### Starting with the Tool

---

1. Click the links on the homepage to navigate to the Advanced views of the FCCPS cohorts and United States Code Statistics.

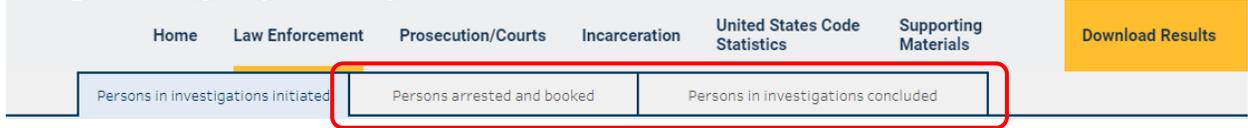

The Bureau of Justice Statistics (BJS), through its Federal Justice Statistics Program (FJSP), compiles comprehensive information describing persons processed in the federal criminal justice system. The Federal Criminal Case Processing Statistics (FCCPS) data tool is an interface that can be used to analyze federal case processing data. Users can generate various statistics in the areas of federal law enforcement, prosecution/courts, and incarceration for the years between 1998 and 2021. Users can also look up data based on title and section of the United States Code for the years between 1994 and 2021. This data tool includes persons held for violating federal laws.

Please select an analytical area of interest from the provided menu.

Click the "+" sign for more information about the case processing stage/cohort.

The image shows two expandable menu sections. The first section, titled "By Stage", is expanded and contains three sub-sections: "Law Enforcement" (with three items: Persons in investigations initiated, Persons arrested and booked, Persons in investigations concluded), "Prosecution/Courts" (with three items: Persons charged, Persons in cases closed, Persons sentenced), and "Incarceration" (with three items: Persons entering federal prison, Persons in federal prison at year-end, Persons exiting federal prison). The second section, titled "By Title and Section", is also expanded and contains one sub-section: "United States Code Statistics" (with five items: Number of persons in cases filed, Number of persons in cases closed, Outcomes for persons in cases closed, Type of sentence for persons convicted, Mean sentence or fine for persons convicted). Arrows point from the text "Links to Advanced views" to the "+" sign in the "By Stage" section, and from "Links to United States Code Statistics" to the "+" sign in the "By Title and Section" section. A "Previous FCCPS Tool" link with a right-pointing arrow is located at the bottom of the interface.

- Advanced views are also available in the top navigation bar. Click cohort titles under each case-processing stage to navigate to their Advanced views.

## Advanced View

- Choose a variable from the “Select a variable” drop-down list.

### Select a variable

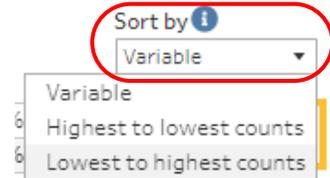

- Use the “Select filter value(s)” drop-down lists to apply filters to all views.

### Select filter value(s)

- Use the “Sort by” drop-down list to order by the variable or the observed count.

# Visualizations by a Single Variable

1. The first four visualizations (table, line graph, bar graph, and line graph by variable) all use these same settings.
