ACKNOWLEDGEMENT OF ASSISTANCE

All manuscripts utilizing data made available through the Consortium should acknowledge that fact as well as identify the original collector of the data. The ICPSR Council urges all users of the ICPSR data facilities to follow some adaptation of this statement with the parentheses indicating items to be filled in appropriately or deleted by the individual user.

The data (and tabulations) utilized in this (publication) were made available (in part) by the Inter-university Consortium for Political and Social Research. The data for the CENSUS OF STATE ADULT CORRECTIONAL FACILITIES, 1984 were originally collected by the Bureau of the Census under the direction of the Bureau of Justice Statistics. Neither the collector of the original data nor the Consortium bear any responsibility for the analyses or interpretations presented here.

In order to provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, each user of the ICPSR data facilities is expected to send two copies of each completed manuscript or thesis abstract to the Consortium. Please indicate in the cover letter which data were used.

INTRODUCTION

STUDY DESCRIPTION

The 1984 Census of State Adult Correctional Facilities entails a descriptive analysis of confinement facilities and state-operated community-based correctional facilities nationwide. This census is one of several efforts designed to provide decision-makers, practitioners, and researchers with information to analyze the current conditions and needs of state correctional facilities for adults.

The first Census was conducted among approximately 600 facilities in January, 1974, and the second, among 791 facilities in November, 1979. Both of these censuses were conducted in tandem with the Survey of Inmates of State Correctional Facilities. The Census uses the institution as the unit of analysis, and the Survey, the inmate.

Based upon major issues confronting corrections administrators today, the 1984 Census delineates facility and population characteristics. Variables of interest include physical security, age of facilities, functions of facilities, capacity, confinement space, available medical facilities, programs, inmate work assignments, staff employment, facilities under court order/consent decree for conditions of confinement, capital and operating expenditures, custody level of inmates/residents, one day count and average daily population, race/ethnicity of inmates, inmate work assignments, inmate deaths, special inmate counts, and assaults and incidents by inmates.

DATA COLLECTION DESCRIPTION

Sponsored by the U.S. Department of Justice, Bureau of Justice Statistics, the Census data collection effort was conducted by the U.S. Bureau of the Census. The universe consisted of all state-operated adult correctional facilities including: prisons, prison farms; reception or diagnostic and classification centers; road camps; forestry or conservation camps; special function facilities, including youthful offender facilities, except in California, vocational training facilities, honor camps, State-operated jails in Alaska, Connecticut, Delaware, Hawaii, Rhode Island, and Vermont, and drug or alcohol

treatment facilities; community-based facilities including halfway houses, pre-release facilities, work release facilities, study release facilities, restitution centers, and facilities administered by the District of Columbia, except the D.C. Detention Facility, and the Occoquan Facility, which house unsentenced and short term misdemeanants and are covered in the National Jail Census.

For inclusion in the universe a facility had to be: 1) administered and staffed by state employees. If owned by the State and administered locally or privately, the facility was not included; 2) primarily for State prisoners; 3) operational on the reference date, June 30, 1984; and 4) functionally distinct in a separate physical location under the administration of its own warden, superintendent, director, or other administrator.

Excluded from the Census were privately operated facilities, even though they may have housed state prisoners and were supported with State funds; military or other Federal facilities; facilities operated and administered locally; and hospitals that had wards or wings reserved exclusively for State prisoners. Moreover, community-based correctional facilities housing State prisoners in Georgia were excluded because they are locally administered and prisoners are not under the direct custody of the State.

Separate questionnaires were devised for confinement facilities (CJ-43) and for community-based facilities (CJ-42) (see Appendix B). Community-based facilities are those facilities that meet the above criteria and allow fifty percent or more of the residents to regularly leave the facility unaccompanied for work, study, school, or outside activities.

