other law enforce ment agencies greatly facilitate the reporting of occurrences and details of the incidents.
Bombing incidents refer to actual and at-
tempted detonations of explosive or incendiary devices in violation of a State, local, or Federal law. Excluded from the tabulations are threats
to bomb, hoax bomb devices, accidental explosions, recoveries of explosive or incendiary devices, and such misdemeanor offenses as the illegal use of fireworks. (Source, 1987, p. 1.)
aFigures may not add to total because of rounding.
Includes major bombing incidents resulting in an unusually high number of personal injuries and deaths, or substantial damage to property.

Table 3.157
Deaths, injuries, and property damage resulting from criminal bombings and accidental explosions

Reported to the Bureau of Alcohol, Tobacco and Firearms, United States, 1976-87

|  | Deaths | Injuries | Property damage <br> (in millions) |
| :--- | :---: | :---: | :---: |
| 1976 | 73 | 272 | $\$ 12.1$ |
| 1977 | 127 | 374 | 61.3 |
| 1978 | 68 | 707 | 27.5 |
| 1979 | 54 | 328 | 16.0 |
| 1980 | 91 | 483 | 31.2 |
| 1981 | 75 | 262 | 105.6 |
| 1982 | 56 | 221 | 12.3 |
| 1983 | 71 | 400 | 34.3 |
| 1984 | 47 | 288 | 74.9 |
| 1985 | 104 | 477 | 26.5 |
| 1986 | 64 | 373 | 29.3 |
| 1987 | 57 | 384 | 45.6 |

Note: See Note, table 3.152. These data include detonated and incendiary bombings, and criminal and noncriminal explosives incidents. The 1977 property damage figure includes approximately $\$ 50$ million resulting from grain elevator explosions. The dramatic increase in the 1978 injury figure is due to two major incidents: 150 people in New York City were injured in the accidental, noncriminal explosion of an ice crean truck; 250 people in Kentucky and West Virginia were injured by illegal fireworks.

Estimated number of fires, civilian fire deaths, and value of property loss due to incendiary or suspicious structure fires

United States, 1987

|  | Estimated <br> number <br> of fires | Estimated <br> number of <br> civilian <br> fire <br> deaths | Estimated <br> value of <br> property loss <br> in thousands) |
| :--- | :--- | :--- | :--- |
| Total, all fires in structures | 758,000 | 4,880 | $\$ 6,266,000$ |
| Total, incendiary and <br> suspicious fires <br> Incendiary fires | 105,000 | 730 | $1,590,000$ |
| Suspicious fires | 65,000 | 465 | $1,109,000$ |

Note: The data above are weighted estimates from a survey conducted annually of fire departments drawn from the Fire Service Inventory File of the National Fire Protection Association. All U.S. fire departments that protect cormunities of 100,000 or more are included in the sample. For departments that protect less than 100,000 population, the sample is stratified by community size. Survey returns range from 2,600 to 3,100 departments annually. Readers are advised to see the Source for more detailed information on methodology and weighting procedures.
"Incendiary fires" are fires in which "legal decision or physical evidence indicates that the fire was deliberately set." "Suspicious fires" are fires in which "circumstances indicate the possibility that a fire may have been deliberately set." "Suspicious circumstances" include multiple ignitions or a lack of accidental or natural ignition factors. "Civilians" include "anyone other than a fire fighter, and covers public service personnel such os police officers, civil defense staff, non-fire service medical personnel, and utility company employees." (Michoel J. Karter, Jr., 'Fire Loss in the United States During 1985," Fire Journal 80(September 1986), p. 36.)

| Other |  |  |  |  | 10 | 95 |  |

Note: Terrorism is defined as premeditated, are derived mainly from incident reports propolitically motivated violence perpetrated a- vided by host governments or by the internagainst noncombatant torgets by subnational groups or clandestine State agents, usually intended to influence an audience. International terrorism is terrorism involving citizens or territory of more than one country (Source, 1986). New coding criteria for 1983 data have excluded nonterrorist hijackings, threats and hoaxes, arms smuggling, conspir acies, and events where the victim was a suspected terrorist. Terrorist assassinations, both completed and attempted, are categorized according to the method used and are now distinguished from executions and other forms of murder. Since 1984, data do not include political demonstrations; nonpolitical violence; conspiracies never activated; and nonviolent, premeditated, or defensive attacks. The Source notes that tallies of incidents are not necessarily comprehensive and vided by host gover
tional news media.
"Hostage taking and barricade" includes situations in which hostages are taken but there is no attempt to leave the scene. This informotion was provided to SOLRCEBOOK staff by the U.S. Department of State, Office for Combatting Terrorism. Data have been revised from previous presentations by the Source.
$a_{\text {In some }}$ of these incidents, U.S. involvement was unintentional.

| Total | 26,826 | \$256,404 | \$7,945,598 | 1,841 | \$7,685,928.73 |

Note: The Federal Crime Insurance Program was established by Congress in 1970. It is administered by the Federal Emergency Management Agency through its Federal Insurance Administration, which is authorized to offer Federal crime insurance policies in States in which it is concluded that there exists a critical problem in the availability of crime insurance. In 1988, 14 States, the District of Columbia, Puerto Rico, and the Virgin
Islands were participating in the program. Policies, offered both to individuals and businesses, cover losses due to robbery and burglary.
"Annual written premiums" are the payments that would be received if all policies were in effect for the entire year. A "combination" policy
provides different coverage limits for robbery and burglary.

Management Agency, Federal Insurance Administration.

## Characteristics and distribution of persons arrested

Most of the information presented in this section is derived from the Federal Bureau of Investigation's Uniform Crime Reporting Program. Participating law enforcement agencies throughout the country report offenses to the FBI on a monthly basis. The FBI publishes summary statistics on the number and rate of arrests by the race, sex, and age of those arrested, and by population groups and geographical area. The number of offenses "cleared by arrest" is also presented. The number of police agencies and the population living within the jurisdictions of these agencies is also reported.

According to the Uniform Crime Reporting guidelines, an orrest is counted "each time a person is taken into custody, notified, or cited for criminal infractions other than traffic violations." A juvenile is counted as a person arrested if he/she commits an act that would be a criminal offense if committed by an adult. Annual arrest figures do not measure the number of individuals taken into custody because one person may be arrested several times during the year for the same offense or for different offenses. Thus, the number of arrests does not reflect the actual number of people arresied.

An offense is "cleared by arrest" when at least one person is arrested, charged, and turned over to the court for prosecution. The clearance rate for an offense is the ratio of the number of offenses of that type cleared to the number of offenses of that type known to the police.

The number of arrests is only one indicator of police activity. Police are called upon to perform many other functions including investigations and service calls. However, measures of these latter activities on the part of police are not available at the national level.

Data for law enforcement activities under the jurisdiction of other Federal agencies are also presented in this section. These agencies include the Coast Guard, the Customs Service, the Immigration and Naturalization Service, the Secret Service, and the Drug Enforcement Administration.

Table 4.1
Estimated number of arrests
By offense charged, United States, 1987

| Offense charged |  |
| :---: | :---: |
| Total ${ }^{\text {b }}$ | 12,711,600 |
| Murder and nonnegligent manstaughter | 19,200 |
| Forcible rape | 36,310 |
| Robbery | 138,290 |
| Aggravated assault | 352,450 |
| Burglary | 443,400 |
| Larceny-theft | 1,469,200 |
| Motor vehicle theft | 169,300 |
| Arson | 18,000 |
| Violent crime ${ }_{\text {c }}{ }_{\text {d }}$ | 546,300 |
| Property crime ${ }^{\text {d }}$ | 2,099,900 |
| Total Crime Index ${ }^{\text {e }}$ | 2,646,200 |
| Other assaults | 787,200 |
| Forgery and counterfeiting | 93,900 |
| Fraud | 341,900 |
| Embezzlement | 12,700 |
| Stolen property; buying, receiving, possessing | 139,300 |
| Vandalism | 273,500 |
| Weapons; carrying, possessing, etc. | 191,700 |
| Prostitution and commercialized vice | 110,100 |
| Sex offenses (except forcible rape and prostitution) | 100,100 |
| Drug abuse violations | 937,400 |
| Gambling | 25,400 |
| Offenses against family and children | 58,700 |
| Driving under the influence | 1,727,200 |
| Liquor laws | 616,700 |
| Drunkenness | 828,300 |
| Disorderly conduct | 698,700 |
| Vagrancy | 36,100 |
| All other offenses (except traffic) | 2,836,700 |
| Suspicion (not included in total) | 13,500 |
| Curfew and loitering law violations | 89,500 |
| Runaways | 160,400 |

Note: These dato were compiled by the Federal Bureau of Investigation through the Uniform Crime Reporting Program. On a monthly basis, law enforcement agencies report the number of offenses that become known to them in the following crime categories: murder and nonnegligent manslaughter, manslaughter by negligence, forcible rape, robbery, assault, burglary, larceny-theff, motor vehicle theft, and arson. All of these crime cotegories, except manslaughter by negligence, are used to establish a crime index in order to measure the trend and distribution of crime in the United States. The "Total Crime Index" is a simple sum of the index offenses. Arson was designated as a Part I Index offense in October 1978. Unlike the tables from Crime in the United States presented in Section 3, arrest statistics for the crime of arson are complete and appear in the "Total Crime Index" and "Property crime" total.
Arrest statistics are compiled as part of this monthly data collection effort. Participating law enforcement agencies are instructed to count one arrest each time a person is taken into custody, notified, or cited for criminal infractions other than traffic violations. Annual arrest
figures do not measure the number of individuals taken into custody
because one person may be arresfed several times during the year for
the same type of offense or for different offenses. A juvenile is counted as a person arrested when he/she cormits an act that would be a criminal offense if cormitted by an adult. Two offense categories,
"curfew and loitering" and "runaway," are tabulated only for juveniles.
Violations of local juvenile acts other than runoway and curfew and
loitering law violations are included in the "all other" classification (U.S.
Department of Justice, Federal Eureau of Investigation, Uniform Crime
Reporting Handbook (Washington, DC: USGPO, 1984), p. 60 ).
Data in this table are estimates based on arrest statistics for all law enforcement agencies in the Uniform Crime Reporting Program, including those submitting reports for less than 12 months in 1987 (Source, p. 313).

For definitions of offenses, see Appendix 3.
${ }^{0}$ Arrest totals based on all reporting agencies and estimates for unreported areas.
Because of rounding, items may not add to totals.
CViolent crimes are offenses of murder, forcible rope, rabbery, and gggravated assault.
Groperty crimes are offenses of burglary, larceny-theft, motor vehicle
theft, and arson.
encludes orson.

See notes at end of table.

Table 4.4
Arrests
By offense, age group, and State, 1987-..Continued

Note: See Note, table 4.1. This table presents data from all law enforcement agencies submitting complete reports for 12 months in 1987 (Source, p. 312). Complete arrest data were not available for Kentucky and Montana. Direct comparisons of arrest totals listed in this table should not be made with prior years. For definitions of offenses, see Appendix 3.

ODoes not include traffic arrests.
${ }^{\text {b }}$ ncludes arson.

CViolent crimes are offenses of murder, forcible rape, robbery, and gggravated assault.
Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

Note: See Notes, tables 4.1 and 4.6. Estimates by the U.S.
Bureau of the Census indicate that on July 1, 1987, whites comprised 84.6 percent, blacks 12.2 percent, and other racial categories 3.2 percent of the total U.S. resident population (U.S. Department of Cormerce, Bureau of the Census, United States Population Estimates by Age, Sex, and Race: 1980 to 1987, Population Estimates and Projections, Series P-25, No. 1022 (Washington, DC: USGPO, 1988), p. 22). For definitions of offenses, see Appendix 3.
${ }^{\text {a }}$ Because of rounding, percents may not add to total.
${ }^{\text {b }}$ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
${ }^{\text {CProperty }}$ crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.
Includes arson.

Note: See Note, table 4.1. This table presents data from all city law enforcement agencies submitting complete reports for 12 months in 1987 (Source, p. 314). Population figures are July 1, 1987 population estimates. For definitions of offenses and city areas, see Appendix 3.
${ }^{0}$ Because of rounding, percents may not add to total.
$\mathrm{b}_{\text {Less }}$ than one-tenth of I percent.
CViolent crimes are offenses of murder, forcible rape,
robbery, and aggravated assault.
CProperty crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.
eIncludes arson.

Note: See Note, table 4.1. "An offense is 'cleared by arrest' or solved for crime reporting purposes when at least one person is: (1) arrested; (2) charged with the commission of the offense; and (3) turned over to the court for prosecution. The prosecuition can follow arrest, court summons, or police notice." An offense is also counted as cleared by arrest if any of the following "exceptional" conditions pertain: (1) suicide of the offender; (2) double murder; (3) deathbed confession; (4) offender killed by police or eitizen; (5) confession by offender already in custody or serving a sentence; (6) an offender prosecuted in another jurisdiction for a different offense and that jurisdiction does not release offender to first jurisdiction; (7) extradition denied; (8) victim refuses to cooperate in prosecution; (9) warrant is outstanding for felon but before arrest the offender dies of natural causes or as a result of an accident, or is killed in the cormission of another offense; or, (10) handling of a juvenile offender either orally or by written notice to parents in instances involying minor offenses where no referral to juvenile court is made as a matter of publicly accepted police policy. (U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reporting Handbook (Washington, DC: USGPO, 1984), pp. 4T, 42.) It should be noted that the arrest of one person can clear several crimes or several persons may be arrested to clear one crime. Arson was designated an Index property crime in October 1978. Due to the incompleteriess of arson reporting by police for offenses known, arson data
are not included in this table. Forcible rape figures furnished by the Statelevel Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, and Total Crime Index categories. This table presents data from all law enforcement agencies submitting complete reports for at least 6 months in 1987 (Source, p. 313). Population figures are July 1, 1987 population es timates. For definitions of offenses, city and suburbon areas, and rural counties, see Appendix 3.

Includes offenses cleared by exceptional means.
biolent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
${ }^{\text {c Property }}$ crimes are offenses of burglary, |arceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties ore also included in other groups.

Note: These data were compiled from the Federal Bureau of Investigation's Uniform Crime Reporting Program. The data presented in this table differ from those presented in the U.S. Department of Justice, Federal Bureau of Investigation, Crime in the United States, 1986 (Washington, DC: USGPO, 1987). This is because this table includes data processed by the Federal Bureau of Investigation ofter the cut off date for that publication. "In one respect, these data may be considered conservative estimates of alcoholrelated arrests. Arrests are classified by a single offense, using a hierarchical rule. Consequently, crimes committed while intoxicated are aategorized under the primary offense. On the other hand, 'driving under the influence' includes arrests for impairment due to any type of drug; it is not limited to impairment due to alcohol." (Source.)

Source: Table adapted by SORCEBOCK staff from table provided by the U.S. Department of Health and Human Services, National Institute on Alcohol Abuse and Alcoholism.

Note: These data are from the Bureau of Justice Statistics' level. There were 21,188 drug suspects arested by the Drug Federal Justice Statistics data base maintained by Abt Associates, Inc. Sources of information include the Executive Office for U.S. Attorneys, the Administrative Office of the U.S. Courts, and the U.S. Parole Cormission.

The data in this table describe 31,660 defendants inter-
viewed by the Pretrial Services Agency in calendar year
1986. Twenty-six percent of the interviews did not record race or ethnicity; 30 percent did not record educational
level. There were 21,188 drug suspects arested by the Drug
Enforcement Administration and the Federal Bureau of Investigation in the 12 months preceding Sept. 30, 1986.
For methodology, see Appendix 10.

Note: These data were collected by the Drug Enfor cement Administration (DEA) in conjunction with the Domestic Cannabis Eradication/Suppression Program. This program is a joint Federal and State effort in which DEA contributes funding, training, equipment, investigative and aircraft resources to the participating States in the effort to eradicate domestically-cultivated marihuana. New Jersey, Nevada, Morth Dakota, and South Dakota did not participate in the Domestic Cannobis Eradication/Suppression Progran in 1988.
Dato for sightings were compiled from individual State reports and information provided by the U.S. Forest Service and the Bureau of

Land Management. "Plots" ore defined by the presence of marihuana plants and vary in size. "Plots eradicated" refer to those plots in which the marihuana plants were destroyed
${ }^{\text {a }}$ State did not participate in the program in 1987, but reported these figures to the DEA.

Note: The dota presented for years prior to and including 1976 coincide with the former Federal fiscal year, the period July 1 to June 30 . The transition quarter refers to the period July 1, 1976 to Sept. 30, 1976. The fiscal year for the Federal Government is now from Oct. I to Sept. 30. "Aliens deported" refers to those aliens required to leave the country under formal orders of deportation. "Public charge" refers to persons deported for vagrancy and similar reasons. "Other" includes persons who,
at the time of their entry, were excludable as: polygamists, draft evaders, illiterates over 16 years of age, children under 16 years of age unaccompanied by parent(s), and smugglers.

## Judicial processing of defendants

Information on the judicial processing of defendants in the United States is presented in this section. Most of the data comes from the Federal courts, since uniform data that would allow for comparison of the activities of various State and local courts is not available on the national level.

Data on the activity of Federal prosecutors are presented here and include cases argued and pending in the U.S. Attorneys office and requests for immunity by Federal prosecutors. Information on court authorized interceptions of private wire, oral, or electronic communications and the arrests and convictions resulting from such orders is provided.

A wide variety of information on case processing in the U.S. District Courts is available. Data are presented on the number of cases filed, terminated and pending, the length of time to disposition, and the number of defendants detained and disposed of by U.S. District Courts. This includes a comparison of the dispositions and sentences of Federal drug law and nondrug law offenders.

The number and type of appeals filed in U.S. appellate courts are presented. Various activities of the U.S. Supreme Court including review of writs of certiorari and cases disposed of are presented. Information on executive clemency, commutations, and pardons is also included.

Data on the disposition of cases involving criminal tax fraud, violations of antitrust laws, and immigration and nationality lawis are presented. Arrests, prosecu.;ns, and convictions handled by the U.S. Postal Inspection Service, the U.S. Secret Service, and the Immigration and Naturalization Service are also provided in this section.

In addition, information on abuses of public office and judicial misconduct complaints is included. Also, the military court martial activities of the Air Force, Army, and Coast Guard are provided.

Table 5.1
Requests for immunity by Federal prosecutors to the U.S. Attorney General and witnesses involved in these requests
By origin of request, fiscol years 1973-88

| Fiscal year | Requests |  |  | Witnesses |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total number | Percent |  | Total number | Percent |  |
|  |  | Criminal Division | Other |  | Criminal Division | Other |
| 1973 | 1,160 | 66\% | 34\% | 2,715 | 5\% | 41\% |
| 1974 | 1,410 | 80 | 20 | 3,655 | 56 | 44 |
| 1975 | 1,632 | 77 | 23 | 3,733 | 58 | 42 |
| 1976 | 1,789 | 76 | 24 | 3,923 | 60 | 40 |
| 1977 | 1,798 | 70 | 30 | 4,413 | 44 | 56 |
| 1978 | 1,445 | 66 | 34 | 2,997 | 47 | 53 |
| 1979 | 1,596 | 73 | 27 | 3,204 | 57 | 43 |
| 1980 | 1,653 | 73 | 27 | 3,530 | 54 | 46 |
| 1981 | 1,686 | 74 | 26 | 3,271 | 62 | 38 |
| 1982 | 1,836 | 75 | 25 | 3,810 | 58 | 42 |
| 1983 | 1,986 | 72 | 28 | 4,226 | 53 | 47 |
| 1984 | 2,378 | 77 | 23 | 4,784 | 59 | 41 |
| 1985 | 2,451 | 77 | 23 | 5,146 | 65 | 35 |
| 1986 | 2,550 | 76 | 24 | 5,013 | 65 | 35 |
| 1987 | 2,359 | 79 | 21 | 4,603 | 71 | 29 |
| 1988 | 2,357 | 77 | 23 | 4,699 | 68 | 32 |

Note: These date reflect requests received from Federal prosecutors under 18 U.S.C. 6001-6005, the statute that now governs the gronting of use inmunity. 18 U.S.C. 6003 requires all Federal prosecuting attorneys to receive authorization from the U.S. Attorney General (or representative) before seeking a court order for witness immunity. It should be noted that in some cases in which the authorization is obtained, the prosecutor may decide not to seek the immunity order from the courts. Therefore, the number of witnesses actually gronted immunity is probably lower than the data in the table indicate. It should also be noted that data for 1973 and 1974 include a total of 11 requests and 27 witnesses, and 7 requests and 11 witnesses, respectively, falling under an older statute, 18 U.S.C. 2514, which has since been repealed. "Criminal Division" refers specifically to the Criminal Division of the U.S. Department of Justice and includes the U.S. Attorneys. "Other" refers to the remaining divisions of the U.S. Department of Justice (e.g., Antitrust, Tax, Civil Division, Civil Rights, and Lands and Natural Resources), as well as to the other Federal agencies (e.g., Interstate Commerce Commission, Federal Trade Cormission, Securities and Exchange Cormission, and Department of the Army) and to the Congress, all of whith may request immunity of witnesses.

| 1984 | 504 | 243 |
| 1985 | 437 | 236 |
| 1986 | 1987 |  |

Note: The Director of the Administrative Office of the United States Courts is required, in accordance with provisions of 18 U.S.C. $2519(1)$, to transmit to Congress a report regarding applications for orders authorizing or approving the interception of wire, oral, or electronic cormunications. This report is required to contain information about the number of such orders and any extensions granted. Every State and Federal judge is required to flie a written report on each application mode. This report is required to contain information on the grants and denials, name of applicant, offense involved, and duration of authorized intercept. Prosecuting officials who have applied for intercept orders are required to file reports containing information on the cost of the intercepts and the results of the intercepts in terms of arrests, trials, convictions, and the number of motions to suppress the use of the intercepts (Source 1987, p. 1). A total of 33 jurisdictions had statutes authorizing the interception of wire, oral, or electronic communications during 1987. Eleven of these jurisdictions did not have any court-authorized orders for interception during 1987.
${ }^{\text {For }} 1968$, the reporting period was from June to December.

Note: The U.S. Attorney is the highest ranking law enforcement representative in each of the Federal judicial districts. The Attorney and staff members ossist the U.S. Attorney General in the enforcement of Federal criminal laws, the investigation and prosecution of corrupt public officials and organized crime figures, and the initiation of environmental litigation. In addition, the U.S. Attorney is responsible for the enforcement of laws pertaining to Federol prograns. These include violations involving Medicaid and Medicare, U.S. Government contracts, the use of labor union funds, educational benefits for war veterans, and the food stamp progran. In the civil law area, U.S. Attorneys are involved in tort claim and civil fraud cases, actions filed against the U.S. Government, Freedom of Information Act cases, and other civil matters. U.S. Attorneys are responsible for collecting criminal fines, civil judgnents, prejudgnent claims, forfeitures, penalties, and other monies owed to the Federal Government.

| Percent change 1987 over 1986 | 9.7\% | 3.1\% | 6.9\% | 7.5\% | 4.1\% |

Note: There are two reporting changes during fiscal year 1976 that have affected the data base. Beginning Oct. 1, 1975, all minor offenses (offenses involving penalties that do not exceed 1 year imprisonment or a fine of more than $\$ 1,000$, with the exception of most petty offenses (offenses involving penolties that do not exceed 6 months incarceration and/or a fine of not more than $\$ 500$ ), are included. Minor offenses are generally disposed of by the magistrates and, in past years, most of these minor offenses would not hove been counted in the workload of the district courts. Second, when the Federal Government's motion to dismiss an original indictment or information is granted, the superseding indictment or information daes not become a new case as in the years prior to 1976, but remains the same case. (An indictment is the charging document of the grand jury, and an information is the charging document of the U.S. Attorney.)
"Received by transfer" includes defendants transferred by Rule 20 , Federal Rules of Criminal Procedure, which provides that defendants who (I) are arrested or held in a district other than that in which an indictment or information is pending against them or in which the warrant for their arrest was issued and (2) state in writing that they wish to plead guilty or molo contendere, may consent to disposition of the case in the district in which they are orrested or are held, subject to the approval of the U.S. Attorney for both districts.
${ }^{\text {a }}$ Does not include 362 cases that were reopened during the reporting period.

Note: These data are from a national reporting system that trucks pretrial services in all Federal Courts and is maintained by the Pretrial Services Agency (PSA) in the Administrative Office of the U.S. Courts. This data system collects records on individuals charged with Federal crimes. A sample of all cases initiated from August 1 through December 31 in either 1983 or 1985 was used to examine pretrial release and detention before and after the Bail Reform Act of 1984. This Act provided for decisions on bail and release which consider the protection and safety of individuals and the community in addition to ensuring the defendant's appearance at trial. The Act authorizes pretrial detention for defendants charged with crimes of violence, offenses with possible life (or death) penalties, mojor drug of fenses, and felonies where the defendant has a specified serious criminal record. (Source, p. 2.) Readers should consult the Source for more informotion regarding the Bail Reform Act of 1984 and possible sources of reporting bios in the PSA database.
"Field until trial" includes all defendants held for the entire period until trial, either for failure to meet bail or on pretrial detention. "Pretrial detention" includes only defendants held without the option of release on bail. The 1983 sample includes 7,623 defendants and the 1985 sample includes 9,551 defendants. Only cases reaching a final disposition within 12 months after initiation were included.
${ }^{\square}$ Includes defendonts released on their own recognizance or unsecured bond and defendants released after meeting financial or other bail conditions.

Note: These data are from the Bureau of Justice Statistics' Federal Justice
Statistics data base maintained by Abt Associates, Inc. Sources of informa-
tion include the Executive Office for U.S. Attorneys, the Administrative
Office of the U.S. Courts, and the U.S. Parole Commission.
These data describe 31,660 defendants interviewed by the Pretrial
Services Agency during 1986.
For methodology, see Appendix 10.
${ }^{a}$ Percents may not add to 100 because of rounding.
Includes only defendants who were released at their initial hearing.
${ }^{\text {c }}$ Includes defendants never detained prior to trial or detained less than 2
gays.
Includes only defendants detained 2 or more days prior to trial.

Note: These data are computed only for the respective time intervals actually begun and terminated during the year ending June 30, 1987. The Speedy Trial Act of 1974 (U.S.C. 3152-3156 and 3161-3174) required each U.S. District Court to adopt a plan for the prompt disposition of criminal coses in accordance with statutory time limits. The time interval from arrest to indictment or information is 30 days ( 18 U.S.C. 3161 (b)). Defendants entering a pled of not guilty must be brought to trial not more than 70 days after a filing of an inforination or indictment, or after an appearance before a judicial officer of the court in which the charge is pending, whichever comes last (18 U.S.C. 316|(c)(1)). The trial may not cormmence sooner than 30 days from the date the defendant first appears unless written waiver is given
( 18 U.S.C. $3161(\mathrm{c})(2)$ ). See Note, table 5.7 for definitions of indictment and information.
The Speedy Trial Act does not establish time limits governing the period between conviction and sentencing, but does require that statistics be furnished regarding the time span of this interval. The Committee on Administration of the Criminal Law of the Judicial Conference has recommended a 45 -day time limit for the interval from conviction to sentencing.

Note: See Note, table 5.9. The District of Columbia is excluded from these data through 1973. The territoricl courts of the Virgin Islands, Canal Zone, and Guam are exciuded through 1976. Data provided for the year ending June 30, 1977 have been revised by the Source.

Beginning in 1977, the periods reported for lengths of sentences of imprisoment are 1 through 12 months, 13 through 35 months, 36 through 59 months, and 60 months and over.
${ }^{a}$ Includes sentences of more than 6 months that are to be followed by a term of probation (mixed sentences).
 the Narcotic Addict Rehabilitation Act.
${ }^{c}$ A split sentence is a sentence on a one-count indictment of 6 months or less in a jail-type institution followed by a term of probation, 18 U.S.C. 3651 approved Aug. 23, 1958 ( 72 Stat. 834). Included are mixed sentences involving confinement for 6 months or less on one count to be followed by a term of probation on one or more counts. For years 1959 through 1762, split sentences are included in prison terms less than 1 year and 1 day. S18 U.S.C. 4205B(1) and (2).
$e_{18}$ U.S.C. $5010(b)$ and (c).
fincluded with sentences of probation.
ONot computed where the number of defendents is less than 25. Split sentences, indeterminate sentences, Youth Corrections Act and youthful offender sentences are not included in computing the average sentence. IIncludes Federal Juvenile Delinquency Act sentences.
includes deportation, suspended sentences, imprisonment for 4 days or less or for time olready served, remitted and suspended fines, and life sentences.

${ }^{\text {a }}$ includes sentences of more than 6 months that are to be followed by a term of probation (mixed sentences).
Excludes split sentences, indeterminate sentences, Youth Corrections Act/youthful offender sentences, and life sentences included in "other" category.
${ }^{C}$ A split sentence is a sentence on a one-count indictment of 6 months or less in a jail-type institution followed by a term of probation, 18 U.S.C. 3651. Included in these figures are mixed sentences involving confinement for 6 months or less on one count, to be followed by a term of probation on one or more counts.

Title 18 U.S.C. 4205b(1) and (2).
Title 18 U.S.C. 5010 (b) and (c).
fincludes deportation, suspended sentences, imprisonment for 4 days or less or for time already served, remitted and suspended fines, and life sentences.

Estimated number of felony convictions in State courts
By most serious conviction offense, United Stotes, 1986

| Most serious conviction offense | Felony convictions |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | United States |  | 75 largest counties |  |
|  | Number | Percent | Number | Percent |
| Total | 582,764 | 100\% | 245,204 | 100\% |
| Murder ${ }^{\text {a }}$ | 9,854 | 1.7 | 4,635 | 1.9 |
| Rape | 19,685 | 3.4 | 7,014 | 2.9 |
| Robbery | 42,305 | 7.3 | 23,660 | 9.6 |
| Aggrovated assault | 38,245 | 6.6 | 15,146 | 6.2 |
| Burglary | 102,683 | 17.6 | 37,623 | 15.3 |
| Larceny ${ }^{\text {b }}$ | 91,092 | 15.6 | 38,210 | 15.6 |
| Drug trafficking | 76,437 | 13.1 | 40,116 | 16.4 |
| Other felonies | 202,463 | 34.7 | 78,800 | 32.1 |

Note: These dato are based on results of the first survey of State felony courts from the National Judicial Reporting Program (NUFP) conducted by the Bureau of Justice Statistics. For this initiol phase, NUPP recorded information on 1986 felany sentences using a nationally-representative sample of State felony courts. Only offenses that State penal codes define as felonies are included. Excluded are Federal courts, and State or local courts that did not try felony cases. The sample includes 54 counties representative of the Nation's 75 largest. The 75 largest counties in the United States comprise about 37 percent of the U.S. population but account for about half of the Nation's crime (Source, pp. 2, 3). Estimates for the United States are based on 100 counties, including all 54 counties representing the Nation's 75 largest, and 46 additional counties randomly sampled after stratifying by number of 1985 felony convictions. "Because of the size and nature of the sample, the data reported here on the 75 largest counties are likely to be a more accurate estimate of the true total than the data on the Notion as a wholeit (Source, p. 2). Any person convicted of multiple offenses that included any of the UCR Index Crimes received the offense designation of the most serious Index Crime. Persons received the offense designation for drug trafficking only if they were not also convicted of one of the Index Crimes.
For definitions of terms and survey sampling procedures, see Appendix 11.
${ }^{\text {a }}$ includes nonnegligent manslaughter.
bincludes motor vehicle theft.

Felony sentences imposed by State courts
By most serious conviction offense, United Stotes, 1986

| Most serious conviction offense | United States |  |  |  |  |  |  | 75 largest counties |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | Incarceration |  |  | Nonincarceration |  |  | Total |  | arcerati |  | Non | incarcera |  |
|  |  | Total | Prison | Jail | Total | Probation | Other |  | Total | Prison | Jail | Total | Probation | Other |
| Total | 100\% | 67\% | 46\% | 21\% | 33\% | 31\% | 2\% | 100\% | 71\% | 41\% | 30\% | 2\% | 27\% | 2\% |
| Murder ${ }^{\text {a }}$ | 100 | 95 | 92 | 3 | 5 | 4 | 1 | 100 | 95 | 91 | 4 | 5 | 4 | , |
| Rape | 100 | 88 | 75 | 13 | 12 | 10 | 2 | 100 | 86 | 68 | 18 | 14 | 13 | 1 |
| Robbery | 100 | 87 | 76 | 11 | 13 | 12 | 1 | 100 | 87 | 71 | 16 | 13 | 12 | 1 |
| Aggravated assault | 100 | 71 | 45 | 26 | 29 | 26 | 3 | 100 | 74 | 43 | 31 | 26 | 23 | 3 |
| Burglary | 100 | 74 | 53 | 21 | 26 | 24 | 2 | 100 | 75 | 50 | 25 | 25 | 23 | 2 |
| Larceny ${ }^{\text {b }}$ | 100 | 64 | 40 | 24 | 36 | 34 | 2 | 100 | 65 | 36 | 29 | 35 | 33 | 2 |
| Drug trafficking | 100 | 64 | 37 | 27 | 36 | 35 | 1 | 100 | 75 | 35 | 40 | 25 | 23 | 2 |
| Other felonies | 100 | 58 | 36 | 22 | 42 | 39 | 3 | 100 | 60 | 27 | 33 | 40 | 36 | 4 |

Note: See Note, table 5.30. For persons receiving a combination of sentences, the sentence designation came from the most serious penalty imposed--prison being the most serious, followed by jail, then probation. Sentence designation "other" includes unknown sentences--3,039 weighted cases for the Nation and 465 for the 75 largest counties.
For definitions of terms and survey sampling procedures, see Appendix 11.
${ }_{b}^{a}$ includes nonnegligent manslaughter.
bincludes motor vehicle theft.

Note: See Note, table 5.12. "Private cases" brought in U.S. District Courts include suits wherein litigation is between States and/or private citizens. Prisoner petitions included in this category are those filed by State prisoners naming a State or its representative(s) as the defendant(s). "Diversity of citizenship" refers to lawsuits between residents of different States.
${ }^{a}$ Data revised from previous report.
${ }^{6}$ Total includes reopened, remanded, and reinstated appeals as well as original appeals.

Note: See Note, table 5.35. "Writ of certiorarit is on order by the appellate court that is used when the court has discretion on whether or not to hear an appeal. If the appellate court grants the writ, it has the effect of ordering the lower court to certify the record and send it up to the higher court which will then hear the appeal. 'U.S. civil" filings involve suits against the Federal government brought in U.S. District Courts. "Private civil" filings involve suits wherein litigation is between States and/or private citizens. Administrative appeals include op-
plications for enforcement or petitions for review of orders of an administrative board or agency. For a list of U.S. District Courts in each circuit, see table 5.11.

| 1987 | 410 | 23 | 0 | 311 | 821 |

Note: Article 11, Section 2 of the U.S. Constitution outhorizes the President to grant executive clemency for Federal offenses. The U.S. Pardon Attorney, in consultation with the Associate Attorney General, receives and reviews all petitions for executive clemency, initiates the necessary investigations, and prepares the recommendation of the Associate Attorney General to the President (Source, p. 35). Clemency may be a reprieve, remission of fine, cormutation, or pardon. A "pardon," which is generally considered only after sentence completion, restores basic civil rights and may aid in the reinstatement of professional or trade licenses that may have been lost as a result of the conviction. A "cormutation" is a reduction of sentence. Petitions denied also include those that are closed administratively. The figures presented in this table do not include clemency actions on draft resisters, or military deserters and absentees during the Vietnam era.

Source: U.S. Department of Justice, Office of the Attorney General, The Annual Report of the Attorney General of the United States 1979 p. 3 ; 1980, p. 35 (Washington, DC: USGPO); and data provided to SORCEBOOK staff by the U.S. Department of Justice, Office of the Pardon Attorney. Table adapted by SORCEBOOK staff.

Commutations and pardons granted

| By jurisdiction, 1987 |  |  |  |
| :---: | :---: | :---: | :---: |

| Virginia | 0 | 3 | Governor |
| Washington | 0 | 0 | Governor |
| West Virginia | (a) | 32 | Governor |
| Wisconsin | 16 | (a) | 32 |

Note: This information was collected through a survey mailed to the 50 States, the District of Columbia, and the U.S. Department of Justice. Arkansas and Colorado did not respond to the survey. Because policies and procedures regarding commutations and pardons vary widely across jurisdictions, the reader is encouraged to consult the Source or the State authorities responsible for pardons/commutations for further explanation of the data presented.
A "commutation" changes a sentence or punishment to one that is less severe. A "pardon" forgives and releases a person from further punishment.
The Source presents the information as submitted by the responding agencies. No attempt is made by the Source to verify the information received.

Wot reported.
bestoration of civil rights and firearm authority constitute a large number of cases, often separate from pardon.
Includes 25 lifers and 7 others commuted to parole eligibility with no reduction in sentence.
Includes pardons and/or restoration of rights. Does not include cutomatic first offender pardans or first offender pardons not processed by pardon board.
${ }^{\text {e All cormutaitions granted in recent years have been to relieve }}$ overcrowding, except for those granted to persons already released on parole.
tone conditioned pardon was granted to an inmate and 10 pardons to community cases (discharged from prison or supervision; in community for 5 years with no criminal involvement).
TRequest opinions of district attorney, law enforcement, and judges pefore any action is taken.
In order to reduce prison crowding, Oklahoma granted $815 \mathrm{com}-$ mutations to prisoners nearing the end of their terms. Life sentences are rarely commuted and there have been no commutations from death sentences since the mid-1960's.
Fiscal year 1987.
Jitah has a totally indeterminate sentencing system that gives the pardon board very broad latitude to make release decisions without the necessity of granting commutations or pardons.
${ }^{k}$ Fiscal year 1985.

Note: The Criminal Investigation Division of the Internal Revenue Service is responsible for enforcing the criminal provisions of the tax laws, investigating evidence of tax evasion or tax fraud, identifying and investigating persons who derive substantial income from illegal activities and who violate tox laws, money loundering violations under the Bank Secrecy Act (Title 31) and recormmending prosecution (Source, 1978, p. 30).
The Criminal Tax Division of the Office of Chief Counsel handles criminal tax legal motters for the Internal Revenue Service, reviews criminal cases and decides if coses warront prosecution, coordinates criminal tax prosecutions with the U.S. Department of Justice, and provides assistance to U.S. Attorneys in criminal tax triois upon request (Source, 1978, p. 53).

Some cases referred by the Criminal Investigation Division may not go through the Office of Chief Counsel. For example, recommendations to prosecute money laundering violations are referred directly to U.S. Attorneys.

Note: Questionnaires are sent annually to the U.S. Attorneys' offices in each of the Federal judicial districts eliciting data concerning indictments and convictions during the year as well as prosecutions awaiting trial on Dec. 31 of each year. These data cover persons elected or appointed to office and career (staff) government employees; "others involved" include individuals who hold no official position, but who participated in on offense aimed at corrupting another's public office. "Abuse of public office" includes offenses such as extortion, bribery, and conflict of interest.
aThe 1983 figures were reviewed to ottempt to identify the reason for the substantial jump in prosecutions of Federal officials. The explanation appears to be two-fold; there clearly has been a greater focus on Federal corruption nationwide, but there also appears to have been more con-
sistent reporting of lower-level employees who abused their office, cases that may have been overlooked in the past. For reference, the U.S. Attorneys' offices were told: "For purposes of this questionnaire, a public corruption case includes any case involvirg abuse of office by a public employee. We are not excluding low-level employees or minor crimes, but rather focusing on the job-relatedness of the offense and whether the offense involves abuse of the public trust placed in the smployee."

