Law Enforcement Management and Administrative Statistics

The Bureau of Justice Statistics began the Law Enforcement Management and Administrative Statistics (LEMAS) program in 1987 with a nationwide survey of the Nation's State and local law enforcement agencies. Expanded versions of the survey were completed in 1990 and 1993. This volume presents 1993 data provided by 661 State and local law enforcement agencies employing 100 or more officers. Data on personnel, expenditures, pay, operations, equipment, computers and information systems, policies and programs collected from each agency by the Governments Division, U.S. Bureau of the Census are included.

The full representation of the Nation's larger State and local law enforcement agencies found in this volume and the completeness of the data presented are both indicative of the tremendous cooperation BJS has received from the law enforcement community in conjunction with the LEMAS survey. In turn, we hope this volume is a useful resource for these agencies, as well as others with interests related to law enforcement.

Introduction

The 1993 Law Enforcement Management and Administrative Statistics (LEMAS) survey included all State and local agencies employing 100 or more full-time sworn personnel as reported in the 1992 Census of State and Local Law Enforcement Agencies conducted by BJS. The survey also included a nationally representative sample of agencies that employed fewer than 100 officers. These smaller agencies received a slightly condensed version of the survey instrument that was sent to the larger agencies.

The initial mailing of the LEMAS questionnaire was conducted in August 1993. The reference date for personnel-related questions was the pay period including June 15, 1993. For other questions it was June 30, 1993. The data were collected by the Bureau of the Census for BJS.

A total of 3,270 agencies received the 1993 LEMAS questionnaire, and 3,028 (93%) responded. Of the 854 agencies with 100 or more officers that were included, 831 (97%) responded. This was the third survey in the LEMAS series, with previous data collections occurring in 1987 and 1990.

Overview of this volume

Agencies included

This volume presents individual agency data for 661 of the 831 large State and local law enforcement agencies that responded to the 1993 LEMAS survey. Only agencies meeting the following criteria are included:

1. Employment of 100 or more full-time sworn officers as of June 1992 (reference month for the 1992 Agency Census).

2. Employment of 100 or more full-time sworn officers as of June 1993 (reference month for the 1993 LEMAS survey).
3. Employment of 50 or more full-time sworn officers whose regular assigned duties included responding to calls for service as of June 1993.

Special State-level agencies such as those enforcing alcohol or conservation laws are not included, even if they met the above criteria. The volume does include the 49 primary State police agencies operating in each State except Hawaii, which has no State-level law enforcement agency.

A total of 612 local law enforcement agencies are also included. Included in this total are 33 county police departments, 411 municipal police departments, 146 sheriffs' departments, and 22 special police agencies. (The latter category is comprised of airport police, transit police, school police, and other agencies with specially-defined jurisdictions).

Local law enforcement agencies are included from all States except North Dakota, Vermont, and Wyoming. These States had no local law enforcement agencies that met the requirements for inclusion. A summary of the number and type of agencies from each State is presented in Table A.

Organization of data tables

In addition to Table A which presents agency totals by State, two additional summary tables are included. Table B lists the State and local law enforcement agencies with 1,000 or more full-time sworn personnel working in the area of field operations. These are the agencies that have the largest number of sworn personnel performing duties directly related to law enforcement.

Table C presents summary data, by type of agency, for most of the variables that are included in the individual agency data tables that follow. The reader should refer to the notes in the corresponding individual data agency tables when using data from table C.

Following the 3 summary data tables are 24 tables containing individual data for State and local law enforcement agencies with 100 or more officers. Each of these tables is divided into "A" and "B" sections. In the "A" section, data are presented for the 612 local-level agencies. The "B" section, which is located on the last page of each table, contains the data for the 49 State police agencies.

Agencies are listed alphabetically by State and county. Within each county, the county police and sheriffs' departments, if applicable, are listed first. This is followed, in alphabetical order, by the general purpose municipal police and special police agencies operating within that county.

A triple dash ("---") is used in all tables to indicate that a particular data item was not reported by an agency. This should be distinguished from a single dash ("-") which refers to instances where a data item is not applicable for that agency, and a response was not possible. A single dash is also used for special police agencies on population-related items, since the actual resident population served by these agencies is not readily defined. See the explanatory notes at the end of the "A" and "B" sections of each table for explanations of other symbols and codes used.

Note: Personnel data for 1993 are for the pay period that included June 15, 1993.
 Personnel data for 1990 are for the pay period that included June 15, 1990.
 Population data are based on Bureau of Census figures for April 1, 1990.
 Figures for number of officers per 10,000 residents are based on all full-time sworn employees.
 Numbers in parentheses indicate a negative percent change in number of employees.

*Percent change is from 1992 because personnel data for 1990 were unavailable.

x-Percent change could not be calculated because the agency had no civilian employees in 1990.

- Population data are not presented for special police agencies.

Note: Detail may not add to 100% because of rounding. "Other" category is comprised primarily of air, water, and K-9 patrol.

*Patrol data are based on two 24-hour periods covering two target dates (a Wednesday and a Saturday) with routine patrol activity. The figures presented in the table are averages based on the two selected target dates, and include only shifts of 7 hours or longer that were actually worked on these dates. Because data for shifts actually worked were unavailable, data for scheduled shifts were used for the following agencies: Dothan (AL) Police; Berkeley (CA) Police; Fullerton (CA) Police; Riverside (CA) Police; Plantation (FL) Police; Pompano Beach (FL) Police; Chicopee (MA) Police; Lansing (MI) Police; Cleveland (OH) Police; Johnson City (TN) Police; Salt Lake City (UT) Police.

--- Data were not reported by an agency or an agency had no officers assigned to patrol shifts of 7 hours or longer during the designated 24-hour periods.

Note: Detail may not add to 100% because of rounding. "Other" category is comprised primarily of air, water, and K-9 patrol.

*Patrol data are based on two 24-hour periods covering two target dates (a Wednesday and a Saturday) with routine patrol activity. The figures presented in the table are averages based on the two selected target dates, and include only shifts of 7 hours or longer that were actually worked on these dates. Because data for shifts actually worked were unavailable, data for scheduled shifts were used for the State police agencies in the following States: Mississippi, New York, Oregon, South Carolina, Utah, Washington, West Virginia.

--- Data were not reported by an agency or an agency had no officers assigned to patrol shifts of 7 hours or longer during the designated 24-hour periods.