The universe for the 1984 Census was devised based on the universe for the 1979 Census of State Correctional Facilities in a two-stage process. First, the universe was revised using the 1984 American Correctional Association directory. Second, a list of facilities along with a request to update the list was sent to administrators in each State's department of adult corrections (see Exhibit 1 in Appendix B for a copy of the letter). Adjustments to the universe were made based on the responses from these administrators. The resulting universe for the 1984 Census consisted of 915 facilities, 693 confinement facilities, and 223 community-based facilities. (See Exhibit 2 in Appendix

B for a distribution of the type of facility to which questionnaires were initially sent by state).

The reference date for the one day count of residents/inmates and staff was June 30, 1984. Annual data were requested for the period ending between July 1, 1983 and June 30, 1984. For four States and the District of Columbia the fiscal year ended on a date other than June 30: Alabama, Michigan, and the District of Columbia, September 30; New York, March 31; and Texas, August 31.

DATA COLLECTION PROCEDURES

Questionnaires were sent to all 693 confinement and 223 community-based facilities identified nationwide. Information on actual expenditures and capital expenditures proposed from July 1, 1984 through June 30, 1985 was obtained from State departments of corrections (Exhibit 3, Appendix B). Each department was sent a worksheet listing that State's facilities included in the universe, on which administrators posted appropriate expenditure data (Exhibit 4, Appendix B).

Data collection began in July, 1984 and ended in January, 1985. Roughly eight to twelve weeks after the initial mailout, second and third questionnaires were sent to those facilities where administrators had not responded. Follow-up telephone calls were made to non-respondents from November, 1984 through mid-January, 1985 (see Exhibit 5, Appendix B). When the data collection phase terminated, a total of 903 facilities had responded (100% response rate). The final response to the Census included 694 confinement facilities and 209 community-based facilities. Four facilities were added and sixteen were eliminated from the Census (see Exhibits 6 and 7, Appendix B).

Questionnaires from the final universe were manually edited and coded. A computer edit, designed to minimize overall errors, identified errors missed during the previous manual edit (Exhibit 8, Appendix B).

DATA LIMITATIONS

EXPENDITURE DATA: (Variables 755 through 759 on both the CJ-42 and CJ-43). Most states supplied expenditure data for each facility in the detail requested. However, seven states provided only expenditure data aggregated at the state level or partial data by facility. For two states that provided only expenditure data aggregated at the state level, Michigan and Rhode Island, these data do not appear on the public use tape since each record on the data tape reflects one correctional facility. These data include the following (figures are in thousands of dollars):

| | Total | Operating Costs | Capital Expenditures |
|--------------|-----------|--------------------|-------------------------|
| Michigan | \$163,652 | \$159,502 | \$4,150 |
| Rhode Island | \$ 23,706 | \$ 21,885 | \$1,821 |

For two States, Indiana, and Texas, that reported expenditure data aggregated at the State level, these data were broken out by facility using the average daily population data for each facility. These data are included on the data tape.

Two States could provide capital expenditures only at the State level: Alaska (\$24,419,000) and Connecticut (\$13,371,000). Therefore, these data are not on the tape. However, operating costs for facilities in each of these States, and equipment costs for Connecticut (\$213,000) which were reported by facility are provided on the data tape.

Vermont provided construction costs only at the State level (\$72,000), but equipment costs for individual facilities. Thus, for Vermont, construction costs are not included, but equipment costs are included on the tape.

Other miscellaneous data limitations may affect expenditure data for some states (see Exhibit 9, Appendix B).

RACE/ETHNICITY DATA: (Variables 658 through 665 on both the CJ-42 and CJ-43). Questionnaire items which asked respondents to break out race of inmates or staff by Hispanic origin (i.e., "white, Hispanic origin," and "black, Hispanic origin, respectively), were not completely reported. Therefore, when added together, these figures do not sum to the total number of inmates or staff of Hispanic origin. Moreover, since items pertaining to race and ethnicity were asked together rather than in separate questions, it is not possible to obtain an accurate total number of inmates or staff by race. As a result, race/ethnic categories which add to the correct totals of inmates or staff are: 1) white, not of Hispanic origin; 2) black, not of Hispanic origin; 3) Hispanic origin, total; 4) other races, including American Indian/Alaskan native, and Asian/Pacific Islander.