Judicial misconduct inquiries, complaints, and dispositions
By type of disposition and State, $1986^{\circ}$

Note: The Center for Judicial Conduct Organizations conducts annual suryeys of judicial conduct commissions. These commissions are typically State agencies created by statute or constitutional amendment with the mandate to receive, investigate, and dispose of complaints regarding judicial misconduct. The judicial conduct commissions handle complaints such os judicial prejudice or bias, slow processing of orders, procedural or administrative irregularity, courtroan demeanor, and conflict of interest.
(The Center for Judicial Conduct Organizations, Judicial Conduct Reporter 3(Fall 1981), p. 2.) A confidentiality provision prohibits revealing disposition of complaints in Virginia. Information was not available for Alaska, Arkansas, lowa, Montana, Ohio, Oklahoma, South Dakota, Vermont, and Wyoming. The data presented are for 1986; however reporting periods vary across jurisdictions, with some States reporting by calendar year and others by fiscal year. Cross jurisdiction comparisons should be done cautiously due to differences among the States in definitions of complaints and recording practices (The Center for Judicial Conduct Organizations, Judicial Conduct Reporter 7(Fall 1985) p. 1).
${ }^{0}$ Most States reported complaints received for the calendar year 1986. The following jurisdictions reported on a fiscal year basis: Alabama, District of Columbia, ( $10 / 1 / 86$ through $9 / 30 / 87$ ); California, Georgia,
Hawaii, Kentucky, Maryland, Missouri, North Carolina, Utah, (7/1/86,
through 6/30/87); Nebraska, New Jersey, Texas (9/1/86 through 8/31/87).
${ }^{5}$ The complaint figures only represent the number of complaints received against judges within the Cormission's jurisdiction. Complaints against attorneys, Federal judges, etc., are not included in the statistics.
${ }^{\text {chany }}$ discrepancies in totals ore usually due to multiple or consolidated complaints ond/or dispositions.
Number of files "opened" and considered "active" until disposed of in reporting yeor.
${ }^{\text {eneceived cgainst }} 46$ judges.
Includes 18 communications that did not result in filing of formal complaints.
Gone case was reopened from 1985.
Includes five complaints pending in the Maine Supreme Judicial Court at the end of 1985 and disposed of as one case by that court in 1986.
${ }^{1}$ An additional 13 cases were pending review by the board but received ofter the last meeting.
Two of these cases were formal complaints pending before the Supreme Court, not the Commission.
Hot within Cormission jurisdiction, insufficient information, unfounded, frivolous, etc. in some instances, investigation occurred before dismissal of the complaint.
Ten complaints were dismissed after initial/minimal investigation and 15 were dismissed after substantial investigation.
${ }^{m}$ Thirty-one cases involved judges.
${ }^{n}$ Includes cases where letters of concern, caution, or admonition were issued.
${ }^{\circ}$ One judge resigned while investigation was pending after pleading yuilty to felonies.
POf the 14 cases of those who resigned while investigation was pending and the 2 coses where resignation occurred after investigation, 8 were

## judges.

${ }^{4}$ Medical disability retirement.
${ }^{\circ}$ Fourteen were judges.
SInclude letters of concern, caution, or admonition, and are part of the total under informal action taken.
${ }^{+}$Nine involved judges.
UConfidentiality was woived.
${ }^{V}$ Retired by the Colorado Supreme Court for a medical disability.
${ }^{W}$ Eight people were removed from office but only seven were judges.

${ }^{x_{\text {Recormmended }} \text { removal to Tennessee Supreme Court requires oction by the }}$ legislature.
Y Judge died.
ZNotice of Formal Proceedings Rehearing Conference Set.
${ }^{a}$ Informally resolved.
abudge corrected the problem.
${ }^{\text {ac }}$ Commission recormendation pending before the Supreme Court.
${ }^{\text {ad }}$ Seven cases were closed without further proceedings. One case was closed due to insufficlent cause to proceed and one case determined that no misconduct existed.
${ }^{\circ}$ One judge not re-elected while investigation was pending. One case was referred to supervisory judge for counsel and one case involved a recommendation for personal psychological counseling. Two judges were ordered to relinquish interest in conflicting income-producing businesses ofter formal hearings held.
Wineteen sets of formal charges are pending hearings. Two cases resulted in disciplinary recommendations (one removal, one public admonistment) filed in Supreme Court. Three cases were referred to President Judges. agrequirement of additional continuing education course imposed.
ah The Judicial Investigation Cormission found probable cause and filed complaints in four matters with the Judicial Hearing Board. These complaints were still pending final disposition at the end of 1986, elther before the Judicial Hearing Board or the Supreme Court.
atProbable cause was found and the formal complaints were filed in the Supreme court.

Note: In the military justice system, a General Court-Martial consists of a military judge and not less than five members (jurors), although a trial may be heard by a millitary judge alone, if requested by the accused ( 10 U.S.C. 815). A Special Court-Martial consists of not less than three members, or a military judge and not less than three members, or trial by military judge alone, if requested by the accused ( 10 U.S.C. 815). The jurisdiction of the Specia! Court-Martial is limited to non-capital offenses. In addition, a Special Court-Martial cannot adjudge a dishonorable discharge, dismissal, confinement longer than 6 months, hard labor without confinement for longer than 3 months, forfeiture of more than two-thirds pay, or any forfeiture of pay for longer than 6 months. If a bad conduct discharge (BCD) is adjudqed, the Special Court-Martial must have included a verbatim record of the proceeding, counsel for the accused, and a military judge ( 10 U.S.C. 819). This is referred to as a Special (BCD) Court-Martial.

These data reflect the combined activity of both General and Special (BCD) Courts-Martial. The data presented for years prior to and including 1976 coincide with former Federal fiscal yeurs. The transition quarter refers to the period July I, 1976 to Sept. 30, 1976. The fiscal year for the Federal Government is now from Oct. I to Sept. 30.
${ }^{1}$ Includes one cadet.
${ }^{\text {b }}$ Includes one civilian.
${ }^{\text {I }}$ Includes two prisoners.

Note: See Note, table 5.54. A Summary Court-Martial is a military trial by one cormissioned officer who need not be a lawyer. Punishment may not exceed 30 days in confinement, and may include reduction and forfeitures of not more than two-thirds of I month's pay. No counsel is furnished for prosecution or defense. Accused personnel have the option to refuse trial by Summary Court-Martial, but refusal may result in the charges being referred to a higher level court-martial. The data presented for years prior to and including 1976 coincide with former Federal fiscal years July I to June 30. The transition quarter refers to the period July 1, 1976 to Sept. 30, 1976. The fiscal year for the Federal Government is now from Oct. I to Sept. 30.

## Section 6

## Persons under correctional supervision

This section presents information on each component of the correctional system, including persons supervised on community probation, juveniles under custody, jail and prison populations, and persons sentenced to death and executed.

Dara describing those under probation supervision are from a survey conducted by the U.S. Bureau of the Census for the Bureau of Justice Statistics. Included are the number of probationers, those received from court, and those released from probation supervision for the 50 States and the Federal Probation System.

The section on institutional correc. tions includes information on juvenile facilities, local jails, and State and Federal prisons. Number of juveniles confined in public, private, and State-operated institutions is presented as well as data on length of confinement and cost per resident. Characteristics of juveniles detained, and detailed information on prior criminal activity, and alcohol and drug use is included.

The information presented on local jails is derived from the 1983 National Jail Census and the Annual Survey of Jails conducted by the U.S. Bureau of the Census for the Bureau of Justice Statistics. A variety of data on jails and jail inmates are provided including the number of jail inmates, jail capacity, legal status of inmates, demographics, and suicides occurring in local jails.

Data on State and Federal prisons include the number and rate of sentenced prisoners, movement of the prison population, race, sex, and sentence length of those confined. Var ious characteristics of State prison inmates are provided including sex, current offense, criminal history, and prior sentences. Detailed data on State prison inmates' prior use of drugs and alcohol are also presented. Characteristics of State correctional facilities, custody level of inmates, and population density of State prisons are included as well as information on residents of community based facilities. A section on State prison releases includes average sentence length, time served, and demographic
characteristics. Sentence length and selected characteristics of Federal prisoners received from court are also provided. Escapes from State and Federal facilities are presented as are population figures for U.S. Army, Navy, Air Force, and Marine correctional institutions.

A section on post release supervision focuses on the parole population and includes rates of persons on parole, movement of the parole population, and those released from parole supervision. Data on violations of parole, time spent on parole before failure, and detailed information on recidivism and rearrest rates are provided.

This section concludes with statistics on State and Federal prisoners sentenced to death, death row populations for each State, and figures on those executed in each State. This includes data on sex, race, age, and cormitment offense for those on death row.

Table 6.1
Rote (per 100,000 adult residents) of persons under community
supervision
By type of supervision, region, and State, 1986 and 1987
(Rate per 100,000 adults ${ }^{\circ}$ )

Note: These data are from a survey of probation and parole agencies of the 50 States, the District of Columbia, and the Federal system on 1986 and 1987 probation and parole populations. The survey was conducted by the U.S. Bureau of the Censu's for the Bureau of Justice Statistics. Persons on probation are defined as offenders who have been placed under the supervision of a probation agency resulting from a court order. Excluded under this definition are persons placed on bench probation, court probation, summary probation, or any status not requiring supervision by a probation agency. Parolees are offenders conditionally released from prison to parole supervision either by a discretionary parole board decision or by fulfilling the conditions for a mandatory release. Many States update their population counts, so that the Jan. 1, 1987, numbers may differ from those pre-
viously published for Dec. 31, 1986. For a discussion of survey methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 12.

Qupublished U.S. Burean of the Census estimates of the odult papulation age 18 and older for July 1, 1986, and July 1, 1987, were used to calculate rates.
Estimated.

Note: Persons under supervision of the Federal Probation System include persons placed on probation--either by U.S. District Courts, U.S. Magistrates, or at the request of U.S. Attorneys (deferred prosecution)-and Federal offenders released from confinement on parole or mandatory release. A Federal prisoner is eligible for mandatory release when the prisoner has served the full term of imprisonment less "good-time" allowances. If the offender has earned more than 180 days of "good-time" credit, supervision (as if on parole) is for that period in excess of 180 days. If "good-time" is less than 180 days, release occurs without supervision.
These deto represent persons who began supervision in the 12 -month period prior to June 30 of the year noted. The Canal Zone, Guarn, and the Virgin Islands began reporting data in 1977.
"Pretrial diversion" was called "deferred prosecution" in years prior to 1977.
"Special parole" refers to a specifled period of parole attached to a term of imprisonment at sentencing. This provision is applicable to violations of certain drug laws (see Drug Abuse Prevention and Control Act of 1970, Public Law 91-513, Oct. 27, 1970, 84 Stat. 1260).

| Wyoming | 380 | 576 | 173 | 46 | 207 | 54 |

Note: The data above are from the 1987 Censuses of Public Juvenile, Detention, Correctional, and Shelter Facilities. The 1987 census collected information on one-day counts of juveniles and facilities as of Feb. 2, 1987, and annual data for the calendar year 1986. Data were obtained through questionnaires mailed to 1,107 public and 2,195 private juvenile institutions.
The response rate for public institutions was almost 100 percent with only two institutions not responding. Approximotely 80 percent of private facilities responded.
Residential programs and group homes in operation on Feb. 2, 1987 were included in the census if they housed more than three residents; if at least 50 percent of the residents were juveniles; and if accused or adjudicated delin-
quents and status offenders were at least I percent of their average daily population. In California, however, all California Youth Authority facilities were included. Juvenile facilities operated as part of odult facilities were excluded, as were nonresidential facilities, facilities exclusively for drug or alcohol abusers or nonoffenders, and Federal juvenile correctional facilities.
${ }^{\text {QRate per }} 100,000$ juveniles age 10 years through the statutorily defined age of majority within each State.

Table 6.10
Average length of stay for juveniles discharged from public facilities

By adjudication status, 1986
$\left.\begin{array}{lccc}\hline & \begin{array}{c}\text { Average length of stay (in days) } \\ \hline\end{array} & \begin{array}{c}\text { All } \\ \text { facilities }\end{array} & \begin{array}{c}\text { Short-term } \\ \text { facilities }\end{array}\end{array} \begin{array}{c}\text { Long-term } \\ \text { facilities }\end{array}\right]$

Note: See Notes, tables 6.6 and 6.8. "Short-term facilities" typically hold juveniles awaiting adjudication or other disposition. "Long-term facilities" generally hold juveniles who have been adjudicated and committed to custody. "Institutional environments" impose greater restraints on residents' movements and limit access to the community. "Open environments" include ranches, camps, shelters, group homes, and halfway houses, and allow greater movement of residents within the facilities and more access to the community.
Estimated average length of stay data were calculated for each adjudication status (detained, committed, and voluntarily admitted) for each facility type (institutional, short- or long-term, and open, short- or longterm).

| Median education | 8 years | 7 years | 8 years | 10 years |

Note: This information was obtained from a survey of juveniles and young adults in custody conducted by the U.S. Bureau of the Census for the Bureau of Justice Statistics. This survey was based on personal interviews with a notionally representotive sample of 2,621 juveniles and young adults. Interviews were conducted in 50 institutions in 26 States, representing I in 4 long-term, State-operated institutions. Data presented are estimates of characteristics of the 18,226 juveniles and 6,798 young adults represented by the sample. Participation in the survey was voluntary and the response rate was 89 percent.

The sample design was a stratified sample based on the size of the correctional facility. Facilities that were long-term and State-operated with institutional environments were included in the sampling frame. The majority of these institutions described themselves as training schoois. Excluded from the survey were institutions that were locally operated, State facilities not designed for secure custody and all short-term or privately. operated facilities and institutions.
Primarily as a result of the inclusion of California's Youth Authority focilities, more than a quarter of the sample was made up of young adults who are age 18 and older (up to 25 years of age). This older population is referred to as young adults, while those less than the age of 18 will be referred to as juveniles. All residents regardless of age are referred to as youth. (Source, pp. 1, 9.)

Opercents may not odd to 100 due to rounding.
Includes American Indians, Alaskan natives, Asians, and Pacific Islanders.

| Rated capacity of jails | 261,556 | 261,432 | 272,830 | 285,726 | 301,198 | 15 | 5 |
| Percent of rated capacity occupied | 85\% | 90\% | 94\% | 96\% | 98\% | 15 | 2 |

Note: Data for 1983 are from the National Jail Census, taken every 5 years and conducted for the Bureau of Justice Statistics by the U.S. Bureau of the Census. Questionnaires were mailed to all $(\mathrm{N}=3,358)$ locally administered joils in the Nation in January 1983. Through the use of various follow-up procedures a response rate of 99 percent was achieved.
Data for 1984, 1985, 1986, and 1987 are from the Annual Survey of Jails that is taken during noncensus years. The survey is based on all jails in jurisdictions with 100 or more joil inmates and a stratified random sample of jurisdictions with an average daily population of less than 100 inmates. For 1984, 1,164 jails representing 893 jurisdictions were surveyed; in 1985, 1,142 jails in 874 jurisdictions were represented in the survey; in 1986, 1,137 joils in 868 jurisdictions were included; and in 1987, 1, 135 jails in 866 jurisdictions were included. Data for these survey years are estimates and therefore subject to sampling error.
A local jail is defined os a facility that holds inmates beyond arraignment, usually for more than 48 hours, and is administered by local officials. Specifically, excluded from
the count were temporary lockups that house persons for less than 48 hours, Federal or State administered facilities, and privately operated facilities. (Source, 1987, p. 5.) Connecticut, Deloware, Hawaii, Rhode Island, and Vermont have combined jailprison systems and therefore were excluded from the survey in 1984-87. Alaska was also excluded as a combined system in 1987.
$a_{\text {Juveniles are persons of an age specified by }}$ State statute (usually under 18) initially subject to juvenile court authority even if tried as adults in criminal court. Because fewer than 1 percent of the pial population were juveniles, caution must be used in interpreting any changes over time.

| Wyoming | 4 | 2 | 2 |

Note: This information is from the National Study of Jail Suicides conducted by the National Center on Institutions and Alternatives. Data were collected through a survey mailed to 16,483 jails nationwide. Only those jails that experienced a suicide during 1986 were asked to respond to the survey. Information was supplemented and verified through surveys mailed to 517 State and county medical exaniners, 60 State jail inspection offices, local jail liaison agencies, 50 State attorney generals offices, and 70 State police offices. The number of jail suicides was also verified through newspaper clippings.

This survey is the second in a series of jail suicide studies sponsored by the U.S. Department of Justice, National Institute of Corrections, and is 0 followup to the first study, which was completed in October 1981.
A local jail was defined as "any facility operated by a local jurisdiction (e.g., county, municipality, etc.), whose purpose was the confinement of inmates apprehended by law enforcement personnel." This includes "temporary holding and pre-trial detention facilities, lockups, 'drunk tanks', etc., which normally detain persons for less than 48 hours, and facilities which normally detain persons or house committed/sentenced offenders for more than 48 hours." State police lockups were included as well as local jails operated by State correctional agencies. (Source, p. 90.)

Note: See Note, table 6.28. A second survey was mailed to all jails in both 1979 and 1986 that experienced at least one suicide, in order to gather descriptive information on the suicide victim and incident. This second survey yielded data on 344 of the 419 suicides occurring in 1979, for a response rate of 82 percent. In the 1986 survey, information was gathered for 339 out of 401 suicides for an 85 percent response rate.
For 1979, "other" includes Spanish/Mexican, American Indian, and unspecified. For 1986, "other" includes Spanish heritage, Chicano, Mexican American, and American Indian.
bMost serious charge at the time of incarceration.
coffenses included in this category are public intoxication, driving while intoxicated, disorderly conduct, resisting arrest, passession of a controlled dangerous substance, distribution of a controlled dangerous substance, and narcotics (unspecified).
Offenses included in this category are burglary, grand larceny, auto theft, robbery (other), re-
ceiving stolen property, arson, breaking and entering, entering without breaking, vandalism, and carrying a concealed weapon ond/or firearms.
e Offenses included in this cotegory are murder, negligent manslaughter, armed robbery, rope, indecent assault, assault, battery, aggravated assault, and kidnapping.
'Offenses included in this category are shoplifting, petit larceny, prostitution, sex offenses (other), trespassing, unauthorized use of a motor vehicle, traffic offenses (other), violation of probation, contempt of court, vagrancy, indecent exposure, status offenses, escape, forgery, embezzlement, and other. $\mathrm{g}_{\text {At }}$ the time of incarceration.

Note: Unlisted jurisdictions either had combined jail-prison systems or did not report prisoners held in local jails. For information on methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 13.
${ }^{\text {a }}$ Arkansas, Colorado, Idaho, Kentucky, Massachusetts, New Jersey, and
Tennessee did not include the inmotes in jails in their jurisdiction counts; however, the percent of jurisdiction population was calculated for all persons serving sentences to prison, whether in prison or in jail.
Source: U.S. Department of Justice, Bureau of Justice Statistics,
Correctional Populations in the United States, 1987, NC.J-118762 (Washington, DC: U.S. Department of Justice, 1989), Table 5.5.

Figure 6.1
Sentenced prisoners in State and Federal institutions on Dec. 31 United States, 1925-87

Note: Prison population data were compiled by a yearend census of prisoners held in custody in State and Federal institutions. Data for 1925
through 1939 include sentenced prisoners in State and Federal prisons and reformotories whether committed for felonies or misdemeanors. Data for
1940 through 1970 include all adult felons serving sentences in State and Federal institutions. Since 1971, the census has included all adults or youthful offenders sentenced to a State or Federal correctional institution with maximum sentences of over 1 year.

Beginning on Dec. 31, 1978, a distinction was made between prisoners "in custody" and prisoners "under jurisdiction." As defined in a 1978 report (U.S. Department of Justice, Bureau of Justice Statistics, Prisoners in State and Federal Institutions on December 31, 1978, Notional Prisoner Statistics Bulletin SD-NPS-PSF-6 (Washington, DC: USCPO, 1980), "in custody" refers to the direct physical control and responsibility for the body of a confined person. "Under jurisdiction" is defined as follows: A State or Federal prison system has jurisdiction over a person if it retains the legal power to incarcerate the person in one of its own prisons. Jurisdiction is not determined by the inmate's physical location; jurisdiction is determined by the legal authority holding the inmote. Examples of prisoners under the jurisdiction of a given system, but not in its custody, are those housed in local joils, in other States, or in hospitals (including mental health facilities) outside the correctional system; inmates on work release, furlough, or bail; and State prisoners held in Federal prisons or vice versa.

For information on methodology, definitions of terms, and a detailed explanation of revised, estimated, and noncomparable data, see Appendix 13.

Figure 6.4
Rate (per 100,000 resident population) of sentenced prisoners in State and Federal institutions on Dec. 31

United States, 1940-87

Note: See Note, figure 6.1. The rates for the period before 1980 are based on the civilian population. The civilian population represents the resident population less the armed forces stationed in the United States. Since 1980, the rates are based on the unpublished estimates of total resident population provided by the U.S. Bureau of the Census. For information on methodology, definitions of terms, and a detalled explanation of revised, estimated, and noncomparable data, see Appendix 13.

Note: See Notes, figures 6.1 and 6.4. Sentenced prisoners are defined as those serving sentences of more than I year. Thes data for the years 197177 represent sentenced prisoners in the custody of State and Federal institutions. The data for 1978-87 represent sentenced prisoners under the jurisdiction of State and Federal correctional authorities. Population estimates are provided by the U.S. Bureau of the Census. Data for 1985 and 1986 have been revised from previous presentations. For information on methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 13.
${ }^{0}$ Counts of inmates by sentence length may be slightly incorrect. See "Sentencing information" for the relevant jurisdictions in Appendix 13 $b_{\text {Figures include both jail and prison imnates; jails and prisons are }}$ combined in one systern.
${ }^{\text {c }}$ All data for Arizona, California, the District of Columbia, Georgia, Illinois, Indiana, lowa, Massachusetts, Michigan, North Carolina, Texas, West Virginia (men), and Wyoming are custody, rather than jurisdiction counts. Florida's counts are based on custody data.

[^31]Movement of sentenced prisoners in State and Federal institutions

Note: See Note, figure 6.1. All figures on admissions and releases are of prisoners sentenced to more than 1 year. The data represent the number of transactions and not the number of individual prisoners who were involved in such movements. Because of different counting procedures among the States, a " 0 " entry in any category can mean that: (1) the State uses this category of admission or release but had no inmates in the cotegory during 1987; (2) the State uses this cotegory but cannot report the number of inmates in the category; or (3) the State does not use this cotegory. "Uniconditional releases" include expiration of sentence, commutation of sentence, and other such unqualified discharges. "Conditional releases" are those involving some form of supervision over the offender upon return to the cormmunity and include parole, probation, supervised mandatory release (early
release because of good behavior), and other forms of conditional discharge. For information on methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 13.
${ }^{\text {a }}$ Counts of inmates may be slightly incorrect. See "Sentencing Information" for the relevant jurisdiction in Appendix 13.
Figures include both jail and prison inmates; jails and prisons are combined in one system.
${ }^{\text {CAll data }}$ for Arizona, Colifornia, the District of Columbia, Georgia, Illinois, Indiana, lowa, Massachusetts, Michigan, North Carolina, Texas, West Virginia (men), and Wyoming are custody, rather than jurisdiction counts. Florida's counts are based on custody data.
Numbers for admission categories are estimated.

Note: See Note, figure 6.1. For information on methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 13.
${ }^{\text {Figigures include both jail and prison inmotes }}$ jails and prisons are combined in one system.
BHispanic prisoners were classified as persons of unknown race.
${ }^{\text {c }}$ All data for Arizona, California, the District of Columbia, Georgia, Illinois, Indiana, lowa, Massachusetts, Michigan, North Carolina, Texas, West Virginia (men), and Wyoming are custody, rather than jurisdiction counts.
Florida's counts are based on custody data.

Racial group membership of the population was estimated.
ETennessee's and Virginia's "not known" category includes all persons reported as other than white or black.
Texas reported only two racial categories: white and nonwhite.

Note: These data were collected by the U.S. Bureau of the Census for the Bureau of Justice Statistics through the Survey of Inmates of State Correctional Focilities. This survey, conducted in 1979 and 1986, employs a strotified probability sampling design with the probabilities proportional to the size of the correctional facility. In 1979, 11,397 intarviews were con-ducted at 215 prisons with a selected sample of about 12,000 inmates. In 1986, 13,711 interviews were conducted at 275 prisons from a sample of oppraximately 15,000 inmates. In 1979, the State prison population was an estimated 274,563. In 1986, the estimated prison population was 450,416. For each characteristic other than ethnicity and income, data were available for at least 99 percent of the inmates. Ethnicity data were available for 95 percent of the inmotes in both 1979 and 1986. Income data were available for 50 percent of the inmates in 1979 and 89 percent of the irmates in 1986.
OThe median age was 26 in 1979 and 28 in 1986.
The median number of years education was 11 in 1979 and 10 in 1986.

Note: See Note, table 6.38. These data are based on the 82 percent of inmates who reported having one or more prior sentences in table 6.42.
OPercents may not add to 100 due to rounding.
Defined as having previously been sentenced to probation or incarceration as a juvenile or adult.

Source: U.S. Department of Justice, Bureau of Justice Statistics, Profile of State Prison Inmates 1986, Special Report NC.J-109926 (Washington, DC: U.S. Department of Justice, Janvary 1988), p. 5, Table 8.

Table 6.44
Use of illegal drugs by State prison inmates prior to incarceration
By type of drug use, United States, 1979 and 1986 (estimated)

| Type of drug use |  | Percent of inmates |
| :--- | :--- | :--- | :--- |
| Under the influence of drugs <br> at time of the current offense | 32.379 | $35.3 \%$ |
| Ever used drugs on a regular basis | 62.9 | 62.3 |
| Ever used a major drug on a <br> regular basis |  |  |
| Used drugs on a daily basis in the |  |  |
| month before the current offense | 33.4 | 35.0 |
| Used a major drug on a daily basis <br> in the month before the current offense | 39.5 | 42.6 |

Note: See Note, table 6.38. Drug use history is based directly on the responses from inmates. Inmates were asked a very detailed set of questions about each of 10 drugs. Drug use histories were developed by examining the responses to all of the 10 sets of questions. The drugs that were specifically asked about were: heroin or methadone; amphetamines and barbiturates, alone or in combinotion; methaqualone (quaaludes); cocaine; LSD; PCP; and marihuana and hashish. Alcohol use was examined in a separate set of questions. (Source, p. 8.)
aMajor drugs include heroin, methadone, cocaine, LSD, and PCP.

Table 6.50
Pre-prison employment status and source of income of State prison inmates

By major drug use history, United States, $1986^{a}$

|  | Estimated percent of all inmates who: Used a major drug |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Never used a major drug | Anytime | Regularly in past | In month before the offense |  |
|  |  | in post |  | At all | Daily |
| Employment status in year before |  |  |  |  |  |
|  |  |  |  |  |  |
| Employed | 73.4 | 67.9 | 67.5 | 67.0 | 60.0 |
| Full-time | 61.6 | 54.5 | 56.7 | 59.0 | 49.5 |
| Part-time | 11.8 | 13.3 | 10.8 | 10.0 | 10.6 |
| Unemployed | 26.6 | 32.1 | 32.5 | 31.0 | 40.0 |
| Looking for work | - 16.5 | 19.8 | 18.9 | 16.9 | 19.8 |
| Not looking for work | 10.1 | 12.4 | 13.7 | 14.1 | 20.2 |
| Source of income ${ }^{\text {c }}$ |  |  |  |  |  |
| Wages or salaries | 85.3 | 85.2 | 83.3 | 84.5 | 77.3 |
| Benefits | 22.3 | 21.4 | 25.9 | 22.1 | 22.8 |
| Family or friends | 23.3 | 30.5 | 25.1 | 29.6 | 30.5 |
| lliegal income | 9.6 | 23.4 | 27.9 | 35.5 | 47.6 |
| Other income source | - 4.0 | 4.0 | 4.1 | 3.0 | 3.8 |

Note: See Note, table 6.46.
Gercents may not add to total because of rounding.
Major drugs include cocaine, heroin, PCP, LSD, and methadone.
CIncome srusce refers to any source of income during the year before the current incarceration. Percents add to more than 100 because more than one source of income could be reported by each inmate.

State correctional facilities and inmates/residents
By type and size of facility, ${ }^{\text {a }}$ and region, United States, on June 30, 1984

| Facilities and inmates/residents | Total | Region |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Northeast | Midwest | South | West |
| Number of facilities | 903 | 134 | 193 | 435 | 141 |
| Confinement facilities housing | 694 | 104 | 139 | 330 | 121 |
| 1 to 499 inmates | 452 | 61 | 88 | 214 | 89 |
| 500 to 999 inmates | 138 | 20 | 26 | 79 | 13 |
| 1,000 or more inmates | 104 | 23 | 25 | 37 | 19 |
| Community-based facilities housing | 209 | 30 | 54 | 105 | 20 |
| 1 to 49 residents | 104 | 22 | 32 | 35 | 15 |
| 50 to 99 residents | 66 | 5 | 18 | 40 | 3 |
| 100 or more residents | 39 | 3 | 4 | 30 | 2 |
| Number of inmates/residents | 395,309 | 68,000 | 80,298 | 175,444 | 71,567 |
| Confinement facilities housing | 381,955 | 66,302 | 77,665 | 167,313 | 70,675 |
| 1 to 499 inmates | 84,881 | 14,428 | 15,683 | 42,507 | 12,263 |
| 500 to 999 inmates | 102,215 | 13,992 | 20,151 | 58,059 | 10,013 |
| 1,000 or more inmates | 194,859 | 37,882 | 41,831 | 66,747 | 48,399 |
| Community-based facilities housing | 13,354 | 1,698 | 2,633 | 8,131 | 892 |
| 1 to 49 residents | 2,800 | 535 | 955 | - 863 | 447 |
| 50 to 99 residents | 4,759 | 307 | 1,174 | 3,074 | 204 |
| 100 or more residents | 5,795 | 856 | 504 | 4,194 | 241 |

Note: These dota were compiled by the Bureau of Justice Statistics for the 1984 Census of State Adult Correctional Facilities, which is the third in a quinquennial series. Earlier censuses were conducted in 1974 and 1979. The universe of facilities was developed from the Census of Statc Adult Correc-
tional Facilities conducted in 1979. This list was revised using the 1984
American Correctional Association Directory and information obtained from State correctional administrators. (Source, p. 4.) The response rate for the Census was 100 percent. For a list of States in regions, see table 6.53.
${ }^{9}$ Facillty size is defined by average daily population.

Note: See Note, table 6.52. Fiscal year closing dates vary arnong States. Average daily papulation was derived by either totaling daily populations for the annual period and dividing by 365 or summing the monthly average daily populations for the annual period and dividing by 12.

Gemale confinement facility inmates were housed in a
county-administered facility whose inmates are counted in enumerations of local jails.
${ }^{6}$ Female confinement facility inmates were housed in the Federal Correctional Institution, Alderson, West Virginia.

Note: See Note, table 6.52. Innates in programs may exceed total number of inmates because on inmate may participate in more than one program. Figures exclude 2,034 male and 640 female partleipants in religious, recreational, and other programs. Average annual enrollment figures are used where June 30 dato fail to represent enrollment throughout the year.
alncludes basic adult education (ABE), secondary education (GED), special education (including programs for inmates with learning disabilities), and college courses. Includes counseling for alcohol addiction, drug depen-
dence, and other conditions; employment counseling; and special adjustment counseling, including preparailion for institutional life and release to the community.
Gemale corfinement facility innates were housed in a county-administered facility whose inmates are counted in enumerations of local jalls.
Female confinement facility inmates were housed in the Federal Correctional Institution, Alderson, West Virginia.

Note: See Note, table 6.52. Residents in programs may exceed total number of residents because a resident may participate in more than one program. Figures exclude 297 male and 47 female participants in religious, recreational, and other programs. Average annual enrollment figures are used where June 30 data fail to represent enrollment throughout the year. No community-based facilities operated on June 30, 1984s in Alaska, Connecticut, Hawail, Kentucky, Louisiona, Montana, North Dakota, Oregon, South Dakota, Texas, Vermont, or Wyoming.
${ }^{a_{\text {Inclu }}}$ (ades basic adult education (ABE), secondary education (GED), special education (including programs for resjdents with learning disabilities), and college courses. blncludes counseling for alcohol addiction, drug dependence, other types of psychological theropy, employment counseling, and special adjustment counseling, including preparation for institutional life ond release to the community.

Note: These data are from the 1984 Prison Census of State operated correctional facilities in operation on June 30, 1984. Data were collected by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. Housing units include single-celled, double-celted, and dormitory units, which contain three or more inmates.
"Special housing" refers to protective custody, administrative custody, or disciplinary action. "Other housing" refers to infirmaries or special prograns. Data refer to inmates in general or special housing except under "type of housing unit" where "other" is shown for comparison.

Population density in State prisons on June 30
By region, 1979 and 1984

Note: See Note, table 6.64. All data refer to general, special, of facilities, conversions of prisons to other uses, and converand other housing. sion of some prison housing spoce to other prison purposes.
${ }^{-}$The South showed on increase of more than 2 million square feet in new facilities built since 1979. However, there was a reduction of space at facilities existing in 1979 due to closing

| Other drug | 63.0 | 14.1 | 16.6 | 38.7 |
| Public-order offenses | 35.4 | 10.4 | 13.2 | 39.5 |
| Weapons | 47.3 | 14.6 | 18.0 | 48.9 |
| Other public-order | 31.4 | 9.5 | 11.5 | 35.7 |
| Other offenses | 51.4 | 13.8 | 17.8 | 50.6 |
| Number of releases | 68,868 | 89,545 | 64,973 | 64,089 |

Note: These data were compiled by the Bureau of Justice Statistics through the National Corrections Reporting Program (NCPP), which involved the voluntary participation of 33 State correctional agencies. These agencies accounted for approximately threefourths of the Notion's total State prison releases for calendar year 1984. Participating States include: Alabama, California, Colorado, Delaware, Georgic, Hawaii, Illinois, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, West Virginia, Wisconsin, and Wyoming. Each State's individual offenses were recoded to a common set of offense types. With the exception of murder, attempts or conspiracies were included with completed offenses. Attempted murders were classified with assaults.
NCRP data include prisoners released from custody, regardless of the original sentencing jurisdiction, and include persons receiving sentences of more than I year. Dota on sentence length are reported for all first releases with sentences of more than a year, for which the most serious offenses and sentence length were reported. Average sen-
tence length data refer to the offense with the longest sentence. Whenever a sentence had both a minimum and a maximum term, the maximum was used to define the sentence length (Source, p. 9). Time served in prison only was based on first releases where data on most serious offense and time served in prison was provided. Time served in jail and prison was based on those cases with known conviction offenses where both jail time credited to prison sentence, ond time served in prison, were reported. The percent of sentence served is calculated for those cases where both sentence length and time served in jail and prison were reported. "Other public-order" offenses include escape from custody, court offenses, obstruction; driving while intoxicated, other traffic offenses, drunkenness, disorderly conduct, morals and decency violations, and cormnercialized vice. "Other olfenses" refer to juvenile offenses and unspecified felonies.
OExcludes persons sentenced to life in prison or death.

Note: The Federal Bureau of Prisons is responsible for two distinct Federal offender populations: (1) individuals who ore housed in, have escaped from, or are in transit between Federal institutions and community treatment centers; and (2) individuals who are housed in, awaiting trial in, or enroute to contract facilities, i.e., State, local, or private facilities that are under contract with the Federal Bureau of Prisons for the housing of Federal offenders. Approximately 11.9 percent of the total Federal prison population was housed in contract facilities at the end of fiscal year 1986. Data in this repart are often broken down into two sets of mutually exclusive categories: (1) court commitments and other-than-court cormitmenis; and (2) prisoners under sentence and prisoners not under sentence. For an explanation of the sentencing procedures within these categories, see Appendix 14. For a definition of "mandatory release," see Note, table 6.3.

Dota prior to 1974 reflect sentenced prisoners only.
Beginning in fiscal year 1970, figures include only Bureau of Prisons institutions.
$\mathrm{c}_{\text {"Other }}$ includes other temporary movement such as furloughs, writs, etc. $\mathrm{d}_{\text {Beginning in }}$ 1958, the term mandatory release replaces the term condi tional release.

Note: See Note, table 6.73. Data in this table are based on 20,859 prisoners with complete information, representing 84.5 percent of the 24,685 court commitments. For an explanation of sentencing procedures, see Appendix 14.
${ }^{\circ}$ This total line excludes the immigration law and violent crime
offenses whose unusual sentence lengths distort the overage sentence length statistic.

Note: See Note, table 6.73. Data in this table are based on 32,682 prisoners with complete information, representing 91.2 percent of the 35,805 inmates confined in Federal institutions. For an explanation of sentencing procedures, see Appendix 14.
${ }^{\text {a }}$ This total line excludes the immigration law and violent crime offenses
whose unusual sentence lengths distort the average sentence length statistic.

Note: This information was collected through a survey mailed to the departments of correction in the 50 States, the District of Columbia, Guam, Puerto Rico, and the Federal Bureau of Prisons. Two jurisdictions, Alasko and Indiana, did not respond to the survey. Wyoming reported 2 escapes from penitentiary, approximately 10 walkaways each year from honor farm, and all escapees returned. The Source presents the information as submitted by the responding agencies. No attempt is made by the Source to verify the information received.

OFiscal year 1985.
Fiscal year 1986.
${ }^{\text {chas of Jan. 1, }} 1986$.

Note: These data refer only to defendants sentenced as adults. The "percent" column refers to inmates who were granted parole as a proportion of the total number of inmates considered for parole. The Source notes, "while the percentage granted zarole has traditionally served as an indicator of paroling policy, it has several limitations. First, it is affected b'y changes in types of offenders entering the system. For example, the rate of parole grants for auto thieves (whose number entering the Federal system has declined over the years) may not be the same os for narcotics dealers (whose number has risen). Second, the measure may be affected by changes in sentencing practices" (Source, October 1, 1986 to September 30. 1987, p. 9). The data do not reflect decisions modified under the Commission's appellate or re-
opening provisions. Data for 1978 have been revised from earlier reports by the Source.

For a list of States in regions, see Appendix 4.

Table adapted by SOURCEBOOK staff.

Table 6.91
Recidivism rates of young adults paroled in 22 States in 1978
By selected demographic characteristics, United States

|  | Number paroled | Rearrested within 6 years | rcent of par Reconvicted within 6 years | lees <br> Reincorcerated within 6 years |
| :---: | :---: | :---: | :---: | :---: |
| All parolees | 11,347 | 6\% | 53\% | 4\% |
| Sex |  |  |  |  |
| Male | 10,761 | 70 | 54 | 50 |
| Female | 524 | 52 | 40 | 36 |
| Race and ethric origin |  |  |  |  |
| White non-Hispanic | 6,540 | 64 | 49 | 45 |
| Black non-Hispanic | 4,206 | 76 | 60 | 56 |
| Hispanic | 374 | 71 | 50 | 44 |
| Other | 143 | 75 | 65 | 63 |
| Education |  |  |  |  |
| Less than high school | 8,937 | 71 | 55 | 51 |
| High school graduate | 1,922 | 61 | 46 | 43 |
| Some college | 167 | 48 | 44 | 31 |

Note: These findings are based on a sample of 3,995 parolees, representing 11,347 persons between the ages of 17 and 22, who were poroled from prisons in 22 States in 1978. These States accounted for 50 percent of all State prisoners paroled in the Nation during that year. (Source, p. 1.) The 22 States are: Alabama, Delaware, Florida, Georgia, Illinois, Kansas, Kentucky, Maine, Michigan, Nebraska, Nevada, New Hampshire, New Mexico, North Carolina, North Dakota, Thio, Pennsylvania, South Dakota, Texas, Utoh, Virginia, and Wyoming. : bcategories may not add to total because of exclusion of missing data.

| Some college or more | 6.8 | 51.9 | 36.1 | 30.4 |

Note: These dato are derived from a sample of 16,355 prison releases, representing 108,580 persons released from prison in II States during 1983. The sample was obtained from records submitted by States participating in the National Carrections Reporting Program (NCRP). Criminal history data for the sample of released prisoners were obtained from the criminal identification bureaus in the II participating States and from the Federal Bureau of Investigation. Information was collected only on felonies and serious misdemeanors occurring within 3 years of a prisoner's release. Demographic characteristics of prisoners were collected from the departments of correction in each State, as part of the NCRP conducted annually by the Bureau of Justice Statistics. (Source, p. 2.) The II States are California, Florida, 11 innois, Michigan, Minnesota, New Jersey, New York, North Carolina, Ohio, Oregon, and Texas. These States accounted for more than 57 percent of all State prisoners released in the nation during 1983. (Source, p. I.)
${ }^{\text {a }}$ Subcategories may not add to totals because of the exclusion of missing data.
Because of the underreporting of court and custody data in Ohio, the percents reconvicted and reincarcerated exclude data from Ohio.
${ }^{\text {c }}$ Data on sex were reported for 100 percent of releases, data on race for 99.6 percent, Hispanic origin for 99.9 percent, age at time of release 96.8 percent, and education for 46.6 percent.

Note: The NAACP Legal Defense and Educational Fund, Inc. periodically collects data on persons on death row. As of Mar. 1, 1989, 37 jurisdictions, the Federal Government, and the United States military had capital punishment laws, and 34 jurisdictions and the Uhited States military had at least I prisoner under sentence of death. Between Jan. I, 1973 and Mar. I, 1989, an estimated 558 death sentences have been vacated as unconstitutional and an estimated 932 convictions or sentences have been reversed or vacated on other grounds.

IIncludes three females.
bincludes one person who was a juvenile at the time of the offense.
${ }^{5}$ Includes one person sentenced to death in the State but serving another sentence in another State.
dincludes one female.
EIncludies two persons sentenced to death in the State but serving other sentences in other States.
Includes two persons who were juveniles at the time of offense.
Includes three persons who were juveniles at the time of the offense.
hincludes two females.
IIncludes four persons who were juveniles at the time of the offense.

| Wyoming | 1 | - | 1 | - | - | - |

Note: See Note, table 6.102. This table identifies the legal or other event effectively terminating the death sentence.

In each of the States of Florida, Nevada, Virginia, and Wyoming, one inmate under a death sentence cormitted suicide. One immate sentenced to execution died of natural causes in Alabama, Florida, Georgia, Pennsylvania, and Texas. Tennessee reported an inmate murdered by another inmate. An inmate in Illinois died of an apparent cocaine overdose.
${ }^{5}$ Corrmutation effects an immediate change in sentence from death to life imprisonment or a term of years.
${ }^{\text {CPPrsons who }}$ whose capital sentence is vacated or whose capital sentence and conviction are vacated are subject to further legal proceedirigs (such as resentencing if the conviction has been vacated) to determine their ultimate disposition. Neither the vacating of the sentence nor the vacating of both sentence and conviction precludes the possibility of reimposition of the death sentence.

Nute: In three States, Maine, Minnesota, and Wisconsin, the death penalty was abolished for the entire period covered by the table. Alaska and Howaii have not had the death penalty since 1960, when they were first included as States. The death penalty was obolished in Michigan in 1963 and in lowa and West Virginia in 1965. Death penalty legislation expired in 1975 in North Dakota and was not renewed. Death penalty lows were found unconstitutional in Kansas (1973), the District of Columbia (1973), Rhode Island (1979), and New York (1984) and have not been rewritten. In South Dakota, the death penalty was abolished in 1915, restored in 1939, abolished again in 1977, and restored in 1979. Oregon abolished the death penalty in 1914, restored it in 1920, abolished it again in 1964, restored it in 1978, and it was found to be unconstitutional in 1981. Massachusetts abolished the death penalty in 1980, restored it in 1983, and it was found unconstitutional in 1984. In California, the death penalty
was found to be partially unconstitutional in 1984. In the following States death penalty laws were found unconstitutional but have been revised to meet constitutional standards: Colorado, Delaware, Illinois, Indiona, Kentucky, Maryland, Missouri, New Hampshire, New Jersey, New Mexico, North Carolina, Ohio, Oklahoma, Pennsylvania, Tennessee, and Washington.
${ }^{\text {As }}$ States, Alaska and Hawaii are included in the series beginning Jan. I, 1960.

Annotated list of sources and references

Only published documents cited by the SOURCEBOOK are listed here. Information provided to SORRCEBOOK staff in the form of single tables or mimeographed reports are not listed.

Where data from more than one edition of a publication were used in trend tables, only the latest edition of the publication is annotated.

Sources typically contain more tables than were selected for presentation in the SOURCEBOOK. Narratives that describe or analyze the tables and the procedures used to collect the data may also be presented in greater detail in the original source.

Administrative Office of the United States Courts

## 1987 Annual Report of the Director

(Annual. Washington: USGPO, 1987. 443 pages, 150 tables (estimated), 14 figures, 2 appendices.)

Presents data for year ending June 30,1987 and trend tables for years ending June 30, 1982-87. SOLRCEBOOK tables 1.60-1.62, 1.66, 1.81, 1.90, 5.8-5.14, 5.26-5.29, 5.33-5.38, 5.46, 6.3-6.5.

This report begins with an overview of Federal judicial business, administration, appropriations, and expenditures, and provides data on all aspects of the Federal court system. A detailed analysis of the workload is presented for the U.S. courts of appeals and the U.S. district courts. For the appellate courts, information is presented on filings, terminations, types of appeals, State prisoner petitions, etc. Information for the U.S. district courts includes civil cases filed, terminated, and pending; prisoner petitions; juror utilization; Federal public/community defenders; criminal cases filed, terminated, and pending; dispositions of criminal cases filed; amount of time from filing to dispositions of criminal defendants; and length of civil and criminal trials. Data are provided in aggregate form and are also presented by circuit and district court.

Federal Court Management Statistics 1987
(Annual. Washington: Administrative Office of the United States Courts, 1987. 167 pages, 143 tables.)

Presents data for years ending June 30, 1982-87. SOURCEBOOK table 1.65.

This report presents workload and performance statistics on both civil and criminal matters for each of the U.S. courts of appeals and each of the 94 U.S. district courts. Data for the former include appeals filed, terminated, and pending; number of judgeships; types of appeals; number of opinions and percent reversed or denied; median time from filing to disposition; and other matters pertaining to the appellate courts. Data for the U.S. district courts include cases filed, terminated, and pending; actions per judgeship; median time from filing to disposition; juror usage index; and other matters related to activities in U.S. district courts. As part of the profile, each court is ranked on various dimensions. Two tables presenting the national profile for all U.S. courts of appeals and all U.S. district courts on the workload and performance measures are also included.

## Federal Judicial Workload Statis-

 tics December 1987(Annual. Washington: USGPO, 1988. 86 pages, 34 tables, 1 appendix.)

Presents data for 1986 and 1987 and trend tables for 1983-87. SOURCEBOOK table 5.7.

This report reviews the judicial workload in the Federal courts. Data on criminal and civil cases filed, terminated, and pending in U.S. district courts and courts of appeal are presented by district and in aggregate form. Information on persons received and removed from probation supervision under Federal jurisdiction, and the U.S. Bankruptcy Court workload are also highlighted. Data on pretrial services, juror service, and Federal Defender Organizations are also presented.

## Federal Offenders in United States District Courts, 1985

(Annual. Washington: Administrative Office of the United States Courts, 1986. 196 pages, 31 tables, 4 figures, 5 appendices.)

Presents data for year ending June 30, 1985 and trend tables for years
ending June 30, 1966-85. SOURCEBOOK table 5.21 .

This report is divided into two sections. Part I emphasizes national data on defendants who were prosecuted in the U.S. district courts. Part Il provides historical offense tables describing the disposition of defendants charged with violation of immigration laws, tax fraud, larceny and theft, forgery, homicide, auto theft, narcotic arug law violations, robbery, weapon and firearm violations, gambling, fraud, embezzlement, antitrust violations, rape, and bank robbery. The five appendices provide 1985 statistical information on individual district courts by nature of offense and type of disposition; type and length of sentence for convicted defendants; type of sentence for convicted defendants; and age, prior record, and sex of convicted defendants.

## Grand and Petit Juror Service in United States District Courts

(Annual. Washington: Administrative Office of the United States Courts, 1987. 174 pages, 102 tables, 3 figures, 3 appendices.)

Presents data for year ending June 30, 1987 and trend tables for years ending June 30, 1983-87. SOURCEBOOK tables 1.79, 1.80.

This report on juror utilization in the Federal courts is presented in three sections. The first section of the report presents information on grand jury operation, petit juror activity, and historical comparisons of petit juror utilization for the period June 30, 1983-June 30, 1987. The second section contains information on 1987 payments for juror attendance, subsistence, mileage, and other costs. The final section provides individual profile pages that highlight pertinent juror statistics for each of the 94 U.S. district courts. Historical data for a 5 -year period are also provided along with comments discussing specific factors affecting juror usage. Appendix A is a glessary of terms found in the report. Appendix B lists U.S. district courts that have adopted rules reducing the size of civil juries. Appendix $C$ provides the local rules assessing juror costs for late settlements for each of the circuits.

Report on Applications for Orders Authorizing or Approving the Interception of Wire, Oral, or Electronic Communications for the Period January 1, 1987 to December 31, 1987
(Annual. Washington: Administrative Office of the United States Courts, 1988. 123 pages, 10 tables, 1 figure, I appendix.)

Presents data for 1987 and trend tables for 1977-87. SOURCEBOOK tables 5.2-5.4.

This is a report on the applications for orders authorizing or approving the interception of wire, oral, or electronic communications, as required by Title 18, United States Code, Section 2519(1). There is a description of the reporting requirements of the statute, regulations for filing reports, and summaries of the reports submitted by judges and prosecuting officials. The tables in the body of the report include data on grants, denials, and authorized length of intercept orders; offenses for which court intercept orders were granted; types of locations of authorized interceptions; nature of the intercept order; average costs of the electronic surveillance; arrests and convictions resulting from electronic surveillance; and a summary of authorized intercepts from 1977 to the year of the report. The appendix tables contain detailed data from reports filed by Federal and State judges and prosecuting officials on court-authorized electronic surveillance activities during the focal year and on arrests, trials, and convictions as a result of intercepts installed during previous years.

American Correctional Association

## 1988 Directory of Juvenile and Adult Correctional Departments, Institutions, Agencies and Parol-

 ing Authorities(Annual. College Park, MD: American Correctional Association, 1988. 595 pages, 15 tables, 6 figures.)

Presents data for 1987. SOLRCEBOOK tables 1.95, 6.81, 6.82.

This directory describes the organization and administrative strucfure of correctional services in all 50 States, the District of Columbia, the Federal Bureau of Prisons, and the U.S. territories. For each jurisdiction, data are provided on institutions, parole boards, and parole and probation services for both adults and juveniles. Descriptions and addresses of each facility within each jurisdiction are provided.

Summary statistics are provided on personnel, fiscal expenditures, correctional populations, paroling authorities, types of facil-
ities, and the death penalty. Information is provided on the U.S. Department of Justice, military correctional facilities, and the Canadian correctional system. New York City, Philadelphia, and Cook County (Chicago) departments of correction are included.

## Vital Statistics in Corrections 1986

(Annual. College Park, MD: American Correctional Association, 1986. 54 pages, 67 tables, 13 figures.)

Presents data for 1985 and 1986, and trend tables for 1910-85. SOLRCEBOOK tables 1.92-1.94.

This report is divided into four sections and details correctional departments in the United States. Section one presents information on agency budgets and the number and type of personnel in adult and juvenile correctional systems. Salary, compensation, and benefits for correctional personnel are provided in Section two. Section three details education and training information for State correctional officers. The fourth section provides adult and juvenile inmate population statistics as well as probation and parole data, correctional departments under court order, and the results of a death sentence survey.

American Humane Association
Highlights of Official Child Neglect and Abuse Reporting 1986
(Annual. Denver, CO: The American Hemane Association, 1988. 58 pages, 24 tables, 10 figures, 3 appendices.)

Presents data for 1986 and trend tables for 1976-86. SOURCEBOOK tables 3.53-3.55.

This is a report by the National Study on Child Neglect and Abuse Reporting, a project of the American Association for Protecting Children, a division of the American Humane Association. Data are collected on officially reported child maltreatment in the United States by participating jurisdictions. The data are from official reports of child maltreatment documented by child protective service agencies nationwide during 1955 . Information is presented on the nature and volume of reporting to these agencies, the characteristics of the reported cases, and the type of response taken by child protective agencies to reported coses.

American Judicature Society, The Center for Judicial Conduct Organizations

## Judicial Conduct Reporter

(Quarterly. Chicago: American Judicature Society. Contents and dates of data presented: See below. SOURCEBOOK tables 1.78, 5.53.)

The Judicial Conduct Reporter is a quarterly publication presenting data on the procedures and operations of State judicial conduct com missions. The newsletter features onnual reports on the disposition of complaints of judicial misconduct and on the personnel and budgets of the State commissions. Also presented are notes on significant court cases in the area of judicial conduct and information on the activities of the Center for Judicial Conduct Organizations.

Astin, Alexander W.; Kenneth C.
Green; William S. Korn; Marilynn
Schalit; and Ellyne R. Berz
The American Freshman: National Norms for Foll 1988
(Annual. Higher Education Research Institute. Los Angeles: University of California, 1988. 174 pages, 14 tables, 13 figures, 7 appendices.)

Presents data for 1988. SOURCEBOOK tables 2.83-2.86.

This report presents national data on the characteristics of students entering American colleges and universities as first-time, full-time freshmen in Fall 1988. These data are based on the responses of 222,296 students at 402 of the Nation's 2 and 4 -year colleges and universities, and have been statistically adjusted to reflect the responses of the 1.6 million first-time, full-time students entering college as freshmen in Fall 1988. Major trends in the Fall 1988 survey are also presented.

Auerbach, Barbara J.; George E. Sexton; Franklin C. Farrow, Ph.D.; and Robert H . Lawson

Work in American Prisons: The Private Sector Gets Involved
(Special. U.S. Department of Justice, National Institute of Justice. Washington: USGPO, 1988 . 113 pages, 2 tables, 1 figure, 6 appendices.)

Presents data for 1987. SOURCEBOOK table 1.103.

This report presents data on the extent and nature of private sector involvement in State prison industries. The information was gathered through a review of the literature, a telephone or mailed survey of the 50 States, and more in depth interviews with public and private participants in five selected jurisdictions. A brief history of the development of prison industries is provided. Detailed accounts of the prison industry experience are presented for five jurisdictions: Arizona, California, Minnesota, Nevada, and Hennepin County, Minnesota. A cost-benefit analysis and recommendations for the development of private-sector prison industries are presented. Finally, a series of appendices addresses issues such as historical developments with an emphasis on legislation, court cases on the status of inmate workers, planning and action outlines, issues in negotiating contracts for private-sector prison industries, and an annotated bibliography.

Begans, Peter
ABC News-Washington Post Poll
(New York: ABC News. Periodicity, contents, and dates of data presented: See below. SOURCEBOOK tables 2.97, 2.98, 2.108, 3.80.)

The ABC News-Washington Post Poll contains the results of opinion surveys conducted by Chilton Research Services of Radnor, Pennsylvania, a subsidiary of American Broadcasting Company, Inc., for ABC News and The Washington Post. There is to be at least one major topical poll per month and frequent spot polls on current issues and trends. A brief note on sample size, sampling error, and survey dates is included in each survey release.

Burton, Velmer S. Jr.; Frances T. Cullen; and Lawrence F. Travis 111
"The Collateral Consequences of a Felony Conviction: A National Study of State Statutes"
(Federal Probation Ll\#\#3 (September 1987), pp. 52-60. 9 pages, 2 tables.)

Presents data for 1986. SOURCEBOOK table 1.108.

This article reports the results of an examination of State statutes governing the loss of civil rights as a consequence of felony conviction. The loss or restriction of the follow-
ing rights is discussed: the right to vote, maintain parental status, remain married, gain public employment, serve as a juror, hold public office, and own a firearm. Registration of felony offenders and civil death are also discussed. Two tables provide a systematic picture of civil rights that are lost or restricted in the 50 States and the District of Columbia. Finally, trends toward increased or decreased restriction of specific civil rights as a result of conviction are discussed.

Burton, Velmer S., Jr.; Lawrence F. Travis, III; and Frances T. Cullen

[^34]
## (International Journal of Com-

 parative and Applied Criminal Justice 12(Spring 1988), pp. 101109. 9 pages, I table.)Presents data for 1986. SOURCEBOOK table 1.109.

This article reports the results of an examination of State statutes governing the restoration of civil rights lost as a consequence of felony conviction. The article discusses the restoration of civil rights through pardon, expungement of one's criminal record, and automatic restoration upon completion of one's sentence. A table provides a systematic description of the available legal methods for restoring a convicted felon's civil rights. Trends in restoration of civil rights are also discussed.

Cheatwood, Derral
"The Life-Without-Parole Sanction: Its Current Status and a Research Agenda"
(Crime and Delinquency
34(January 1988), pp. 43-59. 15 pages, I table.)

Presents data for 1987. SOLRCEBOOK table 1.101.

This article presents a review of life-without-parole statutes for the 50 States. The author distinguishes between statutes that apply to capital offenders and those directed toward habitual or repeat offenders. A total of 29 States were found to have at least one type of statute. A discussion of the use of sentence commutation and its effect on this population of inmates is presented.

In addition, the impact of such statutes on the criminal justice system is discussed with specific reference to prosecution and corrections. Finally, the author points out the need for research in this area and presents specific questions for consideration.

Contact Center, Inc.

## Corrections Compendium

(Monthly. Lincoln, NE: Contact, Inc. Contents and dates of data presented: See below. SOURCEBOOK tables 1.91, 1.96, 5.41, 6.78.)

The Corrections Compendium is a monthly publication focusing on issues in the area of corrections. Regular features of the Corrections Compendium include sections on court decisions, legislation, special interest items, criminal justice publications, inmate lawsuits, and upcoming events. Each issue also carries a new survey and charts on a selected issue (e.g., July 1988 commutations and pardons granted).

The Council of State Governments
The Book of the States 1988-89
(Biennial. Lexington, KY : The Council of State Governments, 1988. 523 pages, 191 tables (estimated), 3 figures. Dates of data presented: See below. SOURCEBOOK tables 1.71, 1.72.)

The Book of the States is a reference work containing information on the operations, revenues, expenditures, and services of State governments. The book is divided into ten sections: State constitutions; the State Executive Branch; the State Legislative Branch; the State Judicial Branch; the State Elections Branch; the State Finances Branch; State Management and Administration; Selected State Activities, Issues, Services; Intergovernmental Affairs; and a final section on historical and contemporary State characteristics. Data that were collected by the Council of State Governments or that were compiled from other sources are presented on a wide variety of topics.

Executive Office of the President. Office of Management and Budget

Budget of the United States Government, Fiscal Year 1990
(Annual. Washington: USGPO, 1989. 631 pages, 125 tables (estimated), 6 figures.)

Presents data for fiscal 1988-92 and trend tables for fiscal 1989-92.
SOURCEBOOK table 1.12.
This report details the actual budgetary expenditures for fiscal 1988 and the projected expenditures for fiscal 1989-92. Data are presented on expenditures of the Federal Government, by department, and on the budget as a whole. Government spending is exploined in terms of notional need, and agency missions and programs.

Gallup, George, Jr.

## The Gallup Poll

(Princeton, NJ: The Gallup Poll. Periodicity, contents, and dates of data presented: See below. SOLRCEBOOK table 2.1.)

The results of public opinion research conducted by the Gullup organization are released every Sunday and Thursday in The Gallup Poll. A wide variety of topics are included in these surveys including problems facing the notion and personal drinking halits. A brief note on sample size, sample tolerance, and survey dates is included in each release.

## The Gallup Report

(Monthly. Princeton, NJ: The Gallup
Poll. Contents and dates of data
presented: See below. SOURCEBOOK
tables 2.3-2.8, 2.10, 2.12-2.19, 2.21,
2.22, 2.30, 2.31, 2.33, 2.34, 2.42, 2.44-2.46, 2.52, 2.55, 2.57-2.61, $2.65,2.89,2.90,2.93,2.94,2.100$, 2.101, 2.103-2.106, 2.109-2.111, 2.115, Fig. 2.2, 3.78, 3.89, 3.90, 3.92, 3.98-3.100, Fig. 3.3.)

The Gallup Report contains the results of opinion surveys conducted by the Gallup Poll. Political, social, and economic trends are presented in issues that include many topics (e.g., February 1989-Abortion, AIDS, Congress, the Presidency, the economy, and the environment). A brief note on sample size, sampling tolerance, and survey dates is included in each issue.

Goldman, Sheldon
"Reagan's Judicial Legacy: Completing the Puzzle and Summing Up"
(Judicature 72(April-May 1989), pp. 318-330. 14 pages, 4 tables.)

Presents data for 1963-88. SOURCEBOOK tables 1.63, 1.64.

This article reports the results of research on judgeships to Federal, district, and appeals courts. Background characteristics of those appointed by President Reagan from 1981-88 are compared with those of appointees made by Presidents Johnson, Nixon, Ford, and Carter. Emphasis is placed on Reagan's appointments for 1985/86 and 1987/88 in relation to appointees for his first term from
1981-84. Appointees who had noteworthy political and legal credentials are highlighted as well as controversial appointees.

Harris, Louis

## The Harris Poll

(Orlando, Fl: Tribune Media Services. Periodicity, contents, and dates of data presented: See below.
SOURCEBOOK tables 2.9, 2.35, 2.56, 2.63, 2.64, 2.114.)

The Harris Poll is a twice weekly release of results of public opinion research conducted by Louis Harris and Associctes. The releases deal with a variety of topics including confidence in selected institutions, gun ownership and abortion. A brief note on sample size and survey dates is included in each release.

Hayes, Lindsay M. and Joseph R.
Rowan
National Study of Jail Suicides: Seven Years Later
(Special. Alexandria, VA: National Center on Institutions and Alternatives, 1988. 58 pages, 33 tables, 5 appendices.)

Presents data for 1979, 1985, and 1986. SOURCEBOOK tables 6.28, 6.29 .

This report presents data on suicides occurring in local jails nationwide during 1985 and 1986. Jail suicide research conducted prior to this report is briefly discussed. The data presented include the number of jail suicides for each State occurring in 1985 and 1986 as well as detailed characteristics of the suicide victim and incident for a sample of the jail suicides occurring in 1986. The 1986
data are also compared to a previous national study conducted in 1979. Five appendices are included. Appendix A provides a summary of the 1979 study, And Darkness Closes In. . .A National Study of Jail Suicides (1981); Appendix B includes the survey instruments from the current study; Appendix C provides information on additional and prior offense charges; Appendix D provides intake screening forms; and Appendix $E$ is a bibliography of jail suicide literature.

Hoetmer, Gerard J.
"Police, Fire, and Refuse Collection, 1987"
(The Municipal Year Book 1988, pp. 137-194. Washington: International City Management Association, 1988. 58 pages, 24 tables, 3 figures.)

Presents data for 1987 and trend tables for 1977-87. SOURCEBOOK tables 1.50 , 1.51, 1.57.

This report presents data gathered through a mail survey sent to all municipalities with populations of 10,000 persons and over in the United States. The survey was conducted in January 1987 by the International City Management Association. Data are presented on personnel, salaries, and expenditure for police, fire, and refuse departments as are data from several similar surveys conducted in previous years.

Insurance Information Institute
Insurance Facts 1988-89
(Annual. New York: Insurance information Institute, 1988. 132 pages, 100 tables, 11 figures.)

Presents data for 1987 and trend tables for 1977-87. SOURCEBOOK figure 3.4.

This yearbook provides data on the property and liability segment of the insurance industry in the United States. Statistics are presented on property and liability insurance companies; policies written and in force, by type of coverage; and insurance written through special programs such as flood insurance and the Federal Crime Insurance Program. Data are presented on insurance losses due to fire, natural disasters, traffic accidents, crime, and other causes.

Jacoby, Joseph E. and Dunn, Christopher S .

National Survey on Punishment for Criminal Offenses, Executive Summary
(Paper presented at the 1987 Meeting of the National Conference on Punishment for Criminal Offenses. Ann Arbor, MI: November 1987. 39 pages, 25 tables, 1 appendix.)

Presents data for 1977 and 1987. SOLRCEBOOK tables 2.37-2.41.

This paper presents information on the attitudes of American adults toward the seriousness of criminal offenses and the punishment of offenders. Crime severity ratings from this survey are compared with severity ratings obtained in the National Survey of Crime Severity, conducted in 1977. The report examines preferences for the type and amount of punishment for selected offenses given various characteristics of the offense, the offender, the victim, and the outcome of the crime. Variation in preferences for punishment based on respondent characteristics is also presented. In addition, respondent attitudes toward the purpose of punishment are examined.

Johnston, Lloyd D., Patrick M. O'Malley; and Jerald G. Bachman

Illicit Drug Use, Smoking, and Drinking By America's High School Students, College Students, and Young Adults, 19751987
(Annual. Washington: USGPO, 1989. 307 pages, 50 tables, 69 figures, 1 appendix)

Presents data for 1987 and trend tables for 1975-87. SOURCEBOOK tables 2.76-2.82, 3.73-3.77, 3.79.

This document is the eleventh in an annual series reporting on drug use and related attitudes of high school seniors and young adults in the United States. The research is sponsored by the U.S. Department of Health and Human Services, National Institute on Drug Abuse. The report presents only highlights of the larger volume published less frequently. The most recent is entitled Drugs and American High School Students: 1975-1983. Two of the major topics treated in the report are the trends in drug use among American high school students since 1975 and the prevalence of drug use among American high school seniors. Also re-
ported are data on school grade at first use; intensity of "high" produced by drug use; attitudes and beliefs among seniors about various types of drug use; and their perceptions of certain relevant aspects of the social environment, such as parental disapproval of drug use or availability of drugs. Beginning in 1985, data on the prevalence and trends in drug use among young adults who have completed high school are incorporated into the report.

Karter, Michael J., Jr.
"U.S. Fire Loss in 1987"
(Annual. Fire Journal (September/October 1988), pp. 33-44. II pages, 5 tables, 5 figures.)

Presents data for 1987 and trend tables for 1977-87. SOURCEBOOK table 3.158.

This article reports the results of the 1987 National Fire Experience Survey conducted by the National Fire Protection Association. Data are presented that describe fire incidence, deaths, injuries, and property loss, by fire type (structural, vehicular, and arson), community size, and geographic region.

Knopp, Fay Honey and William Ferree Stevenson.

## Nationwide Survey of Juvenile and Adult Sex-Offender Treatment Programs and Models, 1988

(Special. Orwell, VT: The Safer Society Program, 1989. 54 pages, 21 tables, 3 appendices.)

Presents data for 1988. SOLRCEBOOK table 1.106.

This report presents data from a national survey of treatment programs for both juvenile and adult sex-offenders. The number of facilities available and the type of treatment services provided are presented for each State and the District of Columbia. Also included is information about the treatment of special juvenile and adult populations. The appendices provide sample questionnaires and the names and addresses of the facilities that were surveyed.

National Center for State Courts
Survey of Judicial Salaries
(Biannual. Williarnsburg, VA: National

Center for State Courts, 1988. 7 pages, 2 tables.)

Presents data for July 1988. SOURCEBOOK table 1.73.

This report presents State judicial salaries as of July 1988. Salaries are presented for the highest court, the intermediate appellate court, and the general trial court of each State. Information is also presented on salary leveis of the Chief Justice and Associate Justice of the highest court and intermediate court as well as salaries of State court administrators.

National Center for State Courts, Conference of State Court Administrators

## State Court Organization, 1987

(See below. Williamsburg, VA: National Center for State Courts, 1988. 420 pages, 34 tables, 5 figures.)

Presents data for 1987. SOURCEBOOK tables 1.77, 1.82, 1.84, 1.85.

This volume is the second in a series of reference volumes examining the organization of State Courts. The first edition was compiled in 1980. This second volume updates information and adds new items describing the management of State appellate and trial courts as of June 30, 1987. The information is presented in three sections; the first provides an overview of the organization and administration of appellate and State trial courts. The second section presents a chart for each of the 50 States describing court structure and types of cases heard in each court. Part three includes a series of descriptive tables providing data on such topics as requirements and qualifications for judges, data on court staff, budget, and juries among various other topics. A glossary and methodology section are also provided.

National Criminal Justice Association

## A Guide to State Controlled Substances Acts

(Special. Washington: National Crimi nal Justice Association, 1988. 124 pages, 14 tables, 5 appendices.)

Presents data for 1987. SOURCEBOOK tables 1.115, 1.116.

This guide presents a comparative review of the controlled substances acts (CSA's) of the 50 States, the

District of Columbia, and the Federal government. These acts govern the possession, use, sale, distribution, and manufacture of drugs that may lead to dependence or abuse. The guide is divided into four sections. The first section reviews the Federal CSA and recent amendments contained in the Anti-Drug Abuse Act of 1986. The next section includes a general overview of each State's CSA and a comparative anolysis of State and Federal CSA provisions. Section three lists summaries of each State's CSA in tabular form for comparison purposes. These summaries include highlights of the particular State's controlled substances act and lists penalties, forfeiture possibilities, and other consequences associated with violation of the CSA. The final section of the guide contains five appendices which list elements of controlled substances acts, penalties for violations, type of drug resulting in enhanced penalties, and type of asset forfeitable under CSA's. Finally, the U.S. Attorney General's guidelines on seized and forfeited property are presented.

National Opinion Reșearch Center
General Social Surveys, 1972-88
(Annual. Storrs, CT: Roper Center for Public Opinion Research, University of Connecticut,' distribuṭors. Contents: See below.)

Presents data for 1972-78, 1980, and 1982-88. SOURCEBOOK tables 2.11, 2.20, 2.23-2.25, 2.29, 2.32, 2.36, 2.43, 2.50, 2.51, 2.62, 2.102, 2.112, 2.113, Fig. 2.1, 3.29, 3.47, 3.48.

This cumulative data file merges all 15 General Social Surveys into a single machine-readable data file with each survey year as a subfile. Interviews were conducted by the National Opinion Research Center during February, March, and April of 1972-78, 1980, and 1982 through 1988. The data are derived from a national probability sample of English speaking adults, 18 years or older, living in non-institutional arrangements in the continental United States. Survey questions relate to a variety of social issues, including politics, abortion, religion, homosexuality, crime, law enforcement, guns, and capital punishment.

The items appearing on the surveys are one of three types: per manent questions that occur in each survey, rotating questions that appear two out of every three years, and a few questions that occur in a
single survey. A comprehensive codebook entitled General Social Surveys, 1972-1988: Cumulative Codebook is published by the Roper Center for Public Opinion Research. Survey methodology and the data program are explained in detail in the document.

National Organization for Victim Assistance
Victim Rights and Services: A Legislative Directory 1987
(Annual. U.S. Department of Justice, Office of Justice Programs. Washington: USGPO, 1988. 237 pages, 4 tables.)

Presents data for 1987. SOLRCEBOOK table 1.107.

This guide to crime victim legislation contains four sections. The first covers victim-related legislation by subject including issues such as victim compensation, funding of victim services, victim bill of rights, and the victim's involvement in criminal justice proceedings. Part two presents a summary of crime victim legislation in tabular form by State. There is also a table describing the elements of the victim compensation programs by State and a table listing the drunk driving countermeasures taken. The third section covers legislative summaries by State and the final section presents samples of victim statutes from several states.

Paul, Amy Cohen

## "Salaries of County Officials for 1987"

(The Municipal Year Book 1988, pp. 125-136. Washington: International City Management Association, 1988. 12 pages, 4 tables, 4 figures.)

Presents data for 1987. SOLRCEBOOK table 1.59.

This article presents data collected from the 1987 County Salary Survey conducted by the International City Management Association. The salaries of county officials are presented by job title, region, county population, and county type. County officials surveyed include the governing board chairperson/president/county judge, county manager, county administrafor, clerk to the governing board, chief financial officer, county health officer, planning director, county en-
gineer, director of welfare/human services, chief law enforcement official, purchasing director, and personnel director.

The Rose Institute of State and Local Government and the American Legislative Exchange Council

## Juvenile Justice Reform: A Model for the States

(Claremont, CA: The Rose Institute of State and Local Government and the American Legislative Exchange Council, March 1987. 201 pag:s, I table, 50 figures. Periodicity: See below.)

Presents data for 1986. SOURCEBOOK table 1.104.

This report focuses on reforming juvenile justice codes. A Model Delinquency Act and a Model Disobedient Children's Act are presented in order to aid State legislators interested in reforming current juvenile justice codes. Also included are suggested legislation and criminal code amendments regarding mentally incapacitated juveniles, release of juveniles from physical custody, and school safety issues. A comporisen of current juvenile justice codes for all 50 States is provided in tabular form. Results of a national survey regarding attitudes toward the "Model Acts" are also presented. Finally, an annotated bibliography is provided.

Sato, S. Alban
" 1987 Salaries of Municipal Officials for
(The Municipal Year Book 1988, pp. 103-124. Washington: International City Management Association, 1988. 22 pages, 4 tables, 2 figures.)

Presents data for 1987 and trend tobles for 1982-87: SORRCEBCOK table !.58.

This article presents data collected from a survey of municipal officials conducted by the International City Management Association in the summer of 1987. The salaries of municipal officials are presented by job title, city size, region, city population, and form of government. Selected central city and suburban officials' salaries are also presented as are a comparison of average salaries from 1981-86. City officials surveyed include the mayor; chief appointed
administrator; assistant city manager; city clerk; chief financial officer; controller; treasurer; engineer; police chief; fire chief; librarian; and directors of public works, planning, personnel, parks and recreation, data processing, and purchasing.

Szymanski, Linda A., Esq.
Waiver/Transfer/Certification of Juveniles to Criminal Court: Age Restrictions--Crime Restrictions
(Special. Pittsburgh, PA: National Center for Juvenile Justice, 1987. 13 pages, 2 tables.)

Presents data for 1987. SOURCEBCOK table 1. 105.

This report presents information on the transfer of juvenile offenders to adult criminal court by judicial waiver. Citations to specific provisions of State juvenile codes, age restrictions, and offense restrictions governing juvenile waiver to criminal court for the 50 States and the District of Columbia are provided in tobular form. Information regarding the currency of each State's legislation is also included.

## U.S. Department of Health and Human Services, National Institute on Drug Abuse

## Notional Household Survey on Drug Abuse: Main Findings 1985

(Periodic. Washington: USGPO, 1988. 173 pages, 94 tables.)

Presents data for 1985. SOURCEBOOK tables 3.81-3.86, 3.93-3.97.

This report presents data on drug abuse among the Nation's population age 12 and over. Prevalence estimates for specific drugs are provided for age groups, sex and race, as well as other demographic characteristics. The drugs included are marihuana, cocaine, inhalants, hallucinogens, PCP, heroin, stimulants, sedatives, tranquilizers, analgesics, other psychotherapeutics, alcohol, cigarettes, and smokeless tabacco. Estimates of frequency of use as well as problems associoted with use are provided. Population estimates, based on the prevalence figures, are also presented. An appendix provides methodological and statistical information as well as a glossary of terms. Finally, selected portions of the survey questionnaire are provided.
U.S. Department of Justice, Bureau of Justice Statistics

## Capital Punishment 1987

(Annual. Bulletin NCJ-II 1939. Washington: U.S. Department of Justice, July 1988. 11 pages, 12 tables, 3 figures.)

Presents data for 1987 and trend tables for 1953-87.. SOLRCEBOOK tables 6.101, 6.102, 6.109, 6.112, 6.113.

This bulletin presents data on prisoners sentenced to death, current methods of execution, and recent changes in capital punishment legislation. Prisoner information includes sex, race, ethnicity, age, education, marital status, and criminal history.

## 1984 Census of State Adult Correctional Facilities

(Special. NCJ-105585. Washington: USGPO, 1987. 34 pages, 32 tables.)

Presents data for 1984. SOURCEBOOK tables 6.52-6.63.

This report presents information from the 1984 Census of State Correctional Facilities conducted by the Bureau of Justice Statistics. Previous censuses were conducted in 1974 and 1979. Data is provided on facilities, inmates, programs, employees, and expenditures for all State-operated confinement and community-based correctional facilities throughout the United States. The report is divided into three sections with section one providing a national overview of facilities and inmates/residents. The following section focuses on confinement facilities and details characteristics such as number and type of full-time employees, facility function and security level, age of facility, and number of inmates in programs and on work assignments. The final section examines both confinement and cormunity-based facilities by State and region and presents data on number of full-time employees and amounts of payrolls and operating expenditures.

Correctional Populations in the United States, 1987
(Annual, NCJ-118762. Washington:
USGPO, 1989, 149 pages, 81 tables.)
Presents data for 1987. SOURCEBOOK
tables 6.30-6.37, Fig. 6.1-Fig. 6.4, $6.83,6.89,6.99,6.103-6.108,6.110$, 6.111.

This report consolidates information collected through surveys of State and Federal corrections officials. The surveys, which include the 1987 Survey of Jails, 1987 Uniform Parole Report, 1987 National Probation Report, 1987 National Prisoner Statistics, and 1987 Survey of Youth in Long-term, State-operated Facilities, were sponsored by the Bureau of Justice Statistics and conducted by the U.S. Bureau of the Census. Data on the numbers and characteristics of persons under correctional supervision in each jurisdiction, including movements between the major components of the correctional system, are presented. Parole and sentencing terms are examined. Characteristics of youthful offenders in long-term, State-operated institutions are presented. In addition, data on the numbers and characteristics of offenders under sentence of death ore reported.

## Criminal Defense for the Poor, 1986

(Special. Bulletin NCJ-112919. Washington: U.S. Department of Justice, September 1988. 8 pages, 9 tables, 1 figure.)

Presents data for 1982 and 1986. SOURCEBOOK tables 1.86-1.89.

This bulletin presents information from the 1982 and 1986 surveys of indigent criminal defense programs. A nationally representative stratified sample of counties were surveyed regarding the organization, caseload, and funding levels for defense services to the poor offered by the jurisdiction. Information is provided on the type of defense program available in counties for all 50 States and the level of government under which the program is organized. Expenditure data include per capita costs, average cost per indigent case, and State rankings for these measures. In addition, a brief methodology section is included along with jurisdictional notes for specific States.

## Criminal Victimization 1987

(Annual. Bulletin NCJ-II3587. Washington: U.S. Department of Justice, October 1988. 6 pages, 7 tables, 4 figures.)

Presents data for 1986 and 1987 and trend tables for 1973-87. SOURCEBOOK tables 3.2, 3.3.

This report presents information on criminal victimization in the United

States using National Crime Survey (NCS) data from 1986 and 1987 based on population figures derived from the 1980 census. Data presented in this report include levels and rates of victimization for personal and household crimes and police reporting rates for personal and household crimes for 1986 and 1987. Changes in victimization rates and police reporting rates for personal and household crimes for the period 1973 through 1987 are also presented.

Criminal Victimization in the United States, 1987
(Annual. National Crime Survey
Report NCJ-\}|5524. Washington: U.S. Department of Justice, 1989. 109 tables, I appendix.)

Presents data for 1987. SOLRCEBOOK tobles 3.1, 3.4-3.6, 3.14-3.28, 3.30, 3.32-3.44.

This report presents information on criminal victimization in the U.S. during 1987, and is the 15th in a series of annual reports prepared under the National Crime Survey (NCS) program. The NCS, conducted for the Bureau of Justice Statistics by the U.S. Bureau of the Census, is based on findings from a continuous survey of a representative sample of approximately 46,000 housing units across the U.S., inhabited by about 93,000 individuals age 12 and over.

The NCS concentrates on certain criminal offenses: the personal crimes of rape, robbery, assault, and larceny, and the household crimes of burglary, larceny, and motor vehicle theft. Both completed and attempted crimes are included in the survey. These crimes are examined from the perspective of their frequency, the characteristics of the victims and offenders, the circumstances surrounding the offenses and their impact, and the pattern of police reporting.

The appendices present the data tables, survey questionnaire and instrument, and technical information concerning sampling design, data collection, estimation procedures, and information on standard error computation. Estimates of the economic cost of crime to victims are also presented. The final section of the report is a glossary, listing crime category definitions and the meanings of variables and other terms used in the NCS.

## Drug Law Violators, 1980-86

(Special Repor† NCJ-III763. Washington: U.S. Department of Justice,

June 1988. 9 pages, 18 tables, 1 appendix.)