POPULATION MOVEMENT: (Variables 48 through 54 on the CJ-42 and Variables 48 through 53 on the CJ-43). Since the questionnaire provided no limitations or definitions as to what constituted an "admission" or a "discharge/transfer," data on admissions and discharges were reported too broadly to provide useful information. The data user should consult staff at the Bureau of Justice Statistics to obtain accurate admissions and releases data for 1984. These data are provided through another program, the National Prisoners Statistics (NPS-1); data are not available through CJAIN.

FILE STRUCTURE

The CENSUS OF STATE ADULT CORRECTIONAL FACILITIES, 1984 is available from the ICPSR in two formats: card image and OSIRIS. The card image file contains several decks per case in a format based on 80 column punched cards. The data are sorted by case with all decks for a case together in ascending order.

The OSIRIS dictionary gives the format and other information for each variable in the OSIRIS data file. The dictionary or dictionary-codebook file is used in conjunction with the OSIRIS software package. The OSIRIS data file is constructed with a single logical record for each case. There are 759 variables on 903 cases.

The OSIRIS data file can be accessed directly through software packages or programs which do not use the OSIRIS dictionary by specifying the tape locations of the desired variables. These tape locations are given in the OSIRIS dictionary-codebook.

CODEBOOK INFORMATION

The example below is a reproduction of information appearing in the machine-readable codebook for a typical variable. The numbers in brackets do not appear but are references to the descriptions which follow this example.

.....

[1] VAR 0656 [2] HISPANIC F/T PAYROLL [3] MD=999
 REF 0656 [4] LOC 1882 WIDTH 3 [5] DK 24 COL 15-17
 [6] IMP DEC= d

[7] Number of Hispanic staff: full-time, payroll

[8] Count as Hispanics persons of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, excluding Brazil, Jamaica, and Haiti.

[9] See NOTE(S) 3

[10] Actual number is coded.

[11] [12]

999. Inap

.....

[1] Indicates the variable and reference numbers. A variable number and a reference number are assigned to each variable in the data collection. In the present codebook which documents the archived data collection these numbers are identical. Should the data be subsetted or rearranged by an OSIRIS program (e.g., MMP to intersperse data from another source, or TCOT to produce an analysis deck), the variable numbers would change to reflect the order of the new data collection, while the reference number would remain unchanged to reflect the variable number in the codebook describing the archived data collection.

- [2] Indicates the abbreviated variable name (maximum of 24 characters) used in the OSIRIS system to identify the variable for the user. An expanded version of the variable name can be found in the variable description list.
- [3] Indicates the code values of missing data. In this example, code values equal to 999 are missing missing data (MD=999). Alternate statements for other variables are "MD GE 5", "MD=0 OR GE 9", or "NO MISSING DATA CODES". Some analysis software packages (including the OSIRIS software package) require that certain types of data which the user desires to be excluded from analysis be designated as "MISSING DATA", e.g., inappropriate, unascertained, unascertainable, or ambiguous data categories. Although these codes are defined as missing data categories, this does not mean that the user should not or cannot use them in a substantive role if so desired.
- [4] Indicates the starting location and width of this variable when the data are stored on a magnetic tape in the OSIRIS format. If the variable is of a multiple-response type, the width referenced is that of a single response. In this example the variable named "HISPANIC F/T PAYROLL" is 3 columns wide and is located at the 1882nd column within the record.
- [5] Indicates the location by deck and column(s) of this variable when the data are stored on cards or in card-image format (80-column format)
- [6] A variable containing data with implied decimals is denoted by the message "IMP DEC=d", where d is the number of decimal places implied in the variable.