Presents data for 1986 and trend tobles for 1980-86. SOURCEBOOK tables 4.27, 5.22-5.25).

This report presents data on Federal drug law violators. Included are dispositions of U.S. Attorneys' cases, information on pretrial release, sentences imposed, and average and median sentence length. Also included are data on demographic characteristics of those arrested for Federal drug law offenses. Mos $\dagger$ tables include Federal data on non-drug offenses and offenders for comparison. Trends for convictions and sentence length are provided for 1980-86.

## Drug Use and Crime

(Special Report NCJ-111940. Washington: U.S. Department of Justice, July 1988.8 pages, 17 tables.)

Presents data for 1986. SOURCEBOOK tables 6.46-6.51.

This report presents information on drug use histories of State prison inmates based on the 1986 Survey of Inmates of State Correctional Facilities. Drug use histories are presented by age of onset, sex, race, seriousness, current offense, employment, income source, and dependency. The role of drug treatment programs for these inmates is also examined and an explanation of the methodology is presented.

## Felony Sentences in State Courts, 1986

(Periodic. Bulletin NCJ-115210. Washington: U.S. Department of Justice, February 1989. 8 pages, 6 tables.)

Presents data for 1986. SOURCEBOOK tables 5.30-5.32.

This bulletin presents data on felony sentences imposed by State courts. It is the first report from the National Judicial Reporting Program and the first nationally-representative data describing the number of persons convicted of felonies in State courts. Data are presented on estimated number of felony convictions, types of felony sentences, lengths of felony sentences, and estimated time to be served in State prisons.

## Households Touched by Crime, 1987

(Annual. Bulletin NCJ-11|240. Washington: U.S. Department of Justice, May 1988. 6 pages, 5 tables, 3 figures.)

Presents data for 1987 and trend tables for 1975-87. SOURCEBOOK tables 3.49, 3.50, Fig. 3.1, Fig. 3.2.

This annual bulletin presents data from the National Crime Survey (NCS) regarding the frequency with which American families experience crime directly. While concentrating on 1987, the bulletin also presents trend data from 1975. Demographic characteristics presented include race/ethnicity of household head, annual family income, region, and place of residence. An explanation of the methodology involved in developing the households touched by crime indicator is also included.

## Jail Inmates 1987

(Annual. Bulletin NCJ-114319. Washington: U.S. Department of Justice, December 1988.6 pages, 11 tables.)

Presents data for 1983, 1986, and 1987 and trend tables for 1983-87. SOURCEBOOK tables 6.24-6.27.

The bulletin preserits data from the 1983 jail census and the 1986 and 1987 Annual Survey of Jails. Data presented include average daily population, admissions and releases, demographic characteristics, rated jail capacity, and percent occupied. Also included is an appendix table which lists the one-day counts and the average daily population of jail inmates for 1978 and 1983-87.

Justice Expenditure and Ernployment Extracts: 1984, 1985, and 1986 Data from the Annual General Finance and Employment Surveys
(Annual. Washington: U.S. Department of Justice, 1989. Contents: See below.)

Presents data for 1984, 1985, and 1986. SOLRCEBOOK tables 1.1-1.11, 1.14-1.27.

This report presents criminal justice expenditure and employment data for 1984, 1985, and 1986. The data were compiled from existing data sources and from surveys of government finances and employment conducted by the U.S. Bureau of the Census. The report includes a discussion of the methodology employed in the study and details differences in the sources of justice expenditure and employ-
ment data frorn 1971-86. Data are presented for Federal, State, and local governments on three categories of criminal justice activities: police protection; judicial, including legal services, prosecution, and defense; and corrections. Public expenditure data are for fiscal 1984, 1985, and 1986 and employment data for the months of October 1984, 1985, and 1986. The appendix contains definitions of concepts, categories, and terms used in the report.

## Motor Vehicle Thefts

(Special Report NCJ-109978. Washington: U.S. Department of Jistice, March 1988. 9 pages, 18 tubles, 2 figures.)

Presents trend tables for 1973-85 (aggregated). SORCEBOOK table 3.31 .

This report presents motor vehicle theft victimization data aggregated for 1973-85. The information is drawn from the Notional Crime Survey which is conducted by the U.S. Bureau of the Census for the Bureau of Justice Statistics. Motor vehicle thefts are examined in terms of households experiencing such victimizations during 1973 to 1985. Included is information on type of vehicle stolen, place and time of theft, and selected demographic characteristics of victims. Information regarding reasons for reporting and not reporting theft to police, days lost from work, and the value of losses and recoveries are also examined.

Population Density in State Prisons
(Special Report NCJ-103204. Washington: U.S. Department of Justice, December 1986. 7 pages, 11 tables.)

Presents data for 1984. SOURCEBOOK tables 6.64-6.68.

This bulletin presents information from the 1984 Prison Census sponsored by the Bureau of Justice Statistics and conducted by the Bureau of the Census. Information was gathered from all Stote-operated correctional facilities and the District of Columbia's prison system. Data are presented on total housing space availability, the average amount of square feet per inmate, the number and percent of inmates in multiple housing units, and the number and rate of inmate deaths, assaults, and disturbances in State prisons.

Pretrial Release and Detention: The Bail Reform Act of 1984
(Special Report NCJ-109929. Washington: U.S. Department of Justice, February 1988. 6 pages, 10 tables.)

Presents data for 1983 and 1985. SOURCEBOOK tables 5.15-5.20.

This repart examines pretrial release and detention for Federal defendants before and after the Bail Reform Act of 1984. Information was drawn from the database maintained by the Pretrial Services Agency (PSA) of the Administrative Office of the U.S. Courts, which tracks pretrial services for defendants in all Federal Courts. A sample of cases initiated between August 1 and December 31 in either 1983 or 1985 was included to examine differences in the likelihood that these defendants will be held until trial with or without the option of bail, or released through their own recognizance or other financial conditions. Changes in the characteristics of defendants held until trial and changes in violation rates for defendants released before trial are considered. Information on the defendant's offense, criminal history, and selected demographics are presented as well as public safety considerations used to determine pretrial detention. A brief merhodoiogy section describes the PSA database and possible sources of reporting bias within the sample of cases used for analysis.

## Probation and Parole 1987

(Annual. Bulletin NCJ-II3948. Washington: U.S. Department of Justice, November 1988.4 pages, 4 tables.)

Presents data for 1987 and tremd tables for 1977-87. SOLRCEBOOK tables 6.1, 6.2, 6.84, 6.85.

This bulletin reports on probation and parole populations for the 50 States, the District of Columbia, and the Federal systern. Data are presented on probation and parole entries and exits for 1987, and on the rate of probationers and parolees per 100,000 adult residents. Summary data comparing prison, probation, and parole populations are presented as are national data on trends in methods of State prison releases.

Profile of State and Local Law Enforcement Agencies, 1987
(Periodic. Bulletin NCJ-l13949. Washington: U.S. Department of Justice, March 1989. 9 pages, 28 tables.)

Presents data for 1987. SOLRCEBOOK tables 1.28-1.49.

This bulletin presents data from the first report of the Law Enforcement Management and Administrative Statistics program of the Bureau of Justice Statistics. The data include numbers of employees, operating budgets, salaries, special functions, and selected characteristics of personnel in local, State, and sheriffs' law enforcement agencies in the United States. Salary ranges are presented by job title; race, sex, and ethnic information is provided. Information is also presented on the size of the population served by the agency.

## Profile of State Prison Inmates 1986

(Special. Bulletin NCJ-109926. Washington: U.S. Department of Justice, January 1988. 8 pages, 15 tables.)

Presents data for 1979 and 1986. SOLRCEBOOK tables 3.51, 6.38-6.45.

This bulletin presents the results of the 1986 Survey of Inmates of State Correctional Facilities. This survey is conducted by the Bureau of Census for the Bureau of Justice Statistics. Data on sociodemographic characteristics, current offense, criminal history, and prior sentences of a sample of State prisoners are provided. Also included is information on inmates' pre-incarceration alcohol and drug use as well as selected characteristics of the victims of violent crimes committed by these inmates. Data from the 1979 Survey of Inmates is also presented for comt parison.

## Recidivism of Prisoners Released

 in 1983(Special Report NCJ-116261. Washington: U.S. Department of Justice, April 1989. 13 pages, 21 tables, 2 figures.)

Presents data for prisoners released in 1983. SOURCEBOOK tables 6.936.98.

This report presents information on the criminal activities over a 3 -year followup period of a sample of State prisoners released from || State prison systems in 1983. Rearrest, reconviction, and reincarceration rates are examined across selected demographic and criminal history characteristics. Recidivism in terms of rearrest is examined in greater detail. Rearrest rates are presented for such factors as rearrest charge,
most serious offense at release, likelihood of rearrest, number of prior adult arrests, and time served in prison. An appendix table compares releasees in the II State with those in 29 States in 1983.

## Recidivism of Young Parolees

(Special Report NCJ-104916. Washington: U.S. Department of Justice, May 1987. 9 pages, 11 tables, 2 figures.)

Presents data for young adults paroled in 1978. SOURCEBOOK tables 6.91, 6.92.

This report presents information on the criminal activities over a 6-year followup period of a sample of young adults paroled in 1978 from prisons in 22 States. It examines these parolees' recidivism rates through factors such as prior arrest record, seriousness of offense at both parole and rearrest, age, and time served in prison. Demographic characteristics are presented and an appendix is included which compares this study with previous studies of recidivism.

## The Redesigned National Crime Survey: Selected New Data

(Special Report NCJ-114746. Washington: U.S. Department of Justice, Jonvary 1989. 10 pages, 15 tables, 1 appendix.)

Presents data for 1986 and 1987. SOURCEBCOK tables 3.7-3.13, 3.45, 3.46.

This report presents data collected from a series of questions added to the Notional Crime Survey in Juiy 1986. The new areas of information presented are: victim's perception of drug and alcohol use by violent offenders; protective actions taken by victims and bystanders; and the response of police and other criminal justice personnel to reported crimes. Tables include characteristics of offenders, types of self-protective measures taken by victims, and whether or not victims perceived these measures to be helpful or harmful. Tables also present data on initial police response to the victimization and follow-up police contact with the victim. Additionally, information is presented on victim's knowledge of the offender's arrest, and whether victim assistance agencies or other criminal justice authorities were in confact with the
victim. An appendix is included that compares data on offenders' use of drugs or alcohol as perceived by victims with self-reported drug and alcohol use of State prison inmates.

Survey of Youth in Custody, 1987
(Special Report NCJ-113365. Washington: U.S. Department of Justice, September 1988. 9 pages, 15 tables.)

Presents data for 1987. SOURCEBOOK tables 6.12-6.23.

This report present's data from a survey of juveniles and young adults in State-operated training schools. The dato were collected by the Bureau of the Census for the Bureau of Justice Statistics. Information is presented on several demographic characteristics such as offense characteristics, and criminal histories of youth in long-term State-operated juvenile institutions. Also provided are characteristics of victims of youth confined for violent offenses. Finally, extensive information on previous drug and alcohol use by youths in custody is provided.

## Time Served in Prison and on Parole 1984

(Special Report NCJ-108544. Washington: U.S. Department of Justice, Janvary 1988, 9 pages, 12 tables, 1 figure.)

Presents data for 1984. SOURCEBOOK tables 6.69-6.72, 6.86-6.88, Fig. 6.5.

This report provides information on time served by offenders released from State prisons and from parole in 33 States. The report presents data on demographic characteristics and original conviction offense of prison releasees, sentence length and time served, and prior felony incarcerations. In addition, the report compares the time served in prison by those who successfully completed their parole terms with those who were unsuccessful and returned to prison. The bulletin contains definitions of offense types and provides a brief review of the methodology used for the survey.
U.S. Department of Justice, Criminal Division
"Report to Congress on the Activi ties and Operations of the Public Integrity Section for 1987"
(Annual. Washington: U.S. Department of Justice. Mimeographed. 50 pages, 3 tables.)

Presents data for 1977-87. SOURCEBOOK table 5.52.

This report was compiled by the Public Integrity Section of the U.S. Department of Justice. It presents tabular information describing Federal prosecutions of Federal, State, and local public officials for offenses involving abuse of public office. The number of public officials and others involved who were indicted, convicted, and owaiting trial is presented for each year from 1977 to 1987. Additionally, the number of convictions of individuals involved in abuse of public office is reported by judicial district.
U.S. Department of Justice, Drug Enforcement Administration

1988 Domestic Carnabis Eradication/Suppression Program-Final Report
(Annual. Washington: iJ.S. Department of Justice, 1988. 21 pages, 7 tables, 4 figures, 1 appendix.)

Presents data for 1988: SOURCEBOOK table 4.30.

This document reports on the Drug Enforcement Administ:ation's (DEA) Domestic Marijuana Eradication/ Suppression Program, describing the effort of the DEA in cooperation with State, local, and other Federal agencies to eradicate domestically cultivated marihuana in the United States. The report presents statistics on the number of marihuana plants destroyed, the number of plots sighted and eradicated, the number of persons arrested, and the number of weapons seized in connection with the eradication program. Data are also presented on the number of sinsemilla plants destroyed, the number of greenhouses eradicated, and the value of assets seized.
U.S. Department of Justice, Executive Office for United States Attorneys

## United States Attorney's Office: Statistical Report Fiscal Year 1988

(Annual. Washington: U.S. Department of Justice, 1988. 82 pages, 39 tables, 14 figures.)

Presents data for fiscal 1988 and trend tables for fiscal 1979-88. SORRCEBOOK tables 5.5, 5.6.

This annual publication is comprised of charts, tables, and commentary summarizing the criminal and civil workloads in U.S. Attorneys' offices. Data are presented on civil and criminal cases filed, terminated, and pending; criminal complaints received, closed, and pending; monetary and nonmonetary civil matters received, terminated, and pending; criminal and civil trials in U.S. district courts; and number and method of disposition of criminal cases and defendants in U.S. district courts and U.S. appellate courts. Additional information is provided on fines imposed, collected, suspended, and uncollectable; grand jury proceedings; appeals filed and terminated in U.S. Attorneys' offices; and staffing in U.S. Attorneys' offices.
U.S. Department of Justice, Federal Bureau of Investigation
"Bank Crime Statistics, Federally Insured Financial Institutions"
(Annual. Washington: U.S. Department of Justice, 1988. Mimeographed. 21 pages, 46 tables.)

Presents data for 1987. SOURCEBOOK tables 3.138-3.140.

This report presents data on crime involving Federally insured financial institutions. The first three sections of this report present data on violations of Federal bank robbery statutes and the Hobbs Act. The data are broken down by characteristics of the banking institutions, offenders, property loss and recovery, community characteristics, deaths, injuries sustained, hostages taken, and State and region of occurrence. The final section of the report presents data on the number of bank fraud and embezzlement investigations by the amount losi and by Sidite und territory.

## Bomb Summary 1987

(Annual. FBI Uniform Crime Reports. Washington: USGPO, 1988. 20 pages, 13 tables, 5 figures.)

Presents data for 1987 and trend tables for 1978-87. SOURCEBOOK tables 3.154, 3.155.

This summary provides tables, charts, narrative descriptions, and comments on bombing incidents reported to the FBI. Data are presented along such lines as type of target; region; population group; time of day; day of week; month of year; apparent motive, including those incidents claimed by terrorist groups; and personal and property damage.

## Crime in the United States, 1987

(Annual. FBI Uniform Crime Reports. Washington: USCPO, 1988. 351 pages, 104 tables (estimated), 36 figures, 5 appendices.)

Presents data for 1987 and trend tables for 1983-87. SOURCEBOOK tables 1.52-1.54, 3.115-3.120, 3.1223.137, 3.159-3.161, 4.1-4.21, Fig. 4.1-Fig. 4.3, 4.23-4.26.

This report begins with a summary of the Uniform Crime Reporting Program. Each Index offense (murder and nonnegligent manslaughter, aggravated assault, forcible rape, robbery, burglary, larceny-theft, motor vehicle theft, and arson) is described individually in terms of the volume and trend of offenses known to police, the nature of the offense (e.g., type of weapon used, regional distribution, or target of the offense), clearances of the offense, and persons arrested and charged. Data on Index offenses cleared by arrest are then presented, followed by information on persons arrested and persons charged. The last section of the report focuses on law enforcement personnel.

Data are presented on offenses known to police by State, region, size of place, and extent of urbanization. Clearance and arrest information are presented for the United States as a whole (estimated), cities, suburban areas, and rural areas. Disposition data are based on a limited number of reporting agencies and are presented by offense, except for juveriles taken inte custody. The law enforcement personnel information includes data on the number of sworn and civilian law enforcement employees in the United States.

The 1987 report includes five appendices. The first appendix describes the data base and construction of each of the major tables in the report. Definitions of the offenses are presented in the second appendix. In the third appendix there are definitions of population categories used throughout the report.

The fourth appendix presents the Index of crime and the number of In dex offenses known to police by Metropolitan Statistical Area. The fifth appendix is a directory of State Uniform Crime Reporting Programs.

## Law Enforcement Officers Kilied and Assaulted, 1987

(Annual. FBI Uniform Crime Reports. Washington: USGPO, 1988. 59 pages, 38 tables, 3 figures.)

Presents data for 1987 and trend tables for 1978-87. SOURCEBOOK tables 3.141-3.151.

This report contains comments, tables, charts, and descriptive summaries on law enforcement officers feloniously killed and assaulted in the line of duty. Data on officers killed are presented by geographic region; population group; circumstance at the scene of the incident; type of officer assignment; type of weapon used in killing the officer; location of the fatal wound; distance between the officer and offender; and the month, day, and time of the attack. Profiles of the victim officers and the known offenders are included as well as a brief summary of the incidents by month and jurisdiction. Data on officers assaulted are presented by geographic region, population group, type of weapon, circumstance at the scene of the incident, type of officer ass: gnment, percent receiving personal injury, time of day, and percent cleared.

The report also presents data on assaults on Federal officers from five sectors of the U.S. Government: the Department of the Interior, the Department of Justice, the Department of the Treasury, the judicial branch, and the U.S. Postal Service. This section begins with departmental summaries and descriptive summaries of selected incidents of assaults on Federal officers that occurred during 1987. Data are presented on the number of known assailants, officers killed or injured, type of weapon, month, type of activity officer was engaged in at time of incident, disposition of known assailants, and demographic region.
U.S. Department of Justice, Federal Bureau of Prisons

[^35](Annual. Washington: Federal Bureau of Prisons, 1987. 116 pages, 42 tables.)

Presents data for fiscal 1986 and trend tables for fiscal 1950-86. SOURCEBOOK tables 6.73-6.77.

This report describes the population of, admission to, and discharges from Federal institutions in fiscal year 1986. Detailed data are provided on the choracteristics of offenders (e.g., offense, age, race) confined in Federal institutions on Sept. 30, 1986 and on offenders admitted and discharged during fiscal year 1986.
U.S. Department of Justice, U.S. Marshals Service

The Director's Report: A Review of the United States Marshals Service in FY 1988
(Annual. Washington: U.S. Department of Justice, 1988.76 pages, 10 tables, 15 figures, 2 appendices.)

Presents data for fiscal 1988 and trend tables for fiscal 1984-88. SOURCEBOOK tables 1.67-1.70, Fig. 1.1, Fig. I.2.

This report covers the activities of the U.S. Marshals Service (USMS) for fiscal year 1988. A brief history of the USMS is provided, followed by an explanation of various USMS duties. These duties include fugitive investigations, prisoner processing and detention, prisoner production and transportation, protection of the judiciary, witness security, execution of court orders, government seizures, special operations, and intelligence.

The report includes two appendices. The first appendix describes support services provided by the USMS to other Federal justice agencies. The second appendix provides a brief explanation of executive direction, support, and staff development of and within the USMS.
U.S. Department of Justice, U.S. Parole Commission

Annual Report of the United States Parole Commission October 1, 1986 to September 30, 1987
(Annual. Washington: USGPO, 1988. (9 pages, 9 tables.)

Presents data for fiscal 1987 and trend tables for fiscal 1984-87. SORCEBOOK tables 1.97-1.99, 6.90.

This report presents information on the activities of the U.S. Parole Commission for fiscal year 1987. The first part of the document describes the guidelines used in reaching various types of parole decisions and the procedures invol"ed in administrative appeals and the field supervision of parolees. Recent litigation involving the U.S. Parole Commission is pre-sented as well as a brief overview of projects carried out by the Research Unit. The report documents workioad statistics and decision trends for the fiscal year, describing number and type of hearings conducted, parole grants and warrants issued, percent of decisions within guidelines, percent of hearings with inmate representation, and the results of appeals to parole decisions. Finally, biographical information for the parole commissioners is provided.
U.S. Department of State

## Patterns of Global Terrorism: 1988

(Annual. Washington: U.S. Department of State, 1989. 85 pages, I table, 6 figures, 3 appendices.)

Presents datc for 1988 and trend tables for 1980-88. SOLRCEBOOK table 3.162-3.165.

This report provides tables, charts, narrative descriptions, and comments on incidents of international terrorism. Data are presented on types of incidents and victims, and on terrorist groups, regional patterns, counter-terrorist activities, and State-supported terrorism. Appendix A presents a chronology of significant terrorist events in 1988. Appendix $B$ provides a worldwide overview of organizations that engage in terrorism. Appendix C provides a map identifying the location of international terrorist incidents in 1988.
U.S. Department of Transportation, Federal Aviation Administration

Semi-Annual Report to Congress on the Effectiveness of the Civil Aviation Security Program, July 1-December 31, 1987
(Semi-annual. Washington: U.S. Department of Transportation, 1988. 36 pages, 6 tables, 5 figures.)

Presents data for 1987 and trend tables for 1978-87. SOURCEBOOK tables 3.166, 3.167.

These reports coniain data on the threats against civil aviotion, both foreign and domestic, in the forms of hijackings, airport bombings, bomb threats, and security incidents. Also included in these reports are data on passenger screening activities and summaries of other ongoing preventive measures. This particular report covers the period July I to Dec. 31, 1987, and provides more detailed descriptions of criminal acts against civil aviation committed during that period. The trend tables span various combinations of the years from 1978 to 1987 depending on the availability of data.
U.S. Department of Transportation, National Highway Traffic Safety Administration

## Digest of State Alcohol-Highway Safety Related Legislation, 7th ed., January 1989

(Annual. Washington: USGPO, 1989. 461 pages, 2 tables, 2 appendices.)

Presents data for 1989. SOLRCEBOOK tables 1.111-1.114.

This seventh edition of the digest provides a detailed description of the various statutory provisions related to alcohol use and highway safety. The data were collected through on examination of the statutory codes of the 50 States, the District of Columbia, and Puerto Rico. Statutory provisions are examined in the following areas: blood alcohol concentration levels as evidence in court, preliminary breath test and implied consent laws, chemical tests authorized under implied consent laws, provisions related to adjudication of driving while intoxicated charges, sanctions for refusal to submit to a blood alcohol concentration test, sanctions following a conviction for driving while intoxicated related offenses, laws requiring a blood alcohol concentration test on persons killed in traffic crashes, minimum legal drinking age, liability of owners of drinking establishments for serving alcohol to intoxicated patrons and to minors, open container laws, and anti-consumption laws. The appendices provide the Uniform Vehicle Code and Federal Alcohol Incentive Grant Criteria.

Fatal Accident Reporting System 1986
(Añnuăl. Washingion: U.S. Department of Transportation, 1988. 129 pages, 121 tables, 80 figures, 5 appendices.)

Presents data for 1986 and trend tables for 1980-86. SOURCEBOOK tables 3.101, 3.102.

The Fatal Accident Reporting System (FARS) gathers data on traffic accidents occurring in the United States that result in loss of human life. FARS data are collected by each State under contractual agreements with the National Highway Traffic Safety Administration. This report presents information on traffic fatality trends by demographic characteristics and related situational factors. A number of tables and figures are presented on the characteristics of fatal accidents including alcohol involvement, use of safety belts, type of vehicle involved, and involvement of pedestrians. Five appendices and a glossary are included.
U.S. Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms

Explosive Incidents Report 1987
(Annual. Washington: U.S. Department of the Treasury, 1988. 60 pages, 22 tables, 10 figures.)

Presents data for 1987 and trend tables for 1978-87. SOURCEBOOK tables 3.152, 3.153, 3.156, 3.157.

This report provides tables and figures on and narrative descriptions of criminal bombings and other explosives incidents that were reported to and investigated by the Bureau of Alcohol, Tobacco and Firearms. This, however, dues not necessarily include all the bombings and explosives incidents that may have occurred in the United States during these years.

The report is divided into four sections. The first section analyzes the explosive incidents. Data are presented on the types of incidents, targets, motives, injuries, property damage, types of devices, geographic location, and peak occurrences of known bombings. The second section describes stolen and recovered explosives. The third section analyzes significant explosives investigations occurring in 1987 and the final section presents a directory of the

Bureau's regional and district offices. Throughout the report, a 10 -year retrospective of explosives incidents dato is presented.
U.S. Department of the Treasury, U.S. Customs Service

## Customs U.S.A.

(Annual. Washington: U.S. Department of the Treasury, 1988. 40 pages, 12 tables.)

Presents data for fiscal 1987 and trend tables for fiscal 1983-87. SOURCEBOOK tables 4.28, 4.32.

This document describes the activities of the U.S. Cusioms Service for fiscal 1987. The report discusses the agency's role in collecting revenue from imports and enforcing customs and related laws. Data are presented in such areas as Customs' collections by region, district, and category; carriers and persons entering the United States; merchandise entries; and seizures of property, narcotics, and dangerous drugs for violation of laws enforced by the Customs Service.
U.S. Postal Service, U.S. Postal Inspection Service
Diges of Activities, Fiscal Year 1988
(Annual. Washington: U.S. Postal Inspection Service, 1989. 3 pages, 3 tables.)

Presents data for fiscal 1988. SOURCEBOOK tables 5.44, 5.45.

This document presents information on the law enforcement activities of the U.S. Postal Inspection Service. Arrest and conviction data are provided for internal crimes involving U.S. Postal Service employees and include offenses such as the mistreat ment of mail, mail theft, financial offenses, abuse of worker's compensation programs, and narcotics related crime. External offenses involve individuals or groups outside the organization. Arrest and conviction data are presented for burglary, robbery, and mail theft. In addition, information is provided for mail fraud, prohibited mailings, and the investigation of crime laboratories. The final two sections of the document present data on internal audits of the Postal Service and postal crime prevention and security.

Walker, Samuel
Employment of Black and Hispanic Police Officers, 1983-1988: A Fol-low-up Study
(Occasional Paper No. 89-1 (1989). Center for Applied Urban Research. Omaha, NE: University of Nebraska at Omaha. 8 pages, 2 tables.)

Presents data for 1983 and 1988. SOURCEBOOK tables 1.55, 1.56.

This document reports the results of a 5 -year follow-up to a similar study of racial minority employment in police departments of the 50 largest cities in the United States. The tables show the percentage of Black and Hispanic officers in the departments and an index of how those percentages compare with the Black or Hispanic population in the community. Percent change in the index between 1983 and 1988 is provided. The existence of affirmative action plans for Blacks and Hispanics is also indicated.

## APPENDIX I

Justice Expenditure and Employ-ment--Survey methodology and definitions of terms

Note: The following information was provided by the U.S. Department of Justice, Bureau of Justice Statistics, from Justice Expenditure and Employment Extracts: 1984, 1985, and 1986 Data from the Annual General Finance and Employment Surveys (Washington, DC: U.S. Department of Justice, 1989).

## Data collection

The Bureau of Justice Statistics (BJS) discontinued its annual survey of criminal justice expenditure and employment (CJEE) for budgetary reasons following the collection of 1979 data. That survey provided comparable trend data from 1971 to 1979. Beginning with 1980, the Bureau adopted a different methodal ogy to compile and present public expenditure and employment data at greatly reduced cost. In 1985, the original survey methodology was reimplemented for a single-time survey designed to provide data necessary for block grant allocation of Bureau of Justice Assistance (BJA) funds. A similar survey collected data for 1988 to support allocation of 1990 BJA funds; a report containing those data will be issued by BJS in late 1989.

In making trend comparisons, users should limit their analysis to one of the two sources, that is, long term trends for 1971-79 and 1985 or more recent single year trends from the 1980-86 extracts reports.

The data presented here are from the extracts reports and are based on a special compilation of data and sources available from the U.S. Bureau of the Census' regular surveys of public finances and employment. These recurrent series of annual publications on governmental finances (series $G$ ) and public employment (series GE) provide data on expenditure and employment, by function, of the Federal, State, and local governments (counties, cities, townships, school districts, and special districts). The data collection procedures for these two surveys are described below.

Annual finance survey: Federal Goverriment financial data were obtained from "actual" data presented in The Budget of the United States for the Fiscal Year 1986 (for FY 1984 data), 1987 (for FY 1985 data), and 1988 (for FY 1986 data). Certain adjustments were made in Federal data to arrive at Census Bureau "expenditure" amounts. State finance statistics as well as those for large counties and cities were compiled by Census Bureau representatives from official reports and records, with the advice of State and local officers and employees. The figures were classified according to standard census categories for reporting large government finances, and were reviewed intensively. The remaining data were provided by local officials either through central State sources or in response to a mail survey using detailed questionnaires. Through these efforts only a minor percentage of the general purpose government sample (representing nearly all quite small governments) remained incom plete. For nonrespondent governmental units and agencies, prior year data were used as they were reported.

Annual employment survey: Federal Government civilian employment data were obtained from records maintained by the U.S. Office of Personnel Management. These records did not provide the information necessary to compute Federal full-time equivalent employment. Statistics for State and local governments were obtained by a mail survey. State government data were based on a complete canvass of all State departments, agencies, and institutions. Questionnaires for local governments were generally sent to a local central reporting office, supplemented by special mailings to dependent agencies. Usable replies were received from about $85-90$ percent of the local mail panel. For nonrespondent governmental units and agencies, prior year data were used.

For the mail portion of these annual surveys, figures reported by government officials are generally accepted as being substantially correct. In some cases, varying interpretations of the instructions or deficiencies in governmental employment and fiscal records may make it difficult for officials to render complete and accurate reports for their governments. These difficulties are dealt with by (1) careful definition of terms and detailed instructions in difficult cases, (2) supplemental correspondence and telephone followup to offi-
cials, and (3) intensive examination of data collected, that is, verification of internal consistency and comparison with previous reports and other sources of data. Errors that may be introduced during processing (input preparation, etc.) are minimized through the use of intensive computer editing of the data at various stages of the nrocessing system. Additional correction and reclassification procedures were used with data from each of the States and large counties in order to narrow methodological differences between the data and those obtained through the periodic BJS surveys.

## Survey coverage

All State governments were sur-veyed--The sample of local governments was drawn from the 1982 Census of Governments and consists of certain local governments taken with certainty plus a sample below the certainty level. Units in the certainty group are: all county governments with a 1980 population greater than 50,000 ; all municipal and township governments with populations greater than 25,000.

The remaining units were selected with probability proportional to size from a compilation of all local governments within county areas having 100,000 or more population. The balance of each county was further stratified by type and size of government. Approximately 9,500 counties, cities, and townships were included in the local government sample.

Only limited data were available on the justice activities of the Federal Government--major totals for police protection, judicial and legal, and corrections. For State governments, no data were available on the activities of universities, including campus police ( $\$ 142$ million expenditure and 13,000 employees in 1978), university-based medical examiners, and legal aid clinics. Employment data were available for the justice sectors of police protection, judicial and legal services, and corrections.

Data for local governments include expenditure and employment for police protection, judicial and legal services, and corrections. Justice data for local governments in the largest SMSA's are not published, nor are data for special police forces in selected school districts and special districts. Minor amounts for purchase of equipment were not always separated from current operations expenditure in the finance survey.

Survey period
The employment data are for October of the year indicated.

The Federal Government expenditure data are for the fiscal year, which ended on September 30 of the year indicated; for example, 1984 data are for the period October 1, 1983 to September 30, 1984.

The State expenditure data presented in this report cover fiscal years ending June 30 for all States except four whose fiscal years ended as follows: New York, Mar. 31; Texas, Aug. 31; and Alabama and Michigan, Sept. 30.

For local governments, the fiscal years reported are those that closed between July 1 and June 30 . Most municipalities and counties end their first fiscal years on Dec. 31 or June 30. The fiscal years :eported for Washington, D.C. encled on Sept. 30.

Some agencies operate on a different fiscal year basis from the rest of the parent government. In such instances, figures included are for the agency's fiscal year that ended within the parent government's regular fiscal year.

## Data limitations

The surveys from which these dato were extracted are not designed specifically to obtain data on specific justice functions. Data were compiled after the regular surveys had been completed and it was not possible to modify collection procedures to achieve a more precise compilation.

The survey sample for the local government police protection, judicial and legal services, and corrections estimates was not designed specifically to produce data on these activities. Thus, the sampling variability, or "standard error," for these three justice sectors is apt to be larger than for the major categories in the Census Bureau's regular surveys and for the same functions in the BJS's periodic surveys. The "standard error" is a measurernent of variation among the estimates from all possible samples, of which this is one, having the same size and selected using the same sampling design. Estimates derived from the different samples would vary from each other (and also from a complete census using the same data collection procedures). The standard error, therefore, measures the precision with which an estimate
from one of these samples approximates the average result of all the possible samples.

In reviewing the sample-based es timates, it is important to bear in mind that the sampling variability for smaller components, such as type of local government detail, is likely to be greater than the overall standard errors. Conversely, because State government figures are not subject to sampling variation, the State-local aggregates shown for individual States are more reliable (on a relative standard error basis) than the local government estimates they include. Since the national estimates of local government expenditure and employment are based on summations of individual State data, they are more reliable than the Stare-area data.

The data are also subject to possible inaccuracies in classification, response, and processing. Every effort was made to keep such errors to a minimum through care in examining, editing, and tabulating the data submitted by government officials. Follow up procedures were used extensively to clarify inadequate and inconsistent survey returns.

Readers should be generally cautious in comparing governments, because differences in functional responsibilities from State to State and government to government also con affect the comparability of expenditure and employment data. For example, some State governments directly administer certain activities that elsewhere are undertaken by local governments, with or without fiscal aid, and the same variation in the division of responsibilities exists for counties and cities.

The figures presented in this report differ in some cases from those previously published in the Census Bureau's annual finance and employment reports because of the more intensive review procedures used for this special compilation, the refinements of data involved, and certain definitional differences. They also differ from those previously published by BJS for 1985. The previously published BJS data for 1985 should be used in trend analysis for 1971-79 and 1988 as the data come from special BJS surveys. The 1985 data in this report should be used with the 1984-86 data here and 1980-83 data published in the BJS extracts series.

## Definitions of terms

Expenditure includes only external
cash payments made from any source of monies, including any payments financed from borrowing, fund balances, intergovernmental revenue, and other current revenue. It excludes any intergovernmental transfers and noncash transactions, such as the provision of meals or housing of employees. It also excludes retirement of debt, investment in securities, extensions of loans, or agency transactions. Total expenditures for all government functions do include interest payments on debt, but the justice expenditure data do not.

Expenditure is divided into two major categories:

1. "Direct expenditure" is all expenditure except that classified as intergovernmental. It includes "direct current expenditure" (salaries, wages, fees, and commissions and purchases of supplies, materials, and contractual services) and "capital outlays" (construction and purchase of equipment, land, and existing structures). Capital outlays are included for the year when the direct expenditure is made, regardless of how the funds are raised (for example, by bond issue) or when they are paid back.
2. "Intergovernmental expenditure" is the sum of payments from one government to another, including grants-in-aid, shared revenues, payments in lieu of taxes, and amounts for services performed by one government for another on a reimbursable or cost-sharing basis (for example, payments by one government to another for boarding prisoners).

Employees are all persons on government payrolls during the pay period including Oct. 12 of the year indicated. They include all paid official and persons on paid leave, but exclude unpaid officials, persons on unpaid leave, pensioners, and contractors.
"Full-time employees" are all persons employed on a full-time basis, including all full-time temporary or seasonal workers who were employed during this pay period.

Full-time equivalent employment prior to 1986 is a statistical measure that estimates the number of employees that would be on the payrolls if the total hours worked by part-time workers were actually worked by full-time workers. It is calculated by dividing the total payroll (full-time plus part-time) by the full-time payroll and multiplying the result by the number of full-time employees.
For 1986, "full-time equivalent employment" is a computed statistic representing the number of full-time
employees that could have been employed if the reported number of hours worked by part-time employees had been worked by full-time employees. This statistic is calculated separately for each function of a government by dividing the "parttime hours paid" by the standard number of hours for full-time employees in this particular government and then adding the resulting quotient to the number of full-time employees. This represents a new method of computing this statistic and should be considered when comparing data for 1986 with those for 1980-85.
Payroll is the gross payroll before deductions and includes salaries, wages, fees, and commissions paid to employees as defined above for the month of October.

Police protection is the function of enforcing the law, preserving or der, and apprehending those who violate the law, whether these activities are performed by a city police department, sheriff's deportment, State police, or Federal Iaw enforcement agency such as the FBI and the Drug Enforcement Administration. Private security police are outside the scope of the survey.
"Judicial and legal services" include all civil and criminal courts and activities associated with courts; the civil and criminal justice activities of the attorneys general, district attorneys, State's attorneys, and their variously named equivalents; corporation counsels, solicitors, and legal departments with various names; and legal counsel and representation in either criminal or civil proceedings as provided by public defenders and other government programs that pay the fees of court-appointed counsel.

Data for the separate functions of courts, prosecution and legal services, and public defense are not available from the source documents as they are from BJS's periodic surveys.

Corrections involves the confinement and rehabilitation of adults and juveniles convicted of offenses against the law and the confinement of persons suspected of a crime awaiting trial and adjudication. It includes costs and employment for jails, prisons, probation, parole, pardon, and correctional administration. Data for institutions with authority to hold prisoners beyond arraignment (usually 48 hours or more) are included in this sector. Data for lockups or "tanks" holding prisoners less than 48 hours are included in "police protection."

Correctional institutions are prisons, reformatories, jails, houses of correction, penitentiaries, correc-
tional farms, workhouses, reception centers, diagnostic centers, industrial schools, training schools, detention centers, and a variety of other types of institutions for the confinement and correction of convicted adults or juveniles who are adjudicated delinquent or in need of supervision. It also includes facilities for the detention of adults and juveniles accused of a crime and awaiting trial or hearing. Prison is sometimes used to refer to State correctional institutions.
"Other corrections" consists of noninstitutional correctional activities, including pardon, probation, and parole activities, correctional administration not directly connectable to institutions, and miscellaneous items that cannot be directly related to institutional care.

Other justice activities includes expenditure and employment data that ore not elsewhere classified, that cut across more than one category, or that are not allocable to separate categories. Examples are crime commissions, neighborhood crime counsels, and State criminal justice coordinating councils.

## APPENDIX 2

The Municipal Year Book 1988-Definitions of terms and survey response rates

This information was excerpted from International City Management Association, The Municipal Year Book 1988 (Washington, DC: International City Management Association, 1988, pp. 103, 106, 125, 152, 198. Non-substantive editorial adaptations have been made.

Regions
Northeast--the New England and Mid-Atlantic Divisions;

North Central--the East and Wiest North Central Divisions;

South--the South Atlantic and the East and West South Central Divisions;

West--the Mountain and Pacific Coast Divisions.

Geographic divisions
New England--Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont;

Mid-Atlantic--New Jersey,
New York, and Pennsylvania;
East North Central--Illinois, Indiana, Michigan, Ohio, and Wisconsin;

West North Central--lowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota:

South Atlantic--Delaware, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia, plus the District of Columbia;

East South Central--Alabama, Kentucky, Mississippi, and Tennessee;

West South Central--Arkansas, Louisiana, Oklahoma, and Texas;

Mountain--Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming;

Pacific Coast--Alaska, California, Hawaii, Oregon, and Washington.

## Metro status

To be classified by the U.S. Office of Management and Budget as a Metropolitan Statistical Area (MSA), an area must include a city with a population of at least 50,000 or an urbanized area of at leas $\dagger 50,000$ with a total metropolitan population of at least 100,000 . The OMB fur-
ther groups metropolitan areas of over $1,000,000$ population into consolidated metropolitan statistical areas (CMSAs) and primary metropolitan statistical areas (PMSAs).

Central cities--The core cities of an MSA having a population of at least 25,000 and meeting two commuting requirements: at least 40 percent of the employed residents of the city must work within the city and there must be at least 75 jobs for each 100 residents who are employed. Cities between 15,000 and 25,000 population may also be considered central cities if they are at least one-third the size of the MSA's largest city and meet the two commuting requirements.

Suburban cities--The other cities, towns, and incorporated places in an MSA.

Independent--the city(ies) not located within an MSA.

City types include metro for municipalities located within an MSA and nonmetro for municipalities located outside an MSA. County types refer to counties located within an MSA for metro; and nonmetro for counties located outside the boundaries of an MSA.

## Forms of government

Mayor-council--an elected council serves as the legislative body with a separately elected head of government;

Council-manager--the mayor and council make policy and an appointed administrator is responsible for the administration of the city;

Commission--a board of elect ed commissioners serves as the legislative body and each commissioner is responsible for administration of one or more departments;

Town meeting--qualified voters meet to make basic policy and choose a board of selectmen to carry out the policy;

Representative town meet-
ing--representatives selected by citizens' vote at meetings, which may be attended by all town citizens.

Table Survey response rates for 1987

|  | Police, fire, and refuse collection |  |  | Survey of municipal officials |  |  | Survey of county officials |  |  |

## APPENDIX 3

Crime in the United States--<br>Definitions of terms

Note: The following information has been excerpted from the U.S. Department of Justice, Federal Bureau of Investigation, Crime in the United States, 1987 (Washington, DC: USGPO, 1988), pp. 1-5, 3|5-318. Non-substantive editorial adaptations have been made. See U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reporting Handbook (Washington, DC: USGPO, 1984) for further definitions and information on classification and counting rules.

## Population definitions

For purposes of statistical presentation, the cities and counties in the United States are divided into groups based on population size. The population group classifications used by the Uniform Crime Reporting Program are shown in Table 1.

Table I Population group, political label, and population coverage

| Population <br> group | Political <br> label | Population <br> coverage |
| :--- | :--- | ---: |
| I | City | 250,000 and over |
| II | City | 100,000 to 249,999 |
| III | City | 50,000 to 99,999 |
| IV | City | 25,000 to 49,999 |
| V | City | 10,000 to 24,999 |
| VI | City | Less than 10,000 |
| VIII | County | - |
| (Rural <br> county) |  |  |
| IX |  |  |
| (Suburban |  |  |
| county) |  |  |

Metropolitan Statistical
Area (MSA)--This includes a city or
an urbanized area with a population of 50,000 or more inhabitants and the surrounding county or counties that share certain metropolitan characteristics. MSAs made up approximately 77 percent of the total U.S. population in 1987.

Rural counties--Rural counties are those outside MSAs. These areas represent 14 percent of the national population in 1987. Prior to 1981, rural counties were referred to as rural areas.

Suburban areas--These areas consist of cities with populations of less than 50,000 together with counties (unincorporated areas) that are within a MSA. Suburban areas can, therefore, be divided into suburban cities and suburban counties.

Other cities--Other cities are urban places outside MSAs; most of these areas are incorporated. These cities comprise 9 percent of the 1987 national population.

The following diagram illustrates the aforementioned discussion of the community types.

|  | MSA | Non-MSA |
| :--- | :--- | :--- |
| Cities | Cities over <br>  <br>  <br>  <br> Suburban <br> Subities | Other <br> cities |
| Counties <br> (unincorpo- <br> Sated area) | counties | Rural |
| counties |  |  |

As a general rule, sheriffs, county police, and many State police report on crimes committed within the limits of the counties, but outside cities; local police report on crimes committed within the city limits.

The major source of Uniform Crime Reporting (UCR) data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year due to population growth, geopolitical consolidation, municipal consolidation, etc. Population figures for individual jurisdictions are estimated by the UCR Program in noncensus years. Table 2 shows the number of agencies within each population group in 1987.

Table 2 Population group and number of agencies

| Population group | Number of <br> agencies |
| :--- | :---: |
| I | 62 |
| II | 127 |
| III | 321 |
| IV | 689 |
| V | 1,694 |
| VIII (Rural area) | 7,661 |
| IX (Suburban county) | 1,715 |
| Total |  |

## Regions and divisions

The United States is divided into four regions; these regions are further divided into nine divisions. The
following is a list of States within divisions and regions.

## Northeast:

New England--Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont. Middle Atlantic--New Jersey, New York, Pennsylvania.

## Midwest:

East North Central--Illinois, Indiana, Michigan, Ohio, Wisconsin.

West North Central--Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota.

## South:

South Atlantic--Delaware, Dis-
trict of Columbia, Florida, Georgia,
Maryland, North Carolina, South
Carolina, Virginia, West Virginia.
East South Central--Alabama,
Kentucky, Mississippi, Tennessee.
West South Central--Arkansas,
Lovisiana, Oklahoma, Texas. West:

Mountain--Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming.

Pacific--Alaska, California, Hawaii, Oregon, Washington.

The Crime Index and Part I Offenses

## The Crime Index

The following offenses and attempts to commit these offenses are used in compiling the Crime Index: (1) murder and nonnegligent manslaughter, (2) forcible rape, (3) robbery, (4) aggravated assault, (5) burglary, (6) larceny-theft, (7) motor vehicle theft, and (8) arson. Arson was added as the eighth index offense in October 1978. (Manslaughter by negligence and simple or minor assaults are not included in the Crime Index.)

## Part I offenses

Criminal homicide--a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, atternpts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty; and (2) the killing of a felon by a private citizen. b. Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded. While manslaughter by negligence is a Part 1 crime, it is not included in the Crime Index.

Forcible rape--The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used--victim under age of consent) are excluded.

Robbery--The taking or at tempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault--An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary-breaking or enter-ing--The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny-theft (except motor vehicle theft)--The unlawful taking, carrying, leading, or riding away of property from the possession or conistructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

Motor vehicle theft--The theft or attempted theft of a motor vehicle. A motor vehicle is selfpropelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

Arson--any willful or malicious burning or attempt to burn, with or without intent to defroud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

## Part II offerises

Other assaults (simple)--Assaults and attempted assaults where no weapon is used and which do not result in serious or aggravated injury to the victim.

Forgery and counterfeiting-Making, altering, uttering, or possessing, with intent to defraud, anything false in the semblance of that which is true. Attempts are included.

Fraud--Fraudulent conversion and obtaining money or property by false pretenses. Included are confidence games and bad checks, except forgeries and counterfeiting.

Embezzlement--Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

Stolen property; buying, receiving, possessing--Buying, receiving, and possessing stolen property, including attempts.

Vandalism--Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or persons having custody or control.

Weapons; carrying, possessing, etc.--All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

Prostitution and commercialized vice--Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

Sex offenses (except forcible rape, prostitution, and commercialized vice)--Statutory rape and offenses against chastity, common decency, morals, and the like. At tempts are included.

Drug abuse violations--State and local offenses relating to the unlawful possession, sale, use, growing, and manufacturing of narcotic drugs.

Gambling--Promoting, permitting, or engaging in illegal gambling.

Offenses against the family and children--Nonsupport, neglect, desertion, or abuse of family and children.

Driving under the influence--Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

Liquor Iaws--State or local liquor law violations, except "drunkenness" and "driving under the influence." Federal violations are excluded.

Drunkenness--Offenses relating to drunkenness or intoxication. Excluded is "driving under the influence."

Disorderly conduct--Breach
of the peace.
Vagrancy--Vagabondage, beg-
ging, loitering, etc.
All other offenses--All violations of State or local laws, except those listed above and traffic offenses.

Suspicion--No specific offense; suspect released without formal charges being placed.

Curfew and loitering laws-
(persons under age 18)--Offenses relating to violations of local curfew
or loitering ordinances where such lows exist.

Runaways-(persons under age
18)--Limited to juveniles taken into protective custody under provisions of local statutes.

## APPENDIX 4

Report of the U.S. Parole Com-mission--Parole guidelines and definitions of terms

Note: The following information was excerpted from U.S. Department of Justice, U.S. Parole Cormission, Parole Commission Rules (28 C.F.R. 2.I-2.64). Washington, DC: U.S. Parole Commission. Pp. 4, 5, 6, 10, 44, 62, 68, 81; and information provided by the Source. Non-substantive editorial adaptations have been made.

## Parole guidelines

Initial parole consideration--The U.S. Parole Commission has adopted guidelines for parole release considerations. These guidelines indicate the customary range of time to be served before release for various combinations of offense (severity) and offender (parole prognosis) characteristics. The time ranges specified by the guidelines are established specifically for cases with good institutional adjustment and program progress. These time ranges are merely guidelines, where the circumstances warrant, decisions outside the guidelines (either above or below) may be rendered.

The guidelines designate offense characteristics as falling into one of eight severity categories. Category 1 represents the least severe and category 8 the most severe offense behavior. Mitigating or aggravating circumstances in a particular case may justify e decision or severity rating different from that listed.

An evaluation sheet containing a salient factor score serves as an aid in determining parole prognosis (potential risk of parole violation). A salient factor score is calculated by summing the offender's score on each of the following items: number of prior convictions and adjudications, number of prior commitments of more than 30 days duration, age at current offense, commitment of more than 30 days duration within the past 3 years, probction/parole/escape status at time of current offense, and heroin/opiate dependence.

Reparole consideration--An offender whose parole is revoked is eligible to be considered for reparole. If revocation is based upon an administrative violation only, i.e.,
a violation not involving new crimi nal conduct, the behavior is graded as a category I offense and the salient factor score recalculated.

If a finding is made that the prisoner has engaged in behavior constituting new criminal conduct, the appropriate severity rating for the new criminal behavior is calculated. New criminal conduct may be determined either by a new Federal, State or local conviction or by an independent finding by the U.S. Parole Cormission at a revocation hearing. If the criminal conduct is in violation of State or local law the appropriate severity level is determined by analogy with the listed Federal offense severity ratings and the salient factor score recalculated. Time served on a new State or Federal sentence is counted as time in custody for reparole guideline purposes.

## Definitions of terms

Initial hearing--The initial parole determination hearing for an eligible prisoner, where examiners discuss with the prisoner his/her of fense severity rating and salient factor score, his/her institutional conduct, and any other matter the panel may deem relevant.

Following an initial hearing, the Cormission may (1) set a presumptive release date (either by parole or by mandatory release) within fifteen years of the hearing; (2) set an effective date of parole; or (3) continue the prisoner to a fifteen year reconsideration hearing pursuant to 28 C.F.R. 2.14(c).

One-third hearing--Covered under 28 C.F.R. 2.14(e) (1976) until it was phased out. The section provided that a prisoner sentenced to a maximum term of more than 18 months under 18 U.S.C. 4205(b)(2), 18 U.S.C. 294, or 26 U.S.C. 5871, could not be continued past onethird of the maximum sentence. The one-third hearing was phased out after implementation of presumptive date procedures in September 1977.

Pre-hearing record reviews--A review of the prisoner's case file by an examiner during the month preceding a regularly scheduled institutional review hearing. If the recormendation was to grant parole, and the regional commissioner concurred, no in-person hearing was conducted. Pre-hearing record reviews (28 C.F.R. 2.14(b)(1976)) were replaced by presumptive date record reviews.

Statutory review hearings-Replaced by statutory interim hearings. The purpose of the "interim hearing" is to consider any significant developments or changes
that may have occurred subsequent to the initial hearing. Following the interim hearing, the presumptive release date that had been set may be advanced for superior program achievement or other clearly exceptional circumstances, retarded or rescinded for reason of disciplinary infractions, or remain unchanged.

Review hearing--Subsequent parole hearing intended to focus on developments or changes in the prisoner's status; replaced by the statutory interim hearing.

Rescission hearing--28 C.F.R. 2.34 provides that if a prisoner has been granted parole and has subsequently been charged with institutional misconduct sufficient to become a matter of record, or is alleged to have committed a new criminal act, a rescission hearing may be scheduled at which time parole may be rescinded or retarded.

Retroactive record review-A special type of consideration resulting from a revision of the parole decision guidelines in June 1979; for more information, see 28 C.F.R. 2.20, 2.21. For information on the local revocation hearing and institutional revocation hearing, see 28 C.F.R. 2.48-2.52 (1976).

Local or institutional revocation hearing--28 C.F.R. 2.49(a)(c)(1981) provides that the parolee may request that he/she be given a revocation hearing reasonably near the place of the alleged violation or arrest if the following conditions are met: (1) the parolee has not been convicted of a crime committed while under supervision; and (2) the parolee denies that he/she has violated ary condition of his/her release. A parolee will be given a revocation hearing upon his/her return to a Federal institution if he/she voluntarily waives his/her right to a local revocation hearing, if he/she admits any violation of the conditions of parole, or if he/she is retaken following conviction for a new crime.

Region--The five regions of the United States are defined in the following manner: Northeast--Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia; Southeast--Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee; North Central--llinois, Indiana, lowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, Ohio, Wisconsin; South Central--Arkansas, Louisiana, New Mexico, Oklahoma, Texas; West--Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington, Wyoming.

## APPENDIX 5

Public opinion survey sompling procedures

Note: Information on Gallup survey sampling procedures was excerpted from George H. Gallup, The Gallup Poll, Public Opinion 1934-1971, Vol. 1, 1935-1948 (New York: Random House, 1972), pp. vi-viii; George H. Gallup, The Gallup Opinion Index, Report No. 162 (Princeton, NJ: The Gallup Poll, January 1979), pp. 29, 30; George Gallup, The Sophisticated Poll Watcher's Guide (Princeton, NJ: Princeton Opinion Press, 1976), p. 102; and from information provided to SORCEBOOK staff from the Gallup Organization. Information on the Harris survey sampling procedures was provided to SOURCEBOOK staff by Louis Harris and Associates, Inc.; similar procedures used in earlier surveys are described in Louis Harris and Associates, Inc., The Harris Yearbook of Public Opinion 1970: A Compendium of Current American Attitudes (New York: Lovis Harris and Associates, Inc., 1971), pp. 511-514. Information on the survey procedures employed by the National Opinion Research Center was excerpted from the National Opinion Research Center, General Social Surveys, 1972-1987: Cumulative Codebook (Chicago: National Opinion Research Center, University of Chicago, 1987), pp. 1, 49, 433-438. Information on the survey procedures employed by the ABC News Washington Post Poll was excerpted from Peter Begans, ABC News-Washington Post Poll, Survey No. 0190 (New York: ABC News, May 8-13, 1987), p. II. Information on the New York Times/CBS News Poll was provided by the New York Times and information on the Media General/Associated Press Poll was provided by Media General/Associated Press Poll.

The sampling procedures of six public opinion survey organizations are presented in this appendix; The Gallup Poll, the Harris Survey, the National Opinion Research Center, the ABC News-Washington Post Poll, the New York Times/CBS News Poll, and the Media General/Associated Press Poll.

## GALLUP POLLS

All Gallup polls since 1950, excluding certain special surveys, have been
based on a national probability sample of interviewing areas. Refinements in the sample design have been introduced at various points in time since then. However, over this period the design in its essentials has conformed to the current procedure, as described in the following paragraphs.

The United States is divided into seven size-of-community strata: cities of population $1,000,000$ and over, 250,000 to 999,999 , and 50,000 to 249,000 , with the urbanized areas of all these cities forming a single stratum; cities of 2,500 to 49,999; rural villages; and farm or open country rural areas. Within each of these strata, the population is further divided into seven regions: New England, Middle Atlantic, East Central, West Central, South, Mountain, and Pacific Coast. Within each size-of-community and regional stratum the population is arrayed in geographic order and zoned into equal sized groups of sampling units. Pairs of localities in each zone are selected with probability of selection proportional to the size of each locality's population--producing two replicated samples of localities.

Within selected cities for which population data are reported by census tracts or enumeration districts, these sample subdivisions are drawn with probability of selection proportional to the size of the population. For other cities, minor civil divisions, and rural areas in the sample for which population data are not reported by census tracts or enumeration districts, small, definable geographic areas are drawn, with the probability of selection proportional to size where available data permit; otherwise with equal probability.

A block or block cluster is drawn with probability of selection proportional to the number of dwelling units from within each subdivision selected for which blocks statistics are available. In cities and towns for which block statistics are not available, blocks are drawn at random, that is, with equal probability. In subdivisions that are rural or open country in character, segments approximately equal in size of population are delineated and drawn with equal probability.

In each cluster of blocks and each segment so selected, a randomly selected starting point is designated on the interviewer's map of the area. Starting at this point, interviewers are required to follow a given direc-
tion in the selection of households, taking households in sequence, until their assigned number of interviews has been completed. Within each occupied dwelling unit or household reached, the interviewer asks to speak to the youngest man 18 or older at home, or if no man is at home, the oldest woman 18 or older. This method of selection within the household has been developed empirically to produce an age distribution by men and women separately which compares closely with the age distribution of the population. It increases the probability of selecting younger men, who are at home relatively infrequently, and the probability of reaching older women in the household who tend to be under-represented unless given a disproportionate chance of being drawn from among those at home. The method of selection among those at home within the household is not strictly random, but it is systematic and objective, and eliminates interviewer judgment in the selection process. Interviewing is conducted at times when adults are most likely to be at home, which means on weekends or if on weekdays, after 4 p.m. for women and after 6 p.m. for men. Allowance for persons not at home is made by a "times-at-home" weighting procedure rather than by "call-backs." This procedure is a standard method for reducing the sample bias that would otherwise result from under-representation of persons who are difficult to find at home.

The pre-stratification by regions is routinely supplemented by fitting each obtained sample to the latest available U.S. Bureau of the Census estimates of the regional distribution of the population. Also minor adjustments of the sample are made by educational attainment (for men and women separately), based on the annual estimates of the U.S. Bureau of the Census derived from their Current Population Survey. The sample procedure described is designed to produce an approximation of the adult civilian population living in the United States, except for those persons in institutions such as prisons or hospitals. The four regions of the country, as reported in Gallup public opinion surveys, have been defined in the following manner:

East--Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Maryland, Delaware, West Virginia, District of Columbia;

Midwest--Ohio, Michigan, Indiana, Illinois, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas;

South--Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Lovisiana, Oklahoma, Texas; and

West--Montana, Arizona, Colorado, Idaho, Wyoming, Utah, Nevada, New Mexico, California, Oregon, Washington, Hawaii, Alaska.

Prior to 1950, the samples for all Gallup surveys, excluding special surveys, were a combination of what is known as a purposive design for the selection of cities, towns, and rural areas, and the quota method for the selection of individuals within such selected areas.

The first step in obtaining the sample was to draw a national sample of places (cities, towns, and rural areas). These were distributed by six regions and five or six citysize, urban-rural groups or strata in proportion to the distribution of the population of voting age by these regional city-size strata. The distribution of cases between the nonSouth and South, however, was on the basis of the vote in presidential elections.

Within each region, the sample of such places was drawn separately for each of the larger States and for groups of smaller States. The places were selected to provide broad geographic distribution within States and at the same time in combination to be politically representative of the State or groups of States in terms of three previous elections. Specifically, they were selected so that in combination, they matched the State vote for three previous elections within small tolerances. Great emphasis was placed on election data as a control in the era from 1935 to 1950.

Within the civil divisions in the sample, respondents were selected on the basis of age, sex, and socioeconomic quotas. Otherwise, interviewers were given considerable latitude within the sample areas, being permitted to draw their cases from households and from persons on the street anywhere in the community.

According to Gallup policy, if the interviewee does not hear or does not understand a question, the inter viewer repeats the question and if on the second reading the person does not understand or does not get the point of the question, the interviewer checks the "no opinion" box. It should also be noted that seldom more than 10 percent of all those contacted refuse to be interviewed.

Surveys of college students usually are based on in-person interviews with 1,000 full-time students representing 60 campuses. A sample of campuses is derived from a list of all colleges and universities obtained from the National Center for Education Statistics. Occasionally, special surveys conducted by Gallup for other organizations use smaller samples because of time and/or financial constraints.

Surveys of teenagers are conducted through recontact telephone interviews. A list of eligible teenagers is derived from previously conducted omnibus polls that gather a wide variety of demographic information. These omnibus polls determine whether a teenager is present in the respondent's home and whether the teenager is eligible for subsequent interview. Recontact calls are made based on this information.

Urbanization--Central cities have populations of 50,000 and above. Suburbs constitute tiise fringe and include populations of 2,500 to 49,999 . Rural areas are those which have populations of under 2,500.

Race/ethnicity--Nonwhite are comprised of individuals who report themselves as any combination of the following classifications: Hispanic, American Indian, Other Indian, Oriental, and Black. Black and Hispanic are subcategories of Nonwhite. However, due to variation in respondent reporting the category White may also include some Hispanics.

The data presented in SOLRCEBOOK from this Source were taken from the following reports. The dates on which interviews were conducted are presented in parentheses after each citation.

## Sampling error

All sample surveys are subject to sampling error, that is, the extent to which the results may differ from what would be obtained if the entire population surveyed had been interviewed. The size of sampling errors depends largely on the number of interviews. The following table may be used in estimating sampling error. The computed allowances have taken into account the effect of the sample design upon sampling error. They may be interpreted as indicating the range (plus or minus the figure shown) within which the results of repeated samplings in the same time period could be expected to vary, 95
percent of the time, assuming the same sampling procedure, the same interviewers, and the same questionnaire.

Recommended allowance for sampling error (plus or minus) at 95 percent confidence level
(Percent)

| Percent- <br> ages <br> near <br> ne <br> l,500 | 1,000 | 750 | 600 | 400 | 200 | 100 |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 10 | 2 | 2 | 3 | 4 | 4 | 5 | 7 |
| 20 | 2 | 3 | 4 | 4 | 5 | 7 | 9 |
| 30 | 3 | 4 | 4 | 4 | 6 | 8 | 10 |
| 40 | 3 | 4 | 4 | 5 | 6 | 9 | 11 |
| 50 | 3 | 4 | 4 | 5 | 6 | 9 | 11 |
| 60 | 3 | 4 | 4 | 5 | 6 | 9 | 11 |
| 70 | 3 | 4 | 4 | 4 | 6 | 8 | 10 |
| 80 | 2 | 3 | 4 | 4 | 5 | 7 | 9 |
| 90 | 2 | 2 | 3 | 4 | 4 | 5 | 7 |

The table would be used in the following manner: Assume a reported percentage is 33 for a group which includes 1,500 respondents. Proceed to row "Percentages near 30 " in the table and then to the column headed, " $1,500$. ." The figure in this cell is three, which means that at the 95 percent confidence level, the 33 percent obtained in the sample is subject to a sampling error of plus or minus three points.

## HARRIS SURVEYS

Harris surveys are based on a national sample of the civilian population of the continental United States. Alaska and Hawaii are not represented in the sample, nor are those in prisons, hospitals, or religious and educational institutions. The sample is based on census information on the population of each State in the country, and on the population living in standard metropolitan areas and in the rest of the country. These population figures are updated by intercensal estimates produced annually by the U.S. Bureau of the Census, and sample locations are selected biennially to reflect changes in the country's demographic profile.

National samples are stratified in two dimensions--geographic region and metropolitan (and nonmetropolitan) residence. Stratification insures that the samples will reflect, within I percent, the actual proportions of those living in the country in different regions and metropolitan (and non-metropolitan) areas. Within each stratum the selection of the ultimate sampling unit is achieved through a series of steps, a process which is technically called
multi-stage unclustered sampling. Each sampling unit yields one interview. First States, then counties, and then minor civil divisions (cities, towns, townships) are selected with probability proportional to census estimates of their respective household populations.

The Harris Survey has four of these national samples, and they are used in rotation from study to study. The specific sample locations in one study generally are adjacent to those used in the next study. For most sur veys covering the entire country, more than one national sample may be employed. Harris Surveys of a nationwide sample usually include 1,250 respondents.

All interviews prior to 1978 were conducted in person, in the homes of respondents. At each household the respondent was chosen by means of a random selection pattern, geared to the number of adults of each sex who live in the household. Interviews lasted approximately one hour. Almost all interviews conducted as of 1978 have been telephone interviews. Respondents are selected on the basis of random digit dialing. When the completed interviews are received in New York, a subsample of the respondents are re-contacted to verify that the data have been ac.curately recorded. Questionnaires are edited and coded in the New York office. The Harris sampling procedure is designed to produce a national cross-section that accurately reflects the actual population of the country 18 years of age and older living in private households. This means that the results of a survey among a national sample can be projected as representative of the country's civilian population 18 years old and older.

Harris Survey national results are reported for the East, Midwest, South, and West regions of the country, defined as follows:

East--Maine, New Hampshire, Vermont, New York, Massachusetts, Rhode Island, Connecticut, Pennsylvania, Maryland, New Jersey, Delaware, West Virginia;

Midwest--North Dakota, South Dakota, Nebraska, Kansas, Minnesota, lowa, Missouri, Wisconsin, Illinois, Michigan, Indiana, Ohio;

South--Kentucky, Virginia, Tennessee, North Carolina, South Carolina, Georgia, Alabama, Mississippi, Florida, Louisiona, Arkansas, Oklahoma, Texas; and

West--Washington, Oregon, California, Idaho, Nevada, Utah,

Arizona, Montana, Wyoming, Colorado, New Mexico.

The data presented in SOURCEBOOK from this Source were taken from the following reports. The number of interviews conducted and the inter.. view dates are presented in parentheses after the citation.

## Sampling error

It should be kept in mind that the results of the surveys are subject to sampling error, i.e., the difference between the results obtained from the sample and those which would be obtained by surveying the entire population. The size of a possible sampling error varies to some extent with the size of the sample and with the percentage giving a particular answer. The following table sets forth the range of error in samples of different sizes and at different percentages of response:

Recormended allowance for sampling error (plus or minus) at 95 percent confidence level
(Percent)

| Re- <br> sponse | Sample size |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | ---: |
| $10(900)$ | 1,200 | 900 | 500 | 250 | 100 |  |
| $20(80)$ | 2 | 2 | 2 | 3 | 5 | 7 |
| $30(70)$ | 3 | 3 | 3 | 4 | 6 | 10 |
| $40(60)$ | 3 | 3 | 4 | 5 | 7 | 11 |
| 50 | 3 | 3 | 4 | 5 | 7 | 12 |
|  |  |  |  |  | 12 |  |

For example, if the response for a sample size of 1,200 is 30 percent, in 95 cases out of 100 the response in the population will be between 27 percent and 33 percent. This error accounts only for sampling errer. Survey research is also susceptible to other errors, such as data handling and interview recording.

## NATIONAL OPINION RESEARCH CENTER

The National Opinion Research Center (NORC) maintains a national probability sample. The General Social Surveys are interviews administered to the NORC national samples using a standard questionnaire. They have been conducted during February, March, and April from 1972 to 1978, 1980, and from 1982 to 1988. There are a total of 23,356 completed interviews (1,613 in 1972; 1,504 in 1973; 1,484 in 1974; 1,490 in 1975; 1,499 in 1976; 1,530 in 1977; 1,532 in 1978; 1,468 in 1980; 1,506 in 1982; 1,599 in 1983; 1,473 in 1984; 1,534 in 1985; 1,470 in 1986; 1,466 in 1987; and 1,481 in 1988). Sampling frames are based on 1970 census information for surveys conducted in 1972-1978, $1980_{5}$ and 1982. For all interviews conducted from 1984-1988, the national sampling frame was based on 1980 census information. A split sample transition design was used in the 1983 survey. One-half of the sample was drawn from the 1970 frame and one-half from the 1980 frame. Since 1973, the median length of the interview has been about one hour. This study employed standard field procedures for national surveys, including interviewer hiring and training by area supervisors in interviewing locations when necessary.

Each survey is an independently drawn sample of English-speaking persons 18 years of age or older, living in non-institutional arrangements within the United States. Alaska and Hawaii are not included in samples drawn from the 1970 sampling frame, but are represented in one-half of the 1983 surveys, and all those conducted from 1984-1988. Block quota sampling was used in the 1972, 1973, and 1974 surveys and for half of the 1975 and 1976 surveys. Full probability sampling was employed in half of the 1975 and 1976 surveys and in all of the 1977, 1978, 1980, and 1982-1988 surveys. At the block level, quota sampling is used with quotas based on sex, age, and employment status. The cost of the quota samples is substantially less than the cost of a full probability sample of the same size, but there is, of course, the chance of sample biases mainly due to not-athomes which are not controlled by the quotas. However, in order to reduce this bias, the interviewers are given instructions to canvass and interview only after 3:00 p.m. on weekdays or during the weekend or holidays.

The first stage of sample selection includes selection of the Primary Sompling Units (PSUs). The PSUs employed are Standard Metropolitan Statistical Areas (SMSAs) or nonmetropolitan counties selected in NORC's Master Sample. These SMSAs and counties were stratified by region, age, and race before selection. The units of selection of the second stage were block groups (BG) and enumeration districts (EDs). These EDs and BGs were stratified according to race and income. The third stage of selection was that of blocks, which were selected with probabilities proportional to size. In places without block statistics, measures of size for the blocks were obtained by field counting. The average cluster size is five respondents per cluster.

The quotas call for approximately equal numbers of men and women with the exact proportion in each segment determined by the 1970 census tract data. For women, the additional requirement is imposed that there be the proper proportion of employed and unemployed women in the location. Again, these quotas are based on the 1970 census tract data. For men, the added requirement is that there be the proper proportion of men over and under 35 years old in the location. Past experience would suggest that, for most purposes, this quota sample of 1,500 could be considered as having about the same efficiency as a simple random sample of 1,000 cases.

The 1975 and 1976 studies were conducted with a traditional sample design, one-half full probability and one-half block quota. The sample was divided into two parts for several reasons: (1) to provide data for possibly interesting methodologi cal comparisons; and (2) on the chance that there are some differences over time, that it would be possible to assign these differences to either shifts in sample designs, or changes in response patterns. Having allowed for the appearance of all items in the transitional sample design, the General Social Survey then switched to a full probability sample for the 1977 survey.

## 1970 National Sampling Frame

For 1977, 1978, 1980, 1982 and onehalf of 1983 interviews, the NORC national probability sample is a stratified, multi-stage, area probability sample of clusters of households in the continental United Stcites based on 1970 census information. The selection of geographic areas at
successive stages is in accordance with the method of probabilities proportional to size. Furthermore, the clusters of households are divided into replicated subsamples in order to facilitate estimation of the variance of sample estimators of population characteristics.

At the first stage of selection, Standard Metropolitan Statistical Areas (SMSAs) and non-metropolitan counties covering the total continental United States were grouped according to size strata within the nine census regions. All population figures and other demographic information were obtained from 1970 U.S. Bureau of the Census reports. Within each size stratum, grouping, based on geographic location or racial characteristics (or both), was accomplished before selection. The final frame was further separated into zones or "paper strata" of equal population size in order to facilitate the selection of replicated subsamples of primary sampling units (PSUs). The selection of PSUs was designed to produce four independent subsamples of equal size. The four subsamples were randomly combined to form two larger subsamples of 101 PSUs each. The large subsamples are thus internally separable into two replicated subsamples for variance estimation purposes. NORC has selected one of the two large subsamples described above to serve as its principle frame of households for the remainder of the decade. The PSUs fall into 89 distinct SMSAs and non-metropolitan counties. (New York, a very large SMSA, represents five PSUs, whereas the smaller counties represent only one PSU.)

The second-stage procedure involved the direct selection of census block groups or enumeration districts (EDs) within SMSAs or counties, eliminating the traditional intermediate stage of clustering selections within urban places or county divisions. Before selections, census tracts, mirror civil divisions, census county divisions containing the block groups, and EDs were carefully stratified by geographic location, income, and race, in order to maximize the precision of sample estimation within a PSU. Block groups and EDs were then selected with probabilities proportional to size in numbers sufficient to satisfy survey demands for households expected throughout the decade. Lists of the separate households contained in the second stage blocks or EDs were constructed by field personnel or obtained from directories. Thus, the principal NORC national probability
sample is, in effect, an inventory of identifiable households, each with a known probability of selection. In a typical sample survey with equal probability of selection for individual households (i.e., a self-weighting sample), households at which interviews will take place are probabilistically selected from the available lists of addresses for blocks and EDs The method of probabilities proportional to size results in the assignment of an approximately equal number of interviews in each final stage cluster, which in turn leads to increased precision in the estimation of overall population characteristics.

## 1980 National Scmpling Frame

Census information for 1980 was used to sample respondents for one-half of the 1983 interviews, and all those surveys administered 1984-1988. Eighty-four PSUs were selected at the first stage. The PSUs consist of counties, SMSAs, independent cities and, in New England, parts of counties. Prior to selection, the United States was divided into PSUs; the PSUs were then grouped into 84 strata. The strata were formed by grouping metropolitan and nonmetropolitan PSUs within each of the four Census regions. Within each region, additional variables were used to define strata. The stratifying variables included within-region geography and size; size was measured by the 1980 Census count of occupied housing units. One PSU was selected from each stratum using a controlled selection procedure. This procedure ensured proportionate representation along certain control dimensions (such as percentage Hispanic in the West). The exact control variables (like the stratification variables) differed somewhat from region to region. Sixteen strata contained only one PSU, which was selected with certainty. The remaining 68 PSUs were selected with probability proportional to size (measured in housing units).

The unit for second stage selection was the block or enumeration district (ED). The number of secondary selections within a PSU depended in part on the stratum size. The number of second stage selections listed for NORC's national frame in the 16 PSUs selected with certainty ranged from 24 to six selections for PGU. In the remaining 68 sample PSUs, six second stage selections were listed. All total, the new frame includes 562 secondary selections.

Prior to selection, the second stage units within each sample PSU were
sorted by county, by minor civil division (in some areas), by Census Tract or ED number, and by block number. Counties were ordered within PSUs according to size and geography. Secondary selections were made using systematic zone selection; the probabilities of selection were proportional to size (measured in housing units). Each secondary selection included at least 50 housing units.

In enumeration districts and blocks with a large number of dwelling units, a third stage of selection was carried out. The block or ED was subdivided into pieces which were "field counted." Based on the field count, a piece of the sample block or ED with probability proportional to its size was selected.

Survey results are reported for four regional categories, with the States classified in the following way:

Northeast--Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont;

North Central--Illinois, Indiana, lowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin;

South--Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia;

West--Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming.

## ABC NEWS-WASHINGTON POST POLLS

ABC News-Washington Post Polls are based on telephone interviews with men and women, 18 years of age and older, living in the continental United States. ABC and the Washington Post select a sample of telephone exchanges which guarantees proportionate representation of each region of the country. Telephone numbers are then formed by adding random digits to the selected exchanges, enabling interviewers to reach both listed and unlisted phones. Responses are weighted by age, sex, education, and race using the most recent U.S. Bureau of the Census figures.

The data presented in SOURCEBOOK from this Source were taken from the following reports. The number of interviews conducted and the inter-
view dates are presented in parentheses after each citation.

Washington Post Poll, Survey No. 0190. New York: ABC News, May 813, 1985, Questions 65-67. ( $N=1,503$, May 8-15, 1985.)

ABC News Poll, Survey No.
0233. New York: ABC News, Aug. 14 26, 1986. Questions 74, 82. ( $\mathrm{N}=1,822$, Aug. $14-26,1986$. )

## NEW YORK TIMES-CBS NEWS POLL

The New York Times-CBS News Polls are based on telephone interviews with adults from across the country. The data presented in SOURCEBOOK from this Source were provided by the New York Times from a survey of 1,210 adults conducted during the period Aug. 18-21, 1986. The survey has a margin of sampling error of plus or minus three percentage points.

## MEDIA GENERAL/ASSOCIATED PRESS POLL

Media General and The Associated Press polls are based on telephone interviews with adults across the continental United States. All samples are drawn randomly by Survey Sampling, Inc. of Westport, Connecticut and include both listed and non-listed households with telephones. The data project to an es timated 161 million adults living in households with telephones.

Interviews on the death penalty and fear of crime included a representative sampling of 1,251 adults and were conducted Nov. 7-14, 1986.

Survey results are reported for four regional categories, with the States classified in the following way:

Northeast--Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont;

North Central-.Illinois, indiana, Lowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin;

South--Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia;

West--Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming.

## APPENDIX 6

National Crime Survey--Data collection procedures and definitions of terms

Note: The following information was compiled by the SOURCEBOOK staff and excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Criminal Victimization in the United States, 1987, A National Crime Survey Report NCJ-l15524 (Washington, DC: U.S. Department of Justice, 1989), Appendix III and glossary.

The National Crime Survey Program surveys a nationwide sample of residents throughout the Nation, including persons living in group quarters such as dormitories, rooming houses, and religious group dwellings. Crew members of merchant vessels, Armed Forces personnel living in military barracks, and institutionalized persons, such as correctional facility inmates, did not fall within the scope of the survey. Similarly, United States citizens residing abroad and foreign visitors to this country were not under consideration. With these exceptions, individuals age 12 and over living in units designated for the sample were eligible to be interviewed.

## Data collection

Each housing unit selected for the National Crime Survey (NCS) is in the sample for 3 years with each of seven interviews taking place at 6month intervals. An NCS interviewer's first contact with a housing unit selected for the survey is in person, and if it is not possible to secure face-to-face interviews with all eligible members of the household during this initial visit, interviews by telephone are permissible thereafter. The only exceptions to the requirement that each eligible person be interviewed apply to incapacitated persons and individuals who are absent from the household during the entire field-interviewing period.

Beginning in July of 1986, unless a knowledgeable household member insists otherwise, 12-and 13-year olds are interviewed directly by the interviewer. This differs from what was done in previous practice of interviewing a knowledgeable adult as a proxy respondent for all 12 - and 13 year olds unless the adult insisted
that the child be interviewed and the alternative was no interview at all. In the case of temporarily absent household members and persons who are physically or mentally incapable of granting interviews, interviewers may accept other househoid members as proxy respondents, and in certain situations (under rigidly prescribed rules) nonhousehold members may provide information for incapacitated persons.

Prior to February 1980 the second through seventh interviews were conducted in the same manner as the initial interview. At that time, however, the mode of interviewing was changed to cut data collection costs. Telephone interviewing was increased and in-person interviewing was reduced. This change was implemented in a manner that reduced the possibility of biasing the results. For half the remaining interviews at a sample address, the procedure was the same as that used for the entire sample prior to February 1980: The third, fifth, and seventh interviews were conducted primarily in person, with telephone follow-up permitted. The three even-numbered interviews have been conducted insofar as possible by telephone. Beginning in March 1986, all interviews were done by telephone wherever possible, except for the fi:st and fifth interviews, which are still primarily conducted in person.

## Sample design and size

Survey estimates are based on data obtained from a stratified, multistage cluster sample. The primary sampling units (PSU's) composing the first stage of the sampling were counties, groups of counties, or large metropolitan areas. Large PSU's were included in the sample with certainty and were considered to be self-representing (SR). The remaining PSU's, called non-self-representing (NSR), were combined into strata by group. ing PSU's with similar demographic characteristics, as determined by the 1980 census. From each stratum, one PSU was selected for the sample, the probability of selection having been proportionate to the PSU's population.

In June 1984, a sample cut resulted in the reduction of NSR strata from 220 to 153. This also included a 20 percent sample reduction in the larger of the 156 SR PSU's. Phase-in of a revised NCS sample design based on 1980 census data began in January 1985. Thus, households that were interviewed during 1987 were drawn from both the 1970- and

1980-based sample designs. The 1980 design consists of 84 SR PSU's and 153 NSR strata, with one PSU per stratum selected with probability proportionate to size. Part of the reduction in the number of SR PSU's is due to a different procedure for drowing PSU boundaries, especially in the New England states, so that the 156 PSU's in the 1970 design are equivalent to 130 PSU's in the current design. Even with this smaller number of sample areas, the reliability of estimates has been maintained by using crime-related characteristics in the formation of the strata and by improving sample selection within the PSU's.