- [7] This is the full text (question) supplied by the investigator to describe the variable. The question text and the numbers and letters that may appear at the beginning reflect the original wording of the questionnaire item.
- [8] Indicates an additional comment or explanation appended to the variable description.
- [9] A variable which has a footnote associated with it is denoted by the message, "SEE NOTE(S) 3" where 3 is the number of the footnote referenced.
- [10] "Actual number is coded" appears in the codebook to indicate that the variable has been declared continuous.
- [11] Indicates the code values occurring in the data for this variable.
- [12] Indicates the textual definitions of the codes.

ICPSR PROCESSING INFORMATION

The data collection was processed according to the standard ICPSR processing procedures. The data were checked for illegal or inconsistent code values which, when found, were recoded to OSIRIS missing data values. No consistency checks were performed. Statements bracketed in "[" and "]" signs in the body of the codebook were added by the processors for explanatory purposes.

Q. V.A1e {FORM CJ-43} and Q. VI.A1e {FORM CJ-42}
Total full-time non-payroll male staff

The number of full-time persons not on the payroll assigned to this facility on June 30, 1984. Count each staff member only once - in the position that person primarily fills. Include personnel of a parent agency who are assigned for some or all of their working time to this facility, personnel paid under contractual agreements or Federal grants, and college interns who receive class credit for their work at the facility. Exclude community volunteers.

Dear Official:

This summer, the Bureau of the Census will conduct the 1984 Census of State Adult Correctional Facilities for the Bureau of Justice Statistics, Department of Justice. This census, which we conduct every 5 years, collects information on the age and capacity of facilities, number of inmates, confinement space, number of staff, operating expenditures, and related subjects.

In preparation for the census, we are updating our list of correctional facilities. Enclosure 1 is a list of state-operated adult correctional facilities in your state. Please review and update the list for accuracy and completeness, indicating address changes, facility closings and newly-opened facilities.

On Enclosure 2, please report any changes to this list planned between now and June 30, 1987, including expected openings, closings, and renovations.

Finally, on Enclosure 3, list any nonstate-operated community-based facilities currently under contract to house state inmates, and the number of state inmates they currently house. Do not list local jails.

Please return the lists within 3 weeks, in the enclosed self-addressed, postage-paid envelope. If you have any questions concerning this request, please contact Arthur Ciampa or Richard Meyer at 301-763-2896.

Thank you for your assistance in this important phase of the census. We will provide you with additional information about the census at a later date.

Sincerely,

John R. Coleman
Chief, Governments Division

State Division of Corrections
Director, Adult Institutions
1 West Wilson Street
P.O. Box 7925
Madison, WI 53707

Dear Director:

Thank you for your recent assistance in updating our universe list of state-operated adult correctional facilities. The information you supplied was very helpful and will ensure that the upcoming quinquennial Census of State Correctional Facilities will include all appropriate facilities.

The information developed through this census provides the most comprehensive overview of state correctional facilities in the country. The participation of all facilities is thus very important. Therefore, we would appreciate your encouraging the administrators of facilities in your state to participate in this effort.

We will soon be mailing the census questionnaires to each of the facilities in your state. Copies of the questionnaires are enclosed. The CJ-42 will be sent to "community-based" facilities, i.e., where 50 percent or more of the residents are regularly permitted to depart unaccompanied for work release, study release, etc.; and the CJ-43 will be sent to "confinement" facilities, i.e., where less than 50 percent of the inmates are regularly permitted to depart unaccompanied.

Questionnaire items were devised by the Bureau of Justice Statistics in consultation with practitioners and researchers in corrections. Items were further refined following a pretest of several selected facilities across the country. Pretest results indicated that all information except expenditure data could be collected directly from individual facilities; administrators noted that expenditure information would be more readily available from the central office. We therefore request that your office provide expenditure information for each facility listed on the enclosed worksheet for fiscal year 1983.

Also, on the separate sheet attached, indicate proposed capital expenditures from July 1, 1984 through June 30, 1987.

This cost information will be analyzed along with such factors as region of the country, facility type, size, security levels, etc. Please mail the worksheet in the envelope provided before August 17th or as soon as actual expenditures are available. If you have any questions concerning this request, please call Mr. Rick Meyer of my staff at (301) 763-7825.