The remaining stages of sampling were designed to ensure a selfweighting probability sample of dwelling units and group quarters within each of the selected areas. This involved a systematic selection of enumerction districts (geographic areas used for the ( 1980 census), with a probability of selection proportionate to their 1980 population size, followed by the selection of clusters of approximately four housing units each from within each enumeration district. To account for units built within each of the sample areas after the 1980 census, a sample was drawn, by means of an independent clerical operation, of permits issued for the construction of residential housing. Jurisdictions that do not issue building permits were sampled using small land-area segments. These supplementary procedures, though yielding a relatively small portion of the total sample, enabled persons occupying housing built after 1980 to be properly represented in the survey. With the passage of time, newly constructed units account for an increased proportion of the total sample.

Approximately 59,000 housing units and other living quarters were designated for the sample. For purposes of conducting the field interviews, the sample was divided into six groups, or rotations, each of which contained housing units whose occupants were to be interviewed once every 6 months over a period of 3 years. The initial interview was for purposes of bounding (that is, establishing a time frame to avoid duplicative recording of information on subsequent interviews) but was not used in computing annual estimates. Each rotation group was further divided into six panels. Persons occupying housing units within one-sixth of each rotation group, or one panel were interviewed each month during the 6month period. Because the survey is
continuous, additional housing units are selected in the manner described and assigned to rotation groups and panels for subsequent incorporation into the sample. A new rotation group enters the sample every 6 months, replacing a group phased out after being in the sample for 3 years. Interviews were obtained at 6 -month intervals from the occupants of about 49,000 of the 59,000 housing units designated for the sample. The large majority of the remaining $10,000 \mathrm{u}-$ nits were found to be vocant, demolished, converted to non-residential use, or otherwise ineligible for the survey. However, approximately 2,000 of the 10,000 units were occupied by persons who, although eligible to particinate in the survey, were not interviewed because they could not be reached after repeated visits, declined to be interviewed, were temporarily absent, or were otherwise not available. Thus, the occupants of about 96 percent of all eligible housing units, or some 100,000 persons, participated in the survey.

Throughout 1987, approximately 3,400 households out of 49,000 households in the sample, were designated to be interviewed using a new technique called computerassisted telephone interviewing (CATI). Data from households in these interview areas are excluded from this report in order to study the effect of this new interview procedure on the designated households. Adjustments were made in the NCS weighting to compensate for the ex clusion of these CATI cases in the 1987 data. It is anticipated that the data collected from CATI-designated households will be included in this report beginning in 1988.

## Estimation procedure

To enhance the reliability of the estimates presented in this report, the estimation procedure incorporated extensive auxiliary data resources on those characteristics of the population that are believed to bear on the subject matter of the survey. These auxiliary data were used in the various stages of ratio estimation.

The estimation procedure produces quarterly estimates of the volume and rates of victimization. Sample data from 8 months of field inter viewing ore required to produce estimates for each quarter. Each quarterly estimate is made up of equal numbers of field observations from the months during the half-year interval prior to the time of interview.

This arrangement minimizes expected biases associated with the tendency of respondents to place criminal victimizations in more recent months during the 6 -month reference period than when they actually occurred. Annual estimates are derived by accumulating data from the four quarterly estimates, which in turn are obtained from 17 months of field interviewing--from February of one year through June of the following year. The population and household rates of victimization are based on an average for these 17 months, centering on the ninth month of data collection period, or October 1987.

## Reliability of estimates

All of the National Crime Survey data presented are population estimates derived from nationwide probability samples. The samples used for the national survey are large; during a 6 -month period, about 49,000 household interviews and 100,000 personal interviews are conducted. Nevertheless, whenever samples of a population-rather than the entire population--are studied, a certain amount of sampling error is introduced into the results. The size of this error depends on such factors as the size of the sample and the variability of the population. However, the sampling design and techniques were carried out in a way that permits an estimation of the amount of sampling error present in the results.

The sample used for the NCS is one of a large number of possible samples of equal size that could have been used applying the same sample design and selection procedures. Estimates derived from different samples would differ from each other.

The standard error of a survey es timate is a measure of the variation among the estimates from all possible samples and is, therefore, a measure of the precision with which the estimate from a particular sample approximates the average result of all possible samples. The estimate and its associated standard error may be used to construct a confidence interval, that is, an interval having a prescribed probability that it would include the average result of all possible samples. Estimates falling within the prescribed confidence interval are considered statistically significant. Most comparisons cited in this report were significant at a minimum level of 2.0 standard errors (the 95 percent confidence level), meaning that the estimated difference is
greater than twice the standard er ror of the difference. Differences that failed the 90 percent test were not considered statistically significant.

Because the method utilized in the production of these standard errors and confidence intervals is based on approximations, the standard errors are an indication of the order of magnitude of the standard error rather than the precise standard error for any specific item. It should be noted that as finer and finer breakdowns of the population are made--for example, along dimensions of race, income, age, etc.--the size of the standard error, relative to the size of the estimate, can be expected to increase.

## Series victimizations

Three or more criminal events that are similar if not identical in nature and incurred by individuals who are unable to identify separately the details of each act or recount accurately the total number of such acts are known as series victimizations. Because of the inability of the victims to provide details for each event separately, series crimes have been excluded from analysis and data tables.

## Definitions of terms

Age--The oppropriate age category is determined by each respondent's age as of the last day of the month preceding the interview.

Aggravated assault--Attack with a weapon, irrespective of whether or not there was injury, and attack without a weapon resulting either in serious injury (e.g., broken bones, loss of teeth, internal injuries, loss of consciousness) or in undeter mined injury requiring two or more days of hospitalization. Also includes attempted assault with a weapon.

Annual family income--Includes the income of the household head and all other related persons residing in the same household unit. Covers the 12 months preceding the interview and includes wages, salaries, net income from business or farm, pensions, interest, dividends, rent, and any other form of monetary income. The income of persons unrelated to the head of household is excluded.

Assault--An unlawful physical attack, whether aggravated or simple, upon a person. Includes attempted assaults with or without a weapon. Excludes rape and attempted rape, as well as attacks in-
volving theft or attempted theft, which are classified as robbery. Severity of crimes in this general category range from minor threats to incidents that bring the victim near death.

Attempted forcible entry--A torm of burglary in which force is used in an attempt to gain entry.

Burglary--Unlawful or forcible entry of a residence, usually, but not necessarily, attended by theft. Includes attempted forcible entry. The entry may be by force, such as breaking a window or slashing a screen, or it may be through an unlocked door or an open window. As long as the person entering had no legal right to be present in the structure, a burglary has occurred. Furthermore, the structure need not be the house itself for a household burglary to take place. Illegal entry of a garage, shed, or any other structure on the premises also constitutes household burglary. In fact, burglary does not necessarily have to occur on the premises. If the breaking and entering occurred in a hotel or in a vacation residence, it still would be classified as a burglary for the household whose member or members were staying there at the time.

Ethnicity--A distinction between Hispanic and non-Hispanic respondents, regardless of race.

Forcible entry--A form of burglary in which force is used to gain entry (e.g., by breaking a window or slashing a screen).

Head of household--For classification purposes, only one individual can be defined as head of household. The head of household is one of the persons who owns, rents or is buying the housing unit and is 18 years of age or older. An individval under the age of 18 may be identified as the household head if his or her spouse is age 18 or older or if all household members are under age 18.

Household--Consists of the occupants of separate living quarters meeting either of the following criteria: (1) persons, whether present or temporarily absent, whose usual place of residence is the housing unit in question, or (2) persons staying in the housing unit who have no usual place of residence elsewhere.

Household crimes--Burglary or larceny of a residence, or motor vehicle theft--crimes that do not involve personal confrontation. Include both completed and attempted acts.

Household larceny--Theft or attempted theft of property or cash from a residence or its immediate vicinity. For a household larceny to
occur within the home itself, the thief must be someone with the right to be there, such as a maid, delivery person, or a guest. Forcible entry, attempted forcible entry, or unlawful entry are not involved.

Incident--A specific criminal act involving one or more victims and offenders. Personal crimes that occurred during the course of a commercial crime are not counted as incidents of personal crime contrary to previous practice, which assumed that such incidents were primarily directed against the business and, therefore, were not counted as incidents in the NCS.

Larceny--Theft or attempted theft of property or cash without force. A basic distinction is made between personal larceny and household larceny.

Marital status--Each
household member is assigned to one of the following categories: (1) married, which includes persons in common-law unions and those parted temporarily for reasons other than marital discord (employment, military service, etc.); (2) separated and divorced (separated includes married persons who have a legal separation or have parted because of morital discord); (3) widowed; and (4) never married, which includes those whose only marriage has been annulled and those living together (excluding common low unions).

Motor vehicle--Includes automobiles, trucks, motorcycles, and any other motorized vehicles legally allowed on public roads and highways.

Motor vehicle theft--Stealing or unauthorized taking of a motor vehicle, including attempts at such acts.

Nonstranger--With respect to crimes entailing direct contact between victim and offender, victimizations (or incidents) are classified as having involved nonstrangers if victim and offender are either related, well known to, or casually acquainted with one another. In crimes involving a mix of stranger and nonstranger offenders, the events are classified under nonstranger. The distinction between stranger and nonstranger crimes is not made for personal larceny without contact, an offense in which victims rarely see the offender.

Offender--The perpetrator of a crime; the term generally is applied in relation to crimes entailing contact between victim and offender.

Offense--A crime; with respect to personal crimes, the two terms can be used interchangeably, regardless of whether the applicable unit of
measure is a victimization or ancident.

Personal crimes--Rape, robbery of persons, assault, personal larceny with contact, or personal larceny without contact. Includes both completed and attempted acts.

Personal crimes of theft-Theft or attempted theft of property or cash by stealth, either with contact (but without force or threat of force) or without direct contact between victim and offender. Equivalent to personal larceny.

Personal crimes of violence--Rape, robbery of persons, or assault. Includes both completed and attempted acts. Always involves contact between the victim and offender.

Personal larceny--Equivalent to personal crimes of theft. A distinction is made between personal larceny with contact and personal larceny without contact.

Personal larceny with con-tact--Theft of purse, wallet, or cash by stealth directly from the person of the victim, but without force or the threat of force. Also includes attempted purse snatching.

Personal larceny without contact--Theft or attempted theft, without direct contact between victim and offender, of property or cash from any place other than the victim's home or its immediate vicinity. The property need not be strictly personal in nature; the act is distinguished from household larceny solely by place of occurrence. In rare cases, the victim sees the offender during the commission of the act.

Physical injury--The term is applicable to each of the three personal crimes of violence. For completed or attempted robbery resulting in injury, a distinction is made between injuries from "serious" and "minor" assault. Examples of injuries from serious assault include broken bones, loss of teeth, internal injuries, and loss of consciousness, or undetermined injuries requiring two or more days of hospitalization. Injuries from minor assault include bruises, black eyes, cuts, scratches and swelling, or undetermined injuries requiring less than two days of hospitalization. For assaults resulting in victim injury, the degree of harm governs classification of the event. The same elements of injury applicable to robbery with injury from serious assault also pertain to aggravated assault with injury. Similarly, the same types of injuries applicable to robbery with injury from minor assault are relevant to simple assault with injury. All completed rapes are defined as having resulted
in physical injury. Attempted rapes are defined as having resulted in injury if the victim reported having suffered some form of physical injury.

Race--Asked once for the entire household at the time of the first interview. The racial categories distinguished are white, black, and other. The category "other" consists mainly of American Indians and persons of Asian ancestry.

Rape--Carnal knowledge through the use of force or the threat of force, including attempts. Statutory rape (without force) is excluded. Includes both heterosexual and homosexual rape.

Rate of victimization--See "Victimization rate."

Robbery-Completed or at tempted theft, directly from a person, of property or cash by force or threat of force, with or without a weapon.

Robbery with injury--Completed or attempted theft from a person, accompanied by an attack, either with or without a weapon, resulting in injury. An injury is classified as resulting from a serious assault, irrespective of the extent of injury, if a weapon was used in the commission of the crime, or, if not, when the extent of the injury was either serious (e.g., broken bones, loss of teeth, internal injuries, loss of consciousness) or undetermined but requiring two or more days of hospitalization. An injury is classified as resulting from a minor assault when the extent of the injury was minor (e.g., bruises, black eyes, cuts, scratches, swelling) or undetermined but requiring less than two days of hospitalization.

Robbery without injury-Theft or attempted theft from a person, accompanied by force or the threat of force, either with or without a weapon, but not resulting in injury.

Series--Three or more similar but separate events, which the respondent is unable to describe separotely in detail to an interviewer.

Simple assault--Attack
without a weapon resulting either in minor injury (e.g., bruises, black eyes, cuts, scratches, swelling) or in undetermined injury requiring less than two days o hospitalization. Also includes attempted assault without a weapon.

Stranger--With respect to crimes entailing direct contact between victim and offender, victimizations (or incidents) are classified as involving strangers if the victim so stated, or did not see or recognize the offender, or knew the offender only by sight. In crimes involving a
mix of stranger and nonstranger offenders, the events are classified under nonstranger. The distinction between stranger and nonstranger crimes is not made for personal larceny without contact, an offense in which victims rarely see the offender.

Tenure--Two forms of household tenancy are distinguished: (1) owned, which includes dwellings being bought through mortgage and (2) rented, which also includes rentfree quarters belonging to a party other than the occupant and situations where rental payments are in kind or in services.

Unlawful entry-A form of burglary committed by someone having no legal right to be on the premises even though force is not used.

Victim-The recipient of a criminal act; usually used in relation to personal crimes, but also applicable to households.

Victimization--A specific criminal act os it affects a single victim, whether a person or household. In criminal acts against persons, the number of victimizations is determined by the number of victims of such acts; ordinarily, the number of victimizations is somewhat higher than the number of incidents because more than one individual is victimized during certain incidents. Each criminal act against a household is assumed to involve a single victim, the offected household.

Victimization rate--For crimes against persons, the victimization rate, a measure of occurrence among population groups at risk, is computed on the basis of the number of victimizations per 1,000 resident population age 12 and over. For crimes against households, victimization rates are calculated on the basis of the number of incidents per 1,000 households.

Victimize--To perpetrate a crime against a person or household.

## APPENDIX 7

Monitoring the Future 1975-1988--Survey methodology and definitions of terms

Note: The following information was excerpted from Jerald G. Bachman, Lloyd D. Johnston, and Patrick M. O'Malley, Monitoring the Future
1986 (Ann Arbor, MI: Institute for Social Research, University of Michigan, 1987), pp. 2-10, 13, 14, 269;
Lloyd D. Johnston, Patrick M.
O'Malley, and Jerald G. Bachman, Illicit Drug Use, Smoking, and Drinking by America's High School Students, College Students, and Young Adults, 1975-1987 (Washington, DC: USGPO, 1989), pp. 15-17, 19, 20; and information provided by the Monitoring the Future Project. Non-substantive editorial adaptations hove been made.

## Survey methodology

The basic research design involves annual data collections from high school seniors during the spring of each year, beginning with the class of 1975. Each data collection takes place in approximately 125 to 135 public and private high schools selected to provide an accurate cross section of high school seniors throughout the coterminous United States.

Since 1985, the results of a followup survey of those young adults one to ten years beyond high school have been presented. These results should accurately characterize 85 percent of the young adults in the class cohorts one to ten years beyond high school who are high school graduates. The high school dropout segment, missing from the senior year surveys, is also missing from the follow-up segments.

Also since 1985, the results of a follow-up survey of those high school students who have continued on to college have been presented. The college sample is limited to the most typical one for college attendance: one to four years past high school, which corresponds to the modal ages of 19 to 22 years old. This age category should encompass about 85 percent of all students enrolled in college full-time in 1980.

## Sampling procedures

The procedure for securing a nationwide sample of high school seniors is a multistage one. Stage 1 is the selection of particular geographic areas, Stage 2 is the selection of one or more high schools in each area, and Stage 3 is the selection of seniors within each high school.

Stage I: Geographic Areas. The geographic areas used in this study are the primary sampling units (PSUs) developed by the Sampling Section of the Survey Research Center for use in the Center's nationwide interview studies. These consist of 74 primary areas throughout the coterminous United States--including the 12 largest metropolitan areas, which contain about 30 percent of the nation's population. Of the 62 other primary areas, 10 are in the Northeast, 18 in the North Central area, 24 in the South, and 10 in the West. Because these same PSUs are used for personal interview studies by the Survey Research Center (SRC), local field representatives can be assigned to administer the data collections in practically all schools.

Stage 2: Schools. In the major metropolitan areas more than one high school is often included in the sampling design; in most other samt pling areas a single high school is scmpled. In all cases, the selections of high schools are made such that the probability of drawing a school is proportionate to the size of its senior class. The larger the senior class (according to recent records), the higher the selection probability assigned to the high school. When a sampled school is unwilling to participate, a replacement school as similar to it as possible is selected from the same geographic area.

Stage 3: Students. Within each selected school, up to about 400 seniors may be included in the data collection. In schools with fewer than 400 seniors, the usual procedure is to include all of them in the data collection. In larger schools, a subset of seniors is selected either by randomly sampling classrooms or by some other random method that is convenient for the school and judged to be unbiased. Sample weights are assigned to each respondent so as to take account of variations in the sizes of samples from one school to another, as well as the (smaller) variations in selection probabilities occurring at the earlier stages of sampling.

The three-stage sampling procedure described above yielded the number of participating schools and students indicated in Table 1.

One limitation in the design is that it does not include in the target population those young men and women who drop out of high school before graduation (or before the last few months of the senior year, to be more precise). This excludes a relatively small proportion of each age cohort--between 15 and 20 percent. Though not an unimportant segment, we do know that certain behaviors such as illicit drug use and delinquency tend to be higher than average in this group. However, the addition of a representative sample of dropouts would increase the cost of the present research enormously, because of their dispersion and generally higher level of resistance to being located and interviewed.

For the purposes of estimating characteristics of the entire age group, the omission of high school dropouts does introduce certain biases; however, their small proportion sets outer limits on the bias. For the purposes of estimating changes from one cohort of high school seniors to another, the omission of dropouts represents a problem only if different cohorts have considerably different proportions who drop out. We have no reason to expect dramatic changes in those rates for the foreseeable future, and recently published government statistics indicate a great deal of stability in dropout rates since 1970.

Some may use the high school data to draw conclusions about changes for the entire age group. While we do not encourage such extrapolation, we suspect that the conclusions reached often would be valid, since over 80 percent of the age group is in the surveyed segment of the population and we expect that changes among those not in school are very likely to parallel the changes among those who are. Nevertheless, for purposes of characterizing the entire age group we would urge the user to check the results emanating from the present monitoring system against those emerging from other data collection systems using different methods, such as household interviews.

One other important feature of the base-year sampling procedures should
be noted. All schools (except for half of the initial 1975 sample) are asked to participate in two data collections, thereby permitting replacement of half of the total sample of schools each year: One motivation for requesting that schools participate for two years is administrative efficiency; it is a costly and timeconsuming procedure to secure the cooperation of schools, and a twoyear period of participation cuts down that effort substantially. Another important advantage is that whenever an appreciable shift in scores from one graduating class to the next is observed, it is possible to check whether the shift might be attributable to some differences in the newly sampled schools. This is done simply by repeating the analysis using only the 60 or so schools which participated both years. Thus far, the half-sample approach has worked quite well; and examination of drug prevalence data from the "matched half-samples" shows that the half samples of repeat schools yielded drug prevalence trends which were virtually identical to trends based on all schools.

## Questionnaire administration

The questionnaire administration in each school is carried out by the local SRC representatives and their assistants, following standardized procedures detailed in a project instruction manual. The questionnaires are administered in classrooms during normal class periods whenever possible, although circumstances in some schools require the use of larger group administrations. Teachers are not asked to do anything more than introduce the SRC staff members and (in most cases) remain in the classroom to help guarantee an orderly atmosphere for the survey. Teachers are urged to avoid walking around the room, so that students may feel free to write their answers without fear of being observed.

The actual process of completing the questionnaires is quite straightforward. Respondents are given sharpened pencils and asked to use them because the questionnaires are designed for automatic scanning. Most respondents can finish within a 45minute class period; for those who cannot, an effort is made to provide a few minutes of additional time.

Content areas and questionnaire design

Drug use and related attitudes are the topics which receive the most extensive coverage in the Monitoring the Future project; but the questionnaires also deal with a wide range of other subject areas, including attitudes about government, social institutions, race relations, changing roles for women, educational aspirations, occupational aims, and marital and family plans, as well as a variety of background and demographic factors. The list below provides an outline of the 19 general subject areas into which all items are categorized. Given this breadth of content, the study is not presented to respondents as a "drug use study," nor do they tend to view it os such.

## Measurement content areas

A. Drugs. Drug use and related attitudes and beliefs, drug availability and exposure, surrounding conditions and social meanings of drug use. Views of significant others regarding drugs.
B. Education. Educational lifestyle, values, experiences, and environments.
C. Work and leisure. Vocational values, meaning of work and leisure, work and leisure activities, preferences regarding occupational characteristics and type of work setting.
D. Sex roles and family. Values, attitudes, and expectations about marriage, family structure, sex roles, and sex discrimination.
E. Population concerns. Values and attitudes about overpopulation and birth control.

## F. Conservation, materialism,

 equity, etc. Values, attitudes, and expectations related to conservation, pollution, materialism, equity, and the sharing of resources. Preferences regarding type of dwelling and urbanicity.G. Religion. Religious affiliation, practices, and views.
H. Politics. Political affiliation, activities, and views.

1. Social change. Values, attitudes, and expectations about social change.
J. Social problems. Concern with various social problems facing the nation and the world.
K. Major social institutions. Confidence in and commitment to various major social institutions (business, unions, branches of government, press, organized religion, military, etc.).
L. Military. Views about the armed services and the use of military force. Personal plans for military service.
M. Interpersonal relationships. Qualitative and quantitative characteristics of cross-age and peer relationships. Interpersonal conflict.
N. Race relations. Attitudes toward and experiences with other racial groups.
O. Concern for others. Concern for others; voluntary and charitable activities.
P. Happiness. Happiness and life satisfaction, overall and in specific life domains.
Q. Other personality variables. Attitudes about self (including self-esteem), locus of control, loneliness, risk-taking, trust in others, health habits and symptoms, importance placed on various life goals, counter-culture orientation, hostility.
R. Background. Demographic and family background characteristics, living arrangernents.
S. Deviant behavior and victimization. Delinquent behaviors, driving violations and accidents (including those under the influence of drugs), victimization experiences.

## T. Health habits and symptoms.

 Health habits, somatic symptoms, medical experiences.Because many questions are needed to cover all of these topic areas, much of the questionnaire content is divided into five different questionnaire forms which are distributed to participants in an ordered sequence that produces five virtually identical subsamples. About one-third of each questionnaire form consists of key or "core" variables which are cormon
to all forms. All demographic variables and some measures of drug use are included in this "core" set of measures. This use of the full sample for drug and demographic measures provides a more accurate estimation on these dimensions and also makes it possible to link them statistically to all of the other measures which are included in a single form only.

## Representativeness and validity

The samples for this study are intended to be representative of high school seniors throughout the 48 coterminous States. As previously mentioned, this definition of the sample excludes one important portion of the age cohort: those who have dropped out of high school before nearing the end of the senior year. But given the aim of representing high school seniors, it is useful to consider the extent to which the obtained samples of schools and students are likely to be representative of all seniors and the degree to which the data obtained are likely to be valid.

There are at least four ways in which survey data of this sort might fall short of being fully accurate. First, some sampled schools refuse to participate, which could introduce some bias. Second, the failure to obtain questionnaire data from 100 percent of the students sampled in participating schools would also introduce bias. Third, the answers provided by participating students are open to both conscious and unconscious distortions which could reduce validity. Finally, limitations in sample size and/or design could place limits on the accuracy of estimates.

## School participation

As noted in the description of the sampling design, schools are invited to participate in the study for a two-year period. With very few exceptions, each school which has participated for one data collection has agreed to participate for a second. Thus far, from 66 percent to 80 percent of the schools initially invited to participate have agreed to do so each year; for each school refusal, a similar school (in terms of size, geographic area, urbanicity, etc.) was recruited as a replacement.

The selection of replacement schools almost entirely removes problems of bias in region, urbanicity, and the like that might result from certain schools refusing to participate. Other potential biases are more subtle,
however. For example, if it turned out that most schools with "drug problems" refused to participate, that could seriously bias the drug estimates derived from the sample. And if any other single factor were dominant in most refusals, that also might suggest a source of serious bias. In fact, however, the reason for schools' refusals to participate are varied and largely a function of happenstance events of the particular year. Thus, there is a fair amount confidence that school refusals have not seriously biased the surveys.

## Student participation

Completed questionnaires are obtained from three-fourths to fourfifths of all students sampled. The single most important reason that students are missed is that they are absent from class at the time of data collection, and in most cases it is not workable to schedule a special follow-up data collection for them.

In addition to absenteeism, student nomparticipation occurs because of schedule conflicts with school trips and other activities which tend to be more frequent than usual during the final months of the senior year. Of course, some students refuse to complete or turn in a questionnaire. However, the SRC representatives in the field estimate this proportion to be only about one percent.

Research design for the follow-up surveys after high school

Beginning with the graduating class of 1976, each class is followed up annually for a period of ten years after high school. From the approxi mately 17,000 seniors originally participating in a given class, a reprasentative sample of 2,400 individuals was chosen for follow-up. In order to ensure sufficient numbers of drug users in the follow-up surveys, those fitting certain criterio of current arug use (that is, those reporting current daily marihuana use in senior year or use of any of the other illicit drugs in the previous 30 days) were selected with higher probability (by a factor of 3.0 ) than the remaining seniors. Differential weighting is used in all follow-up analyses to compensate for the differential sampling probabilities.

The 2,400 selected respondents from each class were randomly assigned to one of two matching groups of 1,200 each; one group was surveyed on even-numbered calendar years, while the other group was surveyed on
odd-numbered years. This biannual procedure was intended to reduce respondent burden.

## Follow-up procedures

Using information provided by respondents at the time of the senior survey (name, address, phone number, and the name and address of someone who would always know how to reach them), students selected for the panels were contacted by mail. Newsletters were sent each year and name and address corrections were requested. Questionnaires were sent by certified mail in the spring of each year. A check for $\$ 5.00$ made out to the respondent, was attached to the front. Reminder letters and post cards went out at fixed intervals thereafter and finally, those not responding received a prompting phone call from the Survey Research Center's phone interviewing facility in Ann Arbor. If requested, a second copy of the questionnaire was sent.

## Panel retention rates

To date the panel retention rates have remained quite high. In the first follow-up after high school, about 83 percent of the original panel returned questionnaires. The retention rate decreases ordinally with time; however, the 1987 panel retention from the Class of 1976-the oldest of the panels, now aged 29--remains at 70.6 percent.

Since attrition is to a modest degree associated with drug use, corrections to the prevalence estimates are presented for the follow-up panels.
These raise the prevalence estimates from what they would be uncorrected, but only slightly. It is believed that the resulting estimates are the most accurate obtainable, but still low for the age group as a whole due to the omission of dropouts and absentees from the population covered by the original panels.

## Validity of self-report data

Survey measures of delinquency and of drug use depend upon respondents reporting what are, in many cases, illegal acts. Thus, a critical question is whether such self-reports are likely to be valid. Like most studies dealing with these areas, there is no direct, objective validation of the present measures; however, the considerable amount of inferential evidence which exists strongly suggests that the self-report questions produce largely valid data. A number of factors suggest a reasonable amount of
confidence about the validity of the responses to what are presumably among the most sensitive questions in the study: a low nonresponse on the drug question; a large proportion admitting to some illicit drug use; the consistency of findings across several years of the present study; strong evidence of construct validity (based on relationships observed between variables); a close match between these data and the findings from other studies using other methods; and the findings from several methodological studies which have used objective validation methods.

## Accuracy of the sample

A sample survey never can provide the sarne level of accuracy as would be obtained if the entire target population were to participate in the survey--in the case of the present study, about three million seniors per year. But perfect accuracy of this sort would be extremely expensive and certainly not worthwhile considering the fact that a high level of accuracy can be provided by a carefully designed probability sample. The accuracy of the sample in this study is affected both by the size of the student sample and by the number of schools in which they are clustered. Virtually all estimates based on the total sample have confidence intervals of $\pm 1.5$ percentage points or smaller--sometimes considerably smaller.

## Interpreting racial differences

Data are given for the two largest racial ethnic subgroups in the pop-ulation--those who identify themselves as White or Caucasian and those who identify themselves as Black or Afro-American. Data are not given for the other ethnic categories (American Indians, Asian Americans, Mexican Americans, Puerto Ricans, or other Latin Amer icans) since each of these groups comprises less than three percent of the sample in any given year, which means that their small N 's (in combination with their clustered groupings in a limited number of schools) would yield estimotes which would be too unreliable. In fact, even Blacks--who constitute approximately 12 percent of each year's sample--are represented by only 350 to 425 respondents per year on any single questionnaire form. Further, because the sample is a stratified clustered sample, it yields less accuracy than would be yielded by a pure random somple of equal size.

Therefore, because of the limited number of cases, the margin of sampling error around any statistic describing Blacks is larger than for most other subgroups described in this survey.

There are factors in oddition to unreliability, however, which could be misleading in the interpretation of racial differences. Given the social importance which has been placed on various racial differences reported in the social science literature, the reader is cautioned to consider the various factors which could account for differences. These factors fall into three categories: differential representation in the sample, differential response tendencies, and the confounding of race with a number of other background and demographic characteristics.

Differential representation-A smaller segment of the Black population than of the White population of high school age is represented by the data contained here. Insofar as any characteristic is associated with being a school dropout or absentee, it is likely to be somewhat disproportionately underrepresented among Blacks in the sample.

Differential response tenden-cies-- In examining the full range of variables, certain racial differences in response tendencies were noted. First, the tendency to state agreement in response to agree-disagree questions is generally somewhat greater among Blacks than among Whites.

There is also a somewhat greater than average tendency for Black respondents to select extreme answer categories on attitudinal scales. For example, even if the same proportion of Blacks as Whites felt positively (or negatively) about some subject, fewer of the Whites are likely to say they feel very positively (or very negatively). In the process of interpreting racial differences, the reader should be aware that differences in responses to particular questions may be related to these more general tendencies.

Covariance with other factors--Some characteristics such as race are highly confounded (correlated) with other variables--variables which may in fact explain some observed racial differences. Put another way, at the aggregate level one might observe a considerable racial difference on some characteristic, but once one controls for some background characteristics such as socioeconomic level or region of the
country--that is, comparing the Black respondents with Whites who come from similar backgrounds-there may be no racial difference at all.

## Definitions of terms

Sex--Percentage distributions are given separately for males and females. Respondents with missing data on the question asking the respondent's sex are cmitted from both groupings.

Race--Percentage distributions are given separately for those de-sc:-ibing themselves as "White or Caucasian" and "Black or Afro-American." Comparable columns for the other racial or ethnic groups (Mexican Americans, Asian Americans, American Indians, etc.) are not shown because of the low number of cases in each group.

Region--Percentage distributions are given separately for respondents living in each of four mutually exclusive regions of the country. The regional classifications are based on Census categories and are defined as follows:

Northeast: Census classifications of New England and Middle Atlantic States; includes Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New
York, New Jersey, and Pennsylvania.
North Central: Census
classifications of East North Central and West North Central States; includes Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, and Kansas.

South: Census classifications of South Atlantic, East South Central, and West South Central States; includes Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas.

West: Census classifications of Mountain and Pacific States; includes Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California.

Four-year college plans-Percentage distributions are given separately for (1) respondents who indicate that they "definitely will" or "probably will" graduate from a fouryear college program and (2) those who say that they "definitely won't" or "probably won't" graduate from a four-year college program. Respondents not responding are omitted from both columns. A number of those who do not expect to complete
a four-year college program do expect to get some post-secondary education.
lllicit drug use: Lifetime-Percentage distributions are given separately for five mutually exclusive subgroups differentiated by their degree of involvement with illicit drugs. Eligibility for each category is defined below.

None--This column contains data from those respondents who indicated that they had not used marihuana at any time and did not report use of any of the following illicit drugs in their lifetime: LSD, other psychedelics, cocaine, amphetamines, tranquilizers, methaqualone, barbiturates, heroin, or other narcotics.

Marihuana only--This column contains data from other respondents who indicated that they had used marihuana (or hashish) but had never used any of the other illicit drugs just listed.

Few pills--This column centains data from those respondents who indicated having used one or more of the above listed drugs (other than marihuana) but who had not used any one class of them on three or more occasions and who had not used heroin at all.

More pills--This column contains data from respondents who had used any of the above listed drugs (other than marihuana) on three or more occasions but who had never used heroin.

Any heroin--This column contains data from those respondents who indicated having used heroin on one or more occasions in their lifetime.

Weighted number of cases-The number of cases is stated in terms of the weighted number of respondents rather than the actual number, since all percentages have been calculated using weighted cases. The actual number of respondents generally is about 15 percent higher than the weighted number for data collected in 1975, 1976, and 1977. A comparison of weighted and unweighted numbers is provided in Table 2. For data collected in 1978 or later, the actual number of respondents is roughly equal to the weighted number. Weighting is used to improve the accuracy of estimates by correcting for unequal probabilities of selection which arise in the multi-stage sampling procedures.

Drug types--Definitions or identifiers used in survey forms include:

Marihuana--pot, grass or hashish;

Other psychedelics--mescaline,
peyote, PCP;
Amphetamines--uppers, pep
pills, bennies, speed;
Quaaludes--quads, methaqua-
lone;
Barbiturates--downers, goofballs, reds, yellows;

Heroin--smack, horse;
Other narcotics--methadone,
opium, codeine, paregoric;
Inhalants--glue, aerosols,
laughing gas;
Tranquilizers--Librium, Valium, Miltown.

Beginning with the 1979 survey, amyl and butyl nitrites were considered "other inhalants" for questions on one alternate survey form ( $\mathrm{N}=0$ ne-fifth of total sample size). This was due to the fact that not all users of this subclass of inhalants were reporting themselves as inhalant users. Hallucinogen use had been similarly underestimated because some users of the hallucinogenic drug PCP do not report themselves as users of hallucinogens-even though PCP was included as an example of a hallucinogenic drug in earlier surveys and on other questions. The alternate questionnaire form contained a special set of questions about PCP, which provided other street names for it (e.g., angel dust). As a result of these definition changes, since 1979 data for drug use in these two drug classes have been adjusted for underreporting. For more information, see the Source.

Table $\mid$ Sample sizes and student response rates

|  | 1975 | 1976 | 1977 | 1978 | 1979 | 1980 | 1981 | 1982 | 1983 | 1984 | 1985 | 1986 |

| Number of private school | 1s. 14 | 15 | 16 | 20 | 20 | 20 | 19 | 21 | 22 | 17 | 17 | 16 |
| Total number of schools | 125 | 123 | 124 | 131 | 131 | 127 | 128 | 137 | 134 | 134 | 132 | 129 |
| Actual number of participating students $15,791 \quad 16,67818,43618,924 \quad 16,662 \quad 16,524 \quad 18,26718,34816,94716,49916,50215,713$ Number of weighted |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |
| Student response rate (percent) | 78 | 77 | 79 | 83 | 82 | 82 | 81 | 83 | 84 | 83 | 84 | 83 |

${ }^{\mathrm{a}}$ Sample weights are assigned to each respondent to correct for unequal probabilities of selection that arise in the multi-stage sampling procedure.
The student response rate is derived by dividing the attained sample by the target sample (both based on
weighted numbers of cases). The target sample is based upon listings provided by schools. Because such listings may fail to take account of recent student attrition, the actual response rate may be slightly underestimated.

## APPENDIX 8

National Household Survey on Drug Abuse: Main findings 1985-Survey methodology

Note: The following information was excerpted from U.S. Department of Health and Human Services, National Institute on Drug Abuse, National Household Survey on Drug Abuse: Main Findings 1985 (Washington, DC: USGPO, 1988), pp. |-8, 111-125, 146-147, 164-172. Non-substantive editorial adaptations have been made.

## Survey methodology

The 1985 National Household Survey on Drug Abuse is the eighth study in a series of national surveys to measure the prevalence of drug use among the American household population aged 12 and older. Population estimates of drug use prevalence for the civilian, noninstitutionalized population of the United States are presented.

The following drugs or categories of drugs are examined in the National Household Survey: marihuana, cocaine, inhalants, hallucinogens, PCP, heroin, nonmedical use of four classes of psychotherapeutic drugs (stimulants, sedatives, tranquilizers, and analgesics), cigarettes and smokeless tobacco, and alcohol. The principle correlates of drug use presented in this report are age, sex, race/ethnicity, density of population, region of residence, educational attainment among those 18 years old and older, and current employment.

For the 1985 National Household Survey on Drug Abuse, the household population of the continental United States, age 12 and older, was sampled using a multistage orea probability design with 100 Prjmary Sampling Units. Strategies for insuring the highest possible rate of participation resulted in a response rate of over 83 percent and a total of 8,038 completed interviews of which slightly less than 9 percent ( $\mathrm{N}=700$ ) were conducted in Spanish. The interviews were completed between mid-June and mid-December of 1985. Of the 8,038 interviews, 3,949 were with whites, 1,945 were with blacks, 1,996 were with Hispanics, and 148 were with persons from other racial/ethnic groups. Response rates
for interviews are at least 80 percent for all racial/ethnic groups. Table I displays population estimates and the sample size for each demographic category surveyed.

Major changes in the 1985 survey include an oversampling of blacks and Hispanics to increase the reliability of the estimates of patterns of drug use in these important groups. There are also significant changes in the way results are reported, both in the categorization of variables and in the presentation of results. First, in previous studies race/ethnicity has generally been dichotomized into categories of white and non-white with Hispanics not classified consistently in either category. In this report three mutually exclusive cate-gories--white non-Hispanic, black non-Hispanic, and Hispanic--are utilized as well as an "other" group when totals are presented. Included in the other category are American Indians, Alaskan natives, Pacific Islanders, and Asians. Second, in the previous reports age has generally been presented for three groups: 12 to 17 year-olds, 18 to 25 year-olds, and persons age 26 and older. This classification is used in the current report only in the presentation of trend data. Otherwise, persons 26 and older are divided into two groups: 26 to 34 year-olds and persons 35 years old and older. Blacks, Hispanics, and the three younger age groups ( 12 to 34 ) were oversampled. Probability procedures were employed to set selection rates for these groups at a higher level than those for whites and persons 35 and older. This was done in order to provide a larger base for the study analysis, because of the presumed higher incidence of drug use in these groups.

The target population is defined as the household population of the continental United States. Thus, a small proportion (less than 2\%) of the U.S. population was not included in the study: those in group quarters (military installations, correctional institutions, college dormitories, and hospitals) and those who had no permanent residence (the homeless and residents of single rooms in hotels). To the extent that some of these groups (prisoners or transients, for example) exhibit high prevalence rates, the results of the National Household Survey may be somewhat conservative estimates of drug use in the total population. This may be particularly true for prevalence estimates of rarely used drugs such as heroin.

## Sampling error and confidence in-

 tervalsEstimates which are based on survey data may differ from true population volues because of two sources of error: sampling error and nonsampling error. Sampling error denotes the natural variability associated with using a portion of the population (i.e., a sample) to make inferences about the total population. Nonsampling error refers to error due to nonresponse, misreporting, and miscoding. Estimates of nonsampling error are typically incalculable. However, sampling theory permits the estimation of sampling error when measurable probability sample designs are employed.

The question of how close the estimates are to the population values can be answered in terms of "confidence limits" that describe the relationship between sample estimates and population values--not with certainty but probabilistically. Thus, it is possible to state the probability that a percentage based on a sample will fall within a calculable distance from the population value it is designed to estimate. Confidence limits were calculated based on 95 percent confidence intervals. The precise interpretation of the 95 percent confidence interval is as follows: if repeated samples of identical design were drawn from the population, and the sample estimate and corresponding upper and lower confidence limits were calculated for each sample, then the true population value would be included in the confidence intervals of 95 out of every 100 samples.

## Missing data

The presence of any sizeable amount of missing data on the prevalence measures for drug use would seriously undermine the reliability of the results in the important national indicator series that the National Household Surveys have become. There are no missing data for any of the lifetime measures except use of PCP. Estimates for PCP are not presented in SOURCEBOOK tables. Missing data on the past year use and past month use variables are under 1.0 percent in most cases. Missing data only exceed 2.0 percent in some age categories for past year and past month nonmedical use of any psychotherapeutic. This occurs becouse in combining responses for each of the
four categories of psychotherapeutics, the missing data for each of the four categories are combined as well. Besides the nonmedical psychotherapeutics measures, missing data only exceed 1.0 percent in some age categories for use of inhalants and analgesics. These levels of missing data compare favorably with reports from previous National Household Surveys.

There are two instances where decisions about the treatment of missing data can affect the interpretation of results. The first instance occurs in the comparisons made in the trend data between 1982 and 1985 rates of use. There is no problem in interpreting differences in lifetime trends between 1982 and 1985 because there are no missing data on the lifetime measures in either the 1982 or 1985 data. However, different treatment of missing data can suggest a different pattern of changes over time. In previous surveys, if recency of use of a drug could no $\dagger$ be determined, the respondent was effectively treated as a nonuser in the past year or past month; this occurred because users were reported as the percent of all respondents, i.e., users vs. nonusers and missing data. Treating those who used the drug at some time but who did not report if it was in the past year or month as nonusers in the past year or month appears unwarranted. For the 1985 survey, if after checking all source questions, it was not possible to assign recency of use for a respondent, the case was excluded from the calculation of percentages. Therefore, previous surveys may have underestimated past year and past month drug use. In practice, underestimation is negligible when there is little missing data and/or when the percentage of users of a given substance is low. In rechecking the data for 1979 and 1982, there were little missing data on any drug except for alcohol use in 1982, where 6.0 percent of the data were missing. Since percentages of alcohol use are sizeable for all age groups, the inclusion of the missing as "nonusers" created a blip of lower alcohol use in 1982. Past year and past month alcohol use for 1982 was recalculated in order to present accurate trend comparisons. The actual pattern of past year and past month use in 1982 and 1985 is quite stable.

The second instance where assumptions have been mode in treating missing data in the 1985 analyses occurs in the analyses reporting problems that respondents attributed to
their use of alcohol or drugs.
Twenty-eight percent of respondents who had used some drug and who should have answered the problems answer sheet did not do so. Most of these, however, smoked cigarettes or drank less than weekly and had used no illicit drug in the past year. The decision was made to treat these respondents as not having problems rather than exclude them from the analyses. This decision represents a conservative strategy of erring in the direction of underestimating the prevalence of perceived problems.
The presence of appreciable levels of problems reported even using this conservative approach is an important result.

## Interpreting the data

The number of persons actually interviewed within each age group and demographic category can be seen in table 1. Attention should be directed to the 148 respondents who were not classified as either white, black, or Hispanic. In all tabular presentations in which race/ethnicity is used as a variable, these "others" were elimi nated because there were too few subjects to yield reliable estimates of drug use. Another group that is excluded from analyses is education for those 12 to 17 year-olds. Since most respondents in this category have not finished their education and would be expected to be at different levels depending on their specific age, educational attainment is not very meaningful. Therefore, the variable is called adult education, and the 12 to 17 year-olds are excluded from the tables. Another variakle for which a category contains a small number of subjects is ctant employment; relatively fe" respondents in the age categories of 12 to 17 years old and 35 years old and older reported that they were unemployed. However, since there is no systematic reason to exclude these categories from the anolysis, they are retained in the tables, though care should be taken in interpreting results from these categories.

## Definitions of terms

Population density

## Large meirropoliton Area--

 Includes Standard Metropolitan Statistical Areas (SMSAs) with a population of 250,000 or more in 1980. Large metropolitan areas include central cities and surrounding areas as defined by the U.S. Bureau of the Census.Non-metropolitan--Those areas of the continental United States that were not part of a Standard Metropolitan Statistical Area (SMSA) as of 1980, according to the U.S. Bureau of the Census. In general, this includes small communities, rural non-farm areas, and rural farm areas.

Small metropolitan--Standard Metropolitan Statistical Areas with a population under 250,000 in 1980 constitute Small Metropolitan areas.

## Regions

North Central--The States included are the East North Central States--Illinois, Indiana, Michigan, Ohio, and Wisconsin--and the West North Central States-- lowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota.

Northeast--The States included are the New England States of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont and Middle Atlantic States--New Jersey, New York, Pennsylvania.

South--This census classification contains the South Atlantic States--Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia; the East South Central States of Alabama, Kentucky, Mississippi, and Tennessee, and the West South Central States of Arkansas, Louisiana, Texas, and Oklahoma.

West--This census classification includes the States of Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

## APPENDIX 9

The Prevalence and Incidence of Delinquent Behavior: 1976-1983 and 1986--Survey methodology and description of offense;

Note: The following information was excerpted from Delbert S. Elliott et al., The Prevalence and Incidence of Delinquent Behavior: 19761980, The National Youth Survey Report No. 26 (Boulder, CO: Behavioral Research Institute, 1983), pp. 5-19, 116-118; and information provided by the Institute of Be havioral Science. Non-substantive editorial adaptions have been made.

## Study design and sample selection

The National Youth Survey (NYS) involved a multicohort panel design with a national probability sample of 1,725 adolescents aged 11 to 17 in 1976. The sample was selected to be a representative sample of American youth bern in the years 1959 through 1965. The initial survey collected data on the extent of their involvement in delinquent behavior during the calendar year 1976. A parent interview was also obtained during the first survey. The second through the fifth surveys were conducted in successive years. The sixth survey was cornpleted in 1984 and provided estimates for 1981, 1982, and 1983.
The seventh survey was completed in 1987 and provided estimates for 1986. Estimates of the proportion of youth involved in specific delinquent acts (prevalence) as well as estimates of the frequency of these behaviors (incidence) in this national youth panel are thus available for calendar years 1976 through 1983 and calendar year 1986. Youth in the 1965 birth cohort were age 11 at the time of the first annual survey and 21 by the seventh survey; youth in the 1959 birth cohort were age 17 at the first and age 27 at the seventh survey. While the design of the study permits age specific estimates of delinquency for ages $1 i$ to 27, it should be noted that the estimates for ages 11 and 27 involve a single (and different) birth cohort, whereas es-. timates for ages 17 and 18 each involve seven birth cohorts. For ages 17 and 18 it will be possible to consider both age and cohort differences in rates of self-reported delinquency, i.e., the effect of maturation from age 17 to 18 on delinquency rates can be observed for seven separate
birth cohorts to see if the pattern of change is constant for all seven cohorts, or if it varies by cohort. For ages 14 and 22, 15,20 and 21, and 16 and 19 , this type of analysis is possible for 4,5 , and 6 cohorts, respectively. This type of analysis is not possible for ages 11 or 25-27 and is somewhat limited for ages 12, 13, 23 , and 24.

The sample--The National Youth Survey empioyed a probability sample of households in the continental United States based upon a multistage, cluster sampling design. At each stage, the probabilities of selection were established to provide a self-weighting sample. Seventy-six primary samt pling units were selected, with probability of selection being proportional to size. This sampling procedure resulted in the listing of 67,266 households, of which approximately 8,000 were selected for inclusion in the sample. All youth living in the selected households who were 11 through 17 years of age on or before Dec. 31, 1976 and were physically and mentally capable of being interviewed were eligible respondents for the study. The selected households generated an estimated total of 2,360 eligible youth. Of these, 1,725 ( 73 percent) agreed to participate in the study, signed informed consents, and completed interviews in the initial survey. An age, sex, and race comparison between nonparticipating eligible youth and participating youth indicates that the loss rate from any particular age, sex, or racial group appears to be proportional to that group's representation in the population. Further, with respect to these characteristics, participating youth appear to be representative of the total il through 17 year old youth population in the United States as established by the U.S. Census Bureau for 1976.

The initial survey was conducted between January and March of 1977 and obtained individual reports of delinquency involvement during the preceding year (1976). Surveys for 1977-80 were conducted during this same period in successive years, obtaining reports of delinquent activity during the calendar year just ended. The 1984 survey obtained data for the calendar year just ended (1983), and included a 3 and 2 year recall period to obtain data for 1981 and 1982. Attempts were made to recontact and inter wew each of the original 1,725 sespmidents in each of the six follow..jp surveys. However, some respondents were lost on one or more follow-up surveys due to their refusal to participate or the inability
to locate them. Respondent loss over the first three surveys was small.
The loss rate for the second survey was 4 percent and for the third survey the curnulative loss was 6 percent. Loss rates were greater in the last four surveys. The cumulative loss rose to 10.6 percent for the fourth survey, 13.3 percent for the sixth survey and 19.8 for the seventh survey. The sample size for the last survey was thus 1,383. A comparison of participants and nonparticipants on each survey after the first revealed some selective loss by race, class, and place of residence (urban/suburban/rural) in 1977 and 1978; a selective loss by sex in 1979; and by age in 1980. There did not appear to be any selective loss relative to self-reported levels of delinquency on the first six surveys. The direction of the observed differences indicates that those lost tended to be slightly less delinquent than those participating each year.

While the comparison of participants and nonparticipants in each survey revealed some small but significant differences, a comparison of those participating in each survey with the total sample on the first survey revealed no significant differences by age, sex, race, class, place of residence, or level of delinquency. The selective loss was thus very small and did not influence the underlying distribution on these variables (as established on the first survey) in any substantial way. The representativeness of the sample with respect to these variables has not been affected in any serious way by respondent loss over the first six surveys. However, selective loss for the seventh survey has not yet been calculated.

## Data collection procedures

The annual reports of delinquent behavior by members of the youth panel were obtained in confidential personal (face-to-face) interviews. In most instances these interviews occurred in the respondent's home. If the situation at home was such that privacy could not be guaranteed, arrangements were made to conduct the interview in some other setting where privacy was assured. Respondents were guaranteed that any information they provided in the interview was confidential and could not be released to any person or agency without their prior written consent.

The measure of delinquent behavior
The primary measure of delinquency employed in the National Youth Sur-
vey was a self-reported measure. The full range of delinquent acts reported in the FBI's Uniform Crime Reports (UCR) was reviewed. Any specific act that involved more than one percent of the reported juvenile arrests for 1972-74 (with the exception of traffic violations) was included in the self-reported delinquency (SRD) measure. As a result, offenses such as robbery and sexual assault, whici are often absent in SRD measures, were included. The process resulted in a 40 -item SRD measure that was used in the initial survey.

The offense set included all but one of the UCR Part I offenses (homicide was excluded), 60 percent of the Part 11 offenses, and a wide range of "other offenses" that included delinquent lifestyles and some status offenses. Nearly all items involved a violation of criminal statutes.

Additional SRD items were added for each subsequent survey. In 1977, a general vandalism item was substituted for the three specific vandalism items used in 1976 for a part of the sample. Two new sexual assault items reflecting different wordings from the original item were added in 1978. Three new fraud items were added in 1978. Three new fraud items were added in 1979 based upon a reassessment of UCR arrest data for youth in the 18 to 21 age range. The same I percent rule as described earlier was applied; i.e., any offense that accounted for 1 percent or more of UCR arrests for any age group up through age 21 was included. An arson item was added in 1980 because of a special interest in this item, even though it did not meet the I percent requirement. The general vandalism item appeared only in 1978. For the 1986 estimates, all of the school related offense items were eliminated. New items were added for work-related offenses: hit someone at work, damaged employer's property, stoie from employer, and embezzlement. Also added were general items for minor assault and strongarm robbery (hit anyone else, strongarmed anyone else), paid someone for sex, and picked someone's pocket.

The number of offense items varied somewhat across surveys. In the initial survey 40 offense items were included. In the second survey, approximately half of the participants responded to a reduced set of 25 of these original 40 items, plus a general damaged property item (instead of three context-specific items), while the remainder responded to the
full set. The annual incidence estimates for 1977 are thus limited to this subset of 25 offenses that are common to all subjects. The third survey included the full original set of 40 offenses plus two new sexual assault items for all subjects. The fourth survey included three new items, and the fifth survey included one more new item, bringing the total offenses in the set to 45 for 1979 and 46 for 1980. The last survey included a total of 40 offense items. See table 1 for a description of offenses.

Table 1 Descriptions of selfreport delinquency items--National Youth Survey

Question: "How many times in the last year have you:"

Initial survey--1976 SRD offenses
Offense item and actual wording
I. Damaged family property--Purposely damaged or destroyed property beionging to your parents or other family members. ${ }^{\text {a }}$
2. Damaged school property--Purposely damaged or destroyed property belonging to a school. ${ }^{a}$
3. Damaged other property--Purposely damaged or destroyed other property that did not belong to you (not counting family or school property).
4. Stole motor vehicle--Stolen (or tried to steal) a motor vehicle, such as a car or motorcycle.
5. Stole something over $\$ 50-$-Stolen (or tried to steal) something worth more than $\$ 50$.
6. Bought stolen goods--Knowingly bought, sold or held stolen goods (or tried to do any of these things).
7. Thrown objects--Thrown objects
(such as rocks, snowbails, or bottles) at cars or people. ${ }^{\text {a }}$
8. Runaway--Run away from home.
9. Lied about age---Lied about your age to gain entrance or to purchase something, for example, lying about your age to buy liquor or get into a movie.
10. Carried hidden weapon--Carried a hidden weapon other than a plain pocket knife.
11. Stole something under $\$ 5$--Stolen (or tried to steal) things worth $\$ 5$ or less.
12. Aggravated assault--Attacked someone with the idea of seriously hurting or killing them.
13. Prostitution--Been paid for having sexual relations with someone.
14. Sexual intercourse--Had sexual
intercourse with a person of the opposite sex (If married, add other than with your wife/husband).
15. Gang fights--Been involved in gang fights.
16. Sold marihuana--Sold marihuana or hashish ("pot," "grass," "hash").
17. Cheated on school test--Cheated on school test. ${ }^{\circ}$
18. Hitchhiked--Hitchhiked where it was illegal to do so.
19. Stolen from family--Stolen money or other things from your parents or other members of your family.
20. Hit teacher-Hit (or threatened to hit) a teacher or other adult at school.
21. Hit parent--Hit (or threatened to hit) one of your parents.
22. Hit student--Hit (or threatened to hit) other students.
23. Disorderly conduct--Been loud, rowdy, or unruly in a public place (disorderly conduct).
24. Sold hard drugs--Sold hard drugs, such as heroin, cocaine, and LSD.
25. Joyriding--Taken a vehicle for a ride (drive) without the owner's permission.
26. Liquor for minor--Bought or provided liquor for a minor. ${ }^{\text {a }}$
27. Sexual assault--Had (or tried to have) sexual relations with someone against their will.
28. Strongarmed students--Used force (strong-arm methods) to get money or things from other students. 29. Strongarmed teachers--Used force (strong-arm methods) to get money or things from a teacher or other adult at school.
30. Strongarmed others--Used force (strong-arm methods) to get money or things from other people (not students or teachers).
31. Evaded payment--Avoided paying
for such things as movies, bus or subway rides, and food.
32. Public drunkenness--Been drunk in a public place. ${ }^{\text {a }}$
33. Stole something worth $\$ 5$ to $\$ 50$ --Stolen (or tried to steal) things worth between $\$ 5$ and $\$ 50$.
34. Stole at school--Stolen (or tried to steal) something at school, such as someone's coat from a classroom, locker, or cafeteria, or a book from the "ibrary.
35. Broke into building or vehicle-Broken into a building or vehicle (or tried to break in) to steal something or just to look around.
36. Panhandled--Begged for money or things from strangers.
37. Skipped classes--Skipped classes without an excuse.
38. Didn't return change--Failed to refurn extra change that a cashier gave you by mistake. ${ }^{\text {a }}$
39. School suspension--Been suspended from school. ${ }^{\text {a }}$
40. Obscene calls--Made obscene telephone calls, such as calling someone and saying dirty things. ${ }^{\text {a }}$

Additional SRD items on subsequent surveys and year added
41. Damaged property--Purposely damaged or destroyed property that did not belong to you. (1977)
42. Physical threat for sex--Physically hurt or threatened to hurt someone to get them to have sex with you. (1978)
43. Pressured for sex--Pressured or pushed someone such as a date or friend to do more sexually than they wanted to do. (1978)
44. Credit card fraud--Used or tried to use credit cards without the owner's permission. (1978)
45. Used checks illegally--Used checks illegally or used phony money to pay for something (includes intentional overdrafts). (1979)
46. Fraud--Tried to cheat someone by selling them something that was worthless or not what you said it was. (1979)
47. Arson--Purposely set fire to a building, a car, or other property or tried to do so. (1980)
48. Hit someone at work--Hit or threatened to hit your supervisor or other employee. (1986)
49. Hit someone else--Hit or threatened to hit anyone else (other than parents, persons at work). (1986)
50. Damaged employer's property-Purposely damaged or destroyed property belonging to your employer. (1986)
51. Stole from employer--Stolen money, goods or property from place where you work. (1986)
$a_{\text {Items missing on the } 1977 \text { survey }}$ for part of the sample.

Respondents initially were asked to indicate how many times during the past year they committed each act. If their response to this open-ended question involved a frequency of 10 or more, interviewers then asked them to select one of the following categorical responses that best described their involvement: 1) once a month, 2) once every 2 to 3 weeks, 3) once a week, 4) 2 to 3 times a week, 5) once a day or, 6) 2 to 3 times a day. A comparison of the two response sets indicates a substantial agreement between frequency estimates given in direct response to the open-ended question and frequency estimates based upon the implied frequency associated with the midpoint of the category selected.

At the upper end of the frequency continuum, estimates based upon the
midpoint of the category are substantially higher than the frequency response given directly. The openended frequency measure thus appears to provide a more conservative estimate of number of delinquent acts, and the estimates given are based upon this response. The correlation between total SRD frequency scores and categorical scores for 1976 was .65.

For purposes of calculating precise estimates of the number of specific delinquent acts committed by age, race, class, and sex subgroups, the open-ended frequency responses were considered more appropriate. It is also the case that these data are more easily interpreted than the cafegorical data and more appropriate for comparisons with official arrest statistics or National Crime Survey (NCS) victimization statistics.

The SRD measure asks respondents to indicate how many times, "from Christmas a year ago to the Christmas just past," they committed each offense. The recall period for 197680 is thus a year, anchored by a specific reference point relevant to most youth. The use of a one-year period that coincides almost precisely with the calendar year allows for direct comparison with UCR data, NCS victimization data, and some prior SRD data. The recall period for the 1986 data was also one year. However, for 1981 and 1982 data the recall period is three and two years respectively since the sixth survey obtained estimates for 1981-83. Thus, 1981 and 1982 involve different recall periods than 1976-80, 1983, and 1986. The reader should be aware of these differences when examining trends encompassing 1981 and 1982 data.

## Item overlap

A specific attempt was made to eliminate as much logical overlap in items as possible in this new SRD measure. There are three logically possible overlaps in the item set. The first involves the home and school theft items that did not specify a dollar value and three general (no context specified) theft items, each involving a different value range (less than $\$ 5 ; \$ 5$ to $\$ 50$; and greater than $\$ 50$ ). The home or school theft items could logically overlap any of the general theft items. In the tables, separate incidence and prevalence estimates are provided for each of these five theft items. However, the home and school
theft offense items are included only in the home or school delinquency scales, i.e., neither is included in any of the other scales. There is thus no internal double counting involved in any of the delinquency scales. Some potential overlap remains between the home or school delinquency scales and other scales that include theft items.

In the 1979 survey, two new sexual assault items were added to facilitate a new study of sexual assault offenders and victims. Again, separate incidence and prevalence estimates are provided for all three sexual assault items. Only the original item is included in any scale. There is thus no double counting of sexual assaults in any of the delinquency scales.

There is also a logically possible overlap between the theft over $\$ 50$ item and the motor vehicle theft item. However, the two items are adjacent in the SRD item set, with the motor vehicle item appearing first, and it is not believed that there is an overlap problem. A special analysis of follow-up questions to these two items did not reveal any instances of overlap.

Given these possible overlaps, reported frequencies for individual items should not be summed across all items to obtain a total frequency score. A special study of item overlap is being done with 1980 SRD data.

## The measure of drug use

While a number of drug related offenses were included in the SRD measure (e.g., selling marihuana, being drunk, buying liquor for a minor), offenses involving the illegal possession of alcohol and illicit drugs for personal use were included in a separate measure of drug use. This measure inciuded seven drug substances: alcohol, marihuana, hallucinogens, amphetamines, heroin, cocaine, and barbiturates. Questions about the personal use of these seven substances were asked of all panel members on each of the seven annual surveys. Use of crack was added for the 1986 survey.

On the first survey, alcohol use was measured by a single item that combined beer, wine, and hard liquor. For the second and third surveys, a subsample was asked about beer, wine, and hard liquor use in three separate items, while the rest of the sample was again asked about al-
cohol use with the original single item. Estimates based upon the single item were substantially lower than those based upon the three items combined. Thus, no comparable measure of alcohol use for the entire sample for 1977 and 1978 was obtained. As a result, no national incidence or prevalence estimates for alcohol are presented for 1977 or 1978.

The general format of drug use questions was similar to that employed with the SRD measure. The general question for the set of drug use items was "In the past year how often have you used. . .?" The refer ence period for drug use, like delinquent offenses, was the last calendar year. The response set for the secand and third surveys was a categorical set involving nine frequency categories ranging from "never" to "2 to 3 times a day." Starting with the third survey and for all subsequent surveys, the dual open-ended and categorical response set utilized with the SRD measure was employed for the drug use measure. A common set of categorical responses were thus available for all seven surveys whereas open-ended frequency responses were limited to the last four surveys.

As a result, the estimates of drug use presented are all based upon categorical data. The interpretation of the drug use incidence (frequency) rates presented in the tables is thus different from the interpretation of self-reported delinquency incidence rates that are based upon an openended response set. The interpretation of prevalence rates for drug use and delinquent offenses is the same, however, as prevalence rates reflect the proportion of youth reporting one or more offenses and is the same whether categorical or open-ended frequency responses are used to determine the rate.

Incidence and prevalence rates
Prevalence refers to the number of persons in a population who report one or more offenses of a given type or class withir: a designated period of time. The unit of analysis, i.e., that which is counted, is persons. The prevalence rate is typically expressed as the proportion of persons in the population who have reported some involvement in a particular of fense or set of offenses. The time interval involved is usually designated, as in an annual prevalence rate, a three year prevalence rate or a lifetime (ever) prevalence rate.

Incidence refers to the number of offenses that occur in a given population during a specified time interval. In this case, it is offenses that are being counted, not persons.

It should be noted that the unit of analysis for incidence in selfreported surveys such as the NYS involves a person-reported offense as distinguished from an offense-event. For example, since a single robbery event may involve more than one person, the number of robberies reported by. persons in the sample may exceed the actual number of robbery events in which these persons were involved. Incidence estimates as used here, describe the rate at which persons commit offenses, not the rate of offense events. Incidence rates may be expressed as an average number of of fenses per person, or as the number of offenses per some population base (e.g., 100, 1,000, or 100,000 persons). As in the case of prevalence, the period of time involved is usually designated, e.g.y monthly incidence rate, annual incidence rate, lifetime incidence rate.

## APPENDIX 10

Drug Law Violators, 1980-86-Methodology

This information was excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Drug Law Violators, 1980-86, Special Report NCJ-111763 (Washington, DC: U.S. Department of Justice, June 1988), pp. 7, 8. Non-substantive editorial adaptations have been made.

## Methodology

The data tabulations in this report were computed using the Bureau of Justice Statistics' Federal Justice Statistics data base, maintained by Abt Associates, Inc. The source files for this report were provided by the Executive Office for U.S. Attorneys, the Administrative Office of the U.S. Courts, and the U.S. Parole Commission. Data on convictions and sentencing include Federal District Court cases brought by U.S. Attorneys and the Criminal Division of the Department of Justice. Except as specifically noted, years cited are calendar years.

Drug violations were classified on the basis of U.S. Code citations into four categories: distribution or manufacturing; importation; possession; and general trafficking and miscellaneous drug offenses. The possession category includes only-those charged with possession without intent to distribute; those charged with possession with intent to distribute are classified under the distribution/manufacturing category. After 1981, the general trafficking category primarily includes persons charged under those sections of the code that were designed to combat organized crime and that do not distinguish between the distribution, manufacture, importation, or possession of drugs. Where possible, data are also classified according to the drug involved in the alleged violation. Classificativins are based on the most serious offense with which the individual was charged at case filing unless otherwise noted.

The classification of offenses as drug offenses and non-drug offenses is based primarily on offense codes established by the Administrative Office of the U.S. Courts. Data records from the U.S. Attorneys' Docket and Reporting System that did not in-
clude the Administrative Office's of fense code were categorized by converting the offense's U.S. Criminal Code Title and Section into corresponding Administrative Office of fense codes. Data records from the U.S. Parole Commission's decision hearing (PDH) file were classified according to offense codes used by the Parole Cormission. Categories of offenses are defined similarly, regardless of the source of the data used to derive the tabulations.

## APPENDIX II

Felony Sentences in State
Courts--Definitions of terms and survey sampling procedures

Note: The following information has been excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Felony Sentences in State Courts, 1986 (Washington, DC: U.S. Department of Justice, February 1989), pp. 6-9. Non-substantive editorial adaptations have been made.

## Crime definitions

Before the somple was drawn, eight crime categories were defined. State penal codes, restricted to those defined as felonies and most closely conforming to each of the eight definitions, were identified. Convicted felons were placed into appropriate categories based on their penal code citations. Because of differences in State classification systems, murder and nonnegligent manslaughter were classified as a single offense as were larceny and motor vehicle theft. These are the definitions for the of fense categories:

Murder--(1) intentionally causing the death of another person without extreme provocation or legal justification or (2) causing the death of another while committing or at tempting to commit another crime. Murder excludes any type of manslaughter, conspiracies to commit murder, solicitation of murder, and attempted murder.

Nonnegligent (voluntary) manslaughter--intentionally and without legal justification causing the death of another when acting under extreme provocation.

Rape--forcible intercourse (vaginal, anal, or oral) with a female or male. Includes forcible sodomy or penetration with a foreign object (which are sometimes called "deviate sexual assault"); excludes statutory rape or any other nonforcible sexual acts with a minor or with someone unable to give legal or factual consent. Includes attempts.

Robbery--the unlawful taking of property that is in the immediate possession of another, by force or the threat of force. Includes forcible purse snatching, but excludes nonforcible purse snatching, which is classified as larceny/theft. Includes at tempts.

Aggravated assault--(1) intentionally and without legal justification cousing serious bodily injury, with or without a deadly weapon or (2) using o deadly or dangerous weapon to threaten, attempt, or cause bodily injury, regardless of the degree of injury if any. Includes "ottempted murder," "aggravated battery," "felonious assault," and "assault with a deadly weapon."

Burglary--the unlawful entry of a fixed structure used for regular residence, industry, or business, with or without the use of force, to commit a felony or theft. Includes at tempts.

Larceny--the unlawful taking of property other than a motor vehicle from the possession of another, by stealth, without force or deceit. Includes pocketpicking, nonforcible purse snatching, shoplifting, and thefts from motor vehicles. Excludes receiving and/or reselling stolen property (fencing), and thefts through fraud or deceit. Includes attempts.

Motor vehicle theft--the unlawful taking of a self-propelled road vehicle owned by another. Includes the theft of automobiles, trucks, and motorcycles, but not the theft of boats, aircraft, or farm equipment (which are classified as larceny/theft). Also includes receiving, possessing, stripping, transporting, and reselling stolen vehicles, and unauthorized use of a vehicle (joyriding). Includes attempts.

Drug trafficking--includes manufacturing, distributing, selling, smuggling, or "possession with intent to sell." Includes attempts.

Other felonies--all felony offenses not listed above. Includes drug possession, forgery or fraud, weapon possession, receiving stolen property, driving while intoxicated or other traffic offenses, statutory rape, and sexual assault (not rape). Includes attempts.

## Survey sampling procedures

Resource constraints limited sample size to 100 counties for the 1986 survey. Table I lists each county in the sample. Every county in the Nation had a nonzero probability of being in the sample. In general, the more felony cases a county had, the more likely it was to be in the sample. The survey used a two-stage stratified cluster sampling design. In the first stage the Nation's 3,109 counties or county equivalents were divided into 6 strata. Strata 1 and 3 consisted solely of the 75 largest counties in the U.S. as defined by 1985 resident population. Strata 2, 4, 5 , and 6 consisted of the remaining 3,034 counties.

Because the 75 largest counties account for a disproportionately large amount of serious crime in the Notion, they were given a greater chance of being selected than the remaining counties.

Stratum I consisted of the 19 counties with the largest number of felony convictions in 1985, plus !3 counties whose participation in the survey had been prearranged. Every county in stratum I was selected for the sample.

Stratum 3 consisted of the 43 most populous counties that were not in stratum 1. The 43 were listed from largest to smallest number of felony convictions in 1985, and then opproximately every other county was selected. Stratum 3 thus contributed 22 counties to the sample. All together 54 out of the 75 largest counties were sampled. Data on 1985 felony convictions were obtained from a mail survey described in U.S. Department of Justice, Bureau of Justice Statistics, State felony courts and felony laws (NCJ-106273) and Census of State felony courts, 1985 (codebook for the Inter-University Consortium for Political and Social Research, study number 8667).

Stratum 2 consisted of 10 counties whose participation in the survey had been prearranged. All 10 were in the sample.

The 3,024 remaining counties were placed into 3 strata defined by the total number of felony convictions in 1985 and then arrayed within stratum by region, and within region from largest to smallest on felony conviction totals. Within stratum 4 , approximately every 7th county was drawn, yielding 13 counties for the sample; within stratum 5, approximately every 49th was drawn, yielding 9 counties for the sample; and within stratum 6, approximately every 179 th was drawn, yielding 14 counties for the sample.

The final sample thus totaled 46 counties from among the 3,034 counties outside the 75 largest.

In 99 out of the sampled 100 counties, case-level data were successfully obtained on convicted felons sentenced in 1986. The missing county, a member of stratum 2, was replaced by a county with similar characteristics.

Collectively 115 State courts in the 100 counties sentenced felons, and all 115 were represented in the sample.

The 42 sampled counties in strata 1 and 2 were self-representing only, and their sampled cases therefore had a first stage sampling weight of I. The remaining 58 counties sampled from strata 3 through 6 were selected to represent their respective strata so that the felony conviction cases sampled had first stage weights greater than 1 .

At the second stage of sampling, a systematic sample of felons sentenced for murder/nonnegligent manslaughter, rape, robbery, aggravated assault, burglary, felony lar-
ceny/motor vehicle theft, drug trafficking, and other offenses was selected from each county's official records. The total sample numbered 51,594 cases. Of these, 39,325 cases were in the 75 largest counties.

Rates at which cases were sampled varied by stratum and crime type. In smaller counties every felony case was taken. In larger counties all murder cases and rape cases were typically included, but other offense categories were sampled.

Before the sample was drawn, each felon sentenced in 1986 was placed into one of the eight offense categories identified above. See note on Table 5.30 for details on how felons were categorized when convicted of multiple offenses on a single day. These procedures gave each sentenced felon a single chance to be in the sample. An exception could have occurred if a felon appeared in court on more than one day for different offenses and received a sentence at each reappearance.

## Sampling error

Estimates of sampling error are presented in tables 2 through 4.

## Sources of data

State courts were the source of data for 61 counties; State prosecutors, 16 counties; and State courts and State prosecutors combined, 5 counties. Sources for the remaining 18 counties included sentencing commissions, a sheriff's office, a law enforcement commission, and a regional criminal justice information system.

For 47 counties, the data were obtained from computer printout submitted by the source; for 21 counties, magnetic tape; for 17 counties, field data collection; and for the remaining 15 counties, the data were obtained from documents submitted by the source (for example, a questionnaire filled out on each felon,
or records of arrest and prosecution on each felon).

## Targeted population

The survey fargeted initial sentences imposed in 1986 on the first day the defendant received a sentence. Modified sentences imposed on subsequent days were ignored. When sentences were suspended on the day of imposition, the recorded sentence was the one executed at the end of that day.

Year of conviction was not a defining characteristic so that some cares in the sample were of persons convicted before 1986 but not sentenced until 1986.

In a few counties, where it was impractical to target sentences in 1986, the target was felons convicted in 1986. Some of the cases in these counties were sentenced after 1986.

## Characteristics of the sample

The smallest county in the sample had a 1986 resident population of about 2,200 persons; the largest county had 8.3 million residents. A total of 37 States were represented in the sample. One county had only one felony conviction in 1986, and one had as many as 31,375 .

## APPENDIX 12

Probation and Parole in the United States--Definitions of terms, survey methodology, and jurisdictional explanatory notes

This information was excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Probation and Parole 1984, Bulletin NCJ-100181, pp. 5, 6; 1985, Bulletin NCJ-103683, pp. 2, 3; 1986, Bulletin NCJ-108012, pp. 2-4; 1987, Bulletin NCJ-113984, pp. 3, 4 (Washington, DC: U.S. Department of Justice); and information provided by U.S. Department of Cormerce, Bureau of the Census. Non-substantive editorial adaptations have been made.

Dato were collected for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Bureau of the Census.

## Definitions of terms

## Probation entries--Persons

 entering probation directly from a sentencing court, or from a correctional facility as a result of split sentencing or sentence modification.Probation exits--Persons removed from probation including discharges (termination, completion of terms, and early dischorges), revocation and commitment to incarceration, and people who die while on probation.

Probation population-All adults who have been placed under the supervisory authority of a probation agency as part of a court order. Bench, court, informal and summary probation cases, where the judiciary never surrenders jurisdiction to a probation agency are excluded from counting.

Probationers--Persons who have been placed under the super visory authority of a probation agency as part of a court order regardless of whether they have been convicted.

Parole entries--Persons entering parole supervision from a correctional facility as a result of either parsle, reparole, reinstatement, or mandatory supervised release.

## Parole exits

Mandatory supervised re-lease--Persons entering parole su-
pervision from a correctional facility upon expiration of sentence not as a result of a paroling authority decision.

Removals--Persons removed from a parole: discharges, including terminations, completion of term and early discharges; revocations and recommitments to prison; and deaths.

Parole population--All persons under the jurisdiction of a paroling authority. (Out-of-State parolees under courtesy supervision are counted in the population of the paroling authority with jurisdiction.)

Paroling authority--A board, commission, or authority responsible for parole supervision which may or may not have discretionary power to release offenders from prison prior to the expiration of sentence, to revoke parole and return violators to prison, and to reinstate or grant other forms of reentry to parole supervision.

Jurisdictional explanatory notes

## Probation notes

Many States update their population counts, so that the Jan. I, 1987, numbers may differ from those previously published for Dec. 31, 1986.

Alabama--The 1987 beginning and yearend counts reflect the addition of Birmingham and Huntsville Municipal Probation Departments.

Arkansas--The State estimated all its data.

Indiana--The data are for calendar year 1986.

Minnesota--The State revised the yearend 1986 count to include 3,674 cases under supervision by the Alternative Sentencing or Case Manager Programs. Data on exits were estimoted.

Missouri--The 1987 beginning and yearend count reflect the addition of cases from the St. Louis office.

Nevada--The State estimated all data.

New Jersey--The State counted 1,188 transfers from other States as entries.

New Mexico--The State counted neither absconders nor persons supervised out-of-State.

Utah--The State excluded interstate prohation compact cases from its yearend count.

Virginia--The probation data are from the fiscal year ending June 30, 1986. Virginia did not include absconders in its yearend count.

Washington--The State included absconders, a category excluded from their count before 1987.

## Parole notes

Many States update their population counts, so that the Jan. I, 1987, numbers may differ from those previously reported for Dec. 31, 1986.

Alabama--Data include 47. 10cal parolees unreported in 1986. The State estimated entries and exits.

Alaska--The State excluded data describing 150 persons on mandatory parole.

California--The State reported releases to parole from both the Department of Corrections and the California Youth Authority. Exits include 6,225 absconders.

Colorado--The State placed absconders in an inactive caseload but included them in the yearend population counts. Colorado estimated exits.

Connecticut--Data include interstate compact cases under supervision within the State.

District of Columbia--The District adjusted the previously reported yearend 1986 population after purging the warrant issued status files.

Delaware--The State supervised only persons sentenced to a year or more.

Georgia--The State counted absconders in its yearend parole population.

13inois--The yearend 1987 count includes persons under parole supervision in other States. Mlinois reported 12,137 persons under active supervision within the State.

Indiana---Data exclude Interstate Compact cases.

Kansas--The State monitors absconders apart from the regular parole caseload and omits them from the reported counts.

Maine--The State abolished parole in 1976. There remain 41 pre1976 parolees under supervision and 35 in prison who will become eligible for parole.

Massachusetts--The State estimated data for entries and exits.

Mississippi--Yearend population counts omit absconders.

Missouri--The State estimated the 1987 parole data.

Montana--Montana estimated data from available manual records.

Nebraska--Data include only parolees under supervision within the State.

Nevada--The State estimated all data.

New Mexico--The 1987 yearend count omits 184 absconders and 198 parolees supervised out-of-State.

New York--Although the State supervises parolees from county facilities, it excluded 301 such cases from the count.

North Carolina--Absconders and transfers to other jurisdictions remain in the active caseload.

North Dakota--The State counted absconders in the yearend population.

Oklahoma--The State does not consider discharged absconders; persons discharged to custculy, detainer, or warrant; or transfers to other jurisdictions to be exits. They are carried as administrative caseload.

Pennsylvania--Local authorities supervised 25,615 parolees. Persons returning to prison with new charges pending or parole revocation pending were not counted as exits.

Rhode Island---Parole data for 1987 include 17 persons being held on detention warrants, I person serving a Federal sentence, 6 persons being supervised by the U.S. Immigration Service, and 3 participants in the Federal Witness Protection Program.

South Dakota--The reporting period was for the fiscal year ending June 30, 1987. The State kept absconders in its yearend parole counts.

Texas--The reporting period was for the fiscal year ending Aug. 31, 1987.

Virginia--The State reported 837 transfers as entries and an unspecified number of transfers as exits.

Washington--The State estimated the number of entries and exits. It placed absconders in an inactive caseload and omitted them from the population count.

West Virginia--West Virginia in 1987 began to report cases being supervised out-of-State.

## APPENDIX 13

Correctional Populations in the United States, 1987--Survey methodology, definitions of terms, and jurisdictional explanatory notes

Note: The following information has been excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Correctional Populations in the United States 1987, NCJ118762 (Washington, DC: U.S. Depariment of Justice, 1989); and Prisoners in 1986, Bulletin NCJ- 104684 (Washington, DC: U.S. Department of Justice, May 1987). Non-substantive editorial adaptations have been made.

## Survey methodology

Data from these sources are based on yearend 1986 and 1987 inmate counts and on enumerations of prisoner transactions during 1987. As in past years, these data were collected with a standard questionnaire transmitted to the appropriate State authorities and the Federal Bureau of Prisons. The final date for receipt of information was Mar. 15, 1988. Data from Prisoners in 1986 were compiled by a yearend census for the Bureau of Justice Statistics.

In each jurisdiction, the questionnaire was completed by a central agency reporting for institutions within the correctional system. This procedure was also used by the Federal Bureau of Prisons in supplying data on Federal institutions. Because the information was derived from a complete enumeration rather than a survey, the statistical data are not affected by sampling error. Response errors were held to a minimum by means of a systematic telephone fol-low-up and, where necessary, other control procedures. Thus, the yearend counts are generally considered reliable. Because of the absence of standardized administrative and record keeping practices from State to State, the data for admissions and departures are not always entirely comparable across jurisdictions. Jurisdictions may revise their numbers in later years. Subsequent publications may therefore differ from data presented here.

National Prisoner Statistics (NPS) cotegory definitions

## Jurisdiction population,

Dec. 31, 1987--Includes all inmates
under jurisdiction of State correctional authorities on Dec. 31, 1987 regardless of location. Does not include other jurisdictions' inmates (for example, inmates from other States, pretrial detainees) merely housed in prisons.