Results from this census will be published by the Bureau of Justice Statistics (BJS). BJS will send you a copy of the Advance Report based on this data when it is completed in 1985. Please contact Dr. Phyllis Jo Baunach (202/724-7755) for further information regarding publication of these data.

Thank you for your continued cooperation.

Sincerely,

JOHN R. COLEMAN

Section III - CONFINEMENT SPACE

INSTRUCTIONS

The figures displayed in section A on the right were reported by your facility in the 1979 Census of State Adult Correctional Facilities.

- Check the confinement units listed in column (1) to see if all units in which residents spend the night are listed. Be sure to include specialized units such as segregation, punitive, protective custody, infirmary, etc.
Check columns (2)-(6) for accuracy referring to the Definitions below for each column.
Once the changes have been identified, transfer all of the data, line by line, to part B, incorporating the revisions.
Also list in part B all additional confinement units not present in 1979.
In part B, column (7), enter the number of residents assigned to each confinement unit on June 30, 1984.
Total the number of residents in part B, column (7), and enter the total in (8) - TOTAL NUMBER OF RESIDENTS ON JUNE 30, 1984. This total should equal the total number of residents reported in section IIC.

Table A: Figures previously reported. Columns: Line No., Confinement units identification (1), Rated capacity of one confinement unit (2) Not rated, Floor space of one confinement unit (3), Number of confinement units (4), Confinement unit use (5), Security designation of confinement unit (6).

DEFINITIONS

Column (1) - Confinement units identification (e.g., "C Block," "West Wing," etc.) - All confinement units (cells, rooms, dormitories, wards, or other units where residents spend the night) including any area normally used for confinement but presently being used for this purpose. e.g., day rooms, corridors, offices, etc. Other nonrated units should also be included, e.g., hospital units, infirmaries, segregation units, etc.

Column (2) - Rated capacity of ONE confinement unit - For each type of confinement unit, please enter the official capacity typically based on administrative policy, court order, legislative restriction, or set by State authorities. If the confinement unit is not included in the total rated capacity of this facility, enter the number of beds and mark the not rated box.

Column (3) - Floor space of ONE confinement unit - For each type of confinement unit, please enter the number of square feet of floor space based on the interior measures. The floor space of larger confinement units, such as dormitories, should be based on the interior measure of the unit excluding areas devoted to bathing, program space, recreation space, office space, etc. Exclude day rooms from floor space unless used to sleep residents.

Column (4) - Number of confinement units - For each type of confinement unit, please enter the number of units. The figures entered in this column multiplied by the figures in column (2), rated capacity, should equal the total capacity for each type of confinement unit.

Column (5) - Confinement unit use - For each type of confinement unit, enter one of the following codes -

- 1 - General housing unit
2 - Protective custody unit
3 - Administrative segregation unit
4 - Disciplinary action unit
5 - Sick or injured resident unit
6 - Work release
7, 8, etc. - Other confinement unit uses (Define meanings in Notes section below)

In the case of units with more than one use, enter the purpose for which it was most recently used.

Column (6) - Security designation of confinement unit - For each type of confinement unit, enter one of the following codes -

- 1 - Maximum (close) security unit
2 - Medium security unit
3 - Minimum security unit

Column (7) - Number of residents on June 30, 1984 - For each type of confinement unit, please enter the number of residents on June 30, 1984. Residents should be counted only once - where they spent the previous night, or where a bed is reserved for them in the case of temporary absences.

Item (8) - Total number of residents on June 30, 1984 - Please add the entries in column (7) and enter here. This figure should be equal to the number in the official count given in section IIC. If not, please explain in the Notes section below (e.g., residents are out to court or otherwise temporarily absent). Do not include residents who are on escape or AWOL.

B. Current information

Table B: Current information. Columns: Line No., Confinement units identification (1), Rated capacity of one confinement unit (2) Not rated, Floor space of one confinement unit (3), Number of confinement units (4), Confinement unit use (5), Security designation of confinement unit (6), Number of residents on June 30, 1984 (7).