Custody popuiation, Dec.
31, 1987--Includes all inmates in the State's custody, that is, housed in State correctional facilities on Dec. 31, 1987. Does not include State inmates housed outside State prison facilities; does not include other jurisdictions' inmates (for example, inmates from other States, the courts, local jails) housed in State's facilities.

Overcrowding, Dec. 31, 1987--Includes all State prison inmates housed in local jails on Dec. 31, 1987, as a direct result of State prison overcrowding. Does not include State prison inmates held in local jails for other reasons (for example, work release, court appearance, etc.).

## Admissions

New court commitments--Includes all inmates who were admitted with all new sentences, that is, these inmates were not readmitted for any sentences for which they had already served some prison time. This category includes probation violators entering prison for the first time on the probated offenses. Does not include parole violators with new sentences.

Parole violators with new sentences--Includes all parolees returned with new sentences.

Other conditional release violators with new sentences--lncludes all individuals on conditional release (other than parole) who are returned with new sentences, for example, returns from supervised mandatory release, from shock probation, etc.

## Parole violators only, no

 new sentences---Includes all parolees returned only for formal revocations of parole that were not accompanied by new sentences. If the parole was not formally revoked, that is, the parolee was held only temporarily pending a hearing, no admission occurred for NPS purposes.Other conditional release violators only, no new sentences--Same as above, substituting conditional release violator for parole violator.

Transfers from other juris-dictions--Includes all inmates transferred to this State's juisdiction to continue sentences already in force. Does not include admissions if State does not acquire jurisdiction. Does
not include movements from prison to prison within State.

## Absent without leave

 (AWOL) returns, with or without sentences--Includes all returns from AWOL, that is, failures to return from authorized temporary absences such as work furlough, study release, mercy furlough, or other authorized temporary absence.Escapee returns, with or without new sentences--Includes all returns from escape, that is, unlawful departures from a State correctional facility or from the custody of State correctional persontiel.

Returns from appeal/bondIncludes all inmates reinstated to correctional jurisdiction from longterm jurisdictional absences on appeal or bond. Does not include returns from short-term movements (less than 30 days) to court (that is, where the State retains jurisdiction).

Other admissions--Includes all other admissions not covered by the above categories.

## Releases

Unconditional--An unconditional release occurs only if the released inmate cannot be imprisoned for any sentence for which he was in prison.

Expirations of sentence--Includes all inmates whose maximum court sentences minus credits have been served.

Commutations--Includes all inmates whose maximum sentences have been changed (lowered) to time served to ailow immediate unconditional release.

Other unconditional
releases--Includes all other unconditional releases not covered by the above categories.

Conditional--A conditional release occurs if the released inmate, upon violating the conditions of tis release, can be imprisoned again for any of the sentences for which he was in prison.

Probations--Includes all inmates who have been placed under probation supervision and conditionally released; includes all shock probation (split sentence) releases.

Supervised mandatory
reieases--Includes all inmotes who must, by law, be conditionally released. This type of release may also be cailed mandatory conditional release.

Paroles--Includes all inmates conditionally released to parole.

Other conditional releases-Includes all other conditional releases not covered by the above categories.

## Death:

Executions--Self-explanatory. Illness/natural causes--Selfexplanatory.

Suicides--Self-explanatory.
Accidental injury to self--Includes all inmates who accidentally cause their own deaths (for example, a fall from a ladder, mishandling electrical equipment).

Death caused by another per-son--Includes all inmates whose deaths were caused accidentally or intentionally by another inmate or prison personnel.

Other deaths--Includes all other deaths not covered by the above categories.

Other releases: Absent without leave (AWOL)--Includes all failures to return from an authorized temporary absence such as work furlough, study release, mercy furlough, or other authorized temporary absence.

Escapes from confinement--Includes all unlawful departures from a State correctional focility or from the custody of State correctional personnel.

Transfers to other jurisdic-tions--Includes all inmates who were transferred from one State's jurisdiction to another to continue sentences already in force. Does not include the release if State does not relinquish jurisdiction. Does not include movements from prison to prison within State.

Releases to appeal/bond--Inclufes all inmates released from correctional jurisdiction to long-term jurisdictional absences to on appeal or bond. Does not include short-term movements (less than 30 days) to court (that is, where the State correctional system retains jurisdiction).

Other releases--Includes all other releases not covered by the above categories.

## Race

White--A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

Black--A person having origins in any of the black racial groups of Africa.

American Indian or Alaskan Native--A person having or \%ins in any of the original peoples of North America, who maintains cultural identification through tribal affiliation or community recognition.

Asian or Pacific Islander--A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands. This
area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

Other--Any other race not covered by the above categories.

Not known--Any inmate whose racial origin is unknown.

## Ethnic origin

Hispanic--A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race.

Not Hispanic--A person not covered by the above category.

Not knewn--Any inmate whose ethnic origin is unknown.

## Jurisdictional explanatory notes for Correctional Populations in the United States, 1987

Differing legal and administrative requirements as well as diverse record keeping practices among jurisdictions hamper efforts to collect uniform nationwide data on the number and movement of inmates in State and Federal correctional institutions. Not all jurisdictions are able to provide information that meets NPS definitions. For some, the discrepancies between reported data and the criteria are minor, but in others these discrepancies are more serious and, overall, serve to limit the comparability of data among jurisdictions. Limitations in State data, of course, carry over into regional and national figures, which, as a consequence, should be viewed as providing an order of general magnitude rather than precise tovals.

The notes that follow identify deviations from the category definitions used in the 1987 questionnaire, provide details on the content of "other" admission and release categories, and specify revisions to data that should be taken into account when comparing 1986 and 1987 figures. State inmates housed in local jails generally considered to be under State jurisdiction. Exceptions to this rule are noted below. Some States included an adjustment residual in their admission or release figure in order to beionce the yearend 1986 count with the yearend 1987 count.

Alabama--New court commit ments: Include other conditional release violators with or without new sentences. Escapees and AWOL prisoners: Counted as a single category. Other admissions: Unspecified to the Alabama data system. Other conditional relemses: Unspecified to the Alabama data system. Cause of death: Can specify only execution.

Alaska--New court commitments: Include other conditional release violators with or without new sentences. Transfers to and from other jurisdictions: Include custody transfers of inmates under Alaska's jurisdiction from and to Federal and Minnesota facilities. Total inmate population: Custody and jurisdiction counts include inmates of prisons and jails, which form an integrated system in Alaska.

Arizona--Population, admissions and reieases counts: Based on custody data. Other admissions: Include inmates ordered by a court to a psychiatric ward for evaluation and treatment. Other unconditional releases: Court-ordered releases. Other conditional releases: Include supervised temporary releases, supervised discretionary releases, and supervised work furloughs. Other releases: Include administrative case closures by the Cormunity Services Division.

Arkansas--Sentencing information: Reported population with sentences longer than 1 year includes a srnall number of inmates with sentences of a year or less. Parole violators with new sentences: Include parole violators without new sentences. Conditional release violators with new sentences: Include conditional release violators without new sentences. Other unconditional releases: Court-ordered releases. Other conditional releasec: Comprised of persons released to supervision u ter the provisions of Arkansas' Acts $3 \dot{u} 9$, 378, and 814. Race: Numbers estimated.

California--Population, admissions and releases counts: Based on custody data. New court cormitmení: May include a small number of transfers from other jurisdictions. Conditional release violators with new sentences: Include some parole violators with new sentences. Conditional release violators without new sentences: Include some parole violators without new sentences. The category also includes supervised mandatory and parole releases returned to prison pending revocation hearings. Other admissions: Contain the difference between total admissions and the number in other admissions categories. Unconditional releases, expirations of sentence: Include some court-ordered releases. Supervised mandatory releases: Include some releases to parole. Other releases: Contain the difference between total releases and the number in other categories of releases. Unsentenced inmates: Include civil commitments of narcotic addicts and county diagnostic cases. Hispanic prisoners: Include only Mexican

Americans. Other Hispanic prisoners were categorized as non-Hispanic.

Colorado--Sentencing information: Reported population with sentences longer than 1 year includes a very small number of inmates with maximum sentences of 1 year. Other conditional release violators: Include probation viointors. Jurisdiction counts for admissions, releases, and population characteristics: Exclude 208 men held in jails solely to ease prison crowding. Other unconditional releases: Court-ordered releases. Race and Hispanic origin: Numbers estimated.

Connecticut--New court commitments: May include a small number of prisoners returned from appeal or bond and some probation violators entering with or without new sentences. Other conditional release violators, with or without new sentences: Include former residents of halfway houses and participants in the supervised home release program. Unconditional releases, expirations of sentence: include some releases to probation supervision. Other unconditional releases: Court-ordered releases and pardon discharges. Other conditional releases: "Community residence" releases under supervision similar to that for parolees. Unspecified causes of death: Utm specified to the Connecticut data system. Hispanic prisoners: Categerized as prisoners of unknown race. Total inmate population: Custody and jurisdiction counts include inmates of prisons and jails, which form an integrated system in Connecticut.

Delaware--Deloware revised the previously reported December 31, 1986, population of irmates with maximum sentence of over a year. Sentencing information, partially suspended sentences: Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under proipation. They were categorized with inmates sentenced to a year or more only when the prison portion of their sentences exceeded 12 months. As a result, the population and movement counts of inmates with maximum sentences of more than I year are understated, and the population count of inmates with a year or less maximum sentences is overstated. New court cormitments: Include some conditional release violators other than parolees, with or without new sentences, Escapees and AWOL prisoners: Counted as a single category. Other admissions: Include those prisoners for whom a short-term movement became long term and a small number of admissions of unknown
type. Unconditional releases, expirotions of sentence: Include some releases to probation. Other unconditional releases: Court-ordered releases. Other releases: Include those prisoners for whom a short-term movement became long term and a small number of releases of unknown type. Total inmate population: Custody and jurisdiction counts include inmates of prisons and jails, which form an integrated system in Delaware.

## District of Columbia--

Population, admissions and releases counts: Based on custody data. Sentencing information, partially suspended sentences: Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categorized with inmates sentenced to a year or more only when the prison portion of their sentences exceeded 12 months. As a result, the population and movement counts of irmates with maximum sentences of more than I year are understated, and the population count of inmates with a year or less maximum sentences is overstated. Sentencing information, short sentences: An undetermined number of inmates housed in neither the District of Columbia jail nor the detention center and having either no sentence or a maximum sentence of a year or less, was included in the admissions, releases, and population counts of irmates with more than I year maximum sentence. As a result, the population and movement counts of inmates with maximum sentences of more than I year are overstated, and the population count of inmates with a year or less maximum sentences is understated. Parole and other conditional release violators: The total number is gctual; counts of men within categories of violation are estimates. The female parole violators are counted as having new sentences. Transfers from other jurisdictions: Transfers from mental hospitals and Federal facilities. Unconditional releases, expirations of sentence: Include some inmates with partially suspended sentences and released to probation. Cause of death: No cause is specified in the District of Columbia's dato system. Other transfers to other jurisdictions: Transfers to mental hospitals and Federal facilities. Jurisdictional population totals: Include unsentenced inmates held for the first time in the District jail or detention center. Total inmate population: Custody and juristiction counts include inmates of prisons and jails, which form an integrated sys-
tem in the District of Columbia. Race: Numbers estimated.

Federal prisons--Sentencing information, partially suspended sentences: Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categorized with inmates sentenced to a year or more only when the prison portiors of their sentences exceeded 12 months. As a result, the population and movernent counts of inmates with maximum sentences of more than I year are understated, and the population count of inmates with a year or less maximum sentences is overstated. New court commitments: Include other conditional release violators with new sentences. Parole violators with and without new sentences: The total number of parole violators is actual; however, the numbers in sentencing categories are estimated. Unconditional releases, expirotions of sentence: Include some inmates with partially suspended sentences released subject to conditions of probation. Other unconditional releases: Include persons released by court orders, pardons, and clemency. Other releases: Include an adjustment for inmates counted as being admitted although they were already in jurisdiction of a prison. Such prisoners had been released on writs or authorized temporary absences that became long term. Population total, unsentenced prisoners: Include 2,365 men and 19 women held under the jurisdiction of the Immigration and Naturalization Service.

Florida--Population, admissions and releases counts: Based on custody data. Returns from appeal or bond hearings, and other admissions: Contain the difference between total admissions and the number otherwise categorized. Include returns from authorized temporary absences on appeal or bond. Other unconditional releases: Include pardons, vacated sentences, and unconditional releases ordered by the Probation and Parole Cormission. Other conditional releases: Include inmates released to supervised community release. Hispanic prisoners: Classified as pris.oners of unknown race.

Georgia--Georgia levised the previously reported Dec. 31, 1986, population of inmates with maximum sentences of more than I year. Sentence lengths of 992 immates were not entered in the data system. Georgia estimates that 892 men and 54 women had a maximum sentence longer than 1 year while 41 men and 5 women had a maximum sentence of a year or less. Population, admissions
and releases counts: Based on custody data. New court commitments: May include some prisoners returning from appeal or bond. Parole violators with new sentences: Include parole violators without new sentences and other conditional release violators with or without new sentences. Escapees and AWOL prisoners: Counted as a single category. Other unconditional releases: Include fines, pardons and suspended sentences. Other conditional releases: The Parole Board controls the conditional reprieve releases. Unspecified causes of death: Cannot specify cause that may include accidents. Jurisdiction population: Excludes inmates awaiting pickup from jails. Race: Numbers estimated. The State estimated that 359 men and 21 women of the 992 inmates with unknown data were white; 574 men and 38 women were black. Black prisoners: Include all persons of a race other than white.

Hawaii--Category estimates: Jurisdiction and custody totals represent actual counts. Admissions, releases, race, and Hispanic origin are estimated from the 1987 fiscal year report. New court cormitments: May include a small number of probation violators or escapees returned to prison with or without new sentences. Transfers: Include a small number of escapes. Total inmate population: Custody and jurisdictio., counts include inmates of prisons and jails, which form an integrated system in Hawaii. Prisoners of unknown race: Include Puerto Ricans, prisoners of other Hispanic origin, and inmates who identified more than one racial background; however, prisoners of part-Hawaiian ancestry were counted as Asians or Pacific Islanders.

Idaho--The population count for Dec. 31, 1987, excludes 130 men held in jails solely to ease prison crowding. Escapees arid AWOL prisoners: Counted as a single category. Other admissions: Inmates returned from "Agreement on Detainers." Include also two civil commitments and two returned from court. Other unconditional releases: Court-ordered releases. Cause of death: No cause is specified in Idaho's data system. Other releases: Inmates released to "Agreement on Detainers."

Illinois--Population, admissions and releases counts: Based on custody data. Data for inmates with a sentence greater than 1 year include some inmates with a year's maximum sentence. Conditional release
violators with new sentences: Iniclude some parole violators with new sentences. Other conditional release violators without new sentences: In-
clude some parole violators without new sentences. Also include some returned violators with charges pending. Other admissions: Contain the difference between total admissions and the number in other admissions categories. Include transfers and prisoner:i returning from a release on medical furlough, writ, appeal, or bond. Other unconditional releases: Court-ordered releases. Other releases: Contain the difference between total releases and the number in other categories of releases. Include transfers and prisoners leaving for a release on medical furlough, writ, appeal or bond. Hispanic prisoners: Categorized as prisoners of unknown race.

Indiana--Population, admissions and releases counts: Based on custody data. Conditional release violators with new sentences: Include parole violators with or without new sentences and other conditional release violators without new sentences. Unconditional releases, commutations: Parole Board determines the termination of sentences. Conditional releases, probations: Number estimated. Other conditional releases: Releases to regulated community assignment. Race and Hispanic origin: Numbers estimated.
lowa--Population, admissions and releases counts: Based on custody data. Parole violators without a new sentence: Include persons refurned to prison to await revocation hearing. Other admissions: Include Safekeepers. Unconditional releases, expirations of sentence: Include prisoners who received executive commutations that free inmates immediately and unconditionally. Other unconditional releases: Courtordered discharges. Conditional releases, paroles: Number estimated. Include prisoners remanded to prison prior to a formal revocation hearing at which they were returned to parole. Also include inmates released to parole by Conditional Cormutation Orders. Hispanic prisoners: Categorized as prisoners of unknown race.

Kansas--New court cormitments: May include a small number of prisoners returning from appeal or bond. Other conditional release violators, with or without new sentences: Include some probation violators who should have been categorized as new court commitments. Escapees and AWOL prisoners: Counted as a single category. Other conditional releases: Prisoners under supervision similar to that of parole. Hispanic prisoners: Categoi ized as prisoners of unknown race.

Kentucky--Category estimates: Population, admissions, and releases counts were actual; categories may have been estimated from proportions determined in previous years. Escapees and AWOL prisoners: Counted as a single category. Other admissions: Prisoners returned to prison by court. May include some prisoners returning from appeal or bond. Other releases: Court-ordered releases, conditional or unconditional. May include some releases for appeal or bond. Total ju: isdiction population: Excludes 898 men and 67 women awaiting pickup from jails where they were housed solely to ease prison crowding.

Louisiana--Category estimates: Jurisdiction and custody yearend counts were actual; movement data by category were estimated. Escapees and AWOL prisoners: Counted as a single category. Other unconditional releases: Include court-ordered releases, pardons, and good-time releases. Other releases: Inmates whose types of release were unknown at time of reporting.

Maine--New court commitments: Estimated from probation and parole data and jurisdiction yearend count for 1987. Supervised mandatory releases: Probation revocations. Mistakenly categorized in 1986. Escapees and AWOL prisoners returned to prison: Counted as single category. Other unconditional releases: Court-ordered releases. Other conditional releases: Releases to intensive supervision program.

Maryland--Category estimates: The admissions, releases, and population totals the actual counts. Categories for admissions and releases are estimated by applying percents from automated data to the totals that are made manually. The automated data count only inmates with maximum sentences longer than I year, while the detailed categories in the manual data include inmates with a maximum sentence of a year or less. New court commitments: May include a small number of prisoners returning from appeal or bond. Escapees and AWOL prisoners: Counted as single group. Other unconditional releases: Court-ordered releases. May include a small number of releases to appeal or bond. Other conditional releases: Inmates from Patuxent Institution released to halfway houses.

Massachusetts--Population, admissions and releases counts: Based on custody data. Category estimates: The totals for admissions and releases are actual; the categories are estimated. New court commitments: Include some parole
violators with new sentences and other conditional release violators with or without new sentences. Unconditional releases, expirations of sentence: Include some releases to probation. Other unconditional releases: Court-order releases. Total inmate population with sentences longer than 1 year: Offenders who are sentenced to local correctional facilities for terms up to $21 / 2$ years are excluded from counts of populotion, admissions, and releases; however, they may be included in reports about the jail population. Total jurisdiction population: Excludes 142 men housed in jails solely to ease prison crowding. Unknown race: The race of some Hispanics was unrecorded.

Michigan--Population, admissions and releases counts: Based on custody data. Transfers from other jurisdictions: Include transfers from mental hospitals, Federal prisons, and prisons of other States. May include other long-term admissions like writs or medical cases. Returns from appeal or bond: Contain the net difference of movements to or from courts. Unspecified couses of death: the cause of death was unknown at the time of data collection. Asian and Pacific Islander prisoners: Categorized as prisoners of unknown race. Releases to appeal or bond: Contain the net difference of movements to or from courts. Hispanic prisoners: Include only Mexican Americans who are also categorized as prisoners of unknown race. Other Hispanic prisoners are classified as non-Hispanic.

Minnesota--Parole violators with new sentences: Include other conditional release violators from supervised mandatory releases and work releases, with new sentences. Parole violators without new sentences: Include other conditional release violators from supervised mandatory releases and work releases, without new sentences. Escapees and AWOL prisoners: Counted as a single category. Other unconditional releases: Include prisoners discharged after the Office of Adult Releases modified their sentences or after a court or executive order. May include some cormutations. Other conditional releases: Work releases. Prisoners of unknown race: Twelve non-Hispanic men categorized as prisoners of unknown race. Hispanic prisoners and prisoners of unknown race: Include 65 men and 1 woman, Hispanics, categorized as prisoners of unknown race.

Mississippi--New court commitments: Include a small number of shock probation violators. Other ad-
missions: Inmates awaiting parole revosation hearings. Other unconditional releases: Court-ordered releases. Other conditional releases: Include supervised earned releases, Governor's suspension of sentence, and Emergency Powers Act releases. Other releases: Inmates who went back to prison pending a revocation of parole hearing that subsequently returned them to community supervision.

Missouri--New court commitments: Include some "shock probation" commitments. May also include other conditional release violators returned to prison. Parole violators without new sentences: Include some parole violators with new sentences. Escapees and AWOL prisoners: Counted as a single category. Other unconditional releases: Court-ordered releases. Conditional releases, paroled women: Number estimated. Unspecified causes of death: No cause specified. Race: Numbers es timated.

Montana--Parole violators, no new sentences: Include some other types of conditional release violators with new sentences.

Nebraska--Nebraska revised the previously reported Dec. 31, 1986, number of male inmates with maximum sentence of more than a year. New court commitments, men: May include some prisoners returned from appeal or bond. Parole violators without new sentences, men: Include some parole violators with new sentences. Transfers for women: Prisoners admitted from and released to a work release center (custody movements only). Other admissions, women: Custody movements only of inmates resident in a State mental facility. Other releases, women: Interstate compact cases housed and released in other States.

Nevada--Nevada revised the previously reported Dec. 31, 1986, population of inmates with maximum sentence of over a year. New court commitments: May contain a small number of returns from appeal or bond. Escapees and AWCL prisoners: Counted as a single category. Other causes of death: Inmate shot while trying to escape. Hispanic prisoners: Categorized as prisoners of unknown roce.

New Hampshire--New court commitments: Include some prisoners returned from appeal or bond and may include other conditional release violators with or without new sentences. Parole violators without new sentences: Include parole violators who receive new sentences ofter readmission to prisori. Other unconditional releases: Court-ordered releases.

New Jersey-New court com mitments: May include some transfers from other jurisdictions. Other conditional release violators without new sentences: Prisoners returned (some with new sentences) from the Intensive Supervision Program, an experimental program operated by the Administrative Office of the Courts. The program provides a sanction that in severity lies between incarceration and probation. The category may also include some conditionally released prisoners returned with new sentences. Escapees and AWOL prisoners: Counted as a single category. Other conditional releases: Prisoners released to the Intensive Supervision Program. Total jurisdiction population and categories for admissions and re'sases: Exclude 1,847 men and 103 women held in jails to ease prison crowding. Include 436 men held in jails to ease prison crowding.

New Mexico--Parole violators without new sentences: May include parole violators with new sentences.

New York--New court commitments: Include parole violators and other conditional release violators with new sentences. Tronsfers from and to other jurisdictions: Transfers from and to the Department of Mental Hygiene for psychiatric treatment. Other admissions: Type of admissions unknown at the time of data collection. Other causes of death: Causes unknown at the time of data collection. Custody population with sentences more than 1 year and total: Include 195 men and 3 women who were detained on warrant as alleged parole violators, awaiting revocation hearings. Hispanic prisoners and race: All Hispanic inmates, white and black, are categorized as white.

North Carolina--Population, admissions and releases counts: Based on custody data. Parole violators with new sentences: Include some parole violators without new sentences and some other conditional release violators with or without new sentences. Escapees and AWOL prisoners: Counted as a single category. Sentencing information, partially suspended sentences: Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. The prisoners are categorized with inmates sentenced to a year or more only when the prison portion of their sentences exceeds 12 months. Although the maximum sentences of all such prisoners were more than I year, nearly all of them are included with those prisoners hoving sentences of a year or less. As a result, the counts of popula-
tion admissions, and releases of inmates with more than 1 year maximum sentences are understated, and the population of inmates with maxi mum sentences of a year or less is overstated. Other unconditional releases: Court-ordered releases. Paroles: Include some supervised mandatory releases. Other releases: Residual not accounted for in other categories, used to adjust the movement data to the yearend total. Category estimates, sentencing: Population totals represent actual counts; however, sentence length populations, more or less than I year, are estimates.

North Dakota--New court commitments: Include some parole violators with new sentences. Other conditional releases: Court-ordered releases.

Ohio--Sentencing information: The yearend total of inmates with maximum sentences longer than I year included some inmates with sentences of a year or less. New court commitments: Include some other conditional release violators with new sentences. Transfers: Include only prisoners transferred between prison and Ohic's Forensic Unit. Other unconditional releases: Sentences vacated by courts. Other conditional releases: Extended furloughs from prison to parole supervision, as in preparole and medical furloughs. Race and Hispanic origin: Actual counts only of jurisdictional inmates in Ohio's custody.

Oklahoma--Oklahoma revised the previously reported Dec. 31, 1986, population of inmates with maximum sentence of more than a year. Category estimates, admissions by sex: Number of men and women in each admission category estimated. Sentencing information: Population, admissions, and releases of inmates with sentences more than I year may include a very small number of inmates with sentences of 1 year. Other admissions: Include six inmates inadvertently dropped from the count and one circumstantial court reception. Escapees and AWOL prisoners: Counted as a single category. Other unconditional releases: Include 1,247 male and 140 female legislative cap releases (Senate Bill 445). Race and Hispanic origin: Numbers estimated. Hispanic prisoners: Categorized as prisoners of unknown race.

Oregon--Parole violators without new sentences: Include some returned parolees whose revocation status was unknown at the time of admission. Escapees and AWOL prisoners: Counted as a single category. Other admissions: Inmates recom-
mitted ofter a court-ordered release. Other unconditional releases: Courtordered releases. Other causes of death: Death certificates not received for two inmates who died while on furlough. Race and Hispanic origin: Numbers estimated.

Pennsylvania--Parole violators with or without new sentences: Include 871 men and 19 women returned to State incarceration by the Board of Probation and Parole. They entered on their original sentences and not as technical or convicted parole violators. Their count was divided between violators with new sentences and violators without new sentences according to the ratios of actual convicted or technical parole violators. Hence, 440 men and 11 women were categorized as parole violators with new sentences; 431 men and 8 women were considered to be parole violators without new sentences. Other unconditional releases: Court-ordered releases. Conditional releases, paroles: Include 214 men and 4 women who had been admitted to prison for parole violations and then released after revocation hearings on their original paroles. Other reieases: Type of release was unknown at the time of data collection.

Rhode Island--Sentencing information, partially suspended sentences: Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categorized with inmates sentenced to a year or more only when the prison portion of their sentences exceeded 12 months. As a result, the population and movement counts of inmates with maximum sentences of more then I year are understated, and the population count of inmates with a year or less maximum sentences is overstated. Total inmate population: Custody and jurisdiction counts include inmates of prisons and jails, which form an integrated system in Rhode Island.

South Carolina--New court cormitments: Include a very small number of transfers from other jurisdictions. Other unconditional releases: Court-ordered releases and offenders who paid fines. Other conditional releases: Inmates released to the jurisdiction of the Department of Parole and Community Corrections under the Emergency Powers Act. Unspecified causes of death: Death of escaped prisoners.

South Dakota--South Dakota revised the previously reported Dec. 31, 1986, population of inmates with sentences of more than I year.

Tennessee--Parole violators with new sentences: Include parole violators without new sentences and other conditional release viciators with or without new sentences. Escapees and AWOL prisoners: Counted as a single category. Releases to parole: Include some mandatory releases to supervision. Other causes of death: Deaths that resulted during attempted escape (3 drowned, 3 killed). Other releases: Include inmates in the Contract Sentencing Releasing Program and releases for medical reasons. Men in jails to relieve prison crowding: The 1,201 inmates classified as men include some women. Prisoners of unknown race: Include all inmates not classified as white or black.

Texas--Population, admissions and releases counts: Based on custody data. Parole violators with or without new sentences: All parole violators reported as having new sentences. Other conditional release violators with or without new sentences: All conditional release violators reported as having new sentences. Other admissions and other releases, men: Include an adjustment for inmates counted as being released even though they remained in the jurisdiction of a prison. Include prisoners returning from or leaving for long-term bench warrants and medical furloughs. Other admissions, women: An adjustment to correct the difference between the beginning and ending 1987 population. Other unconditional releases: Court-ordered releases. Other conditional releases: Conditional pardon releases. Unspecified causes of death: Cause not determined at the time of data collection. Race: Texas used two categories, white and nonwhite. Hispanic prisoners: Classified as prisoners of unknown race.

Utah--Utah revised the previously reported Dec. 31, 1986, population of inmates with maximum sentence of over a year. Other unconditional releases: Includes inmates whose sentences were terminated by the Board of Pardons.

Vermont--Combined prison and jail populations: Numbers reflect population of integrated jail and prison system. "Lockups" operated by some cities and counties were excluded. Population counts: Made Dec. 10, 1987. Race: Numbers estimated, with less than 0.5 percent of the men classified as nonwhite.

Virginia--New court commitments: May include a small number of prisoners returning from appeal or bond. Transfers from other jurisdictions: Include inmates admitted to begin Virginia sentences or to con-
tinue Virginia sentences. Thus, transfers from other jurisdictions may be slightly overstated, and new court commitments slightly understated. Other unconditional releases: Administrative releases. Unspecified causes of death: Unspecified to the Virginia data system for some deaths. Other releases: Types unknown at time of data collection. Prisoners held in jails to reduce prison crowding: Include those with outstanding warrants and being held in jail. Prisoners of unknown race: Include all inmates who are neither white nor black.

Washington--Escapees and AWO prisoners: Counted as a single category. Other admissions: Contain a residual adjustment to reach yearend count. Hispanic prisoners and prisoners of unknown race: Prisoners of unknown race include Hispanics and inmates with mixed racial origins.

West Virginia--West Virginia revised the previously reported Dec. 31, 1986, population of female inmates with maximum sentence of over a year. Population, admissions and releases counts, men: Based on custody data. New court cormitments, men: include parole violators and other conditional release violators with new sentences. Conditional releases, probations, men: Include some releases to court jurisdiction of inmates declared unfit to remain in a particular minimum security facility. Other conditional releases, women: Inmate released on medical furlough. Other releases: Court-ordered releases for which conditions, if any, are unknown. Jurisdiction population total, men: Excludes some inmates awaiting pickup from jails where they were housed solely to ease prison crowding.

Wisconsin--Wisconsin revised the previously reported Dec. 31, 1986, population of inmates with maximum sentences of more than 1 year. Other admissions: Types unknown at the time of data collection. Other conditional releases: Special Action early releases. Unspecified causes of death: Unspecified to the Wisconsin data system. Other releases: Court-ordered releases for which conditions, if any, are unknown.

Wyoming--Wyoming revised the previously reported Dec. 31, 1986, population of inmates with sentences of more than ! year. Population, admissions and releases counts: Based on custody data. New court commitments: May include a small number of administrative turnovers---the start of a consecutive sentence. Escapees
and AWOL prisoners: Counted as a single category. Unconditional releases, expirations of sentence: May include a small number of administrative turnovers--the end of one sentence to be followed by another. Other releases: Releases to detainers. Race and Hispanic origin: Totals are actual counts; numbers of men and women in each group represent estimates. Hispanic prisoners: Categorized as prisoners of unknown race.

## APPENDIX 14

Federal Bureau of Prisons--Statistical Report, Fiscal Year 1986

Note: Data in this report are broken down into two sets of mutually exclusive categories: (1) court commitments and other-than-court commitments; and (2) prisoners under sentence and prisoners not under sentence. Beginning in fiscal year 1974, persons remanded for a mental competency determination or for a mentai incompetency commitment were considered to be "study and observation" cases. The breakdowns within these categories are presented below:

## Court commitments:

Under sentence:
(1) Regular adult
(2) Federal Juvenile Delinquency Act
(3) Youth Corrections Act
(4) 18 U.S.C. 4205 (b)(1) and (b) (2)
(5) Narcotic Addict Rehabilitation Act
(6) Split sentence

Other-than-court commitments: Under sentence:
(1) Parole violator
(2) Mandatory release violator
(3) Sentenced adult, study and observation
(4) State commitments

Not under sentence:
(1) Mental competency determination
(2) Mental incompetency commitment
(3) Youth Corrections Act, study and observation

The following information was taken from the U.S. Department of Justice, Federal Bureau of Prisons, Statistical Report, Fiscal Year 1986 (Washington, DC: Federal Bureau of Prisons, 1987), pp. 115, 116.

Regular adult--A District of Columbia adult, military prisoner, or other individual who qualifies under the parole eligibility provisions of 18 U.S.C. 4205(a), or 26 U.S.C. 7237.

18 U.S.C. 4205(b)(1)--An individual sentenced to a term in excess of I year with the parole eligibility date determined by the court to be less than one-third of the maximum sentence imposed and with the minimum term not to exceed 10 years.

18 U.S.C. 4205(b)(2)--An individual eligible for parole at the determination of the United States Parole Commission.

18 U.S.C. 4205(c)--A commitment for a study (deemed to be for the maximum sentence). The results of the study shall be provided by the Director of the Bureau of Prisons to the courts within 3 months.

18 U.S.C. $5010(\mathrm{~b})$, (Youth
Corrections Act, indeterminate)-A youth offender or young adult sentenced for treatment and supervision who shall be released conditionally under supervision on or before the expiration of 4 years from the date of conviction and who shall be discharged unconditionally on or before 6 years from the date of conviction.

18 U.S.C. 5010(c) (Youth Corrections Act, specific term)-A youth offender or young adult sentenced for treatment and supervision in excess of 6 years, but not to exceed the maximum of the offended statute, and who shall be released conditionally under supervision not later than 2 years before expiration of the maximum sentence imposed.

18 U.S.C. 5010(e) (Youth Corrections Act, study and ob-servation)--A youth offender or young adult committed for observation and study. The findings of the study shall be provided by the Youth Division of the United States Parole Commission.

18 U.S.C. 3651 (Split sen-tence)--A sentence on one count consisting of a suspended sentence with a definite term, and a confinement portion of 6 months or less followed by a period of probation not to exceed 5 years.

18 U.S.C. 4244 (Mental competency determination/not under sentence)--An individual whose mental condition is examined prior to sentencing to determine if he is mentally competent to understand the proceedings against him or to assist in his own defense.

18 U.S.C. 4246 (Mental in-competency)--A person found to be mentally incompetent and committed until such time as the person shall be found mentally competent to stand trial or until the pending charges against him are disposed of according to law.

18 U.S.C. 4252 (Narcotic Addict Rehabilitation Act, case under study)--A person committed for an examination to determine if he is an addict and likely to be rehabilitated through treatment. The examination report shall be furnished to the court by the Attorney General within 30 days.

18 U.S.C. 4256 (Narcotic Addict Rehabilitation Act, sentenced prisoner)--An addict committed for treatment for an indeterminate period of time not to exceed 10 years or the maximum period of time which could otherwise have been imposed.

State case--A State prisoner serving his State sentence in a Federal institution under contract.

## ${ }^{\text {The }}$ National Victims Resource Center

## provides vital information

The National Victims Resource Center (NVRC) is a national clearinghouse for victims information funded by the Office for Victims of Crime, U.S. Department of Justice. Like the Justice Statistics Clearinghouse, sponsored by the Bureau of Justice Statistics (BJS), the NVRC is one of several information resources maintained by the National Criminal Justice Reference Service (NCJRS). When you contact the NVRC, information specialists will provide you with access to the following resources:

More than 7,000 victim-related books and articles covering child physical and sexual abuse, victims services, domestic violence, victim-witness programs, and violent crime included in the NCJRS data base.

- National victimization statistics from the BJS National Crime Survey.

Federally sponsored victim-related research studies.

- Names, addresses, and telephone numbers of people to contact for information and assistance.
- Information on State victims compensation programs funded by the Office for Victims of Crime.

## Learn About Victims Issues and Programs

From the clearinghouse you can get free publications, borrow hard-to-find publications, and buy selected videotapes. The NVRC information specialists can also conduct data base searches designed especially for your needs.

The NVRC is the single most comprehensive source of victim information: it can refer victims to programs that help soften the blow, ease their recovery from trauma, and educate them about the aftermath of crime.

If we can be of assistance, call us at
1 (800) 627-6872 or (301) 251-5525 or write

## One free phone call can give you access to a growing data base on drugs \& crime

The new Data Center \& Clearinghouse for Drugs \& Crime is managed by the Bureau of Justice Statistics. To serve you, the center will -

- Respond to your requests for drugs and crime data.
- Let you know about new drugs and crime data reports.
- Send you reporis on drugs and crime.
- Conduct special bibliographic searches for jou on specific drugs and crime topics.
- Refer you to data on epidemiot ogy, prevention, and treatment of substance abuse at the National Clearinghouse for Alcohol and Drug Information of the Alcohol, Drug Abuse, and Mental Health Administration.
- Publish special reports on subjects such as assets forfeiture and seizure, economic costs of drugrelated crime, drugs and violence, drug laws of the 50 States, drug abuse and corrections, and innovative law enforcement reactions to drugs and crime.

For survey methodology and definitions of terms, see Appendix 1.
    ${ }^{\text {Cotail may not add to total due to rounding. }}$
    bocal government data are estimates subject to sampling variability.
    Gincludes employment of Stotes and all types of local governments
    including independent school districts and special districts, which are not
    displayed separately. The "lacal, total" categories, which include these districts will not equal the sum of the "counties" and "municipalities" gategories.
    Justice system employment of independent school districts and special districts (primarily for special police forces) are not available.
    Source: U.S. Department of Justice, Bureau of Justice Statistics, Justice Expenditure and Employment Extrocts: 1984, 1985, 1986 Data from the Annual General Finance and Employment Surveys (Washington, DC: U.S. Department of Justice, 1989).

[^3]:    See notes at end of table.

[^4]:    See notes at end of table.

[^5]:    Note: The U.S. Marshols Service (USMS) is a law enforcement agency performing duties for the Executive Branch of the Federal government. The agency executes all warrants issued by the Federal courts, conducts fugitive investigations, and maintains custody of all Federal pretrial detainees. In addition the USMS is responsible for prisoner processing and detention, transportation and production of prisoners, protection of Federal judiciary, Federal witness security, the execution of court orders, and management of related Federal government seizures. Further responsibilities include escorting missile convoys, suppressing prison disturbances in Federal prisons, and arresting extremely dangerous fugitives. Data on workload, accomplishments, and time utilization are collected on a regular basis from the 94 district offices.

    A fugitive is an individual who has been convicted or is suspected of criminal octivity and attempts to avoid legal sanctions by fleeing from the

[^22]:    Note: These data were compiled by the Federal Bureau of Investigation through the Uniform Crime Reporting Program. On a monthly basis, law enforcement agencies (police; sheriffs, and State police) report the number of offenses that become known to them in the following crime categories: murder and nonnegligent manislaughter, manslaughter by negligence, forcible rape, robbery, assault, burglary, larceny-theft, motor vehicle theft, and arson. A count of these crimes, which are known as Port 1 offenses, is taken from records of a!l complaints of crime received by law enforcement agencies from victims or other sources and/or from officers who discovered the offenses. Whenever comploints of crime are determined through investigation to be unfounded or false, they are eliminated from an agency's count (Source, 1987, p. 3).

    The Uniform Crime Reporting Program uses seven crime categories to estoblish a "crime index" in order to measure the trend and distribution of crime in the United Stotes. Crime index offenses include murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft; the "Total Crime Index" is a simple sum of the index offenses. Arson was designated as a Part 1 Index offense in October 1978; data collection was begun in 1979. However, due to the incompleteness of arson reporting by police in 1979-87, arson data
    offenses known to the police.
    The figures in this toble are subject to updating by the Uniform Crime Reporting Program. The number of agencies reporting and populations represented may vary from year to year. This table and tables 3.116 and 3.117 present estimates for the United States or particular areas based on agencies reporting. For definitions of offenses, see Appendix 3.
    apopulations are U.S. Bureau of the Census provisional estimates os of July 1, 1960 and 1970, except for the Apr. I, 1980 preliminary census counts, grid ore subject to change.
    Because of rounding, the offenses may not add to totals.
    cViolent crimes are offenses of murder, forcible rape, robbery, and aggravated asscult. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not insluded for the property crime of grson.
    ${ }^{\text {d }}$ All rates were calculated on the offenses before rounding.