(8) TOTAL NUMBER OF RESIDENTS ON JUNE 30, 1984

Notes

Blank lines for notes.

Section IV – PROGRAMS

| If the following programs exist in your facility, give the inmate enrollment for each program on June 30, 1984. If this date is not representative of enrollment throughout the year, you may estimate the average enrollment and mark (X). <ul style="list-style-type: none"> Exclude informal programs. Include all formal ones operated by either public or private agencies. | Type of program | Enrollment on June 30, 1984 | | |

Section III — CONFINEMENT SPACE

INSTRUCTIONS

The figures displayed in section A on the right were reported by your facility in the 1979 Census of State Adult Correctional Facilities.

- Check the confinement units listed in column (1) to see if all units in which inmates spend the night are listed. Be sure to include specialized units such as segregation, punitive, protective custody, infirmary, etc.
- Check columns (2)–(7) for accuracy referring to the Definitions below for each column.
- Once the changes have been identified, transfer all of the data, line by line, to part B, incorporating the revisions.
- Also list in part B all additional confinement units not present in 1979.
- In part B, column (8), enter the number of inmates assigned to each confinement unit on June 30, 1984.
- Total the number of inmates in part B, column (8), and enter the total in (9) — TOTAL NUMBER OF INMATES ON JUNE 30, 1984. This total should equal the total number of inmates reported in section IIC.

DEFINITIONS

Column (1) — Confinement units identification (e.g., "C Block," "West Wing," etc.) — All confinement units (cells, rooms, dormitories, wards, or other units where inmates spend the night) including any area not normally used for confinement but presently being used for this purpose, e.g., day rooms, corridors, offices, etc. Other nonrated units should also be included, e.g., hospital units, infirmaries, segregation units, etc.

Column (2) — Rated capacity of ONE confinement unit — For each type of confinement unit, please enter the official capacity typically based on administrative policy, court order, legislative restriction, or set by State authorities. If the confinement unit is not included in the total rated capacity of this facility, enter the number of beds and mark the not rated box.

Column (3) — Floor space of ONE confinement unit — For each type of confinement unit, please enter the number of square feet of floor space based on the interior measures. The floor space of larger confinement units, such as dormitories, should be based on the interior measure of the unit excluding areas devoted to bathing, program space, recreation space, office space, etc. Exclude day rooms from floor space unless used to sleep inmates.

Column (4) — Number of confinement units — For each type of confinement unit, please enter the number of units. The figures entered in this column multiplied by the figures in column (2), rated capacity, should equal the total capacity for each type of confinement unit.

Column (5) — Average number of hours per day confined to unit — For each type of confinement unit, please enter the average number of hours per day that inmates are not allowed to leave their confinement units.

Column (6) — Confinement unit use — For each type of confinement unit, enter one of the following codes —

- 1 — General housing unit
- 2 — Protective custody unit
- 3 — Administrative segregation unit
- 4 — Disciplinary action unit
- 5 — Sick or injured inmate unit
- 6 — Work release
- 7, 8, 9, etc. — Other confinement unit uses (Define meanings in Notes section below)

In the case of units with more than one use, enter the purpose for which it was most recently used.

Column (7) — Security designation of confinement unit — For each type of confinement unit, enter one of the following codes —

- 1 — Maximum (close) security unit
- 2 — Medium security unit
- 3 — Minimum security unit

Column (8) — Number of inmates on June 30, 1984 — For each type of confinement unit, please enter the number of inmates on June 30, 1984. Inmates should be counted only once — where they spent the previous night, or where a bed is reserved for them in the case of temporary absences.

Item (9) — Total number of inmates on June 30, 1984 — Please add the entries in column (8) and enter here. This figure should be equal to the number in the official count given in section IIC. If not, please explain in the Notes section below (e.g., inmates are out to court or otherwise temporarily absent). Do not include inmates who are on escape or AWOL.
